APPLICATION FOR PERMIT

To appropriate Water within the State of South Dakota

(NOTE Draw a line through items not applicable)

- Name of Applicant Randall Community Water District
Postoffice address Lake Andes State South Dakota
If a corporation show date and place of incorporation NA (RCWD is a subdivision of the State of So. Dakota)
- Method of accomplishing work (contract, employment of others, or by direct labor) Contract
- Name of diversion work Randall Community Water District Diversion Facility
- Amount of water claimed (cubic feet per second) 9.26
- Source of water supply Missouri River
- Location of point of diversion 2960 feet south of and 720 feet west of the Northeast corner of Sec. 5, T95N, R65W; and also 1000 feet north of and 180 feet east of the Southwest corner of Sec. 31, T98N, R68W.
County Charles Mix

- Annual period or periods during which water is to be used Entire year
- Use to be made of water. (Irrigation, industrial, municipal, commercial, recreation, etc.) Rural & Suburban Water Supply System
- For irrigation use, Total number of acres to be irrigated NA

List below each forty acre subdivision, or lot, or fraction thereof and show number of acres to be irrigated in each.

Land Description	No. Acres Irr.	Land Description	No. Acres Irr.
NA		NA	
NA		NA	
NA		NA	
NA		NA	

Attach sheet if more space is needed

- Time required to complete construction of water supply system 5 years. Additional time required to complete application of water to the proposed beneficial use 4 years.
- Choice of newspaper for Notice of Intent to appropriate Water publication Lake Andes Wave
- Principal Features of the Proposed Water Supply System.

- Works proposed to divert water from its natural source. Two separate intake structures located at points indicated in six (6) above. Two 1½ million Gal/day treatment facilities located within three (3) miles of intake structures.
- Works proposed to transport water to place of use. High service pumps located in each treatment plant will be used to pump water to ground level storage reservoirs. Gravity dispersment from these tanks to points of use.
- Works proposed to apply water to beneficial use. Rural water pipeline system containing approximately 5,000,000 Lin. Ft. of pipe, ranging in size from 12" to 1½" in diameter. There are 1500+ rural resident users in the towns of Wagner, Armour, Greenwood, Marty, Geddes. Estimated Total Cost \$ 8,600,000

Attachments: Attach Form 2A if diversion from a well or dugout, or if storage of water, is proposed. Attach map.
(See instructions concerning preparation) NA

STATE OF SOUTH DAKOTA

WATER RIGHT APPLICATION APPROVAL

The Water Resources Commission hereby approves Water Right Application No. 2292-3
Randall Community Water District Lake Andes
 (Applicant) (Post Office Address)
South Dakota 57356 With the following modifications
 (State)

Date of first receipt of application MAY 14 19 75
 Date of return to applicant for correction, amendments or changes required — 19 —
 Date of receipt of corrected application — 19 —
 Approved JULY 24 19 75 Recorded in Book 14 Page 16

WATER RIGHT PERMIT NO. 2292-3

The Water Resources Commission hereby grants and issues this Water Right Permit No. 2292-3 authorizing the construction of the water use system and the putting of water to beneficial use as stated in the Application and as modified in the Water Right Application approval, subject, however, to the following limitations and conditions:

1. The date from which applicant may claim right is MAY 14 19 75
2. The equivalent of at least one-fifth of the work above specified is to be completed on or before JANUARY 24 19 78
3. The whole of said work is to be completed on or before JULY 24 19 80
4. The limit of time from proof of beneficial use of water appropriated in accordance herewith is JULY 24 19 84
5. The water appropriated shall be used for the purpose of COMMUNITY WATER SYSTEM
6. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have acquired a right to the use of water must not be injuriously affected by this appropriation.
7. The amount of the appropriation herein granted shall not exceed 9.26 cubic feet per second; neither shall it exceed the capacity of the above described water supply system, nor shall it exceed the amount of water needed for ~~beneficial use~~ USE OF community water system and if for the irrigation purpose, said appropriation must be limited to not more than ~~four cubic feet per acre per year and be limited to not more than one-seventh (1/7) of one cubic foot of water per second of time for each acre of land to which water is~~ actually and beneficially applied for irrigation on or before JULY 24 19 84; said water to be used during the following described annual period: CONTINUOUSLY

NOTICE OF PERMIT PENDING

The application of Randall Community Water District, Box 247, Lake Andes, South Dakota 57356 for approval of plans and issuance of a permit under authority of the Secretary of the Army is being considered by the District Engineer, U.S. Army Engineer District, Omaha, Nebraska.

The applicant requests permission to construct an intake structure for the purpose of securing water to distribute to approximately 500 rural and urban users for domestic purposes. Approximately 1,010 cubic yards of material will be excavated for the pipe trench utilizing a dragline with the excavated material stockpiled on shore and used for backfilling the trench once the pipes are in place. Approximately 37 cubic yards of sand bedding will be placed in the bottom of the pipe trench prior to laying the three 16-inch O.D. steel casing pipes. Approximately 24 cubic yards of concrete will be utilized to anchor the pipes in place. All excavated material in excess of that required for necessary backfill will be spread around the intake building area above ordinary high water, leveled, and landscaped.

The State of South Dakota has waived its right to certify compliance with applicable water quality standards required under the provisions of Section 401 of the Federal Water Pollution Control Act and Amendments of 1972. Accordingly, certification that the proposed project will not violate applicable water quality standards has been requested from the Regional Administrator, Environmental Protection Agency, Region VIII, Denver, Colorado.

Since the Farmer's Home Administration is the lead Federal agency for this proposed project, the environmental assessment prepared by this office, as required by Federal statute, has only assessed the impacts of the construction and operation of the intake structure and the Government land involved in the construction and maintenance of the pipe line. This assessment indicates that no significant adverse impacts on the human environment will occur.

In compliance with the National Environmental Policy Act of 1969 and Section 106 of the National Historic Preservation Act of 1966, the National Register of Historic Places and monthly supplements thereto have been consulted and no properties included therein will be affected by this activity. However, one site in the immediate vicinity, identified

by the State of South Dakota as Archeological Site 39CH12, may be affected by the proposed work. In addition, presently unknown archeological, scientific, prehistoric, or historic data may be lost or destroyed by work to be accomplished under the requested permit.

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity on the public interest. The decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered; among those are conservation, economics, aesthetics, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use classification, navigation, recreation, water supply, water quality, and in general the needs and welfare of the people. No permit will be granted unless its issuance is found to be in the public interest.

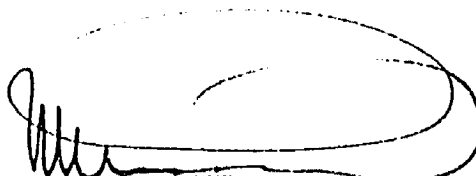

Any interested party (particularly officials of any town, city, county, state, federal agency, or local association whose interests may be affected by the proposed work) is invited to submit to this office written facts, arguments, or objections on or before 7 April 1976. Any agency or individual having an objection to the work should specifically identify it as an objection with clear and specific reasons.

A permit, if granted, will be under Section 10 of the River and Harbor Act of 1899 (30 Stat. 1151; 33 USC 403).

Drawings showing the location and extent of the work are attached to this notice.

NOTICE OF COMPLETION OF WORKS AND/OR APPLICATION OF WATER TO BENEFICIAL USE

Post Office _____

Date March 24, 1980

TO: **WATER RIGHTS COMMISSION**
State Office Building No. 2
Pierre, South Dakota 57501

Dear Sirs:

This is to inform you that I have completed the construction of the water diversion system and/or that I have put the water to beneficial use to the maximum extent it is going to be used, not exceeding the amounts as specified in Water Right Permit No. 2292-3.

Water Right Permit No. 2292-3 states that the diversion system is to be constructed by May 11, 19 80 and that the water is to be put to beneficial use by May 11, 19 84.

The diversion system was completed on April 1, 19 78. Applying the water to beneficial use was completed on April 1, 19 78.

You may schedule an inspection so that a Certificate of Construction and/or the Water License may be issued, thus completing my acquisition of a water right.

Thomas A. Thomas

In addition to our two water diversion points as shown in our Water Permit application, we buy up to 6,000,000 gallons of water a month from the city of Lake Andes for distribution to our customers in our Phase I area. As Lake Andes takes its water from Lake Francis Case, I thought this information should be included.

Permit No. 2292-3
Missouri River - Water District

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Division of Water Rights, DENR, Foss Bldg., Pierre, SD 57501

I have this day made a thorough examination of the water use system constructed by Randall Community Water District of Lake Andes, SD 57356 holder of Permit No. 2292-3, bearing the priority of May 14, 1975 authorizing the diversion of 9.26 cu. ft. of water per second from the Missouri River for rural & suburban water supply purposes, in Charles Mix & Douglas Counties.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

Motor: (all are submersibles)

Section 31 T98N-R68W diversion point

****NOTE:** This equipment is used to supply water for a rural water system. Water is pumped from the Missouri River into filtering plants where the water is purified and then delivered to customers through the distribution system.

The system is in the following condition Excellent. The points of diversion are located #1: 790 feet W and 165 feet S from the S1/4 corner of Section 5 T95N-R65W (NE1/4 SE1/4); #2: 2570 feet W and 265 feet N from the S1/4 corner of Section 31 T98N-R68W (SW1/4 SE1/4). The works are capable of diverting and conveying to the place of use 8.33 cu. ft. of water per second which is to be used for rural and suburban water supply. Water has been put to beneficial use to the maximum extent as follows:

supplying water to 1,500+ rural resident users and the towns of Wagner, Armour, Geddes, Greenwood, and Marty and the license should be issued for 8.33 cfs.

Applicable permit qualifications have been complied with: Yes ☒ No

Exceptions to compliance are: None
