WATER RIGHT APPLICATION APPROVAL

The Water Rights Commission hereby approves Water Right Application No. 2471.3
GEORGE WALTERS RTE #1, SIRON
 (Applicant) (Post Office Address)
SOUTH DAKOTA 57350 With the following modifications:
 (State)

The irrigation well approved under this Permit will be located near domestic wells and other irrigation wells which may obtain water from the same aquifer. The irrigation well owner, under this Permit, shall control his irrigation withdrawals so there is not a reduction of needed water supplies in existing domestic wells or in irrigation wells having prior water rights.

Date of first receipt of application DECEMBER 8 19 75
 Date of return to applicant for correction, amendments or changes required — 19 —
 Date of receipt of corrected application — 19 —
 Approved JANUARY 23 19 76 Recorded in Book 14 Page 228

WATER RIGHT PERMIT NO. 2471.3

The Water Rights Commission hereby grants and issues this Water Right Permit No. 2471.3 authorizing the construction of the water use system and the putting of water to beneficial use as stated in the Application and as modified in the Water Right Application approval, subject, however, to the following limitations and conditions:

1. The date from which applicant may claim right is DECEMBER 8 19 75
2. The equivalent of at least one-fifth of the work above specified is to be completed on or before JULY 23 19 78
3. The whole of said work is to be completed on or before JANUARY 23 19 81
4. The limit of time from proof of beneficial use of water appropriated in accordance herewith is JANUARY 23 19 83
5. The water appropriated shall be used for the purpose of IRRIGATION

6. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have acquired a right to the use of water must not be injuriously affected by this appropriation.

7. The amount of the appropriation herein granted shall not exceed 3.0 cubic feet per second; neither shall it exceed the capacity of the above described water supply system, nor shall it exceed the amount of water needed for beneficial uses served, and if for the irrigation purposes said appropriation must be limited to not more than 3 acre feet per acre per year and be limited to not more than one-seventieth (1/70) of one cubic foot of water per second of time for each acre of land to which water is actually and beneficially applied for irrigation on or before JANUARY 23 19 83; said water to be used during the following described annual period: APRIL THRU OCTOBER

Form 2A - Wells, Dugouts or Water Storage Dams (Supplement to form 2)

12. Principal Features of the Proposed Water Supply System (continued.)

D. Well Information or Estimates More information will be furnished later.

(1) Drill Hole, Diameter 30", Depth 68'

(2) Casing, Type Stainless steel, Diameter 20', Thickness 9 gage
(wood, concrete, steel, etc)

(3) Perforated Screen.

Type Stainless Steel, Diameter 20", Length 35'

(4) Gravel Pack, Thickness 5", Length of gravel pack 43'

E. Dugout Information or Estimates

(1) Surface dimensions _____, Depth _____

F. Fill out for Either a Well or a Dugout.

(1) Water Bearing Materials. (Please attach a copy to test well log if available.)

Character of Water bearing materials _____

Medium gravel to coarse gravel in deposit part

Depth to top of water bearing material 25'

Depth to bottom of water bearing material 68'

Thickness of water bearing material 43'

Depth to water (ground surface to water level) 15'

(2) Distance to nearest existing household or livestock watering wells.

On same owner's property 800 rds. On property owned by others 180 rds.

G. Water Storage Dams.

If the proposed water use system contains one or more water storage dams, please show in the space below, the height, maximum water depth, surface area and storage capacity of each storage dam. The location of each water storage dam should be shown on the water right map.

November 26, 1975

Mr. George Walters
R.R. #1
Huron, SD 57350

Dear Mr. Walters:

I am returning herewith the copy of the water analysis on sample #75-980 which was received here October 9. This copy is apparently one from the original which I sent you earlier. I am keeping a carbon of this analysis for our own use and you may keep both these copies if you wish.

We have now received the application materials for this plan and the soils information is also here. We will be sending a copy of this letter and the water analysis and the application materials on to the State Conservation Commission.

I am enclosing herewith a copy of extension circular 554 with the quality of this water plotted approximately by the red cross on the outside back cover in a nationally used water quality diagram. This water is very high in total salinity but relatively low in sodium content.

The significance of this is that the water will have a considerable tendency to increase the salinity in the soils on which it is used. Even if the soils are well drained, there will be a considerable shrinkage in the water volume as soon as evaporation begins and plant use begins after this water becomes part of the soil solution. Therefore, it is suitable only for use in a limited fashion and on soils that are well drained, or moderately well drained. This means that in your soils all of the areas marked Tetonka-Dudley would be absolutely unsuitable for irrigation and the Tetonka-Hoven which have depressional areas in them up in the northeast corner would also be unsuitable. If you do receive a permit to use this water, it should never be used more than twice a year and preferably only once, and it should never be used as I indicated above on any soils except that which is labeled Prosper-Moudek or Enet. If you irrigate, you should also be careful to irrigate in considerable quantities each time and occasionally you will have to irrigate very thoroughly in the late fall just before the soil freezes up in order that natural precipitation of the winter and spring will have a chance to cause some leaching and move the salts down and out of the root zone of crops. These hazards are very real with a water as salty as this and might cause this soil to become unproductive as soon as 10 years after the beginning of irrigation, especially if you use an application technique which puts on only an inch or two each time and if you irrigate moderately often, such as 3 or 4 times a growing season. The more often you irrigate and the less you put on each time, the worse will be this hazard.

Mr. Walters
November 26, 1975
Page 2

In spite of these hazards, I am forwarding the application to the State Conservation Commission for their final decision on a water use permit. The decision is made in conjunction with the State Water Commission. A copy of this letter, and a copy of the water analysis, plus all of the application materials including the soils information and the WI-1 form are being sent to the State Conservation Commission this date.

Sincerely yours,

L. O. Fine

SOILS MAP

SW¹/₄ & S¹/₂NW¹/₄ 16-112-61

- 12 A Enet loam, 0 to 2 percent slopes
These are well drained soils with 20-40 inches of loam over sand and gravel. Permeability is moderate in the loamy upper part and rapid in the sands and gravels. Clay loam glacial till is at depths below 40 inches in some places.
- 18 Tetonka-Hoven silt loams
This unit consists of poorly drained soils in enclosed depressions. Permeability is very slow and surface drainage is lacking. Dense compact subsoils and ponding generally limit these soils for irrigation. Drainage of these soils is desirable under irrigation.
- 29A Tetonka-Dudley silt loams, 0 to 2 percent
This unit consists of poorly drained soils in enclosed depressions and in swales. Permeability is very slow and surface drainage is very slow to lacking. Dense compact subsoils limit these soils for irrigation when not drained.
- 101A Prosper-Houdek loams, 0 to 2 percent slopes
This unit consists of deep well and moderately well drained loamy soils with calcareous substratums. The subsoils contain 30-35% clay. Depth to the calcareous clay loam substratum ranges from 18 to 30 inches. Permeability is moderately slow. Included within these areas are small enclosed depressions and small areas of soil with claypan subsoils which contain salts. Drainage or fill of these included areas may become desirable to prevent ponding and excessive wetness.

Route #3
Huron, South Dakota 57350

Dear Mr. Walters:

The inspection of your water use systems and inspection of the extent of your application of water to beneficial use, as developed under your Water Rights Nos. 2471-3, 4146-3, 4147-3 and 4546-3 has been completed. Your final water right documents, the Water License, can now be issued.

Statutes require that we charge a \$50.00 fee for each inspection and issuing of the Water Licenses (total of \$200.00 for the four). Upon receipt of the \$200.00 fee from you, your Water Licenses will be sent to you.

You will also receive the Certificates of Construction as required by statute.

Sincerely,

Maxine Stirling
Staff Assistant

MS/

NOTE: On form of payment, please include the number of the water permits. This insures proper handling of the fee.

Permit No. 2471-3Water Division 3 JAMES RIVER Water DistrictREPORT OF EXAMINATION OF WORKS
AND/OR APPLICATION OF WATER TO BENEFICIAL USE

TO: WATER RIGHTS, WATER MANAGEMENT BOARD / FOSS BLDG., PIERRE, SOUTH DAKOTA 57501

I have this day made a thorough examination of the water use system constructed by GEORGE
WALTERS of HURON holder
of Permit No. 2471-3, bearing date of priority of DECEMBER 8, 1975
authorizing the diversion of 3.0 cu. ft. per second of the waters of GROUNDWATER
for IRRIGATION purposes, in BEADLE County.

I have to report on the condition of the same as follows:

The Water Use System consists of,

A. Works used to divert the water:

65' DEEP WELL WITH 16" STAINLESS STEEL CASING - 15' SS SCREEN
NATIONAL PUMP CO 8" PUMP (NOTAG) POWERED BY
50HP US ELECTRIC MOTOR @ 1765 RPM

B. Works used to transport water to place of use,

1660' OF 8" BURIED PVC FROM WELL TO S PIVOT PAD
1250' OF 8" BURIED PVC FROM S PIVOT PAD TO N PIVOT PAD

C. Works used to apply water to beneficial use.

10 TOWER ZIMMATIC (SHORT SPAN) CENTER PIVOT (LOW PRESSURE)
WITH NELSON #100 END GUN

The system is in the following condition: GOOD

The point of diversion is located 200' N & 150' E OF THE SW CORNER,
SECTION 16, T112N, R61W

The works are capable of diverting and conveying to the place of use 1.33 (600 GPM)
cu. ft. per second of water which is to be used for IRRIGATION

Water has been put to beneficial use to the maximum extent as follows:

FOR IRRIGATING A 132 ACRE CIRCLE IN THE SW⁴, AND
A 70 ACRE 1/2 CIRCLE IN THE S²NW⁴, ALL IN
SECTION 16, T112N, R61W

comprising a total of 202 acres of land.

SECOND NOTICE

C2471-3
4146-3
4147-3
4546-3

George Walters
RR 3
Huron SD 57350

Dear Mr. Walter:

July 15, 1982 you were notified the required final inspection fee of \$50 each (total \$200) was due before Water License Nos. 2471-3, 4146-3, 4147-3 and 4546-3 can be issued. As of this date, the fee has not been received.

The fee is a final step in the legal process of obtaining and perfecting a water right and is required by SDCL 46-2-13(3). Upon receipt of the \$200 fee, your Water Licenses will be sent to you. You will also receive the Certificates of Construction as required by Statute. These are the final papers for the perfection of your Water Rights.

A perfected water right is similar to a property right and once a water right is perfected, it cannot be lost as long as the water is used. Failure to pay the fee means that the legal requirements to establish a water right have not been completed and a property right has not been established.

Please submit the required fee immediately to avoid jeopardizing your water permits or advise if you have any questions.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Division

4147-3

4546-3

NOTICE OF WATER LICENSE INSPECTION FEE REQUIREMENT AND OF INTENT TO ISSUE ORDER TO CEASE PUMPING

George Walters
RR #3
Huron SD 57350

Dear Mr. Walters:

July 15, 1982 and December 7, 1982 you were notified the required final inspection fee of \$200 is due before Water License Nos. 2471-3, 4146-3, 4147-3 and 4546-3 can be issued (\$50 for each License).

The fee is required by SDCL 46-2-13(3) and is a final step in the legal process of perfecting and thus assuring the continuance of your authority to use water for irrigation. As of this date, the fee has not been received.

The fee requirement is legally no different than any other condition of your permit. Failure to pay the \$200 fee within 30 days will result in an order to you, the permit owner, to cease the use of any water for the purposes authorized by your permit until the fee is paid. Failure to pay the fee can result in cancellation for nonuse of water in accordance with SDCL 46-5-37, the forfeiture statute.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Division

Dear Mr. Walters:

Enclosed herewith is, Water License No. 2471-3. This is the final water right document completing your process of obtaining a water right.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Division

NOTICE

Re: Violation of Water Permit No(s). 4546-3 and 1987 Irrigation Questionnaire Requirements

Our records indicate that the 1987 Irrigation Questionnaire has not been submitted for Permit No(s). 4546-3. The request for the questionnaire was dated October 8, 1987. The Water Management Board has directed that owners of water permits who have not submitted 1987 Irrigation Questionnaires be given notice of permit violation and of hearing(s) before the Board. The hearing(s) will be held to determine action to be taken by the Board for violation of Water Permit No(s). 4546-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will also be to determine if Permit No(s) 2471-3, 4146-3, 4147-3, 1170-3 should be amended with the qualification to require the Questionnaire to be submitted each year.

The hearing(s) will be at 9:00 am, March 2, 1988, in Room 216, Joe Foss Building, 523 E Capitol, Pierre, South Dakota.

The hearing(s) will be conducted pursuant to the provisions of SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11, and 46-2-17. These are contested case hearings pursuant to procedures contained in SDCL 1-26.

Following the hearing(s), the Water Management Board can:

1. Suspend Permit No(s). 4546-3 until either the 1987 Questionnaire is submitted or for the period of up to one year;
2. Amend Permit No(s) 2471-3, 4146-3, 4147-3, 1170-3 also held by GEORGE WALTERS to require the Irrigation Water Use Questionnaire to be submitted each year;
3. Postpone any action;
4. Take no action.

The hearing(s) is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

Sincerely,

A handwritten signature in cursive script, appearing to read "John Hatch".

John Hatch, Chief Engineer
Water Rights Division

Note: If the questionnaire(s) are received in this office before the March 2 hearing date, you will no longer be in violation of your permit(s) and your name will be deleted from the agenda pertaining to these hearings.

Dear Mr. Walters:

I am writing to acknowledge receipt of your 1987 Irrigation Questionnaire(s). A notice was sent to you January 29, 1988 regarding the requirement to submit the Irrigation Questionnaire(s) for Water Permit No. 1170-3, 2471-3, 4146-3, 4147-3 and 4546-3 and the hearing date before the Water Management Board.

Since your questionnaire was received prior to the March 2, 1988 Water Management Board Meeting, your name has been deleted from the Board Meeting agenda. If you have any questions, please contact us.

Very truly yours,

NOTICE OF TRANSFER OF OWNERSHIP

No. 477-3

To: Chief Engineer
Water Rights Division, DWR
523 East Capitol
Pierre, SD 57501-3181

Date: 2-24-92I, We request that Water Permit/Right No. 2471-3formerly owned by: George Walter, RR 1, Huron, SD 57350be transferred to: (name & address) Buell & Craig Slepikas, RR 2, Huron, SD 57350(telephone No.) 352-5451

Title to the following described land(s)/property has been transferred as described above:

SW 1/4, S 1/2 NW 1/4 Section 16, T112N, R61W

I, We understand that the validity of Water Permit/Right No. 2471-3 has not been determined by this transfer action. If I/We have any questions on validity, I/We understand that only the Water Management Board has the authority to determine if a water permit/right is valid (see note).

You are requested to file this "Notice of Transfer" in the appropriate file at the Division of Water Rights, as evidence of the change of ownership.

A fee of Two Dollars and Fifty Cents (\$2.50) is attached to cover the filing fees as required under SDCL 46-2-13.

STATE OF SOUTH DAKOTA)

County of Beadle)

I, Craig A. Slepikas being first duly sworn on my oath depose and say that my relation to the above described undertaking is that of Owner, that I have read the above foregoing statement, and that I know of my own personal knowledge that the information herein stated is true.

Craig A. Slepikas
(Signed)

Subscribed and sworn to before me this 24th day of February, 1992.

Robert E. Danzger
(Notary Public)
Commission Expires 5/17/99

NOTE: Water permits may be cancelled for nonconstruction within the five year construction period. Once a water permit is developed and the water used, the permit becomes a water right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.
