SOIL MAP

SOIL LEGEND

- 18 Tetonka-Hoven silt loams
This unit consists of poorly drained soils in enclosed depressions. Permeability is very slow and surface drainage is lacking. Dense compact subsoils and ponding generally limit these soils for irrigation. Drainage of these soils is desirable under irrigation.
- 29A Tetonka-Dudley silt loams, 0 to 2 percent slopes
This unit consists of poorly drained soils in enclosed depressions and in swales. Permeability is very slow and surface drainage is very slow to lacking. Dense compact subsoils limit these soils for irrigation when not drained.
- 38 Elsmere loamy sand, 0 to 3 percent slopes
This unit consists of deep, sandy, somewhat poorly drained soils. They have a seasonally high water table. Permeability is rapid. Calcareous clay loam material is at depths below 40 inches.
- 52A Carthage fine sandy loam, 0 to 3 percent slopes
This unit consists of moderately well drained soils on nearly level to gently undulating uplands. The soils have sandy loam surfaces and subsoils which grade to clay loam till at 20 to 40 inch depths. Permeability is moderately rapid in the sandy loam upper part and moderate in the underlying clay loam materials. Surface runoff is medium.
- 101A Koudek-Prosper loams, 0 to 2 percent slopes
This unit consists of deep well and moderately well drained loamy soils with calcareous substrata. The subsoils contain 30-35% clay. Depth to the calcareous clay loam substratum ranges from 18 to 30 inches. Permeability is moderately slow. Included within these areas are small enclosed depressions and small areas of soil with claypan subsoils which contain salts. Drainage or fill of these included areas may become desirable to prevent ponding and excessive wetness.

102B Houdek-Prosper loams, 2 to 6 percent slopes

The Houdek and Prosper soils are described in the 101A mapping unit above. This unit differs primarily in the degree of slope.

Dear Mr. DeVries:

I am enclosing herewith the original copy of the report of analysis on water sample #76-724 from your #2 well in the west half of section 26-110-61.

I am also enclosing a copy of our AES publication #13. In the chart on the outside back cover of this pamphlet, I have plotted the approximate quality of this water for irrigation uses by means of the red cross. As you see, it is in the high salinity, low sodium class.

Accordingly, it is only fair water for irrigation purposes, primarily because of the high total salt load it carries. The water is high enough in salts so that it has approximately 1.4 tons of salt for each acre foot of water you add. That is, over each acre that you irrigate, assuming you add 12 inches of water in a year, you will have added about 1.4 tons of total salt of all kinds.

The soils which you propose to irrigate are only moderately well suited for irrigation. All of the areas in the soil map designated by #18 will give you real serious trouble with the miring and traffic problems with a center pivot system. The one area of Tetonka-Hoven in the southeastern corner of the quarter is perhaps the most objectionable of all. Furthermore, soil areas 29A, the Dudley-Tetonka, and 102B have drawbacks for irrigation. In some cases, there are claypans present, other cases there are claypans plus salt. Thus, water penetration and water movement will not be good in any of these areas. The small depressional areas in the major part of the land can give serious traffic problems with center pivot systems when they become thoroughly soaked up. Therefore, I would recommend that you either drain those by surface drains ahead of time or else move enough soil into these depressional areas to reduce the ponding of water that will result when you start to irrigate. Any ponding of water will raise the water table eventually and bring salts which are presently in the subsoil up to the surface and interfere seriously with crop growth.

This is not an easy development to make. You will have considerable soil problems as indicated above, and the water will not be of very good quality. Therefore, I recommend that you undertake this venture with full knowledge that you may have to conduct leaching operations and you may have to defer irrigation for a year or two occasionally so that natural rainfall can restore productivity by leaching of salts which will sometimes occur as a result of irrigating these soils with moderately poor water.

Dear Sir:

The Water Rights Commission will be meeting in Huron, November 16, 17 and 18, 1976. Wednesday afternoon, November 17, at 3:15 p.m., a discussion on Beadle County Water Supplies is scheduled. Part of the discussion will be in regard to 40 deferred Water Right applications in Beadle County. Since your application is one of those in deferred status, you may wish to attend this meeting.

We would also like to know your answer to the following two questions:

1. Would you develop your application during 1977 if approved or would you wait two or three years before development?
2. Would you be interested in a temporary trial permit with no pumping during July and August? If the results of the trial pumping were successful, the Commission maybe able to approve a permanent full-time permit after a one to two year trial period.

FROM: Garland Erbele, Chief Engineer

SUBJECT: Amendment to Water Right Nos. 2547-3, 2548-3 and 3085-3

Pursuant to the provisions of the notice dated January 19, 2001, and following the hearing March 7, 2001, the Water Management Board has amended Water Right Nos. 2547-3, 2548-3 and 3085-3 to add the following qualification:

"This water right is subject to the Irrigation Water Use Questionnaire being submitted each year."

This action was taken for failure to return the 2000 irrigation questionnaire. The addition of this qualification to your Water Rights means that failure to submit the required irrigation questionnaire in the future could result in suspension of the water rights with no use of water for up to one year for the first violation.

Effective April 1, 2017, Water Right Nos. 2547-3, 2548-3, 3085-3, 6381-3 and 6440-3 be suspended for the 2017 irrigation season for failure to submit the 2016 irrigation questionnaires.

If the 2016 irrigation questionnaires are received prior to April 1, 2017, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2017 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2017 unless the 2016 irrigation questionnaire is submitted by April 1st.

After April 1st, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2016 irrigation questionnaire and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 10-11, 2017, in Pierre, SD. The letter should include your reasons for not completing the 2016 irrigation questionnaire. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION OF WATER RIGHTS

TO: Gene DeVries, 40535 213th St, Cavour SD 57324

Water Rights Program 

SUBJECT: One Year Suspension of Water Right Nos. 2547-3, 2548-3, 3085-3, 6381-3
& 6440-3

On March 6, 2019, the Water Management Board ordered:

Effective April 6, 2019, Water Right Nos. 2547-3, 2548-3, 3085-3, 6381-3 & 6440-3 be suspended for the 2019 irrigation season for failure to submit the 2018 irrigation questionnaires.

If the 2018 irrigation questionnaires are received prior to April 6, 2019, the suspensions will not take effect.

Suspension of a water right means water may not be pumped during the 2019 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2019 unless the 2018 irrigation questionnaires are submitted by April 6th.

After April 6th, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2018 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 8-9, 2019, in Pierre, SD. The letter should include your reasons for not completing the 2018 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Dear Mr. De Vries:

Just a note to remind you that before we can schedule a hearing for the suspended water rights held by Gene De Vries or De Vries Inc., we still need the 2018 irrigation questionnaires and a written request from you to be placed on the agenda for the Water Management Board meeting July 17th.

I have tried calling and have been unable to get through to you. Please send in the questionnaires and something in writing for the agenda and I can get the issue scheduled. Everything needs to be in to us no later than July 8th.

If you have questions, please give me a call.

Dear Water Usage Board,

We are writing this letter in regards to the water permits that are in Gene DeVries's name. At the present time, they are suspended. We have had permits since 1976. This is the first occurrence of having our permits suspended in 43 years.

The circumstances surrounding the suspension of these permits are; dad's (Gene DeVries) health and the subsequent re-routing of the mail. In November, my dad had several blood clots in his lungs that led to several mini heart attacks. We found him in his house in a comatose state of mind (nearly dead) and brought him back and called the ambulance. He was in the Huron hospital for 1 week then went on to stay in Avera Sioux Falls for 3 ½ weeks.

After his release, he moved to Sunquest Health Village, an assisted living center in Huron, SD. Therefore, his mail was re-routed to Sunquest and ended up delayed by several weeks. My sister was also taking care of the mail and when this letter did come through, she didn't realize that this was something that needed a reply.

In closing, we would very much appreciate your consideration of our dilemma with the Irrigation questionnaires.

Sincerely,

Jeff DeVries
