Dear Mr. Wipf:

Your water sample (Lab. No. 76-1515) has been analyzed and the results are reported on the accompanying sheet, which is your copy to keep.

I am also enclosing a copy of AES pamphlet #13 for your use. The quality of your water for irrigation use is plotted approximately by means of the red cross in the chart on the outside back cover.

Your water, as indicated by this analysis, is satisfactory for use on the soils you indicate will be irrigated. If a salt problem or a water table problem should develop, contact extension personnel for assistance.

The WI-1, soils information, and a copy of the water analysis are being forwarded to the State Conservation Commission for their action.

Sincerely yours,

REPORT ON
ROLLAND COLONY
WATER RIGHT APPLICATION NO. 3218-3 & NO. 3219-3

The Water Rights Commission deferred action at the January 26-27, 1977, meeting on the Rolland Colony Water Right Applications No. 3218-3 and No. 3219-3 pending Staff investigation. Also at that time two other permits within the immediate area were deferred and subsequently after a field investigation one of these applications was issued at the February meeting. Action was not taken on the Rolland Colony applications at that time because of failure to produce drillers logs of test holes. Drillers logs were made available to the Staff in time for the May meeting but the Staff was unable to notify the protestors in time so the application was not considered at the May meeting.

PROPOSED PROJECT

Application No. 3218-3 proposes the use of 4.0 cfs of water from two 50 feet deep wells to irrigate 284 acres in the E $\frac{1}{2}$ Section 17, T110N, R48W and Application No. 3219-3 proposes the use of 4.4 cfs of water from one 52 feet deep well to irrigate 308 acres in the W $\frac{1}{2}$ of Section 10, T110N, R48W. (See map for diversion points.)

OBJECTIONS

Two petitions—one containing 27, the other 22 signatures against No. 3218-2 and No. 3219-3 respectively were received by the Commission at the January meeting. The protestors were concerned that ground water in the area would be depleted and/or polluted.

PERSONS CONTACTED

Numerous persons were contacted including protestors, irrigators, applicants and others. Some of those contacted were Sam Wipf, Joe Henman, Melvin Knutson, Mrs. Verlyn Hill, Maxine and Gordon McKeown, Clarence Hanson and William Landsman.

DISCUSSION

Examination of the test hole logs indicates good potential well locations in the NE $\frac{1}{4}$, Section 17, T110N, R48W and in the NW $\frac{1}{4}$ Section 9, T110N, R48W (log copies included). From a tele-

Report on Application No. 3218-3 & No. 3 0-3 continued

phone conversation with Sam Wipf it was learned that at least 12 test holes were dug altogether with another location showing potential in the SW $\frac{1}{4}$ of Section 10, T110N, R48W. After looking at these logs and the records of the observation wells ST-6 and ST-5 and talking to area residents it appears that the aquifer is limited to the area along Deer Creek and in fact the aquifer boundaries can nearly be traced from the topography. Since the Colony wells are scheduled to be located near the edge of the aquifer, the wells may not yield large volumes of water for long periods of time, this means the location of the irrigation wells should be as far from the aquifer boundary as possible.

Since the ground water in the area is under water table conditions, it is doubtful nearby domestic wells would be affected by irrigation pumping. If adequate domestic wells were to be affected to the point that sufficient water was not being supplied, then the domestic wells must be protected in accordance with the domestic well statutory preference requirements.

RECOMMENDATION

At this time, the Staff believes there is unappropriated water available and the approval of these applications with the following qualification is recommended.

"The irrigation wells approved under this permit will be located near domestic wells and other irrigation wells which may obtain water from the same aquifer. The irrigation well owner, under this permit, shall control his irrigation withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in irrigation wells having prior water rights."

Dear Mr. Wipf:

Enclosed are your 2003 irrigation questionnaires for Water Right Nos. 3218-3 and 4859-3. I received one of them on November 4th and the second one was missing from the correspondence.

In order for them to be considered complete, you will need to fill them out with any irrigation information you have for the 2003 crop season. They are due back in our office by **December 1, 2003.**

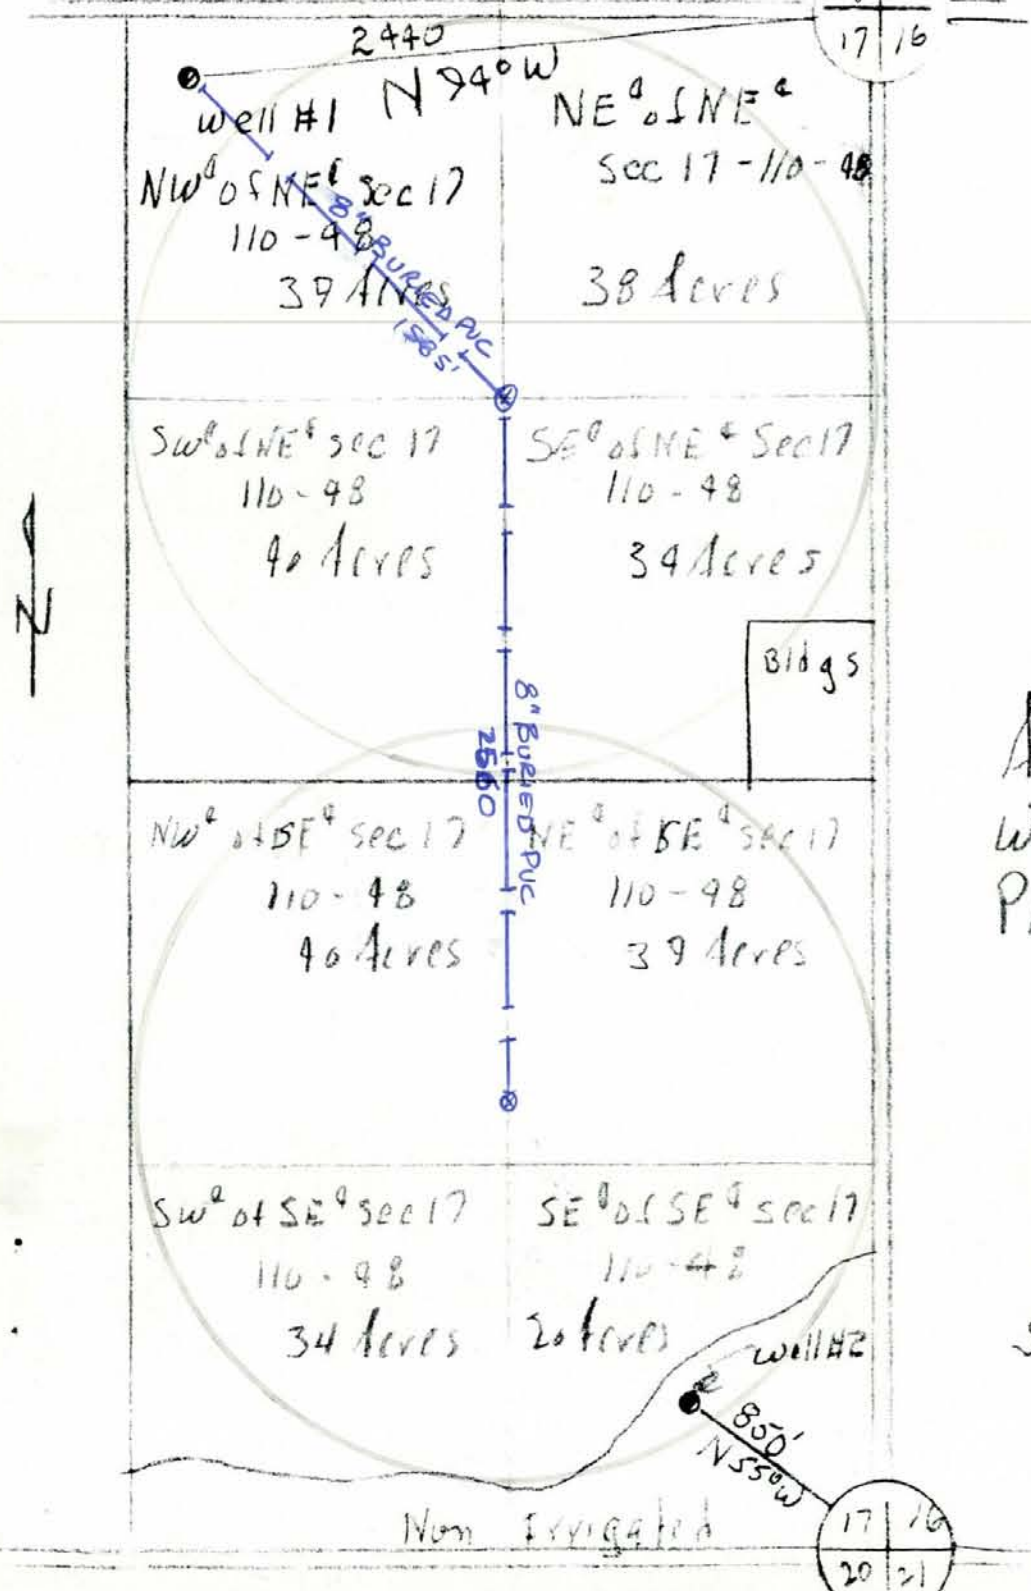

Please write in the acres, pump rate, days per month and average hours per day in the months that water was applied. We use the information to calculate how much water was used from a specific source.

The legal descriptions of the water rights are included on each questionnaire. If you have any questions, please get in touch with me.

Sincerely,

The Water Management Board has directed that owners of water permits who have not submitted the 2016 Irrigation Questionnaires be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine if Permit No(s) 3218-3 & 3452-3 should be amended to require the Questionnaire to be submitted each year and to determine action to be taken for violation of Water Permit No(s) 4859-3 & 8017-3 qualification:
