RE: Water Rights for Huron Colony

Dear Mr. Friedrichsen:

I am writing regarding Huron Colony's water permit application for irrigation from the James River and their intention to amend Water Right No. 3268-3 which utilizes a well to irrigate new acres. I contacted you to clarify exactly what is being proposed.

Based on our phone conversation, Huron Colony proposes to irrigate lands from the James River which are currently authorized for irrigation from a well authorized by Water Right No. 3268-3. This land will no longer be irrigated from the well. Huron Colony then intends to transfer Water Right No. 3268-3 to new acres. An application to amend Water Right No. 3268-3 will need to be submitted in order to transfer these acres. Enclosed is an application form and instruction sheet. The filing fee to amend a water right is \$100.

South Dakota Codified Law 46-5-34 provides a process by which water rights may be severed from one parcel and simultaneously transferred to other lands. The application to amend will need to include the reason for the transfer. Specifically, the law allows the transfer only if it becomes impracticable to use all or any part of the water beneficially or economically for irrigation of any land to which the right of its use is appurtenant. Enclosed is a copy of the applicable law for your review.

The Water Rights Program will begin processing Huron Colony's application to appropriate water from the James River. Huron Colony will need to know that James River water rights are subject to shut-off orders during low flow conditions and the application, if approved, will have a junior priority date.

If I have misunderstood Huron Colony's intentions or if you have any questions on the application process, please contact Eric Gronlund or me.

Sincerely,

Karen Schlaak

RE: Amendment to Existing Water Right #3268-3
Huron Colony
Beadle County, SD

Dear Karen:

Please find enclosed an Application to Amend an Existing Water Right at the above referenced location.

The existing well covered by this permit is currently used to supply an irrigation pivot in the NE 1/4 of section 24, T113N R62W. The owner views it as more economically beneficial to supply this pivot from the nearby James River rather than incur the expense of pumping water from the current source. An application has been made for this intent.

Concurrently, the owner wishes to use the existing well covered under #3268-3 to irrigate lands located in the NW 1/4 of section 19, T113N R61W. Since these lands are located in the same quarter section as the well, the owner considers this to be a more economical use of the water from this permit.

The enclosed application, map, and fee are intended for this purpose. Please call me if there are any questions, or if additional information is required.

Sincerely,

Brian Friedrichsen, PE

REPORT ON WATER PERMIT APPLICATION NO. 3268A-3
For Huron Colony
June 1, 2004

Application No. 3268A-3 requests to amend Water Right No. 3268-3 by transferring the irrigated acreage to other lands. Water Right No. 3268-3 appropriates 1.56 cfs from one well located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of section 19, T113N R61W to irrigate 113 acres located in the NE $\frac{1}{4}$ section 24, T113N R62W. This application proposes to move the center pivot approximately $\frac{1}{4}$ mile to the east to irrigate 113 acres in the NW $\frac{1}{4}$ of section 19, T113N R61W. The water source for this irrigation system is the Tulare East James aquifer and no increase in the diversion rate or number of acres irrigated is authorized by this application.

AQUIFER – TULARE EAST JAMES (T-EJ)

The Tulare East James aquifer has been declared fully appropriated based upon use by the Water Management Board. The aquifer is under water table conditions in this area and ground water movement is towards the James River (Hedges, 1982). The aquifer underlies 23,200 acres and contains an estimated 132,000 acre-feet of recoverable water in storage in Beadle County (Hedges, 1982). The aquifer extends into Spink County to the north where it is much larger. There is a review of this information, see Report on Water Permit Application No. 6431-3 for Philip Hines (Goodman, 2003).

However, this application does not request a new appropriation only a transfer of authority. The original water right No. 3268-3 has been in use and is apparently still a valid water right. The only question remaining is will this transfer create any potential for interference. Since, the well will not be moved and only the irrigated acreage the potential for interference should not be changed.

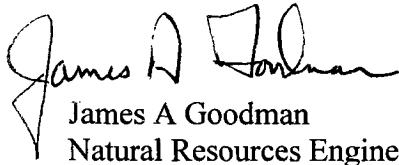

The Water Rights Program monitors an observation well BD-77I located about two miles northeast of this application. Water levels for this well show good response to climatic conditions, that is, rising water levels during wet years (recharge) and gradually declining water levels during dry years. The effects of pumping are not obvious and show that drawdown is not significant (Water Rights, 2004). A hydrograph for this observation well is included with this report.

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are no other nearby existing water permits/right that obtain water from the Tulare East James aquifer. There is a disputed water permit application No. 6431-3 (located about $\frac{1}{2}$ mile northwest of this application. This water permit was denied by the Water Management Board and is presently in litigation. This fact should not matter to this application.

CONCLUSIONS

1. The source of water for this application is the Tulare East James aquifer.
2. This application is simply a transfer of authority for irrigation authorized by Water Right No. 3268-3 across the road to a new site. No increase in the amount of water or a change in the diversion point location is authorized by this application.
3. Approval of this application will not increase the potential for well interference.
4. This is an existing well and has been in use for many years. Very little is known about the actual construction of the well.

Water Right No. 3268-3 appropriates 1.56 cubic feet of water per second (cfs) from one well located in the NW 1/4 NW 1/4 Section 19-T113N-R61W to irrigate 113 acres located in the NE 1/4 Section 24-T113N-R62W. This application proposes to move the center pivot approximately 1/4 mile to the east to irrigate 110 acres located in the NW 1/4 Section 19-T113N-R61W. The water source for this irrigation system is the Tulare-East James Aquifer and no increase in the diversion rate or number of acres irrigated is authorized by this application.

State Law (SDCL 46-5-34) allows an irrigation water right to be severed from one parcel of land and simultaneously transferred to another parcel if it becomes impracticable to use all or any part of the water beneficially or economically for irrigation on current land. Mr. Waldner indicates that since the existing well is located in the NW 1/4 Section 19, the most economical use of water would be irrigating land located nearest to the well.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 3268A-3 because 1) existing rights will not be unlawfully impaired, 2) it is a beneficial use of water, and 3) it is in the public interest. The approval of Application No. 3268A-3 is contingent on approval of Application No. 6505-3 (see below). If Application No. 6505-3 is contested, this application will also be delayed to allow a Board hearing.

Application No. 6505-3 proposes to appropriate 1.56 cubic feet of water from the James River

In accordance with SDCL 46-2A-23, the Chief Engineer will act on the applications, as recommended, unless a petition is filed opposing the applications or the applicant files a petition contesting the Chief Engineer's recommendations. If

a petition opposing the applications or contesting the recommendations is filed, then a hearing will be scheduled and the Water Management Board will

Dear Mr. Waldner:

Enclosed is Water Permit No. 3268A-3 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

Form 10, *Notice of Completion of Works and Application of Water to Beneficial Use*, is enclosed. Please return this completed form after you have finished the system and have put the water to beneficial use. An investigation can then be scheduled so the water license may be issued, thus completing the acquisition of a water right.

An informational sheet *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Garland Erbele, Chief Engineer

SUBJECT: One Year Suspension of Water Permit/Right Nos. 2390A-3, 3268A-3, 4400A-3, 5651-3, 6431-3, 7365-3, 7366-3, 7367-3, 7370-3, 7395-3, 7905-3, 7906-3, 7369A-3, 7369B-3, 7369C-3, 7906A-3

On March 2, 2022, the Water Management Board ordered:

Effective April 4, 2022, Water Permit/Right Nos. 2390A-3, 3268A-3, 4400A-3, 5651-3, 6431-3, 7365-3, 7366-3, 7367-3, 7370-3, 7395-3, 7905-3, 7906-3, 7369A-3, 7369B-3, 7369C-3, 7906A-3 be suspended for the 2022 irrigation season for failure to submit the 2021 irrigation questionnaires.

If the 2021 irrigation questionnaires are received prior to April 4, 2022, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2022 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2022 unless the 2021 irrigation questionnaires are submitted by April 4, 2022.

After April 4th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2021 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 4-5, 2022, in Pierre, SD. The letter should include your reasons for not completing the 2021 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.
