Dear Mr. Goetz:

Thank you for contacting me concerning your Water Right No. 3564-3. During our phone conversation you inquired how long it would take to lose your water right if you did not irrigate. My understanding of your situation is that the west pivot in Section 26 and the NW¼ Section 25 (a side roll system) are enrolled in the CRP program through 1999; and the east pivot in Section 26 is not currently irrigated.

Under South Dakota water law, unless legal excuse exists, you need to irrigate at least once every three years to maintain your water right. Legal excuse as defined in Water Management Board Rules includes, but is not limited to, the following: 1) unavailability of water to satisfy a permit or right; 2) legal proceedings which prevent the use of water; or 3) water use under existing climatic conditions would result in a waste of water.

An exception to this rule would be found in SDCR 46-5-37.2. This law basically says that if the water was applied to beneficial use for irrigation prior to participation in the federal program and if the water source is not fully appropriated, the placement of land in the program does not constitute forfeiture of the water right. I have enclosed a copy of the law for your review.

You indicated the land had been irrigated about 15 years prior to enrolling it in the CRP program. If this is the case, that portion of the water right can not be considered abandoned or forfeited. I hope I have answered your questions concerning Water Right No. 3564-3. If you still have some concerns after reviewing the enclosed copy of water laws dealing with abandonment, forfeiture and the exceptions, please give me a call.

RE: status of water right

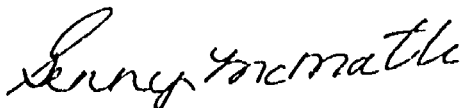

COMMENTS:

Mr. Goetz called to ask if his water right was still in good standing. I discussed with him the rules dealing with use of water, abandonment and/or forfeiture and legal excuse.

He indicated that he had irrigated his land until 1989. In 1989 he entered the land in the CRP program through 1999. He said he did not irrigate in 2000 or 2001 because the land was in grass and didn't need the additional moisture.

He was afraid of losing his water right if he didn't irrigate. I explained that in looking at the information in the file and knowing that his land was in CRP for those years, it does not appear that the water right has been abandoned or forfeited. He would, however need to irrigate soon or risk forfeiting the water right. He said if it remains dry, he would be irrigating unless he was allowed to put the land back into CRP.

He would like something in writing sent to him regarding what we spoke about. I told him that for some reason, I still had him down as being in CRP so that would explain why he did not get an irrigation questionnaire from our office for the past two years. I told him that with the information he gave me, I could complete a form for him for the past two years. I told him the 2002 forms would be mailed out in October and he could keep us updated through the questionnaires on when he irrigated.

Dear Mr. Goetz:

I am writing in follow-up to our phone conversation and your inquiry concerning the status of your water right.

Your water right authorizes irrigation of 286 acres in the E ½ NW ¼ & NE ¼ Section 26 and the NW ¼ Section 25, T121N, R78W. The irrigation system was inspected and a water license issued in 1981 for the extent of development. You indicated you irrigated up until 1989 when the land was placed in the Conservation Reserve Program. My understanding is that the land was in CRP through 1999 and then was planted to grass and no irrigation was necessary.

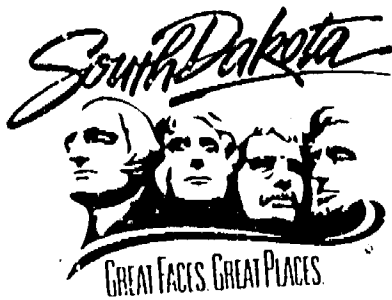

I found a letter in your file dated 1997 concerning legal excuse for non-use of water and dealt with the CRP land (see enclosed copy). The letter also discusses portions of land that were not enrolled in CRP.

The Water Management Board is the entity responsible for determining if a water right is valid or if it has been abandoned or forfeited due to non-use. In reviewing the water right file, with the exception of a portion of the land in Section 26 not previously enrolled in CRP, the remaining portion of the water right would not be considered abandoned or forfeited and therefore still active.

As long as the water right is not lost due to non-use of water without legal excuse, you have a continuing right to the use of the water. I hope I have answered your questions. Thank you again for your inquiry.

Akaska, SD 57420

Dear Mr. Goetz:

I am writing in follow-up to our July 2nd phone conversation concerning your use of water as authorized by Water Right No. 3564-3.

Your concern is whether or not you will lose your water right if you do not irrigate this year. Your water right allows you to irrigate using water from the Missouri River. You indicated that the pump site is out of water causing you to have to switch power types in order to divert any water. You felt it was too late in the summer to justify the change.

From the information you have given me, it would appear that the water right (with the exception of the portion of land in Section 26 not previously enrolled in CRP), has been maintained. However, as I indicated in my letter to you dated June 19th, the Water Management Board is the entity responsible for determining if a water right is valid or if it has been abandoned or forfeited due to non-use.

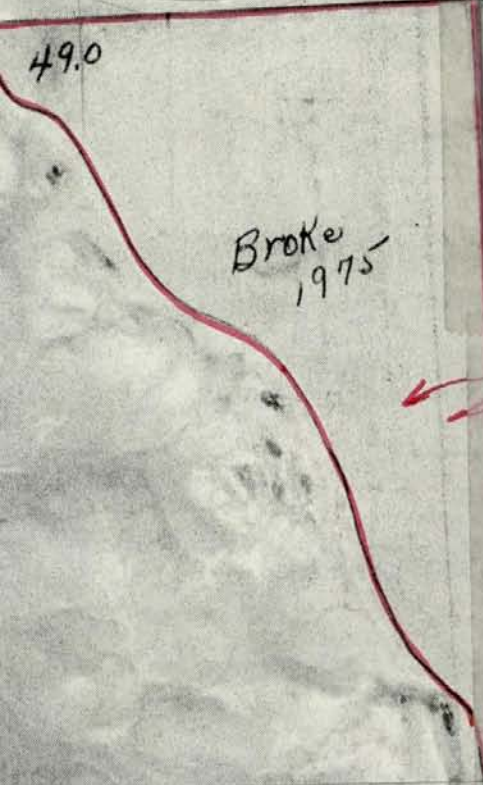

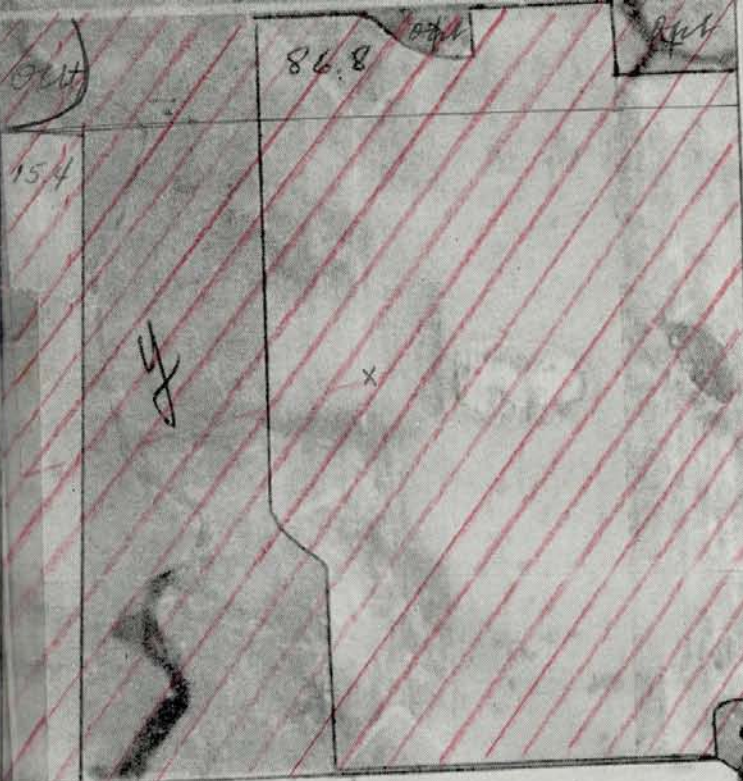

I can tell you what the law says by explaining legal excuse and the laws dealing with abandonment and/or forfeiture, but I am not authorized to make determinations on validity of a water right. If there is still a question in your mind as to whether or not the water right has been maintained, you may want to file a declaratory ruling request and have the Board make a determination.

As long as the water right is not lost due to non-use of water without legal excuse, you have a continuing right to the use of the water.

Sincerely,

Genny McMath

Dear Mr. Goetz:

I am writing in followup to your 2010 irrigation questionnaire. I note on the form that you indicated you have abandoned the use.

Typically when an irrigator reports they have abandoned the use of irrigation, the water right is scheduled for cancellation consideration. In your case, I wanted to write and ask you if that was truly your intent.

Your water right authorizes irrigation of land in portions of Section 25 and 26, T121N, R78W. Information we have in the file shows that the land in Section 25 is in CRP thru either 2015 or 2016. With respect to the land in Section 26, most years you have indicated that you have either had sufficient moisture and did not need to irrigate or the river level was too low and you could not get to water. All of these reasons are either in statute or Water Management Board rules as legal reasons for non-use of water and do not subject a water right to cancellation.

If you have made the decision to abandon the use of water for irrigation purposes and no longer wish to maintain the water right, we can begin the cancellation process. I imagine getting the annual irrigation questionnaire each year when you are not irrigating is frustrating as well but it does have a purpose and is one of the tools we use for managing the water resources of the state. Please let us know what your intent is towards the water right. If you wish to hold on to it until the land in Section 25 comes out of CRP to make a final decision, let me know.

Sincerely,
