Dear Mr. & Mrs. Jenter:

SDCL 46-1-14 authorizes the Water Rights Commission to issue amended permits recognizing the date of priority of the original application if certain conditions are met.

At the May 24, 1979 Commission Meeting, the Commission reviewed the amended Permits that had been issued with the later priority, and granted the earlier priority date to such amended permits.

By this action, the priority date for your Permit No. 3737-3 was established as September 16, 1976 instead of March 10, 1977 as now shows on your copy of the Permit.

If you have questions regarding this action, feel free to contact this office.

Dear Mr. Jenter:

Enclosed is your 1989 irrigation questionnaire. More specific information needs to be included on the form. Please fill in the following information:

- 1) Number of days pumped in each month
- 2) Average number of days pumped in each month
- 3) Average pump rate (gallons per minute)

On the questionnaire you inquired as to what the statement "Has your system been constructed" referred too. If your well has been drilled, pipeline installed and the water use system (center pivot, for example) hooked up, your system has been constructed. Many permit holders have not yet installed their irrigation system. By having irrigators specify whether or not they have completed their irrigation system and are irrigating, we are able to determine how much water is actually being used vs. how much water is appropriated on "paper" only.

Please complete the questionnaire and return it to us before December 15, 1989. If you have any questions, or need assistance in completing the form, please contact me.

Re: Aquifer management unit redesignation for selected water rights/permits on Clay and Turner Counties

COMMENTS:

Review of a request to change diversion point for Water Permit No. 8790-3, authorized to withdraw water from the Upper Vermillion Missouri: South aquifer (UVM:S), determined the well they wished to use is authorized under authorized by Water Right No. 7384-3 Water Right No. 7384-3 does not currently have a management unit designated for withdrawal from the Upper Vermillion Missouri aquifer (Water Rights, 2025). In reviewing the best information currently available for aquifer and management unit naming conventions, the best aquifer and management unit designation for Water Right No. 7384-3 is the Southern management unit of the Upper Vermillion Missouri aquifer (UVM:S) as shown in Figure 1. Furthermore, there are an additional 25 other water rights/permits, see Table 1, which should have the UVM:S management unit assigned (Water Rights, 2025).

This addition of the management unit designation, to the Southern management unit of the Upper Vermillion Missouri aquifer, does not represent a physical change in the water source. It is an update to the naming convention to reflect the currently best available information for aquifer and management unit extents. This update to the aquifer management unit name does not authorize any increase in the amount of water appropriated by any of these water rights/permits, change in diversion rate, relocation of existing wells, completion of additional wells into the aquifer, or change of acres permitted for irrigation. Going forward, issuance of any pertinent documents will reflect the updated aquifer and management unit designation.
