Mr. William Rumbolz

Dear Mr. Rumbolz:

This letter is in reference to a well which you have located in the NE $\frac{1}{4}$ Sec. 30-T111N-R60W and a center pivot located in the SE $\frac{1}{4}$ Sec. 19-T111N-R60W. As you know, you do not have a water right for this irrigation project. Since your existing Water Right No. 1479-3 does not cover this new project, without a valid Water Right, you are faced with the possibility of not being able to irrigate this land.

It is our suggestions that you attempt to get this matter straightened out as soon as possible. We are enclosing the necessary application forms including the forms necessary to submit a water sample to the Water Quality Laboratory in Brookings.

Even with submission of the forms, there is no assurance you can obtain a permit. A water sample for chemical analysis must be satisfactory. We also have some concern with ground water levels in your area.

Please advise if you have any questions on this matter.

Very truly yours,

John Hatch, Chief Engineer

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, June 14, 1995, made a thorough examination of the water use system constructed by Billy Rumbolz of RR 2, Ethan, SD 57334 holder of Permit No. 3788-3, bearing the priority of March 9, 1977 authorizing the diversion of 1.50 cu. ft. of water per second from ground water for irrigation purposes, in Davison County.

On October 18, 1983, Water Permit No. 3788-3 was transferred to Lyle Rumbolz, 5565 North Federal #16, Denver, Colorado 80221.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

A 60 HP Lincol AC motor with a 600 GPM National Pump.

B. Works used to transport water to place of use:

1300 feet of 8" Aluminum .

C. Works used to apply water to beneficial use:

An 8 tower Renke center pivot rated at 600 GPM.

The system is in the following condition good. The point of diversion is located 1300 feet S and 1380 feet W from the NE corner of Section 30; T101N R60W (NW1/4 NE1/4). The works are capable of diverting and conveying to the place of use 1.33 cu. ft. of water per second which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

T101N R60W	SECTION 30	NW1/4 NE1/4	32.5 acres
		NE1/4 NE1/4	32.5 acres
		SW1/4 NE1/4	32.5 acres
		SE1/4 NE1/4	22.5 acres

comprising a total of 120 acres of land and the license should be issued for 1.33 cfs.

Applicable permit qualifications have been complied with: Yes ☒ No

NOTE: All correspondence should be sent to Billy Rumbolz, Ethan, SD. The well for this water permit is also used to irrigate Section 19; T101N R60W. The pivot is towed across the road to irrigate 130 acres in Section 19. Mr. Rumbolz does not want the permits incorporated. The pipeline that runs across Section 30 to get water to Section 19 is 10" Aluminum which is on the ground surface. It meets with 10" buried PVC which runs to the pivot center in Section 30.

Exceptions to compliance are: None Date Report Completed: February 16, 1996

Ethan, SD 57334

Dear Mr. Rumbolz:

On April 9, 1996, you were notified the final inspection fee of \$50.00 per license (\$100.00 total) is due before Water License Nos. 3788-3 and 3789-3 can be issued. As of this date, the fee has not been received.

The fee is a final step in the legal process of obtaining and perfecting a water right and is required by SDCL 46-2-13(3). Upon receipt of the \$50.00 fee per license (\$100.00 total), your Water Licenses will be sent to you. This is the final document for the perfection of your Water Rights. A perfected water right is similar to a property right and once a water right is perfected, it cannot be lost as long as the water is used.

Please remit fee to:

Dear Mr. Rumbolz:

Enclosed are Water License Nos. 3788-3 and 3789-3. These are the final water right documents completing the process of obtaining a Water Right. Enclosed are Receipt Nos. 415062 and 415063 in the amount of \$50.00 each which you paid for the investigation and issuance of the Water Licenses.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right Nos. 3788-3 and 3789-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water Licenses, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

RE: Correspondence for No. 3788-3

COMMENTS:

Sylvia Rumbolz called regarding Water Right Nos. 3788-3 and 3789-3. Ms. Rumbolz was upset that they had not been informed that the well located on their property in the NE¼ section 30-T101N-R60W was also used to irrigate the property in the SE¼ section 19-T101N-R60W owned by Biliy Rumbolz. Mr. Rumbolz leases the property in the NE¼ section 30 from Lyle and Sylvia Rumbolz.

I informed Sylvia Rumbolz that the original water right permit applications specified that a common well was to be used for all of the irrigated acreage. Ms. Rumbolz also questioned why all the correspondence regarding their water right (No. 3788-3) was being directed to their renter. I told her we were instructed to do so by the renter but we could easily change that. Ms. Rumbolz then directed me to send all correspondence to Lyle and Sylvia Rumbolz. Ms. Rumbolz also requested a copy of both water right applications showing that the same diversion point was described on both. I said I would send the copies.

Dear Mr. & Mrs. Rumbolz:

Enclosed is your "2001 Irrigation Questionnaire". In order for us to calculate how much water was used during this past crop season, the back side of the form needs to be completed.

Please write in the information for each month on the crop type, number of acres irrigated, pump rate in gallons per minute, days per month and average hour per day. Once we have that information, we can calculate the acre feet of water used.

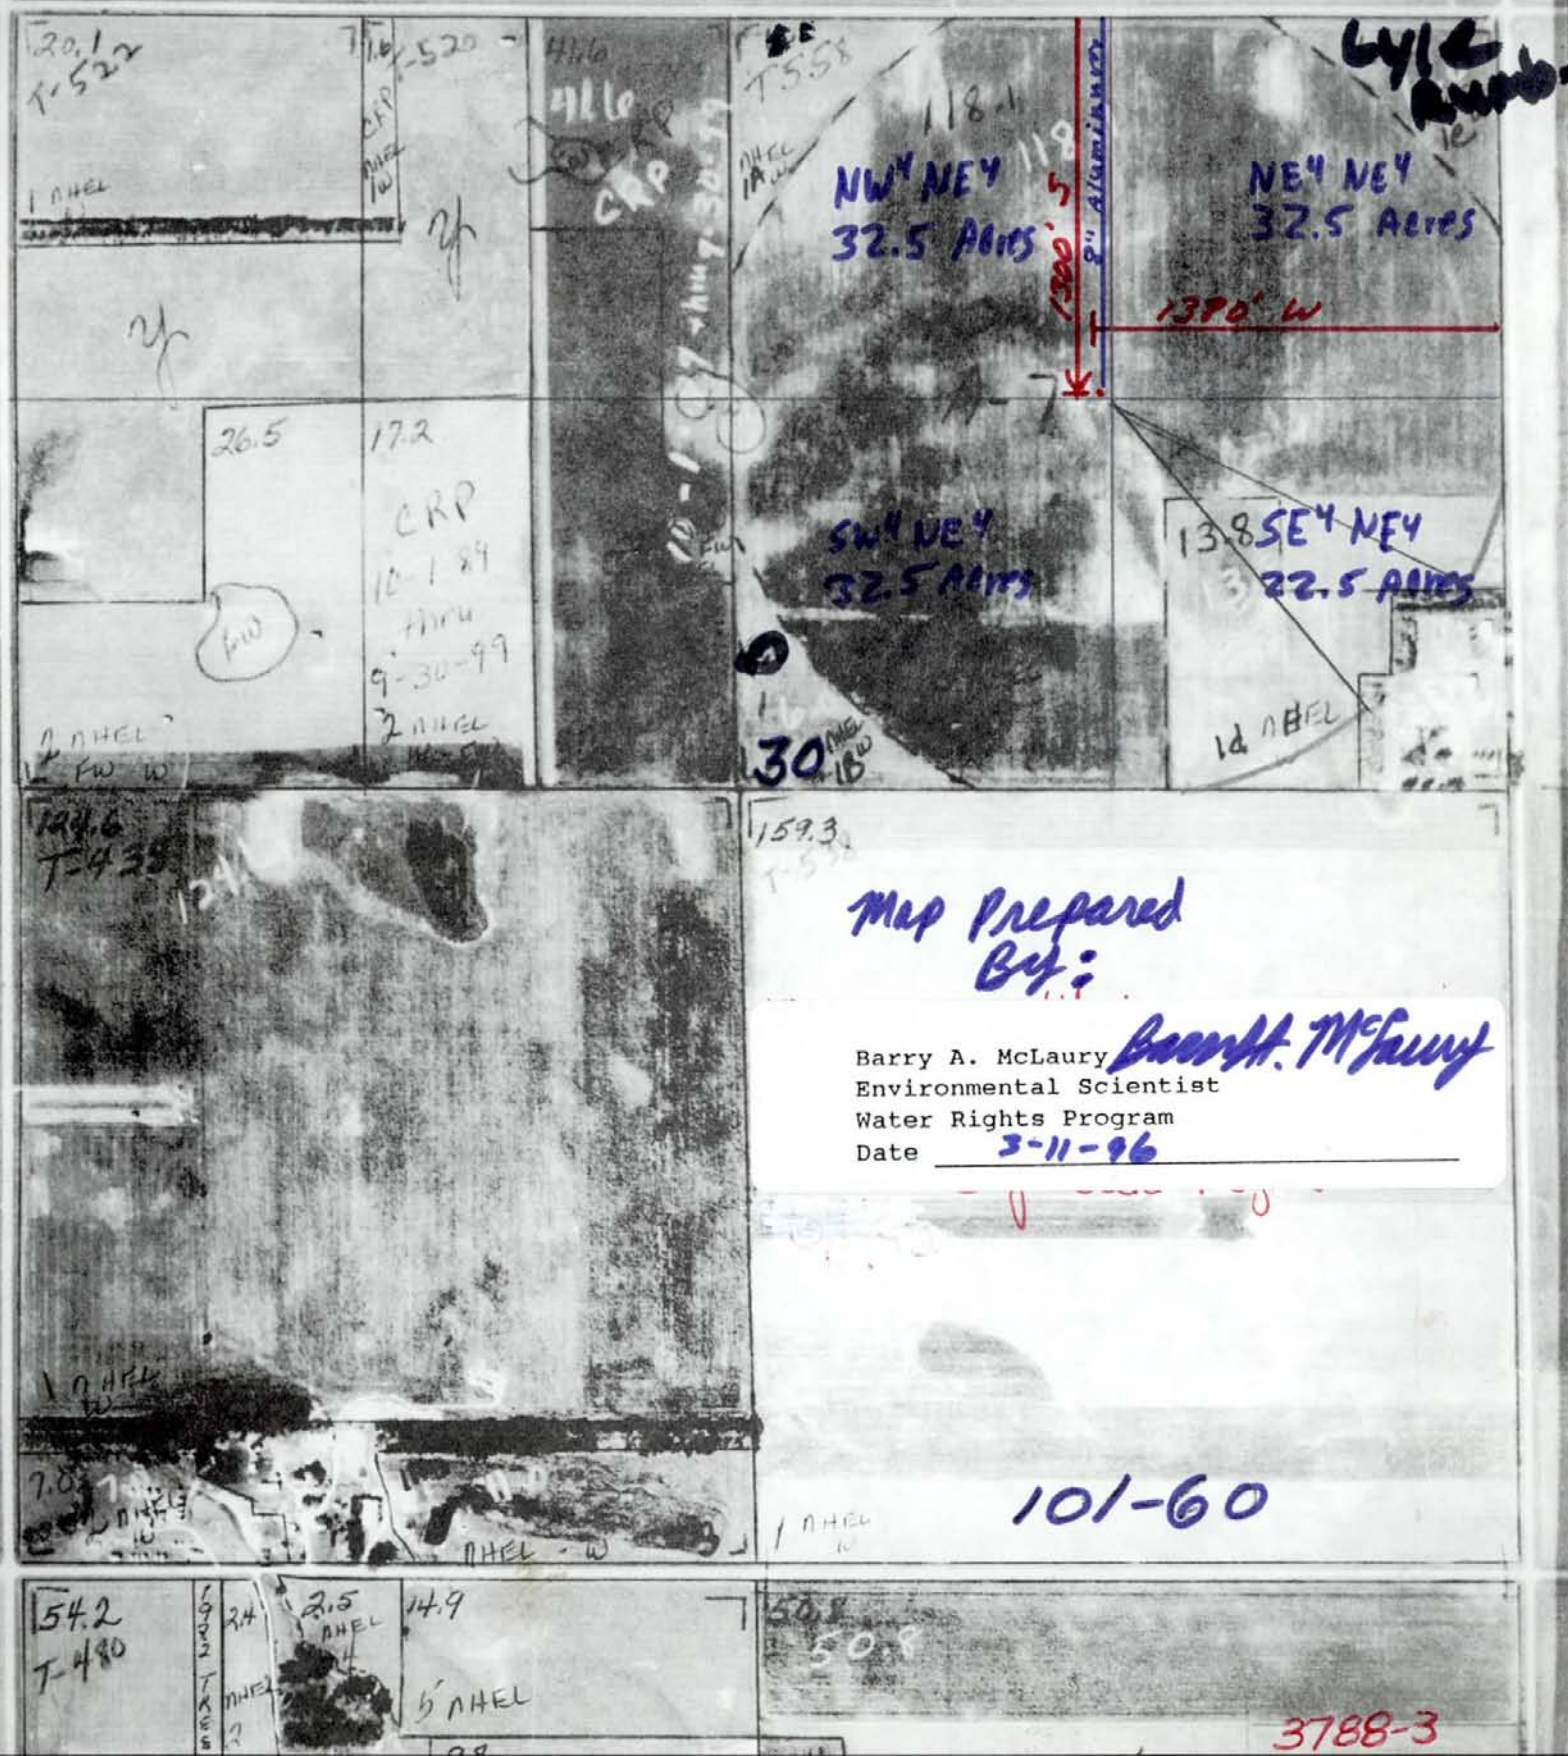

I am enclosing a postage paid envelope for your reply. Thank you in advance for your help.

Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 3788-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised.
