MY COMMISSION
 EXPIRES NOV. 4, 1984

WATER RIGHT APPLICATION APPROVAL

The Water Rights Commission hereby approves Water Right Application No. 3790-3
DORIS M. NENABER = Nenaber Bros. Rt 2, Box 114, ILLINOIS
 (Applicant) (Robert A or Brian E) (Post Office Address)
SOUTH DAKOTA 57353 With the following modifications:
 (State)

The irrigation well approved under this Permit will be located near domestic wells and other irrigation wells which may obtain water from the same aquifer. The irrigation well owner, under this Permit, shall control his irrigation withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in irrigation wells having prior water rights.

THE APPLICABLE PORTIONS OF PERMIT NO 3079-3 HAVE BEEN INCORPORATED INTO THIS PERMIT AND PERMIT NO 3079-3 HAS BEEN CANCELLED.

Date of first receipt of application MARCH 10 19 77
 Date of return to applicant for correction, amendments or changes required MARCH 10 19 77
 Date of receipt of corrected application MAY 9 19 77
 Approved MAY 25 19 77, Recorded in Book 18 Page 202

WATER RIGHT PERMIT NO. 3790-3

The Water Rights Commission hereby grants and issues this Water Right Permit No. 3790-3 authorizing the construction of the water use system and the putting of water to beneficial use as stated in the Application and as modified in the Water Right Application approval, subject, however, to the following limitations and conditions:

1. The date from which applicant may claim right is 1.85 FROM JULY 23, 1976
1.35 FROM MARCH 10, 1977
2. The equivalent of at least one-fifth of the work above specified is to be completed on or before NOVEMBER 25, 1979
3. The whole of said work is to be completed on or before MAY 25, 1982
4. The limit of time from proof of beneficial use of water appropriated in accordance herewith is MAY 25, 1984
5. The water appropriated shall be used for the purpose of IRRIGATION
6. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have acquired a right to the use of water must not be injuriously affected by this appropriation.
7. The amount of the appropriation herein granted shall not exceed 2.2 cubic feet per second; neither shall it exceed the capacity of the above described water supply system, nor shall it exceed the amount of water needed for beneficial uses served, and if for the irrigation purposes said appropriation must be limited to not more than 3 acre feet per acre per year and be limited to not more than one-seventieth (1/70) of one cubic foot of water per second of time for each acre of land to which water is applied, and beneficially applied for irrigation on or before MAY 25, 1984 said water to be used during the following described annual period: MARCH - NOVEMBER

SOILS MAP

NE¹/₄-32-110-59

SOIL LEGEND

- 4C** Houdek-Ethan loams, 6 to 9 percent slopes
This unit consists of deep well drained loamy soils with calcareous substratums. Permeability is moderately slow. The subsoils contain 30-35% clay. Most of the slopes in these areas are less than 8%.
- 12A** Enet loam, 0 to 2 percent slopes
These are well drained soils with 20 to 40 inches of loam over sand and gravel. Permeability is moderate in the loamy upper part and rapid in the sands and gravels. Clay loam glacial till is at depths below 40 inches in some places.
- 44** Durrstein silt loam, 0 to 2 percent slopes
Wetness, high salt content and slow permeability make these soils unsuitable for irrigation.
- 50** Bon loam, channeled
The unit consists of deep moderately well and well drained loamy soils on nearly level surfaces. These soils are occasionally flooded. The physical properties of these soils make them generally well suited for irrigation.
- 101A** Houdek-Prosper loams, 0 to 2 percent slopes
This unit consists of deep well and moderately well drained loamy soils with calcareous substratums. The subsoils contain 30-35% clay. Depth to the calcareous clay loam substratum ranges from 18 to 30 inches. Permeability is moderately slow. Included within these areas are small enclosed depressions and small areas of soil with claypan subsoils which contain salts. Drainage or fill of these included areas may become desirable to prevent ponding and excessive wetness.
- 102B** Houdek-Prosper loams, 2 to 6 percent slopes
The Houdek and Prosper soils are described in the 101A mapping unit. The unit differs primarily in the degree of slope.

NOTICE OF COMPLETION OF WORKS AND/OR
APPLICATION OF WATER TO BENEFICIAL USE

Post Office Treasure

Date July 30, 1977

TO: Water Rights Commission
Joe Foss Building
Pierre, South Dakota 57501

Dear Sirs:

This is to inform you that I have completed the construction of the water diversion system and/or that I have put the water to beneficial use to the maximum extent it is going to be used, not exceeding the amounts as specified in Water Right Permit No. 3790-3.

Water Right Permit No. 3790-3 states that the diversion system is to be constructed by May 25, 1982 and that the water is to be put ☒ beneficial use by May 25, 1984.

The diversion system was completed on 15 May, 1977.
Applying the water to beneficial use was completed on 14 June, 1977.

You may schedule an inspection so that the Certificate of Construction and/or the Water License may be issued, thus completing my acquisition of a water right.

Gentlemen:

Enclosed herewith are, Water License No. 4652-3 and Certificate of Construction.

Water License No. 4652-3 is the final water right document completing your process of obtaining a water right.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water.

Very truly yours,

John Hatch
