Remarks by State Water Resources Commission: City water supplies shortages from this aquifer in the past are considered due to improper spacing of wells. Considering their capacity, spacing of wells proposed in applications 375-3, 396-2 and 397-3 is considered adequate but the minimum that should be allowed, ^{need is not} while not expected, the City shall, and City officials have agreed, pay special attention to domestic water supplies near the City well field, including these three new wells, and shall settle with each domestic well owner any adverse effects upon such domestic water supplies. *JS*

RE: Water Right Nos. 299-3, 395-3, 396-3, 1347-3, 5710-3, 7361-3, 7362-3 & 7363-3

Dear Mr. Anderson:

Enclosed are Water License Nos. 7361-3, 7362-3, 7363-3 and Reissued Water License No. 1347-3. They are the final water right documents completing the process of obtaining Water Rights. Included with the licenses for Nos. 7361-3, 7362-3 and 7363-3 are maps prepared by the staff engineer who conducted the field investigation.

Upon licensing, the applicable portions of Water Right Nos. 299-3, 395-3 and 396-3 were incorporated into Nos. 7361-3, 7362-3 and 7363-3 in their entirety. Portions of Nos. 1347-3 and 5710-3 were also incorporated into the licenses.

With respect to Water Right No. 5710-3, three of the wells are no longer in use and have been plugged. Our intent is to schedule that portion of the water right for cancellation consideration. Once the Board takes action, the water license will be reissued to reflect the remaining wells and associated diversion authority.

For your information SDCL 46-6-27 requires that if in the future, the owner of an existing well constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. As long as you use the water beneficially, as stated in the Water Licenses, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer
