Dear Mr. Druin:

In reviewing your file with the Division of Water Rights, a discrepancy has been found between the acreage permitted on your Water Rights Permit and that with Soil and Water Compatibility Approval.

By State Law, Soil and Water Compatibility approval is required prior to the issuing of a Water Right. However, the soil map, which was submitted to our office, along with your WI-1 form (Soil and Water Compatibility Permit) does include the correct legal description; therefore we are amending your permit to include these additional acres. (please see attached permit)

If you have any questions or feel this amendment is in error, please feel free to contact this office.

Sincerely,

Jim Stukel

Dear Mr. Druin:

Enclosed is Water License No. 5524-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 412931 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5524-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.
