Dear Mr. Oberle:

I am contacting you in reference to the municipal wells used for the City of Bristol. In July, 1984 the Office of Drinking Water within our Department, notified us that the city was going to drill a new well. Application forms were sent to you to apply for a water permit for the new well. To date nothing has been received from you.

June 10, 1986, records with the Office of Drinking Water reflect the City has two wells, one drilled in 1946 and one drilled in 1981. Vested Right No. 4320-3 recognized two wells, one drilled in 1936 and one in 1949.

If the well drilled in 1981 was a replacement well, a water permit is not required.

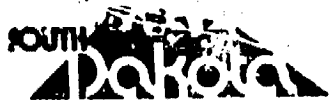

Please contact our office as to the status of the City's wells. Is the 1981 well new or a replacement? If it is a replacement well, a well log of the well should be filed with our office.

We would appreciate hearing from you on this matter as soon as possible.

Dear Mr. Oberle:

I am contacting you in regard to the municipal wells used for the City of Bristol. In June, 1986 I wrote to you requesting information on the city's wells. To date, nothing has been received from you.

Vested Right No. 4320-3, held by the City of Bristol, recognizes two wells, one drilled in 1936 and one drilled in 1949. The well drilled in 1981 is not covered by a water permit.

My question to you in my last letter was whether or not the well drilled in 1981 was a replacement well or a new well. If it was a replacement well, and one of the other wells was abandoned, a new permit would not be necessary.

I urge that you contact our office concerning this matter. It is very important to keep your water right files up-to-date.

Dear Mr. Oberle:

I am contacting you in regard to the municipal wells used by the City of Bristol. In June, 1986 and July 27, 1987, I wrote to you requesting information about the well drilled in 1981. To date, no reply has been received from you.

As stated in previous letters, the City holds Vested Water Right Claim No. 4320-3 which recognizes two wells. The wells were drilled in 1936 and 1949. Is the well drilled in 1981 an additional well or a replacement well?

If the well is a replacement well, we will need to know the location of the well and which well (the 1936 or 1949 well) it replaces. If the well is an additional well, please complete the enclosed application forms according to the instruction sheet and return them to our office.

If you are not aware of the status of the city's wells, please send me the name of the person(s) I can contact concerning this matter.

Dear Mr. Oberle:

Thank you for your telephone call of August 23, 1989. During our conversation, you indicated the following:

1. The well drilled in 1981 replaces Well #2;
2. The replacement well is 300 feet west of Well #2;
3. Well #1 is located in Block 8 and Well #2 (replacement well) is located on railroad property (both in SE 1/4 Section 25, T122N, R57W);
4. The City is now using WEB water, however are maintaining their existing wells as standby wells.

Since the 1981 well was drilled as a replacement well, a new water permit will not be needed. The above information will be placed with Vested Water Right Claim No. 4320-3. If you have any questions, or feel I did not interpret the above information correctly, please contact me.
