Dear Mr. Broer:

On November 3, 1978, I stopped at your place to make the final inspection on your Water Right Permit No. 2501-3. During the inspection, it was found that you were irrigating 160 acres in the SW $\frac{1}{4}$ Section 5, T109N, R62W whereas your permit only allows for 140 acres in this quarter section. You also are pumping 3.0 cfs whereas your permit is limited to 2.0 cfs. I have discussed this matter with Burton Jones, Water Rights Specialist on our staff, and he said it will be necessary that you apply for the additional 20 acres and 1.0 cfs of water in order to comply with the South Dakota Water laws. The law states that all land irrigated should be covered under a Water Rights Permit and also the amount diverted should be included in a permit.

Enclosed are completed copies of Form 2 "Application for Permit to Appropriate Water". We would like you to check them over and make the necessary corrections, sign, have notarized, and return to this office with a check for \$150.00 to cover the cost of the filing fees. It will not be necessary to send in a map as we can use the map sent in for Permit No. 2501-3. Enclosed is an overlay map to show the area irrigated as I found it during the inspection.

If you have any questions regarding the matter, please feel free to contact this office.

Mr. George G. Hoer
Luron, St. 57151

Dear Mr. Hoer:

The water sample received here from your well has been analyzed. You designated it as your #1 well in the southeast quarter, section 25-109-62.

The analysis report is enclosed for your use and information. I am also enclosing a copy of extension circular 1-7 which explains some of the difficulties that may be encountered in the use of low quality or marginal waters on questionable soil. Both of these situations exist in many places in Leadle County. However, most of the soils in the area which you intend to irrigate (southeast quarter 26 and southeast quarter 25) are fairly well suited to irrigation. The bottom and lower silt loams in the northwestern part or southeast quarter of 26 and the silty Stickney soils through the eastern edge of southeast quarter of 26 are the poorest soils in the whole half-section. They could be irrigated, however, if certain management techniques are observed. The main rule is this water as infrequently as possible, and by this I mean no more than 1 or possibly 4 times in any one year's season, and when you do irrigate you should do a thorough job of replenishing the soil moisture throughout the depths of the soil profile. This may mean that you use as much as 5 or 6 inches in certain irrigation operations. If you observe these above principles and also occasionally do a thorough job of irrigating just before freeze-up in the fall, you will probably be able to salvage the salt carried in this irrigation water with satisfactory performance of crops for many years. However, frequent, light irrigations and heavy irrigating in the late fall to cause leaching will certainly lead to problems within 10 or 12 years, perhaps sooner.

I am sending your application materials and a copy of this report and of the water analysis to the State Conservation Commission for their action.

Sincerely yours,

Dear Mr. Broer:

The inspection of your water use system as developed under Water Permit Nos. 2501-3, 3076-3 and 4348-3 was completed February 25, 1987. In reviewing the permits prior to issuing a license, I found the lands you are irrigating in Section 36, T109N, R62W do not have soil/water approval from the well in Section 25, T109N, R62W.

Enclosed is a partially completed soil/water compatibility application (WI-1) and instruction sheet. Please read over the instruction sheet make any necessary corrections and complete the application accordingly. A water sample will need to be obtained from the well in Section 25. The instruction sheet shows the sampling procedures and gives the address for sending the WI-1 and water sample.

Once the soil/water application is approved by the Conservation Commission, your water license can be issued. Your three permits, 2501-3, 3076-3 and 4348-3 will be incorporated together and a water license issued under No. 4348-3. A \$50.00 fee will be required before the license can be issued. I will wait to bill you for this fee until after we receive the soil/water compatibility approval.

If you have any questions or need assistance with the enclosed application, you may contact the Division of Conservation directly, at the Anderson Building, Pierre, SD 57501 (605 773-3259), Attention, Jim Stukel.

REQUIREMENTS:

The area of (Cf) Teton-Hoven Salt Loam, and (Hv) Hoven salt loam, are pot hole soils which are subject to wetness, ponding and salt accumulations. These areas shall be maintained in permanent vegetation or drained.

The area of (Sh) Shue foamy fine sand, is somewhat poorly drained and has a perched water table. Under irrigation the water table may be raised and inhibit the necessary leaching of salts. For this reason internal drainage will be provided as necessary i.e. tile drainage.

MANAGEMENT RECOMMENDATIONS:

We recommend the use of a form of conservation tillage to conserve soil moisture and help reduce soil erosion.

We also recommend that due to the wide range of soil textures that a water management plan be developed to best address the crops and salt leaching needs.

The hearing will be held at 8:45 am, April 6, 1994, at the Golden Hills Resort, 900 Miners Ave, Lead, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to SDCL 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 4348-3 in accordance with applicable provisions of SDCL 46-1-12;

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is(are) received in this office on/or before April 1, 1994, you will no longer be in violation of your permit and your name will be deleted from the Board agenda.
