RE: Center Pivot coverage
COMMENTS:

Called Mr. Goodfellow to check area his
pivot covered cause of trees in SE corner.
He said the trees were removed to allow the
center pivot to go by. He said the pivot does
go from fence to fence for whatever that covers.

In NW corner the slough there is under water
now, so this year he didn't run the pivot all
the way through but got to that point and ran it
the other way. Usually he goes right through that
spot when it isn't ^{too} wet.

File in Permit or other file as necessary. Use to document conversations and
what the other party was told; why action or decision was made.

Dear Mr. Goodfellow:

On October 6, 1988, the Water Management Board adopted rules to implement a 1988 law for application of chemicals through irrigation systems. The rules establish equipment standards, performance standards and installation requirements for irrigation systems that apply chemicals (fertilizers, insecticides, or herbicides) with irrigation water.

You have indicated on your 1988 Water Management Board Irrigation Questionnaire that you do apply chemicals with irrigation water. A copy of the new rules for chemigation are enclosed for your information.

The new standards include:

- * a check valve between the irrigation pump and the point of chemical injection;
- * a vacuum relief valve on top of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a low-pressure drain on the bottom of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a chemical injection line check valve between the chemical injection pump and the point at which the chemical is injected into the irrigation line; a second check valve is required if the chemical injection pump is not a positive displacement pump;
- * an interlock system which ensures that the chemical injection pump will stop whenever the irrigation pump stops;
- * an inspection port between the irrigation pump and the check valve on the irrigation line;

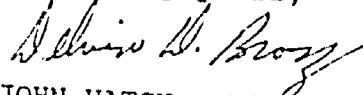

Each of these equipment requirements are discussed more thoroughly in Sections 74:02:09:05 through 74:02:09:10 of the enclosed rules. Appendix A contains diagrams of the arrangements of these anti-pollution devices.

The equipment must be installed according to the manufacturer's specifications, calibrated, and maintained in good working condition. All chemical product labels must be followed and warning signs must be posted. These rules also require reporting of all spills, accidents, and system malfunctions. A 24-hour telephone number is provided.

The chemigation rules contain notification and record keeping requirements. Prior to using chemigation, notification must be given to the Chief Engineer on the enclosed Form 1C. Information that must be provided in this notification includes the water permit or right number, the name, address, and telephone number of the water permit or right holder and of the system operator, and the legal description of the lands on which the system is located. A record of the name, quantity, dates and hours of each chemical applied must be provided to the Chief Engineer on Form 2C. A copy of this form is also enclosed for your information. It will be mailed with the annual irrigation questionnaire and must be returned with the questionnaire by the date specified. If you have any questions regarding these rules or need additional copies of the forms, please contact Susan Bowar, Water Rights Engineer (605-773-3352).

Very truly yours,

JOHN HATCH, Chief Engineer

RE: Failure to Report Chemical Use under Water Permit No(s) 4632-3

The first notice to file chemigation report(s) for Permit No(s) 4632-3 was dated 10/24/96. Our records indicate that we have not received the 1996 chemigation report for Permits No(s) 4632-3. The Water Management Board has directed that owners of water permits who have not submitted the 1996 chemigation report(s) be given notice of violation and hearing before the board. The hearing held by the board is to determine what action is to be taken concerning violation of Administrative Rule 74:02:09:02(3). This rule requires chemigation users to report the type of chemical applied, the dates, hours and amount of chemical applied.

The hearing will be held at 2:30 PM on March 5, 1997, in the Floyd Matthew Training Center, Joe Foss Building, 523 East Capitol, Pierre, SD and will be conducted pursuant to SDCL 34A-2A through 34A-2A-5; 46-1-12, 46-1-14, 46-2-11, 46-2-17. These are contested case hearings pursuant to chapter 1-26. According to SDCL 46-1-12, the board may suspend a permit for a period of up to one year for the first violation or up to three years for the second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s). 4632-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the chemigation report(s) is(are) received by this office on/or before February 28, 1997 your name will be deleted from the board agenda.

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 East Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

Dear Sir:

I am writing to acknowledge receipt of your 2000 irrigation questionnaire. You may disregard the January 19, 2001, "Notice" concerning reporting requirements for Water Right No. 4632-3. The information was received in our office prior to the Water Management Board meeting and your name has been deleted from the agenda.

I noticed on the questionnaire that you made a notation to change the address label to Goodfellow Farms. Do you wish to have the ownership of the water right transferred to Goodfellow Farms? Currently it is listed in the name of Gordon Goodfellow.

If you would like the actual name on the water right to be changed, a "Notice of Transfer of Ownership" will need to be filed. If you are merely wanting correspondence to be directed to Goodfellow Farms, we can do that without a transfer. I am enclosing a partially completed "Notice of Transfer of Ownership" form in the event you want the ownership changed.

Please review the form and complete as needed. Upon completion, please sign the form in the presence of a notary and return it to our office with a required filing fee of \$2.50. The check or money order for the fee should be made payable to the Water Rights Program.

If you have any questions, please contact me.
