REPORT ON APPLICATION NO. 4733A-3  
CITY OF MORRIDGE  
June 24, 1986

This application proposes to change the diversion source for Permit No. 4733-3 from the Missouri River to a groundwater source. The point of diversion consists of one well 40 feet deep located in NW 1/4 SW 1/4 of Section 29, T124N, R79W. The water is used for irrigating the city softball park (10 acres) located in the NW 1/4 SW 1/4 of Section 29, T124N, R79W. This application does not authorize any increase in water appropriated or acreage irrigated above that specified by Permit No. 4733-3 which is 0.14 cfs and 10 acres.

Aquifer - Pliocene or Pre-Pliocene sands and gravels.

Geology and Aquifer Characteristics

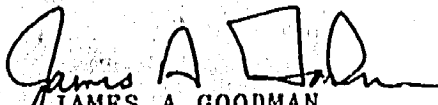

The aquifer consists of Pliocene or Pre-Pliocene sands and gravels overlying the Pierre shale (Kume, 1979) and is in hydraulic connection with the Missouri River. The well log submitted with the application indicates a static water level 15 feet below land surface and a saturated thickness of 18 feet. The static water level of the well is approximately the normal pool elevation of Oahe Reservoir. The water level in the well should closely follow the pool elevation of Oahe Reservoir. The aquifer is under water table conditions.

Review of Existing Water Permits

There are no existing groundwater permits in this area.

Conclusions

1. Water is available from this aquifer. The aquifer is hydraulically connected with Oahe Reservoir.
2. Interference is not a problem. There are no nearby permits for groundwater and the diversion rate requested is small. Under water table conditions drawdowns are not significant. The well completion report indicates the well produced 46 gpm with 2 feet of drawdown.
3. Should the level in Oahe Reservoir be low, this well may not produce the amount of water requested. The pool elevation of Oahe Reservoir could have a significant impact on the availability of water to this well.

Dear Sir:

Enclosed herewith is your Water Permit No. 4733A-3 as approved by the Water Management Board authorizing you to construct your water diversion system and the water to beneficial use, not exceeding the limits as specified in said Water Permit No. 4733A-3.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that your Water License may be issued to you, thus completing your acquisition of a Water Right.

Very truly yours,

JOHN HATCH, Chief Engineer

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period-i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period will be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.

Mobridge, SD 57601

Dear Ms. Zahn:

The inspection of your water use system and the inspection of the extent of application of water to beneficial use, as developed under Water Permit Nos. 4733-3 and 4733A-3, has been completed. Your final water right document, the Water License, can now be issued. Upon licensing, the applicable portions of Water Permit No. 4733-3 will be incorporated into 4733A-3.

Statutes require that we charge a \$50.00 fee for the inspection and issuance of the Water License. Upon receipt of the \$50.00 fee from you, we will begin processing your Water License.

South Dakota Water Law 46-5-30.1 requires that a permit holder may not divert water until the \$50.00 license fee has been paid. Please contact us if you have any questions.

Sincerely,

Cheryl F. Frost  
Secretary  
Water Rights Division

Dear Mr. Bender:

Enclosed is Water License No. 4733A-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 413834 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 4733A-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

SUBJECT: Reporting Requirement for 2014 Irrigation Questionnaire(s)

Our records indicate your 2014 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 4733A-3. The request for the Questionnaire was dated October 17, 2014. The Water Management Board has directed that owners of water permits who have not submitted the 2014 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 4733A-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

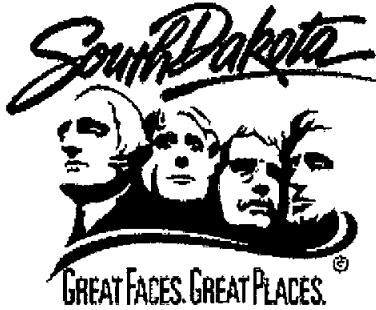

The hearing will be held at **10:00 am, March 4, 2015** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 4733A-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 4, 2015** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use.
