Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, July 30, 1996 made a thorough examination of the water use system constructed by Rutland School District 39-4 of P.O. Box 89, Rutland SD 57057 holder of Permit No. 4813-3, bearing the priority of September 29, 1981 authorizing the diversion of 1.12 cu. ft. per second of the waters of Howard Aquifer for Municipal purposes, in Lake County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

One well 205 feet deep with 190 feet of 4 inch PVC casing and 15 feet of PVC screen. Goulds submersible pump model no. 10EJ with a capacity of 15 gpm and a Franklin Electric motor rated at 1 1/4 hp.

B. Works used to transport water to place of use:

150 feet of 1 1/4 plastic pipe.

C. Works used to apply water to beneficial use:

Sprinkler and garden hose.

The system is in the following condition good. The point of diversion is located 1190' E of the W 1/4 corner Section 9, T107N, R51W. The works are capable of diverting and conveying to the place of use 0.033 cu. ft. per second of water which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

Section 9, T107N, R51W: SW 1/4 NW 1/4 0.75 acres

comprising a total of 0.75 acres of land and the license should be issued for 0.033 cfs.

Applicable permit qualifications have been complied with: yes

Exceptions to compliance are: none

Comments: The permit was for the water supply for the town of Rutland and the school including lawn and football irrigation. The community and the school are now on a rural water system but the school still irrigates the football field from the well when needed.

AUTHORITY:

Pursuant to SDCL 46-5-13.1, the location of a diversion point may be changed or additional diversion points may be licensed provided the following conditions are met and the potential for interference with other existing diversions is not increased:

- **Developed water source same as permitted source and no additional water appropriated**
Permitted water source is unknown, however, the school has always used the water source it presently uses.
- **If irrigation, no new land is irrigated**
Water use was for the school and 9 residents in Rutland. The permit currently is used to irrigate the football field when needed.
- **Review of Existing Diversions**
Permit 4813-3 is the only water right on file for T107N, R51W. No domestic wells on file in the same water source and the community of Rutland is on a rural water system.

RECOMMENDED ACTION

Based on the above criteria, it is recommended that the diversion point be licensed as developed.

Lynn Beck, Natural Resources Engineer
Water Rights Program

The Chief Engineer makes a finding pursuant to SDCL 46-5-13.1 that:

This change in location does not increase the potential for interference with existing diversions. In making this finding, "does not increase the potential for interference" is interpreted to mean potential for adverse interference.

Dear Mr. Williams:

The investigation of your water use system was conducted on July 30, 1996, by Lynn Beck, staff engineer. The investigation included the extent of application of water to beneficial use, as developed under Water Permit No. 4813-3. Your final water right document, the Water License, can now be issued.

Statutes require that we charge a \$50.00 fee for the investigation and issuance of the Water License. Upon receipt of the \$50.00 fee from you, we will begin processing your Water License.

Please remit fee to:

Dear Mr. Williams:

Enclosed is Water License No. 4813-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 415608 in the amount of \$50.00 which you paid for the investigation and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 4813-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.
