Gentlemen:

Enclosed in your copy of the laboratory report of analysis for water sample No. 81-761.

I have plotted the approximate quality of your water by means of a red cross in the chart located on the back cover of the accompanying AES pamphlet #13.

Sample No. 81-761 is classified as a medium saline, low sodic water. It is suitable as a source for irrigation.

The Estelline silt loam, Vienna loam, Vienna sandy loam, and the Fordville sandy loam found in the SE 1/4 of Section 4-110-48 are compatible with the quality of your water. However, the Lamoure silty clay loam located along the drainageway in the S 1/2 of the SE 1/4 of Sec. 4-110-48 may pond under irrigation. Persistent wet spots in this area should be kept in grass or a grass/alfalfa mixture.

If a rising water table does develop in the Lamoure drainageway, please contact your county extension agent or this office for assistance.

The WI-1, soils information, and a copy of the water analysis are being forwarded to the Division of Conservation for their action.

Sincerely yours,

Michael H. Sanders

The inspection of your water use system and the inspection of the extent of application of water to beneficial use, as developed under Water Permit Nos. 4859-3, 4497-3A and 4497-3, has been completed. Your final water right document, the Water License, can now be issued. Upon licensing, the applicable portions of Water Permit Nos. 4497-3A and 4497-3 will be incorporated into No. 4859-3.

Statutes require that we charge a \$50.00 fee for the inspection and issuance of the Water License. Upon receipt of the \$50.00 fee from you, we will begin processing your Water License.

South Dakota Water Law 46-5-30.1 requires that a permit holder may not divert water until the \$50.00 license fee has been paid. Please contact us if you have any questions.

Sincerely,

Genny McMath

NOTE: On check or money order, please specify your permit number. This will insure proper handling of the fee.

Dear Mr. Kaiser:

I am currently working on processing a license for a water right for Rolland Colony in Brookings County. After reviewing our records I did not find an as built well log for the irrigation well. Our records show that you were the drilling firm which constructed the well located in the SW 1/4 of Section 4-T110N-R48W. Please send the well log or any information concerning this well.

Dear Mr. Wipf:

Enclosed is Water License No. 4859-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 412332 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 4859-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

JOHN HATCH, Chief Engineer

Dear Mr. Wipf:

Thank you for the return of your 1993 irrigation questionnaires. On the questionnaire for Water Right No. 4859-3, you mentioned that you did not receive a form for Permit No. 4497-3A (SW $\frac{1}{4}$ Sec 4).

When Water Permit No. 4859-3 was licensed, the applicable portions of Water Permit Nos. 4497-3 and 4497-3A were incorporated into the license (see enclosed copy). Under Water Management Board Rule, when water permits cover "one system", they are incorporated into one license. You did not lose acreage or priority dates by this process.

You will no longer receive questionnaires for Water Permit Nos. 4497-3 or 4497-3A. In the future, any irrigation done in the S 1/2 of Section 4, T110N, R48W should be reported on the irrigation questionnaire pertaining to Water Right No. 4859-3.

I hope I have addressed your concerns. If you have any questions, please contact me.

Dear Mr. Wipf:

Enclosed are your 2003 irrigation questionnaires for Water Right Nos. 3218-3 and 4859-3. I received one of them on November 4th and the second one was missing from the correspondence.

In order for them to be considered complete, you will need to fill them out with any irrigation information you have for the 2003 crop season. They are due back in our office by December 1, 2003.

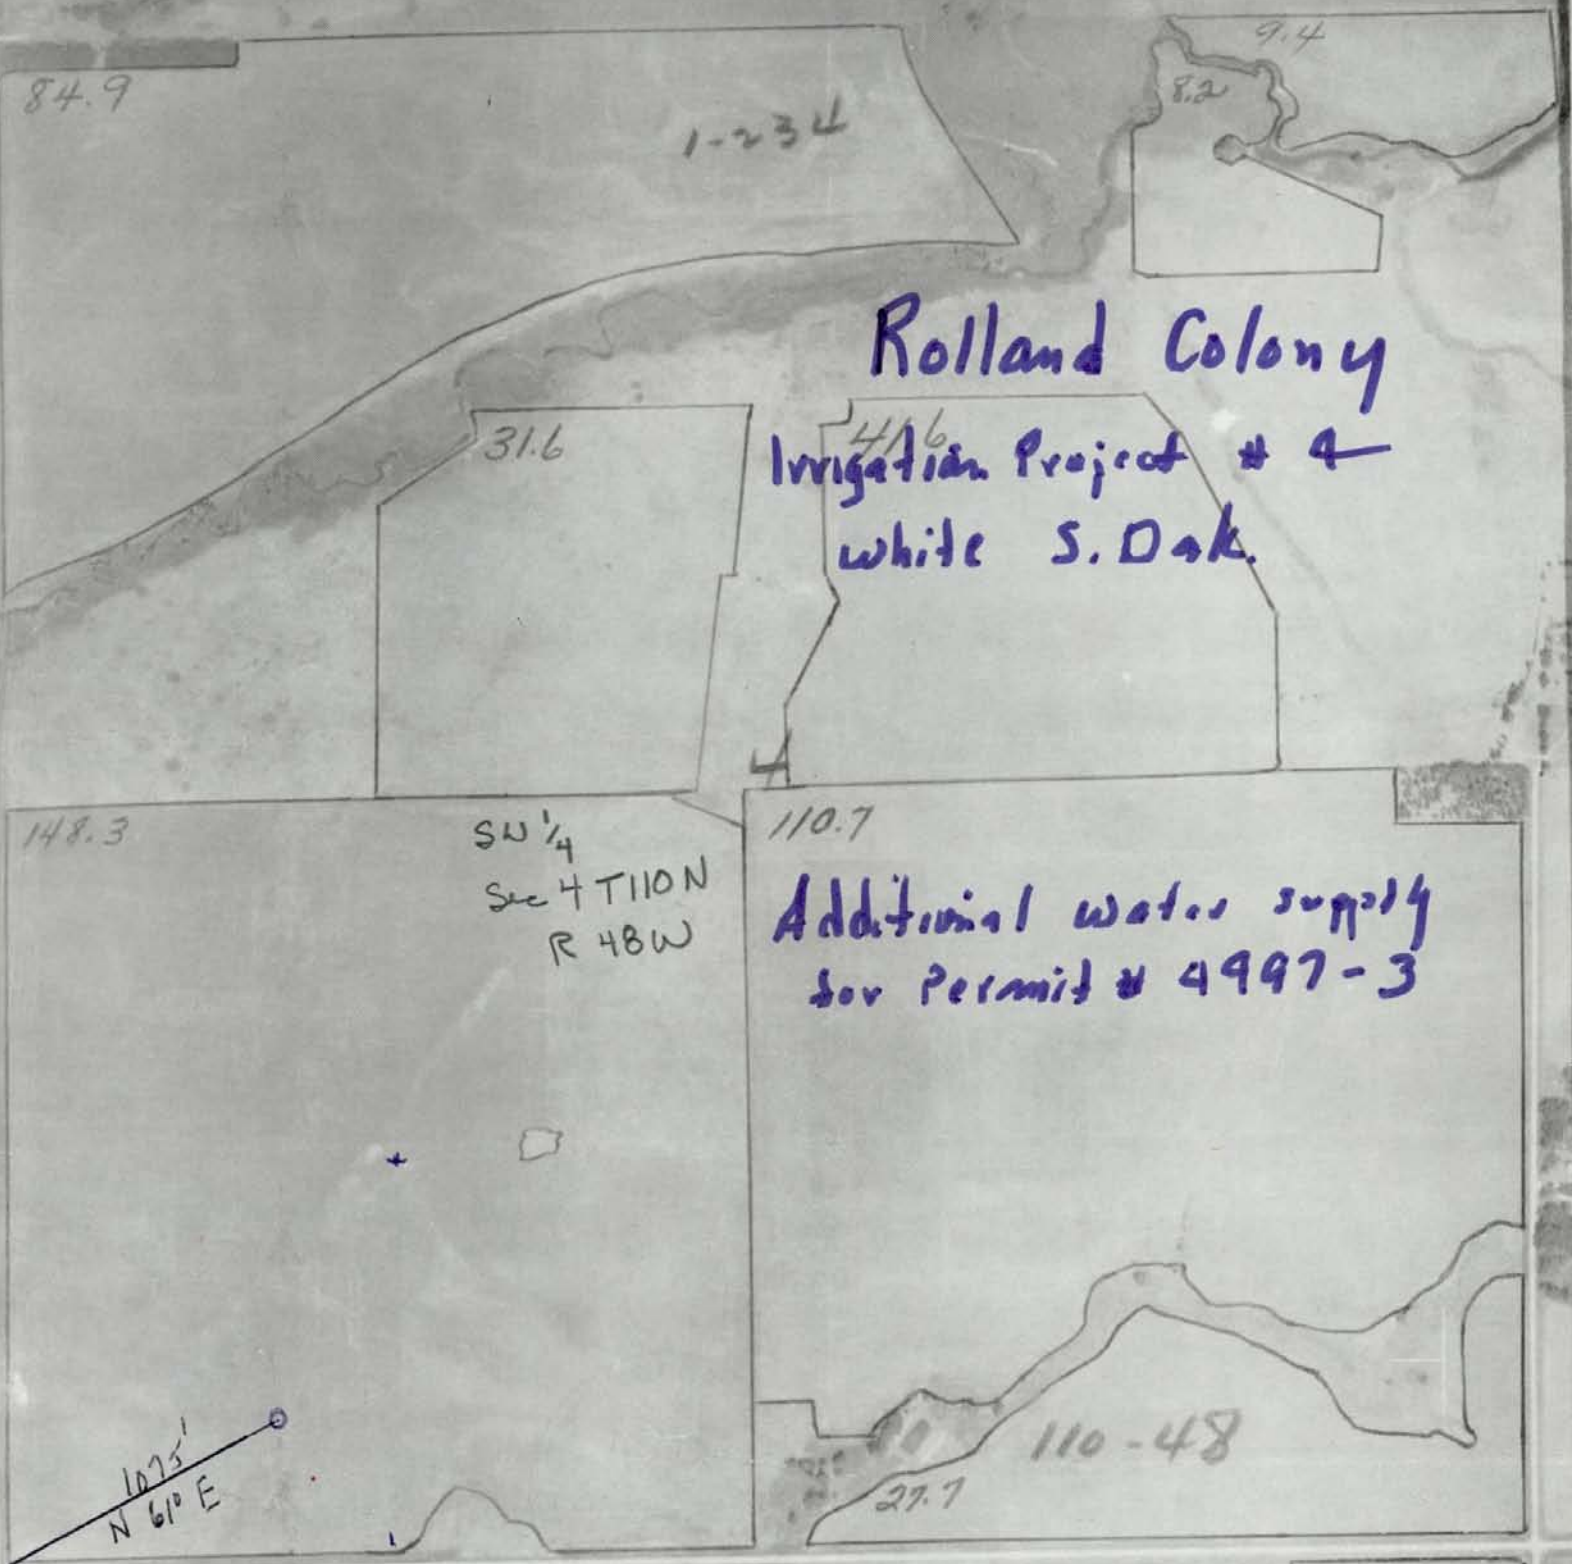

Please write in the acres, pump rate, days per month and average hours per day in the months that water was applied. We use the information to calculate how much water was used from a specific source.

The legal descriptions of the water rights are included on each questionnaire. If you have any questions, please get in touch with me.

Dear Mr. Wipf:

I am writing in regard to Rolland Colony's request to authorize one additional well for irrigation authorized by Water Right No. 4859-3.

Water Right No. 4859-3 appropriates 1.78 cfs from one well to be completed into the Big Sioux Aurora Aquifer located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 4 to irrigate 272 acres location in the S $\frac{1}{2}$ Section 4; all in T110N, R48W. The priority date is November 20, 1981 and March 17, 1980.

Upon review of the request and pursuant to SDCL 46-5-13.1, the additional existing well completed into the Big Sioux:Aurora Aquifer is authorized without application or publication of a notice of hearing. The additional well is located in the approximate center of the NW $\frac{1}{4}$ of Section 9, T110N, R48W.

No additional appropriation above the 1.78 cfs (800 gpm) currently authorized by Water Right No. 4859-3 is authorized. If the combined diversion rate from the two wells exceeds 1.78 cfs, a new water permit must be obtained. In addition, the water source is to be the Big Sioux:Aurora Aquifer. If a well is completed into the deeper Rutland Aquifer, a new water permit is required.

If you have any questions, please contact Eric Gronlund at (605) 773-3352.

Garland Erbele, Chief Engineer

Approval of Additional Diversion Point

NAME: Rolland Colony, c/o Jonathon Wipf**ADDRESS:** 38088 210th Street, White SD 57276**DATE:** June 18, 2008 **COUNTY:** Brookings**TELEPHONE:** cell 690-7540

Rolland Colony has made a request to authorize the additional well developed for the irrigation of land authorized by Water Right No. 4859-3.

Water Right No. 4859-3 appropriates 1.78 cfs from one well to be completed into the Big Sioux Aurora Aquifer located in the SW ¼ SW ¼ Section 4 to irrigate 272 acres location in the S ½ Section 4; all in T110N, R48W. The priority date is November 20, 1981 and March 17, 1980.

A request submitted by Mr. Wipf indicates that an additional well was needed to obtain the 800 gpm (1.78) needed to operate the system. The map submitted states the permitted well produces 500 gpm and the existing well is intended to be utilized at a rate of 300 gpm. Previously, Dave Gullickson with Farmers Implement in Brookings called stating the colony's existing well had diminished in capacity. The original well is completed to a depth between 54 and 64 feet deep. Mr. Wipf in a telephone conversation said that the additional well in the NW ¼ of Section 9 is 64 feet. Both wells at this depth would be completed into the Brookings:Aurora Aquifer.

A well completion report is on file for a well drilled in the NW ¼ Section 9 in 1981 that indicates the well is 65 feet deep. Mr. Wipf thought this was the same well the colony intends to use. However, there is a cancelled Water Right No. 3219-3 in the NW ¼ of Section 9. The well location for this cancelled water right and the location on the map accompanying this request are different. Therefore, it is not a certainty that the well completion report on file is for the same well that is the subject of this request.

AUTHORITY:

Pursuant to SDCL 46-5-13.1, the location of a diversion point may be changed or additional diversion points may be licensed provided the following conditions are met and the potential for interference with other existing diversions is not increased:

- **Developed water source same as permitted source and no additional water appropriated**

The water source remains the Big Sioux:Aurora Aquifer. No additional water is to be appropriated by this request. The map indicates the production of the original well has diminished to 500 gpm. This additional well is intended to produce 300 gpm to bring the diversion capability up to the permitted amount of 800 gpm.

- **If irrigation, no new land is irrigated**

No additional land is to be irrigated above the 272 acres authorized by Water Right No. 4859-3. This request is solely to authorize one additional well.

- **Review of Existing Diversions**

A review of existing diversions in neighboring sections was conducted. This is an area of irrigation development. The existing water rights are shown on Table 1.

TABLE 1

Permit No.	Holder	Source	Well Location	Approx. Distance from WR 4859-3
3841-3	John Finley	Big Sioux:Aurora	NW SE Sec.34 T111N, R48W	2 miles
6113-3	Rolland Colony	Rutland	NW SE Sec. 9, T110N, R48W	7/8 of a mile
3218-3	Rolland Colony	Big Sioux:Aurora	NW NE Sec. 17, T110N, R48W	1 mile

The Water Rights Program's database of well completion reports was also reviewed. Driller reports for four domestic wells that are completed into the Big Sioux:Aurora Aquifer were found in neighboring sections. Two of these domestic well are owned by Rolland Colony. There is a domestic well located in the SW SW Section 3, T110N, R48W drilled in 1980 for Lawrence Halstead approximately 1 mile from the additional Colony well. The other domestic well was also drilled in 1980 for a Joseph Hemmen located in the SE Section 16, T110N, R48W approximately 1 ¾ miles southeast of the colony well. The other wells are either irrigation wells or domestic wells completed into the Rutland Aquifer.

The Water Rights Program monitors observation well BG-63D completed in the Big Sioux:Aurora Aquifer within one and a half miles southwest of the additional well. This is shallow well completed to a depth of 21 feet that has been in place since 1963. The well was "out of service" from the fall of 1993 to the fall of 2005. The water levels in the aquifer show good response to climatic conditions. The hydrograph is for this well is attached. Drawdown create by pumping should not be significant and interference with area wells is not a concern.

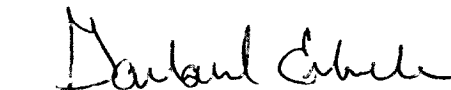

RECOMMENDED ACTION

Based on the above criteria, it is recommended that the one additional diversion point be authorized pursuant to SDCL 46-5-13.1.

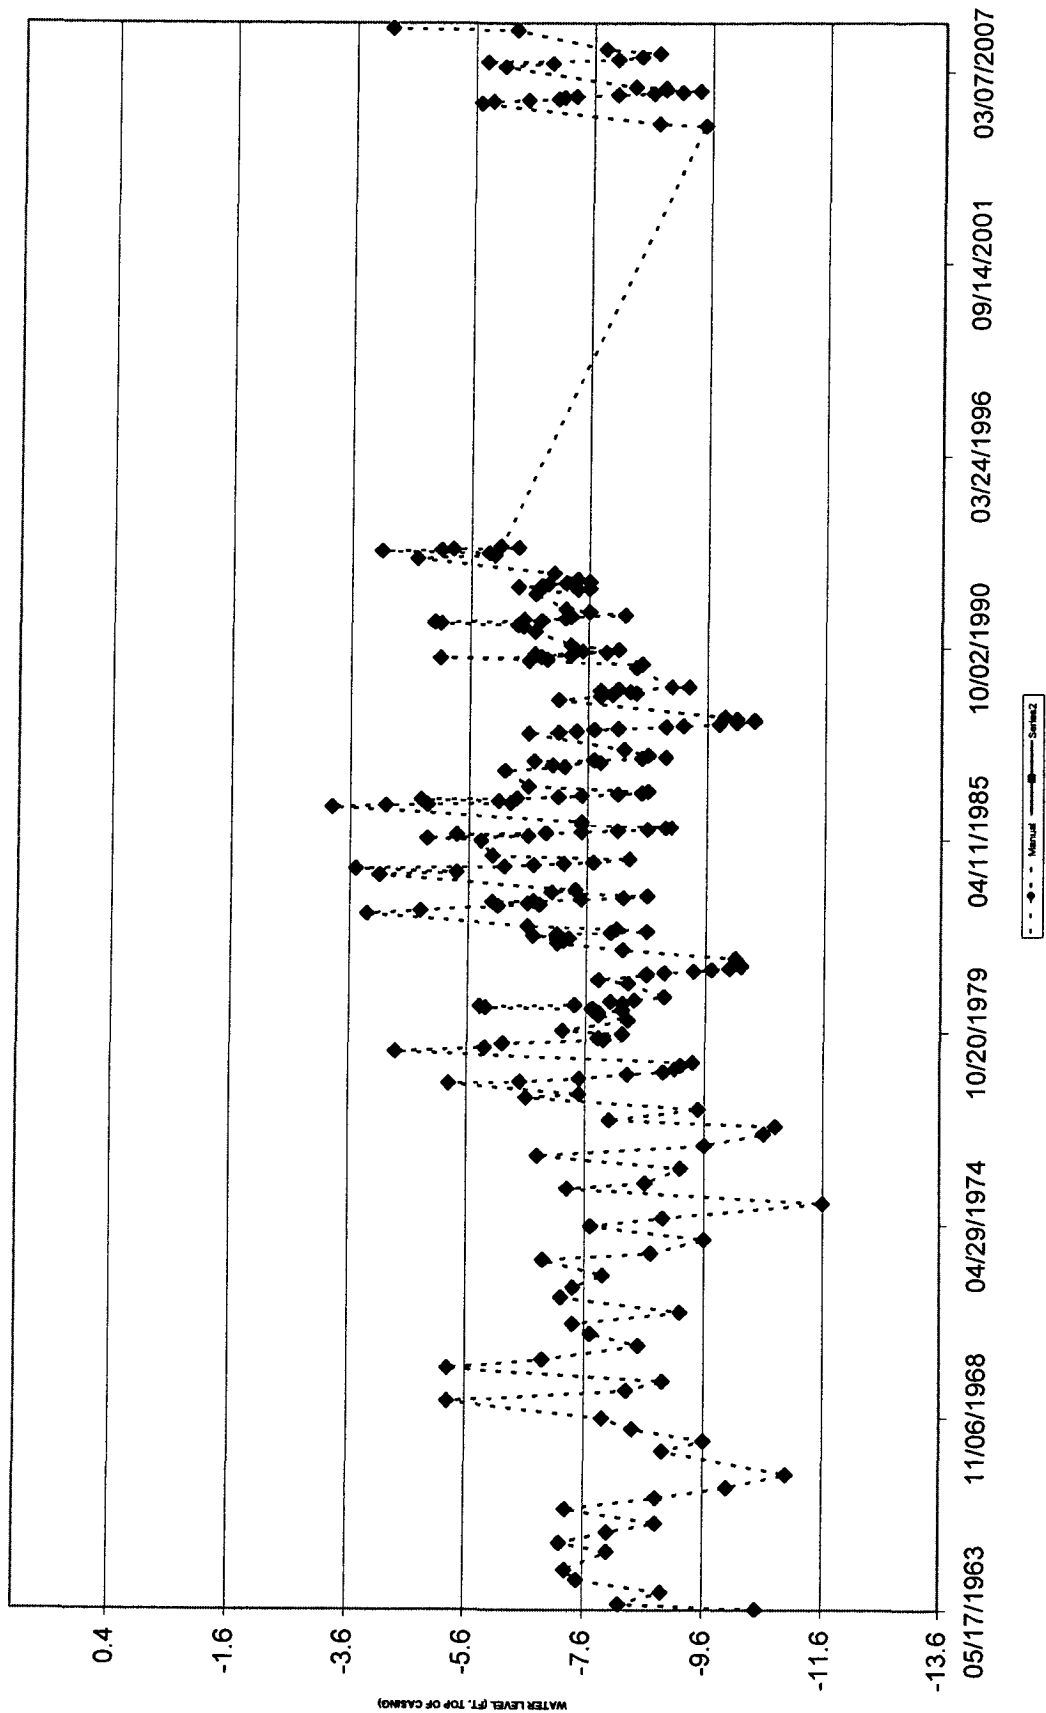

Eric Gronlund, Natural Resources Engineer
Water Rights Program

The Chief Engineer makes a finding pursuant SDCL 46-5-13.1 and ARSD 74:02:01:14.01 that:

This additional diversion point does not increase the potential for adverse effects to existing diversions.

Our records indicate your 2016 Irrigation Questionnaires have not been submitted. The request for the Questionnaires was dated October 21, 2016. The Water Management Board has directed that owners of water permits who have not submitted the 2016 Irrigation Questionnaires be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine if Permit No(s) 3218-3 & 3452-3 should be amended to require the Questionnaire to be submitted each year and to determine action to be taken for violation of Water Permit No(s) 4859-3 & 8017-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 1, 2017 at 11:00 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 4859-3 & 8017-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Amend Permit No(s) 3218-3 & 3452-3 to require the Irrigation Water Use Questionnaire to be submitted each year;

SUBJECT: Reporting Requirement for 2022 Irrigation Questionnaires

The Water Management Board has directed owners of water permits who have not submitted the 2022 Irrigation Questionnaires be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine if Permit No(s) 3218-3 & 3452-3 should be amended to require the Questionnaire to be submitted each year and to determine action to be taken for violation of Water Permit No(s) 4859-3 & 8017-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 8, 2023 at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 4859-3 & 8017-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Amend Permit No(s) 3218-3 & 3452-3 to require the Irrigation Water Use Questionnaire to be submitted each year;
