Dear Mr. Bullock:

In reviewing your soil and water compatibility application of the SE $\frac{1}{4}$ 25-113-51 = 130 acres, the irrigation staff is recommending a Straight Approval of your application to the State Conservation Commission at their January 12, 1984 meeting. The Straight Approval recommendation was made because we foresee no problems with good management. The Management Recommendations are as follows:

MANAGEMENT RECOMMENDATIONS:

We feel we must advise you on a small area in the SW corner of the quarter mapped as Lamoure silty clay (16) is a possible problem area. In this area you may experience a trafficability problem and reduced crop yields due to excess wetness. We recommend that this area be maintained in grass and/or alfalfa.

We also recommend the use of a form of conservation tillage to control wind erosion. The additional benefit of leaving this crop residue in the field is the increasing of the water retention ability of the soils.

If you have any questions concerning your application please feel free to contact this office.

Sincerely,

Jim Stukel
Program Administrator

REPORT ON APPLICATION NO. 4993-3

K. D. BULLOCK
February 27, 1984

Application No. 4993-3 proposes to irrigate 130 acres in the SE 1/4 Section 25, T113N, R51W from one well 44 feet deep. The applicant proposes to withdraw 1.80 cubic feet per second of groundwater from the Big Sioux-Brookings management unit in Hamlin County.

The Big Sioux-Brookings management unit is a glacial sand and gravel aquifer. The aquifer contains an estimated 642,230 acre feet of recoverable water (Hedges, 1981). The aquifer is generally under water table conditions.

The Division of Water Rights monitors 68 observation wells in the Big Sioux-Brookings unit. These wells have shown seasonal fluctuations due to the spring runoff and the affects of the high capacity wells. Hydrographs also indicate the fluctuation of head pressure in the portion of the management unit that is under artesian conditions. In no case did the hydrographs indicate a problem with depleting the waters of the aquifer.

Presently, appropriations by the Water Management Board total approximately 92,000 acre feet of water from the BS:B unit. This is 14 percent of the total amount of recoverable water. Only 5% of the 92,000 acre feet appropriated was reported as used in 1982. Complete values for 1983 water use were not available at this time, but a review of the questionnaires returned indicate 1983 use will be much less because of federal farm programs (PIK).

Although there is a large number of permits issued in the management unit (198) interference between high capacity wells should not be a problem. This is also indicated by the stable water levels in the observation wells.

Conclusions

1. There is a reasonable probability that unappropriated water is available for this application.
2. Observation wells exist and are being monitored in this aquifer.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 4993-3, K.D. Bullock

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Water and Natural Resources concerning Water Permit Application No. 4993-3, K.D. Bullock, Rt 1, Box 15, Estelline SD.

The irrigation well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The irrigation well owner, under this Permit shall control his irrigation withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in wells having prior water rights.

This permit is approved subject to the irrigation water use questionnaire being submitted each year.

Dear Mr. Bullock:

Enclosed herewith is your Water Permit No. 4993-3 as approved by the Water Management Board authorizing you to construct your water diversion system and the water to beneficial use, not exceeding the limits as specified in said Water Permit No. 4993-3.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that your Water License may be issued to you, thus completing your acquisition of a Water Right.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Division

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period-i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period will be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.

Dear Mr. Kalsbeck:

Enclosed is Water License No. 4993A-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 413476 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of existing well(s), such as the well(s) authorized by Water Right No. 4993A-3 constructs a replacement well(s) and does not plan to use the old well(s), the old well(s) is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.
