REPORT ON APPLICATION NO. 5016-3
SOUTH DAKOTA DEPARTMENT OF GAME, FISH & PARKS
May 15, 1984

Water Permit Application No. 5016-3 is to appropriate 1.34 cubic feet per second of water from the Missouri River for non-consumptive use. The point of diversion is to be located in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 15, T104N, R71W.

Discussion

The intent of this application is to build a fish spawning and imprint station located at the mouth of American Creek and the Missouri River in Chamberlain. The water will be pumped into fish tanks where the fish will be spawned and imprinted before being released into the Missouri River. The use of the water will be non-consumptive, being pumped from the Missouri River through the facility and then back into the Missouri River.

Conclusion

- 1) There is unappropriated water available for Water Permit Application No. 5016-3.
- 2) The diversion rate of 1.34 cfs will not have an adverse effect on existing water rights.

Dear Mr. Hanten:

Enclosed herewith is your Water Permit No. ~~5016-3~~ as approved by the Water Management Board authorizing you to construct your water diversion system and the water to beneficial use, not exceeding the limits as specified in said Water Permit No. ~~5016-3~~.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that your Water License may be issued to you, thus completing your acquisition of a Water Right.

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period-i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period will be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.
