Dear Burton:

Reference is made to your request of November 26, 1962 regarding water rights for the City of DeSmet, South Dakota. Their new well No. 4 is for the replacement of Well No. 2. The well is in the same aquifer and has a capacity less than that covered by the water right for Well No. 2. The new well No. 4 is located about 100 feet south of Well No. 3 on the same lot owned by the City of DeSmet.

Attached herewith are two (2) copies of Form 2A for Well No. 4.

Dear Mr. Trimble:

In your letter of January 2, 1973, you request indications from this office as to effects on ground water which may occur as a result of construction of the De Smet Municipal Airport.

The proposed airport is located in an area of extensive shallow ground water supplies. These ground waters are susceptible of rapid recharge from surface water.

The usual precautions included in airport construction are sufficient to avoid ground water contamination. At the De Smet location, construction activities and operations after construction should be such as to avoid disposal of wastes, especially liquids, on the land surface or into airport surface or subsurface drains.

Sincerely,

Dear Mr. Grimes:

In the very near future we will be submitting to the F.A.A. and the State Clearinghouse an Environmental Impact Statement to accompany a Request for Aid for a new airport facility at DeSmet, South Dakota. The project will consist of:

Land and clear zone acquisition; site preparation and drainage of the NW/SE landing strip, connecting taxiway, apron, auto parking lot, access road, and hangar and tie down area; installation of a lighted wind cone, segmented circle and landing strip markers; seeding; construction of new fence, repair of some existing fence and removal of fence no longer required; gravel surfacing of the auto parking lot and access road; and obstruction removal.

Enclosed please find the graphic description of the project along with the vicinity map.

We ask that you write this office indicating whether this project will have an adverse effect on the ground water in the area.

Thank you for your cooperation.

Sincerely,

Vernon L. Trimble
