1. Water Permit No. 5257-3 appropriates 0.35 cubic feet of water per second from 2 wells (1 existing well and 1 well proposed) and a dugout in Dawson Creek to irrigate 25 acres of the golf course. The existing well and the proposed well, 120 and 140 feet deep, and the dugout are located in the SE 1/4 SW 1/4 Section 8, T96N, R58W. 2. The amount of the appropriation may not exceed 2 acre feet per acre per year or one-seventieth (1/70) cubic feet of water per second for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: June 1 - September 30.
3. The date from which applicant may claim right is January 18, 1989.
4. One-fifth of the construction is to be completed on or before September 2, 1991.

Carol Hofer, Treasurer
Scotland Golf Club, Inc.
Scotland SD 57059

Dear Ms. Hofer:

This letter is in response to the water permit application received on September 1, 1988 for the Scotland Golf Club. The following information is needed to complete the water permit application:

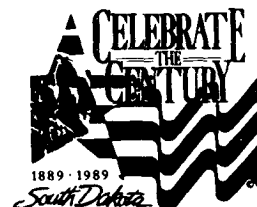

- 1) The location of the well needs to be marked on the aerial photo and the photo needs to be signed by one of the following persons: 1) A South Dakota registered professional engineer, 2) A South Dakota registered land surveyor or 3) A government employee that regularly prepares maps as part of his or her employment (ASCS or SCS offices).
- 2) The acreage outlined in black on the aerial photo is located in the SE1/4 SW1/4, SW1/4 SE1/4 section 8-T96N-R58W. I have placed this legal description on the enclosed application form which is partially completed. The acreage needs to be described to the nearest 40 acre area as specified on the application form.
- 3) I have left Question No. 2 regarding the amount of water claimed blank on the enclosed application. The original application specified a pumping rate of 100 gpm. You may pump 1 cfs per 70 acres according to South Dakota Water Rights law which for 25 acres is 160 gpm. Therefore, you may want to consider applying for the maximum pumping rate allowed by law unless you are certain the pumping rate will not exceed the 100 gpm placed on the original application.
- 4) A well log is on record with the Water Rights Division dating from June 1977 for the Dawson Creek golf course in the SE1/4 SW1/4 section 8-T96N-R58W. Please indicate if this is the well currently in use or if a second well has been drilled. The golf course should include all water sources on this permit application. If a second well has been drilled, then a signed well driller's log needs to be submitted with the application.

The enclosed application needs to be completed and then be signed and notarized. The application should then be returned to the Water Rights Division with the completed map and a well log if a new well has been constructed. The application can not be processed for consideration by the Water Management Board until the application is complete. Please contact me if you have any questions.

Sincerely,

Ron Duvall

COMMENTS:

Pat ^{Hartnett} ~~Arden~~ called regarding my letter of Sept. 16, 1988 requesting additional info about the application. Mr. ^{Hartnett} ~~Arden~~ indicated that Dawson Creek and an existing well were also to be used as diversion points. I told Mr. ^{Hartnett} ~~Arden~~ that the existing well log could be used since the well to be constructed and the existing well are to be located near each other. I also instructed Mr. ^{Hartnett} ~~Arden~~ to locate both wells on the map & the Dawson Creek diversion point.

Pat Hartnett called in response to my question regarding the dugout location on the aerial photo. Mr. Hartnett indicated the dugout was only a few feet South of the well & proposed well along Dawson Creek

I, Maurice Diehl, as a registered land surveyor, being first duly sworn on oath depose and state that I did on the 3rd day of May, 1962, at the direction of Stanley Haynes and Frances B. Haynes, make a survey to locate, mark and plat into lots the following real estate, to-wit:

Parcel A of Lot D, of the East $\frac{1}{2}$, and Lot D of the East $\frac{1}{2}$, all in the SW $\frac{1}{4}$, and Parcel A of Lot I, of the W $\frac{1}{2}$ of the SE $\frac{1}{4}$, all in Section 8, Township 96 Range 58. Bon Homme County, South Dakota:

That said survey along with a plat thereof was recorded on October 10, 1962, at 1:30 o'clock P.M., and recorded in Plat Book #3, on page 186. That in drafting said plat as heretofore described, I mistakenly described Parcel A as to being a part of Lot D when it should have been Parcel A in Lot G; and I miscakenly described Lot D of the E $\frac{1}{2}$ as heretofore described when it should have been Lot G of the E $\frac{1}{2}$, all in the SW $\frac{1}{4}$ of Section 8, Township 96 North, Range 58, West of the 5th P.M., Bon Homme County, South Dakota. (In essence I mistakenly used Lot "D" when I should have used Lot "G" in said described real estate).

That your affiant makes this affidavit solely for the purpose of establishing a correction as to said Lot "D" being Lot "G" on said recorded Plat as heretofore recorded, and that the Register of Deeds of Bon Homme County, South Dakota, make the necessary corrections as to said Lot "D" being Lot "G" as heretofore described in Plat Book #3, on page 186.

Report on Application No. 5257-3
Scotland Golf Club
January 17, 1989

This application proposes to appropriate 0.35 cfs from 2 wells (1 existing and 1 proposed) and a dugout in Dawson Creek to irrigate 25 acres of the Scotland Golf Course. The 120 feet deep existing well, the proposed 140 feet deep well and the dugout are located in the SE 1/4 of Section 8, T69N-R58W. The acreage to be irrigated is located in the SE 1/4 SW 1/4, SW 1/4 SE 1/4 of Section 8, T69N-R58W, in Bon Homme County.

Aquifer - Niobrara Marl (NBRR)

The Niobrara Marl consists of gray chalky limestone and gray calcareous marl and averages about 160 feet in thickness in Bon Homme County, (Christensen, 1974). Locally the Niobrara is capable of yielding 200 GPM or more (Jorgenson, 1971) but predicting well yields is very difficult because aquifer characteristics are site specific.

The driller's log submitted with this application indicates Niobrara was encountered 40 feet below land surface which would indicate artesian conditions at the site; however, for the most part, the Niobrara is under water table conditions in Bon Homme County (Jorgenson, 1971). Existing well data (Water Permit Files, 1989) for the city of Scotland indicate that the city has three wells completed into the Niobrara which are capable of up to 100 GPM for an individual well.

The Division of Water Rights does not monitor any observation wells completed into the Niobrara in the immediate area of Scotland. The Niobrara is hydraulically connected to the Lower James Missouri - Scotland Aquifer and observation well records for this aquifer are available. These records indicate only minor annual fluctuations due to extreme wet or dry climatic conditions (Water Rights, 1989).

Review of Existing Water Rights

There is one existing ground water permit No. 062-3 for the city of Scotland in the area. That permit is licensed for .58 cfs from 3 wells about 160 feet deep and completed into the Niobrara. The city wells and the wells proposed with this application are all in Section 8, and approximately 1/2 mile apart. Interference potential cannot be evaluated with existing data, however, adverse effects are unlikely. The City of Scotland is also obtaining water from BY II RWS.

There are no existing filings for surface water rights for Dawson Creek; however, there is a Game Fish and Parks Dam (Lake Henry) which is about 1 mile downstream of the proposed dugout. The dugout is being considered as surface water in this instance, because the application indicates a dugout will be used to supply water when the creek is flowing. The dam (Lake Henry) has an estimated storage capacity of 400 acre-feet and would be entitled to the first annual fill. The dam should qualify for a vested right.

Conclusions

1. Ground water is available from the Niobrara Marl. The Niobrara is hydraulically connected to large glacial aquifers in the area.
2. Interference cannot be evaluated without site specific data; however, adverse interference is unlikely for the following reasons:
 - a. The requested diversion rate is relatively small.
 - b. The Niobrara is basically under water table conditions in the area.
 - c. The Niobrara is hydraulically connected to large glacial aquifers.
3. Surface water is available from Dawson Creek. It will be necessary to by-pass water for downstream rights and domestic use.
4. The proposed well must be constructed in accordance with SD Well Construction Standards.
5. The combined or separate diversion either surface or ground water cannot exceed 0.35 cfs.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5257-3, Scotland Golf Club, Inc.

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Water and Natural Resources concerning Water Permit Application No. 5257-3, Scotland Golf Club, Inc., Box 150, Scotland SD.

The Chief Engineer is recommending APPROVAL of Application No. 5257-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualifications:

1. The well authorized pursuant to this permit shall be constructed by a licensed well driller and construction shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04.
2. Low flows as needed for downstream domestic use, including livestock water and prior water rights must be by-passed prior to filling the dugout.
3. This permit is approved subject to the irrigation water use questionnaire being submitted each year.
4. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that the Water License may be issued, thus completing your acquisition of a Water Right.

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period - i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period will be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Division of Water Rights, DENR, Foss Bldg., Pierre, SD 57501

I have this day made a thorough examination of the water use system constructed by Scotland Golf Club of Box 488 Scotland, SD 57059 holder of Permit No. 5257-3, bearing the priority of January 18, 1989 authorizing the diversion of 0.35 cu. ft. of water per second from surfacewater & groundwater for irrigation purposes, in Bon Homme County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

2 Goulds submersible pumps (30 & 100 GPM for the wells, a Jacuzzi (30 GPM) & a Berkeley (125 GPM) pumps at the dugout.

B. Works used to transport water to place of use:

2500 feet of 3" PVC and 600 feet of 4" PVC.

C. Works used to apply water to beneficial use:

A sprinkler system consisting of Pop-Up, Toro, & Rainbird Sprinklers located throughout the entire golf course to irrigate greens, fairways, & tee boxes.

The system is in excellent condition. The points of diversion are located #1: 2045 feet E and 330 feet N; #2: 2150 feet E and 330 feet N; #3: 2245 feet E and 330 feet N; all from the SW corner of Section 8 T96N-R58W of Bon Homme County. The works are capable of diverting and conveying to the place of use 0.28 cu. ft. of water per second from groundwater and 0.34 cu. ft. of water per second from surface water which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

Dear Mr. Bertrand:

Enclosed is Water License No. 5257-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 414384 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5257-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

Dear Jenny Mc Math,

We received a call from Barry Mc Laury on the status of the well at the Scotland Golf Course. We let him know that it is our intention to use the well for irrigation when run off from the local alcohol plant is not sufficient.

We understand that on the irrigation form filled out last fall this was stated wrong. Please make a correction on the status of the well; as we do intend to use it this summer.

Thanks for your understanding. Please call Joe Bertrand at 605-583-2913; if you have any questions regarding this matter.

Sincerely,

NOTICE OF ONE YEAR SUSPENSION OF WATER RIGHT

TO: Wayne L Bertrand, Scotland Golf Club Inc, Box 488, Scotland SD 57059

FROM: Garland Erbele Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right No. 5257-3

On March 9, 2011, the Water Management Board ordered:

That effective April 9, 2011, Water Right No. 5257-3 be suspended for the 2011 irrigation season for failure to submit the 2010 irrigation questionnaire.

If the 2010 irrigation questionnaire is received prior to April 9, 2011 the suspension will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2011 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2011 unless the irrigation questionnaire is submitted by April 9th.

After April 9th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2010 irrigation questionnaire and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May, 2011 in Pierre, SD. The letter should include your reasons for not completing the 2010 irrigation questionnaire. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.
