Dear Mr. Zemlicka:

On May 7, 1991, I inspected your four water permits. During that inspection, I found two of your permits not corresponding to what was there. The well you are using for the irrigated lands is not covered by a water permit. Enclosed are applications to correct those permits. Complete the partially filled out permit applications and sign the applications in the presence of a notary public. Then, return them to this office with a \$50.00 filing fee.

During the inspection, you indicated that you are not pumping out of Gravel Creek. Under the new permit, the lands covered by Gravel Creek will now be covered by ground water. Since Gravel Creek is not a source of water, we will schedule Water Permit No. 2262-3 for cancellation by the Water Management Board.

A water sample from the well you are using will be required for a water quality test.

If you have any questions, feel free to contact me at (605) 773-3352.

Sincerely,

REPORT ON WATER PERMIT APPLICATION NO. 5578-3
HARLEY ZEMPLICKA
OCTOBER 30, 1991

Application No. 5578-3, Harley Zemlicka, proposes to correct the location of 24 developed acres, to irrigate 16 additional acres and to change the location of the diversion point on Water Permit No. 2168-3. Water Permit No. 2168-3 appropriates 3.25 cubic feet of water per second (cfs) from one well located in SW 1/4 SE 1/4 Section 20 to irrigate 228 acres located in the SE 1/4, E 1/2 SW 1/4 Section 20; all in T118N-R52W. This application is to correct the location of 24 developed acres and to irrigate 16 additional acres located in the W 1/2 SW 1/4 Section 20; from the existing well 50 feet deep located in the NW 1/4 SW 1/4 Section 20-T118N-R52W. This application, if approved, does not authorize any increase in the developed diversion rate.

Aquifer - Big Sioux - North (BS-N)

The Big Sioux - North aquifer consists of poorly to well-sorted surficial outwash that ranges from medium sand to medium gravel. The aquifer generally is less than 10 feet below land surface. The aquifer is limited to the flood plain of the Big Sioux River and its tributaries, and is underlain by till. The Big Sioux - North underlies 150 square miles of Grant and Codington Counties and contains an estimated 151,430 acre-feet of recoverable water in Codington County (Hedges, 1982). Whereas, the Big Sioux - North contains an estimated 350,000 acre-feet for Grant and Codington Counties (Hansen, 1990). The Big Sioux - North aquifer is hydraulically connected to the Big Sioux River; and it is recharged by direct infiltration and subsequent percolation of rainfall and snowmelt.

Review of Existing Water Rights/Permits

The 1990 Irrigation Summary by Aquifer reported 44 water permits/rights appropriating up to 22,493 acre-feet of water from the Big Sioux - North Management Unit. A total 1990 use for irrigation was 2,520.10 acre-feet. Since the 1990 Irrigation Summary by Aquifer report was completed, there have been 7 water permits canceled and 1 water permit scheduled for cancellation based on non-construction. Subtracting the 8 permit appropriations, the annual appropriation for irrigation is 17,906 ac-ft out of the Big Sioux - North aquifer. There are 23 other water permits/rights for industrial, commercial, municipal, and rural water system use from the Big Sioux - North aquifer (Maximum use would be $60\% \times 12,463 = 7,478$ acre-feet). The combined appropriation from the Big Sioux - North is 25,384 ac-ft. There is one Water Right No. 5262-3 located west of old Highway 81, 1/4 mile west of this application which authorizes 2 wells withdrawing from the Big Sioux - North. Harley Zemlicka owns this Water Right.

The Division of Water Rights monitors six observation wells located near this application. Two observation wells, CD-89A and CD-57A, are located 1/2 mile north; one observation well, CD-89B, is approximately

1/4 mile west; one observation well, CD-76B, is located approximately 1 1/2 mile southwest; one observation well, CD-81B, is located approximately 1 1/2 mile southeast; one observation well, CD-81A, is located approximately 3 1/2 miles south; all from the well for this application. Water level measurements show the aquifer readily responds to precipitation. Water levels rise during wet years (recharge) and decline during drought years.

Conclusions

1. Water is available in the Big Sioux - North aquifer.
2. The aquifer is under predominantly water table conditions and drawdowns will not be significant very far from the production wells. Interference should not be a problem.
3. Inspection of Water Permit No. 2168-3 found 2.66 cfs and 244 acres developed. If this application is approved, Water Permit 2168-3 and Water Permit Application No. 5578-3 can be combined into one water license for 2.66 cfs.
4. The observation well readings show there are no adverse fluctuations in water levels and the aquifer recharges readily when water is available.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5578-3, Harley Zemlicka

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Environment and Natural Resources concerning Water Permit Application No. 5578-3, Harley Zemlicka, RR 5 Box 45, Watertown, SD 57201.

Dear Mr. Zemlicka:

Enclosed is Water License No. 5578-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 413369 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5578-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,
