FILE NO.
DATE 6/92

**SOUTH DAKOTA
WATER PERMIT NO. 5727-3**

Date of first receipt of application August 14, 1992.

Date of return to applicant for corrections, amendments or changes August 19, 1992.

Date of receipt of corrected application November 16, 1992.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 5727-3 to City of Ramona, PO Box 34, Ramona SD 57054-0034 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 5727-3 appropriates 0.67 cubic feet of water per second (300 gallons per minute) from one existing well (Dakota Formation) 820 feet deep located in the SW 1/4 NE 1/4 Section 32-T108N-R53W.
2. The water appropriated shall be used for the purpose of supplying water to the City of Ramona and may not exceed the amount of water needed for beneficial use for municipal purposes.
3. The water is to be used during the following described annual period: January 1 - December 31.
4. The date of approval of Permit No. 5727-3 is March 24, 1993.
5. The date from which applicant may claim right is November 16, 1992.
6. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATION

The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

Peggy Vickmark, Finance Officer
Town of Ramona
PO Box 34
Ramona SD 57054-0034

Dear Ms. Vickmark:

We received the water permit application for the Town of Ramona on August 14, 1992. The new permit application stated that water rights could not be found. A review of our files found that the Town of Ramona does have a water permit for 0.17 cubic feet of water per second (75 gallons per minute). Enclosed is a copy of the permit. The map submitted with the application, indicates the town has two wells. It would appear that one of the two wells is covered by Water Permit No. 3999-3.

The amount of water claimed on the new application is 0.67 cfs (300 gpm). Is this the amount of water claimed from the additional well or from both wells?

The application is also being returned because it must be signed and notarized. The \$275.00 fee is correct if the application is for 300 gpm.

Upon clarification of the above, further processing of the application will continue. If you have any questions, please contact this office.

Sincerely,

Karen Schlaak

Peggy Vickmark, Finance Officer
Town of Ramona
PO Box 34
Ramona SD 57054-0034

Dear Ms. Vickmark:

On August 14, 1992, an application was submitted (copy enclosed) for a permit to appropriate water for municipal use. You were notified on August 19, 1992 (copy enclosed) that the application was incomplete and were instructed what additional information was necessary in order to complete the application. To date, we have not received a response.

Obtaining a water permit ultimately benefits you by protecting your right to use water. Except for domestic use, any water user without a water right is not entitled to receive protection in the event of interference by a new or future user who has a water right.

Pursuant to South Dakota Codified Laws 46-1-15, 46-5-9, 46-5-10 and 46-2-18, you must have a water permit prior to using water.

If there are any questions, please contact this office.

Sincerely,

Karen Schlaak

WATER PERMIT APPLICATION No. 5727-3
THE CITY OF RAMONA
JANUARY 4, 1993

Water Permit Application No. 5727-3 proposes to appropriate 0.67 cubic feet of water per second (300 gallons per minute) from one existing well (Dakota Formation), 820 feet deep located in the SW 1/4 NE 1/4 Sec.32-T108N-R53W. The water is used for municipal use by the City of Ramona.

AQUIFER: Dakota Formation

AQUIFER CHARACTERISTICS:

The Dakota Formation is composed of interbedded sand, sandstone, shale and sandy shale. The formation underlies approximately 487 square miles of Lake County and contains an estimated 3,628,800 acre-feet of recoverable water in storage in the county (Hedges, 1982).

The City of Ramona has two wells completed into the Dakota Formation. The wells were reportedly drilled in 1967 and 1977 respectively. Well logs are not available however, the well depths are reported to be 820 feet and 860 feet. These wells are both located within the same quarter-quarter (40 acre tract) and are within one block of each another. One of these wells is covered under Water Permit No. 3999-3, the other well is not currently covered under permit. Most of the available information indicates that Permit No. 3999-3 is for Well #2, a well 860 feet deep, located in Lot 14, Block 7, Original Plat (the southern well).

The information provided on Line 4 of FORM 2 for this application appears to describe the same well that is covered under Permit No. 3999-3. The information provided on Line 4 of this application form should be disregarded and this application should be considered for Well #1 (the North Well). This well has been in use for several years and the Division of Water Rights has not received any reports of controversy regarding availability or adverse affects on other water rights.

CONCLUSIONS:

1. The City of Ramona is currently using two wells completed into the Dakota Formation for its water supply.
2. Water Permit No. 3999-3 is for .17 cfs from Well #2 which is the southernmost of the two wells. This application is for Well #1, (the north well).
3. The well to be covered under this permit has been in use for several years with no reported controversy.

4. Approval of this permit will not change water use from the Dakota Formation beyond the status quo.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5727-3, City of Ramona

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Environment and Natural Resources concerning Water Permit Application No. 5727-3, City of Ramona, c/o Peggy Vickmark, Finance Officer, PO Box 34, Ramona, SD 57054-0034.

The Chief Engineer is recommending APPROVAL of Application No. 5727-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion has been developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualification:

The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

See report on application for additional information.

RE: File Clarification

COMMENTS:

Review of the permit application and public notice indicate that Permit No. 3999-3 is for Well #2 located in "N 40' Lot 14, Block 7, original plat", (SW 1/4 NE 1/4 Sec.32, T108N-R53W). The application indicates the well was drilled in 1967 and Form 2A identifies the depth of the well as 820 feet. Two maps are included in this file. One map identifies well #2 as the southern well and a second map (the larger of the two) identifies the northern well as #2. The note at the bottom of the second map states "WELL #1 - 3999-3 LOT 14 BLK.3 1968".

In 1988, Huron Drilling Inc., relined one of Ramona's wells. The Rehabilitation Report submitted for the work indicates a screen was installed from 720' to 845' below ground surface. I contacted Peggy Vickmark, Finance Officer for Ramona and she informed me that it was the south well^{that} was rehabilitated in 1988.

Information on record with the Office of Drinking Water (ODW) identifies Well #1 as being located 1/2 block North and 1/2 block West of the Bank and Well #2 as being located one block North of Well #1. The ODW survey information indicates that Well #1 was drilled in 1967, has 8" casing, and a total depth of 820 feet. The ODW survey information indicates that Well #2 was drilled in 1977, has 8" casing, and a total depth of 860 feet.

"South Dakota Public Water System Data," (ODW, 1986), lists well #1 as the 1977 well and lists the Total Depth as 800 feet. The report lists well #2 as the 1967 well and lists the Total Depth as 820 feet.

CONCLUSION:

I think that Permit No. 3999-3 is for the South Well, which was constructed in 1967[?] to a total depth of 860 feet. Although some of the information from the Office of Drinking Water may dispute this, their information contradicts itself too. Two things in the permit file appear erroneous: (1) I think the wells were simply mislabeled on the large map (and the note on that map is irrelevant to Permit #3999-3 but correctly locates well #1); and (2) the well depth

estimated on form 2A is not correct.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

Dear Ms. Vickmark:

Water Permit Application No. 5727-3 for municipal use has been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice of hearing has been sent to the Publisher of the Daily Leader printed at Madison, SD (Ph # 256-4555). For your information, a copy of the notice, the recommendation of the Chief Engineer and a report on the application are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper to authorize publication of your Notice of Hearing and to arrange for payment. Early contact with the paper can eliminate delays. The publisher has been instructed to publish your notice once each week for two consecutive weeks with the last publication to occur twenty days before the board meeting. The newspaper has been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund
Natural Resources Engineer
605 773-3352

enclosures

NOTE: If you plan to contest any part of the Chief Engineer's recommendation, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the application.

ATTENTION: Legal Department

Enclosed is a Notice of Hearing on Application No. 5727-3 to be published twice. Please publish the first notice on February 25, 1993, with the second publication 7 days later.

The APPLICANT MUST VERIFY TO YOU THAT THE NOTICE IS TO BE PUBLISHED, before you make the first publication. Please BILL the APPLICANT for the cost of publication. The APPLICANT is the City of Ramona, PO Box 34, Ramona, SD 57054-0034 (Ph # 894-8691).

A copy of BOTH publications must be SENT to the WATER RIGHTS DIVISION. IMMEDIATELY return the FIRST publication with the FIRST Transmittal form on the bottom of this page. The first copy is needed to check the publication for errors so any corrections can be made in the second publication. Publication errors can invalidate the public notice and cause the applicant costly delays.

Please be sure the SECOND publication is returned IMMEDIATELY with the enclosed Proof of Publication form. DO NOT WAIT until the end of the month or the billing cycle. No action may be taken on the permit application until proof of publication has been received.

Sincerely,

Eric Gronlund

NOTICE OF HEARING on Application No. 5727-3 to Appropriate Water

Notice is given that the City of Ramona, PO Box 34, Ramona, SD 57054-0034 has filed an application for a water permit to appropriate 0.67 cubic feet of water per second (300 gallons per minute) from one existing well (Dakota Formation) 820 feet deep located in the SW 1/4 NE 1/4 Section 32-T108N-R53W. The water is for municipal use by the City of Ramona.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 5727-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. Unless a petition is filed opposing the application or the applicant files a petition contesting the chief engineer's recommendation, the Water Management Board will NOT CONDUCT a HEARING to consider this application and the chief engineer will issue the permit as recommended. Petitions filed in support of the application will NOT require the Board to hear the application.

Any person interested in opposing or supporting this application must file a written petition with BOTH the applicant and Chief Engineer. The applicant must also file a petition if opposed to the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Division, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by March 15, 1993. The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

For purposes of publishing 1) the notice of hearing on Application No. 5727-3 and 2) the chief engineer's recommendation, a meeting at the Division of Water Rights office to hear this application is scheduled for March 24, 1993, at 9:00 am in Room 413, Joe Foss Building, 523 E Capitol, Pierre SD. If this application is opposed or the recommendation is contested, the March 24, 1993, hearing date will be rescheduled for a regularly scheduled Board meeting. Notice of the time and place of the rescheduled hearing before the Board will be given by First Class Mail to the applicant and persons filing petitions. Anyone not filing a petition, but interested in attending the hearing, may contact the Division of Water Rights to confirm a hearing date and location. The March 24, 1993, hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from the applicant or any interested person opposing the application. The request for an automatic delay must be filed by March 15, 1993.

If a hearing is held, the Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) approve with qualifications, 3) defer, or 4) deny this application based on the facts presented at the public hearing. Any hearing will be an adversary proceeding. Any person filing a petition and/or the applicant have the right to be represented by a lawyer and may present evidence or cross-examine witnesses according to SDCL 1-26. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law. Contact Eric Gronlund by March 15, 1993, at the above Water Rights Division address to request copies of information pertaining to this application, to assure access to the hearing by the handicapped or to obtain an interpreter for the hearing impaired.

This application is made pursuant to SDCL 46-1-1 thru 46-1-9, 46-1-12 thru 46-1-16; 46-2-3.1, 46-2-9, 46-2-11, 46-2-13, 46-2-17; 46-2A-1 thru 46-2A-10, 46-2A-12, 46-2A-14, 46-2A-15, 46-2A-20, 46-2A-21; 46-5-1 thru 46-5-11, 46-5-13 thru 46-5-15, 46-5-24, 46-5-25, 46-5-30.2, 46-5-30.4, 46-5-31; 46-6-3, 46-6-3.1, 46-6-6.1, 46-6-10, 46-6-13, 46-6-14, 46-6-26; and Board Rules ARSD 74:02:01:01 thru 74:02:01:15. **NOTICE OF HEARING
ON APPLICATION NO. 5727-3
TO APPROPRIATE WATER**

Notice is given that the City of Ramona, PO Box 34, Ramona, SD 57054-0034 has filed an application for a water permit to appropriate 0.67 cubic feet of water per second (300 gallons per minute) from one existing well (Dakota Formation) 820 feet deep located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 32-T108N-R53W. The water is for municipal use by the City of Ramona.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 5727-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. Unless a petition is filed opposing the application or the applicant files a petition contesting the chief engineer's recommendation, the Water Management Board will NOT CONDUCT a HEARING to consider this application and the chief engineer will issue the permit as recommended. Petitions filed in support of the application will NOT require the Board to hear the application.

Any person interested in opposing or supporting this application must file a written petition with BOTH the applicant and Chief Engineer. The applicant must also file a petition if opposed to the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Division, Foss Building, 523 E. Capitol, Pierre SD 57501 (605-773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by March 15, 1993. The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

For purposes of publishing 1) the notice of hearing on Application No. 5727-3 and 2) the chief engineer's recommendation, a meeting at the Division of Water Rights office to hear this application is scheduled for March 24, 1993, at 9:00 a.m. in Room 413, Joe Foss Building, 523 E. Capitol, Pierre, SD. If this application is opposed or the recommendation is contested, the March 24, 1993, hearing date will be rescheduled for a regularly scheduled Board meeting. Notice of the time and place of the rescheduled hearing before the Board will be given by First Class Mail to the applicant and persons filing petitions. Anyone not filing a petition, but interested in attending the hearing, may contact the Division of Water Rights to confirm a hear-

ing date and location. The March 24, 1993, hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from the applicant or any interested person opposing the application. The request for an automatic delay must be filed by March 15, 1993.

If a hearing is held, the Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) approve with qualifications, 3) defer, or 4) deny this application based on the facts presented at the public hearing. Any hearing will be an adversary proceeding. Any person filing a petition and/or the applicant have the right to be represented by a lawyer and may present evidence or cross-examine witnesses according to SDCL 1-26. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law. Ramona, SD 57054-0034

Dear Ms. Vickmark:

Enclosed is Water Permit No. 5727-3 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

We will schedule an inspection so that the Water License may be issued to you, thus completing your acquisition of a Water Right.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Division

All the 6" is perforated.
There is a 6" x 8" lead packer on top of the 6" pipe;
also a 6" male left hand thread on the top of the
6" pipe.

In June 1956 we cleaned out the well and pumped the well
with air at #48 gals. per min. with a little trace of sand.
We then installed the pump, and it is pumping about
60 gals per min. - clear water.

HURON, SOUTH DAKOTA 57350

November 20, 1978

Warren Stephens - Ron Pedde
R.F. Sayre & Associates
Sioux Falls, South Dakota

Dear Mr. Stevens:

I received your letter dated November 17, 1978 and am answering all the questions you referred to on the project:

1. The well site has been graded and cleaned up as to the approval of Mr. Fisher the water man.
2. The valve box closest to the well has been excavated and fixed so that now it is in working order.
3. 3 Phase Motors can be run in either direction with no harm to the motors. The amperage on some of these motors is of so little difference that necessary checking several times is often required.
4. I have talked to Mr. Fisher the water man and on the day that we decide to start their pump he will drain his reservoir so we will be able to determine the number of Gallons the pump is producing at the draw down, which will be indicated by our draw down air line gauge.
5. I am in the process of forwarding shop drawings in triplicate on the Pitless Adapter, Pump, Motor and Electrical Panel.
6. The hand operated air pump will be furnished to the town when we start the pump.
7. The pump installed is a Redda-NN65-14 which is a 20 H.P. pump end, someone by mistake from our firm submitted you a curve of a NN65-19 Redda Pump which is a 25 H.P. pump end. I think what has happened is when they submitted the drawing they got on the wrong curve, the 20 H.P. pump, however, was approved and should do the job very nicely for the city. This pump will deliver up to about 100 GPM at their total design head, which should be about 400 Feet. How we arrived at this figure is as follows:
Down the well 100 GPM drawdown 335 Feet.
Friction loss and efficiency factors combined should not exceed 65 Feet, therefore TDH shouldn't be more than 400 Feet.
8. The type of material used for the piping was 3 Inch PVC pipe, the Schedule and wall thickness on this pipe will be forwarded to you.
9. We are obtaining mill certificates for the drop pipe and wire and and this will be forwarded along with the shop drawings.
10. As to the granular backfill material, it was my understanding that the city authorized this type of fill, I verified this by a telephone conversation with Mr. Marvin Fisher the water man on November 20, 1978.

Except for the shop drawings and the mill certificates we are ready to inspect the pump and piping system. Please let us know when you will be able to inspect these items and we will have a representative their to perform the test.

Thank You for your consideration on this project.

Sincerely,

Karl Osberg,

Permit No. 5727-3 & 3999-3
Big Sioux River - Water District

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, July 30, 1996 made a thorough examination of the water use system constructed by the City of Ramona of P.O. Box 34, Ramona SD 57054-0034 holder of Permit Nos. 5727-3 and 3999-3, bearing the priority of November 16, 1992 and May 5, 1977 authorizing the diversion of 0.67 and 0.17 cu. ft. per second of the waters of the Dakota Formation for municipal purposes, in Lake County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

N. Well is 860 feet deep with 10 inch steel casing, Grundfos submersible pump model no. ST16-20, Hitachi Ltd submersible motor model no. 389567E rated at 20 hp. The well capacity is 100 gpm.

S. Well is 845 feet deep with 720 feet of 6 inch steel casing and 125 feet of stainless steel screen, Goulds submersible pump, Franklin Electric submersible motor model no. 236103900 rated at 10 hp. The well capacity is 50 gpm.

B. Works used to transport water to place of use:

6 inch PVC mainline. Installed new approximately three years ago.

C. Works used to apply water to beneficial use:

20,000 gallon storage tank and a 10,000 gallon pressure tank.

The system is in the following condition good. The point of diversion is located N. Well is 1750' W and 1185' S and the S. Well is 1700' W and 1460' S of the NE corner Section 32, T108N, R53W. The works are capable of diverting and conveying to the place of use 0.333 cu. ft. per second of water and/or storing 20,000 gallons of water which is to be used for municipal use. Water has been put to beneficial use to the maximum extent as follows:

Municipal water supply for the City of Ramona.

The license should be issued for 0.333 cfs (0.111 cfs priority date May 5, 1977 and 0.222 cfs priority date November 16, 1992) and/or 20,000 gallons of storage.

Applicable permit qualifications have been complied with: yes

Exceptions to compliance are: none

Comments: The south well produces 50 gpm with a priority date of May 5, 1977. The north well produces 100 gpm with a priority date of November 16, 1992.

Lynn Beck
Lynn Beck

9-5-97
Date

Natural Resources Engineer
DENR, Water Rights Program

Approval of Location Change and/or Additional Diversion Point(s)

NAME: City of Ramona

ADDRESS: P.O. Box 34, Ramona SD 57054-0034

DATE: September 6, 1997 COUNTY: Lake TELEPHONE: (605) 894-8691

AUTHORITY:

Pursuant to SDCL 46-5-13.1, the location of a diversion point may be changed or additional diversion points may be licensed provided the following conditions are met and the potential for interference with other existing diversions is not increased:

- **Developed water source same as permitted source and no additional water appropriated**
yes

- **If irrigation, no new land is irrigated**
municipal use

- **Review of Existing Diversions**

The only other permit in the same water source in this area is Permit No. 3999-3 which also belongs to the City of Ramona. The well authorized by 3999-3 is located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ and the well authorized by 5727-3 is located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ all in Section 32, T108N, 53W. There are no domestic wells on file within a one mile radius of the well under Permit No. 5727-3. Both Permit No. 3999-3 and Permit 5727-3 have the well interference qualification.

RECOMMENDED ACTION

Based on the above criteria, it is recommended that the diversion point(s) be licensed as developed.

Lynn Beck, Natural Resources Engineer
Water Rights Program

The Chief Engineer makes a finding pursuant to SDCL 46-5-13.1 that:

This change in location does not increase the potential for interference with existing diversions. In making this finding, "does not increase the potential for interference" is interpreted to mean potential for adverse interference.

STATE OF SOUTH DAKOTA

WATER LICENSE NO. 5727-3

(1) The City of Ramona, PO Box 34, Ramona, SD 57054-0034 made Application No. 5727-3, August 14, 1992 for a water permit to divert 0.67 cubic feet of water per second from ground water (one existing Dakota Formation well), Lake County, South Dakota for municipal purposes. Permit No. 5727-3, with a priority date of November 16, 1992 was approved March 24, 1993 and issued to the applicant for diversion of water with construction of the described water supply system completed and the application to beneficial use of said water completed.

The applicable portions of Water Permit No. 3999-3, also held by the City of Ramona, are incorporated into this Water License No. 5727-3. A priority date of May 5, 1977, established under No. 3999-3, is retained for 0.111 cfs (south well); and a priority date of November 16, 1992, established under No. 5727-3, is retained for 0.222 cfs (north well).

(2) It is certified that the applicant has complied with the provisions of South Dakota State Law relating to completion of the construction of the water supply system and is entitled to divert 0.333 cubic feet of water per second for beneficial use. The location of the diversion points are north well: 1,750'W and 1,185'S of the NE corner of Section 32 (NW¼ NE¼); south well: 1,700'W and 1,460'S of the NE corner of Section 32 (SW¼ NE¼), both in T108N, R53W.

(3) The applicant has complied with the provisions of South Dakota State Law relating to the application of water to beneficial use.

(4) Pursuant to South Dakota Water Law 46-5-30.1 the City of Ramona, PO Box 34, Ramona, SD 57054-0034 the holder and/or owner of Incorporated Water Permit No. 5727-3 is issued a license to appropriate water, the right to use 0.333 cubic feet of water per second from ground water (two wells) with priority dates of May 5, 1977 (0.111 cfs) and November 16, 1992 (0.222 cfs) from the locations specified in (2) of this license, for municipal purposes. This license is subject to any limitations or qualifications listed in Incorporated Water Permit No. 5727-3 and subject to South Dakota State Law.

City of Ramona
Peggy Vickmark, Finance Officer
P.O. Box 34
Ramona, SD 57054-0034

Dear Ms. Vickmark:

The investigation of your water use system, including the extent of application of water to beneficial use, as developed under Water Permit Nos. 3999-3 and 5727-3, has been completed. Your final water right document, the Water License, can now be issued. Upon licensing, the applicable portions of Water Permit No. 3999-3 will be incorporated into 5727-3.

Statutes require that we charge a \$50.00 fee for the investigation and issuance of the Water License. Upon receipt of the \$50.00 fee from you, we will begin processing your Water License.

Please remit fee to:
Department of Environment & Natural Resources
Water Rights Program
523 E. Capitol
Pierre, SD 57501-3181

South Dakota Water Law 46-5-30.1 requires that a permit holder may not divert water until the \$50.00 license fee has been paid. Please contact us if you have any questions.

Sincerely,

Cheryl F. Frost
Secretary
Water Rights Program
(605) 773-3352

NOTE: On check or money order, please specify your permit number. This will insure proper handling of the fee.

Peggy Vickmark, Finance Officer
P.O. Box 34
Ramona, SD 57054-0034

Dear Ms. Vickmark:

Enclosed is Water License No. 5727-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 415500 in the amount of \$50.00 which you paid for the investigation and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5727-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Program
