Dear Mr. Bures:

In regard to the water permit application received on February 18, 1993, the following information needs to be submitted and clarified in order to process your application.

1. On the application, you indicated the water use as domestic. The use of water for a town, such as this, would be considered municipal use. Also, on Item No. 4, the location of the point of diversion (well) was not completed. The map indicates the well is located in the NE 1/4 NE 1/4 Section 17-T96N-R64W. Is this location correct? Do you concur with these two changes on the application?
2. The filing fee for this application will be \$50.00.

Upon receipt of the fee, further processing of the application will continue. If you have any questions, please contact this office.

Sincerely,

Karen Schlaak

REPORT ON APPLICATION NO. 5756-3
Town of Ravinia
April 21, 1993

Application No. 5756-3 proposes to appropriate 35 gpm (0.08 cfs) from one well approximately 350 feet deep located in the NE 1/4 NE 1/4 of section 17, T96N R64W in Charles Mix County. The water is for municipal use and is a backup supply for the rural water system.

AQUIFER - CODELL SANDSTONE (CDLL)

The Codell Sandstone is a fine to medium grained sandstone and ranges from about 20 to 60 feet in thickness in this area (Shurr, 1966). The Codell underlies 1,134 square miles and contains an estimated 1.45 million acre feet of recoverable water in storage in Charles Mix County (Hedges, 1982). The Codell is confined and under artesian conditions at this site.

The Division of Water Rights does not monitor any observation wells completed into the Codell sandstone in this immediate area. There is a Codell well called CM-52A located about 8 miles southeast of Ravinia. Water levels for this well have shown a decline since 1960 (Kume, 1977). Because the condition of this well is not known this data could be suspect. Another observation well DG-80F, located up near Armour, shows relatively little change in water levels and does appear to fluctuate with precipitation changes (Water Rights, 1993).

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are no other water rights/permits which obtain water from the Codell Sandstone in this area. This well will only be used as a backup to rural water. The information on the well included with the application is poor. Records and reports in our files indicate that the well for Ravinia was 350 feet deep not 200 feet deep as shown on the application.

CONCLUSIONS

1. Water is available from the Codell Sandstone.
2. The aquifer is confined and under artesian conditions.
3. The information available in reports and files in the Division of Water Rights indicates that the well in Ravinia is 350 feet deep not 200 as indicated on the application.

4. This well will be used as a backup water supply to the rural water system.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5756-3, Town of Ravinia

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Environment and Natural Resources concerning Water Permit Application No. 5756-3, Town of Ravinia, c/o Ernie Bures, Trustee, PO Box 5, Ravinia, SD 57357.

The Chief Engineer is recommending APPROVAL of Application No. 5756-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualification:

The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

Dear Ms. Hall:

Enclosed is Water License No. 5756-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 414835 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5756-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

JOHN HATCH, Chief Engineer
