The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 5817-3 to Florence M. Sanderson, 703 1st Ave SW, Estherville IA 51334 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 5817-3 authorizes irrigation of 25 additional acres. Water Permit No. 4522-3 appropriates 3.64 cubic feet of water per second (cfs) from four wells to irrigate 255 acres located in the N 1/2 Section 22-T114N-R51W. An inspection of the permit found 2 wells capable of diverting 1.77 cfs irrigating 280 acres. This permit authorizes irrigation of 25 additional acres located in the NW 1/4 NW 1/4, N 1/2 NE 1/4 Section 22-T114N-R51W. No increase in the developed diversion rate from the two wells is authorized by this permit.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: April 1- October 31.
3. The date from which applicant may claim right is March 11, 1994 (based on repeal of Soil/Water Compatibility permitting statutes set forth by passage of House Bill 1366).

QUALIFICATIONS

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. This permit is approved subject to the irrigation water use questionnaire being submitted each year.

REPORT ON APPLICATION NO. 3374A-3
for Bill Sanderson
and
REPORT ON APPLICATION NO. 5817-3
for Florence M Sanderson
May 18, 1994

Water Permit No. 3374A-3 is to specify the correct location of the irrigated acreage and to correct the location of the well. Water Permit No. 3374-3 appropriates 5 cfs from two wells located in the SE 1/4 NE 1/4 of section 15 and near the center of the SW 1/4 of section 14; to irrigate 400 acres located in the E 1/2 of section 15 and the W 1/2 of section 14; all in T113N R51W in Hamlin County. An inspection of Permit No. 3374-3 found one well constructed and supplying 2.0 cfs to irrigate 339 acres. This application is to correct the location of 86 acres of the 339 acres being irrigated. The correct location of the 86 acres is the SW 1/4, SE 1/4 NW 1/4 of section 15, T113N R51W. This application also corrects the location of the well which is the NW 1/4 SW 1/4 of section 14, T113N R51W. No increase in the developed diversion rate or number of acres being irrigated is authorized by this application.

Water Permit Application No. 5817-3 is to irrigate 25 additional acres. Water Permit No. 4522-3 appropriates 3.64 cfs from four wells to irrigate 255 acres located in the N 1/2 of section 22, T114N R51W in Hamlin County. An inspection of this permit found 2 wells capable of diverting 1.77 cfs irrigating 280 acres. This application is to irrigate 25 additional acres located in the NW 1/4 NW 1/4, N 1/2 NE 1/4 of section 22, T114N R51W. No increase in the developed diversion rate from the two wells is authorized by this application.

AQUIFER - BIG SIOUX BROOKINGS (BS:B)

The Big Sioux Brookings is an alluvium mantled glacial outwash (sand and gravel) under predominantly unconfined or water table conditions (Kume, 1985). The aquifer underlies 88,500 acres and contains an estimated 331,880 acre feet of recoverable water in storage in Hamlin County (Hedges, 1982). The aquifer is hydraulically connected to the Big Sioux River and extends into Codington County to the north and into Brookings County to the south. Ground water movement is from east to west and north to south in this area with ground water discharging into the Big Sioux River.

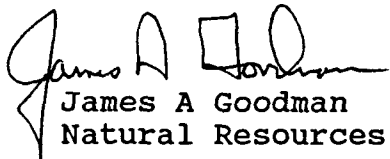

The Division of Water Rights monitors 21 observation wells completed into the Big Sioux Brookings aquifer in Hamlin County. Water levels for these wells show good response to climatic conditions, that is, rising water levels during wet years and gradually declining water levels during dry years. In general, the water level records indicate that the aquifer is capable of sustaining additional withdrawals (Water Rights, 1994).

REVIEW OF EXISTING WATER PERMITS/RIGHTS

These two applications are for already existing systems. There are existing water permits/rights within 1/2 mile of each application. Interference is not expected to be a concern. The wells for these applications have been in use for many years with no apparent problems.

CONCLUSIONS

1. Water is available from the Big Sioux Brookings aquifer.
2. The aquifer is unconfined and under water table conditions. Drawdown is not expected to be significant and should not adversely affect any existing right.
3. The wells authorized by these applications already exist. The information available is not sufficient to determine if these wells have been constructed in accordance with SD Well Construction Standards.
4. Approval of these applications will allow licensing of each of the permits to reflect "as built" status.

RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5817-3, Florence M. Sanderson

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Division, Department of Environment and Natural Resources concerning Water Permit Application No. 5817-3, Florence M. Sanderson, 703 1st Avenue SW, Estherville, IA 51334.

The Chief Engineer is recommending APPROVAL of Application No. 5817-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualifications:

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

Dear Ms. Sanderson:

I am writing to advise you that the legal notice of hearing on your Water Permit Application No. 5817-3 published in the Estelline Journal is not correct. The legal descriptions of the lands to be irrigated were published incorrectly. The newspaper was contacted on June 2 to have the error corrected on the second publication; however, the legal description was still incorrect on the June 9, 1994 publication.

As a result of the error, the notice of hearing will need to be readvertised. The readvertisement is needed to ensure the permit is free from legal problems due to inaccurate public notice. The information needed to readvertise the notice is enclosed. Be sure to contact the Estelline Journal (Phone # 605 873-2475) to authorize publication on June 30 and July 7 and arrange for payment.

The portion of the notice of hearing regarding Water Permit Application No. 3374A-3 for Bill Sanderson was published correctly and will not be readvertised. We will proceed with the processing of Water Permit Application No. 3374A-3.

If you have questions, please contact me.

Dear Ms. Sanderson:

Enclosed is Water License No. 5817-3. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 414335 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5817-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Dear Mr. Fugere:

This will acknowledge receipt of the 1998 irrigation questionnaires for Water Right Nos. 1812-3, 3374A-3 and 5817-3. In reviewing the forms, I noticed that on two of the three questionnaires you indicated the land is in CRP through 2008.

Below is a table showing the legal descriptions of the water rights. I wanted to make sure the questionnaires you marked "in CRP" corresponded to the same water right.

Water Right No.	No. of Acres	Source of Water	Description of Acres Irrigated
1812-3	70 acres	Big Sioux River/Hidewood Creek	NW ¼ Section 15, T113N, R51W
*3374A-3	339 acres	ground water (one well)	SW ¼, SW ¼ NW ¼ Section 14 S ½, S ½ NE ¼, SE ¼ NW ¼ Section 15, all in T113N, R51W
*5817-3	280 acres	ground water (two wells)	N ½ Section 22, T114N, R51W

* I will make a notation in Nos. 3374A-3 and 5817-3 that the land is in CRP. You will not receive irrigation questionnaires for these water rights until the year 2009.

If, after reviewing the above information you feel changes need to be made, please give me a call. If I do not hear from you, I will assume I have marked the files correctly.

Dear Mr. Sanderson:

Thank you for visiting with me in regard to Water Right No. 5817-3.

In regard to the error on the original license, I have enclosed a copy of the license and map with notations made on the license to show you what needs to be changed. The locations of the wells are described as being south and west of the NW corner of Section 22. The descriptions should have read south and east of the NW corner. The license will be reissued to correct the error.

Enclosed is a partially completed Notice of Transfer of Ownership form for filing an ownership change. Please review the form and make any necessary corrections. Upon completion, please sign the form and return it to our office with a required filing fee of \$2.50. The check or money order for the fee can be made payable to the Water Rights Program.

Once we receive the transfer of ownership form and filing fee from you, the license will be reissued to reflect current ownership and also to correct the legal description of the well locations.

If you have any questions, please contact me.

Sincerely,

No. 5817-3

Date: 4/14/08

I/We request that Water Right No. 5817-3

formerly owned by: Florence Sanderson

be transferred to: (name & address) Sanderson Farms Partnership, % Bill Sanderson
703 1st Ave S, Estherville IA 51334

Telephone No. 712-362-5885

Title to the following described land(s)/property has been transferred as described above:

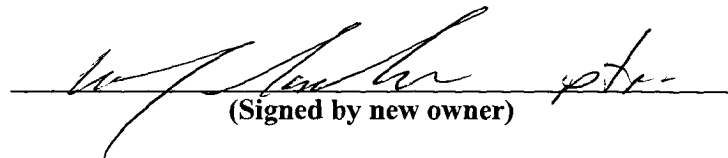

280 acres in the W 1/2 Section 22, T114N, R51W

I/We understand that the validity of Water Right No. 5817-3 has not been determined by this transfer action. If I/We have any questions on validity, I/We understand that only the Water Management Board has the authority to determine if a water permit/right is valid (see note).

You are requested to file this "Notice of Transfer" in the appropriate file with the Water Rights Program, as evidence of the change of ownership.

A fee of Two Dollars and Fifty Cents (\$2.50) is required to cover the filing fees as required under SDCL 46-2-13. This form must be signed by the new owner.

I/We Sanderson Farms, the new owner, certify that the above information is true and correct.

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

Dear Mr. Sanderson:

Enclosed is your Reissued Water License No. 5817-3. The license has been reissued to correct an error in the legal descriptions of the diversion points.

Also enclosed is your Receipt No. 03622 in the amount of \$2.50 which you paid for filing an ownership change with the water right. The transfer has been completed. The water right, formerly held by Florence Sanderson is now listed in the name of Sanderson Farms Partnership.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 5817-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Garland Erbele, Chief Engineer

STATE OF SOUTH DAKOTA

REISSUED WATER LICENSE NO. 5817-3

(1) Florence M Sanderson was issued Water License No. 5817-3, September 6, 1995 for a water right to divert 1.77 cubic feet of water per second from ground water (two wells – Big Sioux:Brookings Aquifer), Hamlin County, South Dakota for irrigation purposes. Water License No. 5817-3, with priority dates of April 14, 1980 and March 11, 1994 was issued to the permit holder for diversion of water with construction of the water supply system completed and the application to beneficial use of water completed.

A review of the original license found an error in the description of the two diversion points. The wells were described as being south and west of the northwest corner and should have been described as being south and east of the northwest corner. The license is being reissued to correct the error. Re-issuance of the license does not alter the remaining portions of the license.
