**REPORT ON APPLICATION NO. 5895-3
ST. JOSEPH'S INDIAN SCHOOL
JANUARY 9, 1996**

Background

Water Permit Application No. 5895-3 requests approval to appropriate 1.50 cubic feet of water per second (cfs) from the Missouri River. The diversion point is to be located in the SE 1/4 NW 1/4 Section 10-T104N-R71W. The water will be used to irrigate 40.5 acres located in the E 1/2 NW 1/4, W 1/2 NE 1/4, NE 1/4 SW 1/4, and NW 1/4 SE 1/4; all in Section 10-T104N-R71W in Brule County. Application No. 5895-3 replaces canceled Water Permit No. 5387-3.

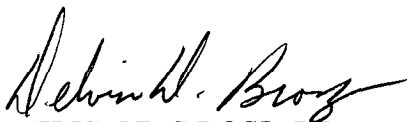

Discussion

Application No. 5895-3 requests a diversion rate of 1.5 cfs to irrigate 40.5 acres. In accordance with Section 74:02:01:05 of the General Rules and pursuant to SDCL 46-5-6, the diversion rate may not exceed 1.0 cfs for the irrigation of 70 acres or the equivalent thereof. The maximum diversion rate allowed for irrigation of 40.5 acre is 0.58 cfs.

The water will be diverted from the Missouri River. The Missouri River has ample unappropriated water available for Water Permit Application No 5895-3.

Conclusions

1. Unappropriated water is available from the Missouri River for Water Permit Application No. 5895-3.
2. Water Permit Application No. 5895-3 is in the public interest and constitutes a beneficial use of water.
3. If Water Permit Application No. 5895-3 is approved, it should include the qualification to submit the annual irrigation questionnaire.

DELVIN D. BROSZ, PE
Natural Resources Engineer IV

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 5895-3, St. Joseph's Indian School**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 5895-3, St. Joseph's Indian School, Congregation of Priests of the Sacred Hearts, Inc., %Harold Juhnke, P.O. Box 89, Chamberlain, SD 57325.

The Chief Engineer is recommending APPROVAL of Application No. 5895-3 for 0.58 cubic feet of water per second (cfs) because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion has been developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualifications:

1. Permit No. 5895-3 appropriates 0.58 cfs to irrigate 40.5 acres.
2. This permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

JOHN HATCH, Chief Engineer
January 18, 1996

Note: The statutory limit allowed for irrigation states the diversion rate may not be in excess of one cubic foot of water per second for each seventy acres irrigated. The irrigation of 40.5 acres equated to a maximum allowable diversion rate of 0.58 cfs.

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period - i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period may be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.

Dear Mr. Iverson:

On March 12, 2015 the investigation of your water use system, including the extent of application of water to beneficial use, as developed under Water Permit No. 5895-3, was completed by Mark Rath, a staff engineer with our program. Your final water right document, the water license, can now be issued.

State law requires that we charge a \$50.00 fee for the investigation and issuance of the water license. Upon receipt of the \$50.00 fee from you, we will complete processing your water license. The check or money order for the fee should be made payable to the "Water Rights Program".

Your licensed water right will be similar to a property right that cannot be lost as long as the water use continues and you abide by the permit requirements.

If you have any questions regarding the water permit, investigation of your water use system or payment of the fee, please contact me.
