Notice of Hearing - date to intervene: _____

SOUTH DAKOTA
WATER PERMIT NO. 6042-3 FOR IRRIGATION

Date of first receipt of application June 16, 1997.

Date of return to applicant for corrections, amendments or changes June 17, 1997.

Date of receipt of corrected application January 22, 1998.

The Water Management Board approved Water Permit Application No. 6042-3 on May 6, 1998 for Raymond Jensen, RR 3 Box 92, Dell Rapids SD 57022 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 6042-3 appropriates 1.40 cubic feet of water per second from the Big Sioux River located in the NW ¼ SW ¼ Section 1 to irrigate 98.3 acres located in the NW ¼ SW ¼, W ½ NW ¼ (Lots 1 & 2) Section 1; all in T104N-R49W.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: May 1 – September 30.
3. The date from which applicant may claim right is January 22, 1998.
4. One-fifth of the construction is to be completed on or before November 6, 2000.
5. All construction is to be completed on or before May 6, 2003.
6. Water is to be put to beneficial use on or before May 6, 2007.
7. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. Low flows as needed for downstream domestic use, including livestock water and prior water rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is being by-passed when pumping at the Dell Rapids USGS gauging station, or unless written orders have been issued by the Chief Engineer. Diversions under this permit shall be in accordance with any written orders issued by the Chief Engineer.
2. The City of Sioux Falls has senior priority rights to Big Sioux River flows under Future Use Permit Nos. 3981-3 and 3981A-3. Future diversions under Permit No. 6042-3 will be subject to these prior rights, and an increased by-pass may be required if and when the City of Sioux Falls develops the water reserved by Future Use Permit Nos. 3981-3 and 3981A-3.
3. The Water Management Board retains jurisdiction of Permit No. 6042-3 in the event that the City of Sioux Falls develops water reserved by future use permit or additional information shows that changes need to be made in the by-pass requirement.

(continued)

4. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

June 17, 1997

Raymond Jensen
RR 3 Box 92
Dell Rapids SD 57022

Dear Mr. Jensen:

Thank you for submitting your *Application for a Permit to Appropriate Water for Irrigation*.

Your application indicates this is an application to Amend Water Right No. 1350-3. Since this is new acreage to be irrigated and a new diversion point, this application will be considered a New application and will receive a new priority date.

Item No. 7 of the application states you plan to irrigate 18.3 acres located in the NW 1/4 SW 1/4 Section 1 and 80 acres located in the W 1/2 NW 1/4 (Lots 1 & 2) Section 1; all in T104N-R49W for a total of 98.3 acres. The application fee to irrigate 98.3 acres is \$225. The \$50 you submitted has been receipted and an additional \$175 is required.

It appears from the location marked on the map that the diversion point from the Sioux River is located in the NE 1/4 SW 1/4 Section 1-T104N-R49W. Is this a correct location?

Also, your application indicates no additional water is needed. Under State Statutes you are allowed 1 cfs (450 gpm) for each 70 acres irrigated. This would mean that you are allowed 1.40 cfs (630 gpm) for the 98.3 acres to be irrigated. Please let us know if you concur with this change on your application.

If you have any questions, please contact me.

Sincerely,

Karen Schlaak

REPORT ON WATER PERMIT APPLICATION NO. 6042-3

Raymond Jensen

March 4, 1998

Application No. 6042-3, Raymond Jensen, proposes to appropriate 1.40 cubic feet of water per second from the Big Sioux River. The diversion point is to be located in the NW1/4 SW1/4 of Section 1 T104N-R49W. The water will be used to irrigate 98.3 acres located in the NW1/4 SW1/4, W1/2 NW1/4 (Lots 1 & 2) in Section 1 T104N-R49W. The proposed project is located approximately 2 miles NE of the town of Dell Rapids in Minnehaha County.

Review of the Proposed Project and Existing Water Rights

The applicant proposes to irrigate 98.3 acres by diverting Big Sioux River water at a rate of 1.40 cfs. There are 32 existing water rights/permits appropriating 79.31 cfs from the Big Sioux River downstream from the proposed diversion point to the confluence with the Missouri River. From the proposed diversion point to a point just below Sioux Falls there are 9 existing permits/rights appropriating 40.98 cfs. The City of Sioux Falls also holds Future Use Permit Nos. 3981-3 and 3981A-3 for Big Sioux River water for which 40,000 acre-feet is still in reserve. The Big Sioux River downstream from Sioux Falls generally receives sufficient flow from tributary inflows and effluent discharge from the Sioux Falls waste water treatment plant to meet the needs of the downstream water permit/right holders.

The United States Geologic Survey maintains several gauging stations on the Big Sioux River for monitoring flow. The river gauging station near Dell Rapids is located approximately 9 miles downstream from this project. Table 1 shows the flow duration hydrograph data from this station based upon 39 years of record.

Table 1. Flow duration hydrograph data for May through September for the Big Sioux River near Dell Rapids.

	Probability of Flow, cfs				
	10%	30%	50%	70%	90%
May	1166	611	258	136	59
Jun	1602	533	205	108	39
Jul	795	363	150	62	24
Aug	542	137	65	25	12
Sep	231	90	52	26	5

The Water Management Board approved Water Permit No. 5530-3 on December 4, 1991 for irrigation with a diversion rate of 5.84 cfs from the Big Sioux River. The diversion point for No. 5530-3 is located approximately 9 miles upstream from this project. No. 5530-3 contains a

qualification requiring a 35 cfs bypass at the USGS Gauging Station at Dell Rapids. If approved this permit should require a 41 cfs bypass at the Dell Rapids gauging station to protect senior water rights including No. 5530-3. If at a future date Sioux Falls develops water appropriations under their future use permits or there is a significant change in the amount of water pumped by senior water rights, the bypass qualification may need to be changed by the Water Management Board.

Conclusions

1. This application proposes to appropriate 1.40 cubic feet of water per second (cfs) from the Big Sioux River for irrigation of 98.3 acres.
2. The City of Sioux Falls holds Future Use Permit Nos. 3981-3 and 3981A-3 for Big Sioux River water for which 40,000 acre-feet is still in reserve.
3. The Water Management Board approved Water Permit No. 5530-3 with a bypass qualification at the Dell Rapid gauging station. If approved, this permit should contain a 41 cfs bypass qualification at the Dell Rapid gauging station to protect domestic use and senior water rights including No. 5530-3.
4. If at a future date Sioux Falls develops water appropriations under their future use permits or there is a significant change in the amount of water pumped by senior water rights, the bypass qualification for this permit may need to be changed by the Water Management Board.

Natural Resources Engineer III

Approved by:

Delvin D. Brosz, P.E.
Natural Resources Engineer IV

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6042-3, Raymond Jensen**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6042-3, Raymond Jensen, RR 3, Box 92, Dell Rapids, SD 57022..

The Chief Engineer is recommending APPROVAL of Application No. 6042-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. Low flows as needed for downstream domestic use, including livestock water and prior water rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is being by-passed when pumping at the Dell Rapids USGS gauging, or unless written orders have been issued by the Chief Engineer. Diversions under this permit shall be in accordance with any written orders issued by the Chief Engineer.
2. The City of Sioux Falls has senior priority rights to Big Sioux River flows under Future Use Permit Nos. 3981-3 and 3981A-3. Future diversions under Permit No. 6042-3 will be subject to these prior rights, and an increased by-pass may be required if and when the City of Sioux Falls develops the water reserved by Future Use Permit Nos. 3981-3 and 3981A-3.
3. The Water Management Board retains jurisdiction of Permit No. 6042-3 in the event that the City of Sioux Falls develops water reserved by future use permit or additional information shows that changes need to be made in the by-pass requirement.
4. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Dear Mr. Jensen:

Water Permit Application No. 6042-3 for irrigation use has been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice of hearing has been sent to the Publisher of the Dell Rapids Tribune printed at Dell Rapids, SD (Ph # (605) 428-5441). For your information, a copy of the notice, the recommendation of the Chief Engineer and a report on the application are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper to authorize publication of your Notice of Hearing and to arrange for payment. Early contact with the paper can eliminate delays. The publisher has been instructed to publish your notice once each week for two consecutive weeks with the last publication to occur twenty days before the board meeting. The newspaper has been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund
Natural Resources Engineer

Instruction to Newspaper - Publish first Notice on April 8, 1998, with the second publication 7 days later. The applicant is responsible for payment.

NOTICE OF APPLICATION NO. 6042-3 to Appropriate Water

Notice is given that Raymond Jensen, RR 3 Box 92, Dell Rapids, SD 57022 has filed an application for a water permit to appropriate 1.40 cubic feet of water per second from the Big Sioux River located in the NW 1/4 SW 1/4 Section 1 to irrigate 98.3 acres located in the NW 1/4 SW 1/4, W 1/2 NW 1/4 (Lots 1 & 2) Section 1; all in T104N-R49W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 6042-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest.

Any person interested in opposing or supporting this application must file a written petition with BOTH the applicant and Chief Engineer. The applicant must also file a petition if opposed to the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by April 27, 1998. The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

The Water Management Board will consider this application at 10:00 a.m. (CDT), May 6, 1998, Floyd Matthew Training Center, Joe Foss Building, 523 East Capitol, Pierre, SD. The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) approve with qualifications, 3) defer, or 4) deny this application based on the facts presented at the public hearing. The May 6, 1998, hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from the applicant or any interested person opposing the application. The request for an automatic delay must be filed by April 27, 1998.

Any hearing will be an adversary proceeding. Any person filing a petition and/or the applicant have the right to be represented by a lawyer and may present evidence or cross-examine witnesses according to SDCL 1-26. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law. Contact Eric Gronlund by April 27, 1998, at the above Water Rights Program address to request copies of information pertaining to this application, to assure access to the hearing by the handicapped or to obtain an interpreter for the hearing impaired.

This application is made pursuant to SDCL 46-1-1 thru 46-1-9, 46-1-12 thru 46-1-16; 46-2-3.1, 46-2-9, 46-2-11, 46-2-13, 46-2-17; 46-2A-1 thru 46-2A-10, 46-2A-12, 46-2A-14, 46-2A-15, 46-2A-20, 46-2A-21; 46-5-1 thru 46-5-11, 46-5-13 thru 46-5-15, 46-5-24, 46-5-25, 46-5-30.2, 46-5-30.4, 46-5-31; 46-6-3, 46-6-3.1, 46-6-6.1, 46-6-10, 46-6-13, 46-6-14, 46-6-26; and Board Rules ARSD 74:02:01:01 thru 74:02:01:15. Dear Mr. Jensen:

Enclosed is Water Permit No. 6042-3 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that the Water License may be issued, thus completing your acquisition of a Water Right.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Program
(605) 773-3352

enclosures

PLEASE NOTE: Certain changes may be made to your water permit usually without affecting the priority date. The location of a point of diversion may be changed or additional points of diversion may be approved if the water source remains unchanged; no additional water is appropriated; and, if irrigating, no additional land is irrigated. The change may be allowed without application or publication, if the Water Rights Program is contacted and the chief engineer makes a finding that the change does not increase the potential for interference with existing diversions.

A new water permit application is required to change water sources, increase the permitted diversion rate, or increase the irrigated acreage. If the application is approved, the water permit will receive a new priority date.

6042-3

NOTICE

TO: RAYMOND D JENSEN, RR 3 BOX 92, DELL RAPIDS, SD 57022

FROM: Ron Duvall, Natural Resources Engineer
for Garland Erbele, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 1999 Irrigation Questionnaire(s)

Our records indicate that the 1999 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 7, 1999. The Water Management Board has directed that owners of water permits who have not submitted the 1999 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at 1:30 pm, March 1, 2000 in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol, Pierre, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is(are) received in this office on/or before February 28, 2000, you will no longer be in violation of your permit and your name will be deleted from the Board agenda. If you have questions or need assistance in completion of the irrigation questionnaire(s), please contact Genny McMath at (605) 773-3352.

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

Permit No. 6042-3
Big Sioux River - Water District

Report of Examination of Works and/or Application of Water to Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, June 27, 2006, made a thorough examination of the water use system constructed by Raymond Jensen of 24348 478th Ave, Dell Rapids, SD 57022 holder of Permit No. 6042-3, bearing the priority of January 22, 1998 authorizing the diversion of 1.40 cu. ft. per second of the waters of Big Sioux River for irrigation purposes, in Minnehaha County.

Inspection contact & relationship to permit holder, if applicable: **Raymond Jensen – cell # (605) 351-3220**

A. Works used to divert the water:

Pump:

- 1) Make Berkley
- 2) Model B3J
- 3) Size 6"
- 4) Capacity 450 GPM

Motor:

- 1) Make Diesel Tractor
- 2) Model No.
- 3) Horsepower rating _____ hp

B. Works used to transport water to place of use:

- 1) Type aluminum
- 2) Size 6 inches
- 3) Length 3180 feet

C. Works used to apply water to beneficial use:

Movable Hose:

- 1) Length 1350 feet
- 2) Diameter 4 inches

Chemigation Equipment:

- 1) Does chemigate no

D. Compliance with Permit Requirements:

- 1) Permit qualifications being abided by yes
- 2) Irrigation Questionnaires checked to determine if permit owner started irrigation by the end of construction period yes
- 3) Exceptions to compliance are: none

Report of Examination of Works

Permit No. 6042-3

The system is in fair condition with the point(s) of diversion located as follows: 2320' N and 175' E of the SW corner Section 1-T104N-R49W; 43.839568, -96.666724. The works are capable of diverting and conveying to the place of use 1.0 cu. ft. per second of water which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

Section 1-T104N-R49W:

NW $\frac{1}{4}$ NW $\frac{1}{4}$ 38 acres NW $\frac{1}{4}$ SW $\frac{1}{4}$ 11 acres

SW $\frac{1}{4}$ NW $\frac{1}{4}$ 38 acres

comprising a total of 87 acres of land and the license should be issued for 1.0 cfs.

All structures, wells and lands on map yes

Dear Mr. Jensen:

On June 27, 2006 the investigation of your water use system, including the extent of application of water to beneficial use, as developed under Water Permit No. 6042-3, was completed by Lynn Beck, a staff engineer with our program. Your final water right document, the water license, can now be issued.

State law requires that we charge a \$50.00 fee for the investigation and issuance of the water license. Upon receipt of the \$50.00 fee from you, we will complete processing your water license. The check or money order for the fee should be made payable to the "Water Rights Program".

Your licensed water right will be similar to a property right that can not be lost as long as the water use continues and you abide by the permit requirements.

If you have any questions regarding the water permit, investigation of your water use system or payment of the fee, please contact Genny McMath with our program at (605) 773-3352.

Sincerely,

Karen Schlaak

STATE OF SOUTH DAKOTA

WATER LICENSE NO. 6042-3

(1) Raymond Jensen, 24348 478th Ave, Dell Rapids SD 57022 made Application No. 6042-3, June 16, 1997 for a water permit to divert 1.40 cubic feet of water per second from the Big Sioux River, Minnehaha County, South Dakota for irrigation purposes. Permit No. 6042-3, with a priority date of January 22, 1998 was approved May 6, 1998 and issued to the applicant for diversion of water with construction of the described water supply system to be completed on or before May 6, 2003 and for the application to beneficial use of water on or before May 6, 2007.

(2) The water supply system has been completed and water applied to beneficial use in accordance with South Dakota State Law. Pursuant to South Dakota Codified Law 46-5-30.1, the holder and/or owner of Water Right No. 6042-3 is issued a license, bearing a priority date of January 22, 1998 to appropriate 1.0 cubic feet of water per second from the Big Sioux River to irrigate 87 acres.

The diversion point is located: 2,320 feet north and 175 feet east of the southwest corner of Section 1-T104N-R49W (NW ¼ SW ¼). The acres authorized for irrigation are as follows:

Section 1-T104N-R49W	NW ¼ NW ¼ 38 acres	SW ¼ NW ¼ 38 acres (Lots 1 & 2)
	NW ¼ SW ¼ 11 acres	Total: 87 acres

(3) This license is subject to South Dakota Water Law, any limitations or conditions listed in Water Permit No. 6042-3 including the following now applicable qualifications:

- Low flows as needed for downstream domestic use, including livestock water and prior water rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is being by-passed when pumping at the Dell Rapids USGS gauging station, or unless written orders have been issued by the Chief Engineer. Diversions of under this permit shall be in accordance with any written orders issued by the Chief Engineer.
- The City of Sioux Falls has senior priority rights to Big Sioux River flows under Future Use Permit Nos. 3981-3 and 3981A-3. Future diversions under Permit No. 6042-3 will be subject to these prior rights, and an increase by-pass may be required if and when the City of Sioux Falls develops the water reserved by Future Use Permit Nos. 3981-3 and 3981A-3.
- The Water Management Board retains jurisdiction of Permit No. 6042-3 in the event that the City of Sioux Falls develops water reserved by future use permit or additional information shows that changes need to be made in the by-pass requirement.
- This permit is approved subject to the irrigation water use questionnaire being submitted each year.

Garland Erbele

Garland Erbele, Chief Engineer
Water Rights Program
Department of Environment and Natural Resources

DEC 22 2006

date

Amendment to the qualifications contained in Water Right No. 6042-3

Deleted Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is flowing past the Dell Rapids USGS Gaging Station, or unless written orders have been issued by the Chief Engineer. Diversions under this Permit are shall be in accordance with any written orders issued by the Chief Engineer.

New Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Prior to issuing any shut off orders, the Chief Engineer shall also take into consideration the flows at the USGS Gaging Station No. 6482020 at North Cliff Avenue in Sioux Falls. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

1350-3 6042-3

Mrs. Raymond D Jensen & Scott Jensen, Operator
24348 478th Ave
Dell Rapids SD 57022

Dear Mrs. Jensen and Mr. Jensen:

I am writing in response to action taken by the Water Management Board on May 3, 2018, regarding the Hearing to Amend the Bypass Qualifications on Big Sioux River water rights.

Attached is the qualification that was deleted from your water right and the new qualifications.

This amendment designates a US Geological Survey gaging station as the measuring point to determine if pumping is allowed. The gaging station has real time flow information that can be accessed online at <https://waterdata.usgs.gov/sd/nwis/rt>. However, the water right is also subject to written orders of the Chief Engineer regardless of the bypass criteria.

If you have questions concerning the Board action or your water right(s), please contact Mark Rath with our program at 605 773-3352 or mark.rath@state.sd.us.

Sincerely,

Jeanne Goodman, Chief Engineer
Water Rights Program

NOTICE

TO: RAYMOND D JENSEN, 24348 478TH AVE, DELL RAPIDS, SD 57022

FROM: Ron Duvall, Natural Resources Engineer
for Garland Erbele, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2008 Irrigation Questionnaire(s)

Our records indicate that the 2008 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 24, 2008. The Water Management Board has directed that owners of water permits who have not submitted the 2008 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **10:00 am, March 11, 2009** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

- 1 Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office on/or before **March 6, 2009**, you will no longer be in violation of your permit and your name will be deleted from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352. If you prefer, you can complete the questionnaire on-line at the following link:

<https://www.state.sd.us/eforms/secure/eforms/E0455V7-IQ.pdf>

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

Dear Mr. Jensen:

I am writing to acknowledge receipt of your 2008 irrigation questionnaires. You may disregard the January 23, 2009, "Notice" concerning reporting requirements for Water Right Nos. 1350-3 and 6042-3.

The information was received in our office prior to the Water Management Board meeting and your name has been deleted from the agenda.

If you have any questions, please contact me.

Sincerely,

A handwritten signature in cursive script that reads "Genny McMath".

NOTICE

TO: RAYMOND D JENSEN, 24348 478TH AVE, DELL RAPIDS, SD 57022
FROM: Ron Duvall, Natural Resources Engineer
for Garland Erbele, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2009 Irrigation Questionnaire(s)

Our records indicate that the 2009 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 16, 2009. The Water Management Board has directed that owners of water permits who have not submitted the 2009 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **10:00 am, March 10, 2010** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office on/or before **March 5, 2010**, you will no longer be in violation of your permit and your name will be deleted from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. If you prefer, you can complete the questionnaire online at the following link: <https://denr.sd.gov/iq/asp>

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

March 11, 2010

NOTICE OF ONE YEAR SUSPENSION OF WATER RIGHTS

TO: Raymond D Jensen, 24348 478th Ave, Del Rapids SD 57022

FROM: Garland Erbele Chief Engineer
Water Rights Program

SUBJECT: One Year Suspension of Water Right Nos. 1350-3 and 6042-3

On March 10, 2010, the Water Management Board ordered:

Effective April 10, 2010, Water Right Nos. 1350-3 and 6042-3 be suspended for the 2010 irrigation season for failure to submit the 2009 irrigation questionnaires.

If the 2009 irrigation questionnaires are received prior to April 10, 2010 the suspension will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2010 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2010 unless the irrigation questionnaires are submitted by April 10th.

After April 10th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2009 irrigation questionnaires and a letter to our office requesting time on the agenda for the Water Management Board meeting scheduled for May 5, 2010 in Pierre, SD. The letter should include your reasons for not completing the 2009 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

CERTIFICATION

I hereby certify that on March 11, 2010, I have personally deposited with the United States mail at Pierre, South Dakota, first class postage, prepaid envelopes containing a Notice dated March 11, 2010 regarding failure to submit irrigation questionnaires addressed as stated below:

One Year Suspension:

1828-1	Danny Adams, 2010 Avalon Pkwy Ste 400, McDonough GA 30253-3011
1769-1	Lee Ahrlin, 531 Fox Run Dr, Rapid City SD 57701

August 6, 2012

Dear Water Right Holder;

Due to low flows I am advising water right holders on the Big Sioux River of the possibility of shutoff orders in 2012 for the river reach from Watertown through Sioux Falls. This is **not a shutoff order**.

As a result of the continuing lack of precipitation, tributary flows throughout the Big Sioux River basin remain well below the historical average. The forecast for improved conditions for the near future is not favorable.

This letter is only intended to give you advanced warning that your ability to divert water may be cut short this year. If shut-off orders are issued, you will receive another letter from the department. In the meantime, water right holders can help by closely monitoring water usage and trying to avoid wasting water.

South Dakota water law gives the highest priority to domestic use, which includes livestock watering. There is generally adequate water available to meet both domestic use and other needs. However, once water availability reaches critical low levels, other uses, including irrigation, will begin to interfere with domestic use. If levels become critically low, the department must issue shut-off orders to protect domestic water uses. Once these orders are issued, the department will continue to monitor water availability and should conditions improve, the shutoff orders would be rescinded.

If you are interested, the US Geological Survey has an Internet site showing real-time river flows at 159 stream gauging stations across the state including three gages sites on the Big Sioux River. To access this information go to <http://waterdata.usgs.gov/sd/nwis/rt> and click on the link "Statewide Streamflow Current Conditions Table".

Thank you for your cooperation. If you have any questions, please contact Lynn Beck or Mark Rath at (605) 773-3352.

Sincerely,

Garland Erbele, Chief Engineer
Water Rights Program

CERTIFICATION

NOTICE OF SHUTOFF ORDER

TO: Raymond D Jensen
24348 478th Ave
Dell Rapids SD 57022

FROM: GARLAND ERBELE, Chief Engineer
Water Rights Program

SUBJECT: Big Sioux River Shutoff Order

Shutoff Order for Water Right No 6042-3.

The flow in the Big Sioux River is below 40 cubic feet per second (cfs) at the USGS gaging station near Dell Rapids, SD. A qualification under Permit No. 6042-3 states that diversions from the Big Sioux River are authorized only when flow at the Dell Rapids gage is at least 41 cfs while pumping under this permit. Therefore, effective immediately, no diversion of water from the Big Sioux River is authorized under Water Permit No. 6042-3.

Flow in the Big Sioux River has dropped to the point where domestic use of water, which includes livestock watering from the river and diversions for senior water rights, have become a concern. This order will be rescinded as soon as conditions improve. If conditions do not improve, this order will remain in effect until the end of the calendar year.

I am asking for your cooperation in complying with this shutoff order. The ongoing drought is creating hardship for all the water right holders along the river. If you have any questions, please contact Lynn Beck or Mark Rath with the Water Rights Program at (605) 773-3352. Thank you.

NOTICE

TO: SCOTT JENSEN, MGR, 24348 478TH AVE, DELL RAPIDS, SD 57022

FROM: Ron Duvall, Natural Resources Engineer
for Garland Erbele, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2014 Irrigation Questionnaire(s)

Our records indicate your 2014 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 17, 2014. The Water Management Board has directed that owners of water permits who have not submitted the 2014 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **10:00 am, March 4, 2015** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 4, 2015** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. If you prefer, you can complete the questionnaire online at the following link: <http://denr.sd.gov/iq.aspx>

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

March 3, 2016

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION OF WATER RIGHTS

TO: Scott Jensen, Mgr., 24348 478th Ave, Dell Rapids SD 57022

FROM: Jeanne Goodman, Chief Engineer 
Water Rights Program

SUBJECT: One Year Suspension of Water Right Nos. 1350-3 and 6042-3

On March 3, 2016, the Water Management Board ordered:

Effective April 4, 2016, Water Right Nos. 1350-3 and 6042-3 be suspended for the 2016 irrigation season for failure to submit the 2015 irrigation questionnaires.

If the 2015 irrigation questionnaires are received prior to April 4, 2016, the suspension will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2016 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2016 unless the 2015 irrigation questionnaires are submitted by April 4th.

After April 4th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2015 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 4-5, 2016, in Pierre, SD. The letter should include your reasons for not completing your 2015 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

NOTICE

TO: Scott Jensen, Mgr, 24348 478th Ave, Dell Rapids SD 57022

FROM: Ron Duvall, Natural Resources Engineer
for Jeanne Goodman, Chief Engineer
Water Rights Division 

SUBJECT: Unclaimed Certified Mail Concerning Suspension of Water Right Nos. 1350-3
and 6042-3

The attached notice was sent certified mail. The post office has returned the certified mail to our office marked "**unclaimed**". The envelope indicated the post office notified you March 5 and March 10, 2016 to pick up and sign for the certified mail. They held the mail for you to claim until March 20th.

If you have any questions, please contact Genny McMath, (605) 773-3352.

CERTIFICATION

I hereby certify that on March 29, 2016, I have personally deposited with the United States mail at Pierre, South Dakota, first class postage, prepaid envelope(s) containing a Notice dated March 29, 2016 regarding unclaimed certified mail concerning suspension of water rights addressed as stated below:

Water Right Nos. 1350-3 and 6042-3

Scott Jensen, Mgr, 24348 478th Ave, Dell Rapids SD 57022

RE: Suspended Irrigation Permits

COMMENTS:

Kyle Anderson, DENR-Water Rights Program Seasonal Observation Well Technician, drove by the lands permitted for irrigation by Water Right Nos. 1350-3 and 6042-3 on June 20, 2016 and July 11, 2016 per the instructions of Whitney Kilts. At that time he witnessed no irrigation at either site. He also stated there did not appear to be any irrigation equipment at either site.

Dell Rapids SD 57022

Dear Mr. Jensen:

I am writing in follow-up to our phone conversation concerning Water Right Nos. 1350-3 and 6042-3. I have included copies of the water rights in the event you do not have them.

The water rights are both listed in your dad's name. Enclosed are partially completed Notice of Transfer of Ownership forms for filing the ownership changes. Upon completion, please have the forms signed and returned to our office with a required filing fee of \$50.00 each (total of \$100). The check or money order for the fee can be made payable to the Water Rights Program.

I completed a set of 2017 irrigation questionnaires for you based on our conversation and have enclosed a copy for you to keep. They reflect that you did not irrigate because you believed the water rights were still under suspension.

If you have any questions concerning any of the enclosed information, please give me a call.

Sincerely,

Genny McMath

DELL RAPIDS SD 57022

Subject: Bypass Qualifications on Big Sioux River Water Rights

Dear MR JENSEN,

I am writing to inform you of an effort the SD Dept. of Environment and Natural Resources Water Rights Program is undertaking to review and update a number of water right permits authorized to pump water from the Big Sioux River. When a number of these permits were issued, they contained a qualification requiring a minimum flow bypass before the user is able to pump water from the river. The bypass qualification was placed on these permits to protect the use of water by downstream senior priority water right holders and domestic water users, which includes livestock watering. The review found, with the passage of time, a number of senior water right permits have been cancelled due to abandonment or forfeiture. Consequently, it may be possible to lower the flow bypass limitation on the remaining permits. In other words, the amount of flow in the river can be lower and pumping will still be allowed. The review also found an inconsistency between permits on where the bypass flow is to be measured.

The intent of this effort is to standardize and make consistent the bypass requirements for the remaining water users. In most cases, the proposed changes will reduce the flow bypass requirement on the individual permits. To make the permits consistent, the bypass measuring point will also be designated at a United States Geological Survey (USGS) stream gaging station. The USGS maintains a real-time stream gaging network on the Big Sioux River. Current river flow information can be easily accessed from the internet at the following internet address:

<https://waterdata.usgs.gov/sd/nwis/rt>

In order to amend a qualification on an existing water right permit, formal action by the SD Water Management Board is needed. In the next few weeks, you can expect to receive official notification scheduling a hearing before the Water Management Board. If you wish to participate in the hearing you can, but you are not required to. There will be instructions with the notification on how to participate in the hearing if you so choose.

If you have any questions concerning this effort, please contact Mark Rath of the Water Rights Program at phone (605) 773-3352.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeanne Goodman". The signature is fluid and cursive, written over a horizontal line.

Mrs. Raymond D Jensen & Scott Jensen, Operator
24348 478th Ave
Dell Rapids SD 57022

Subject: Bypass Qualifications on Big Sioux River Water Rights

Dear Mrs. Jensen & Mr. Jensen:

The SD Department of Environment and Natural Resources has evaluated the minimum flow bypass condition on water rights that pump from the Big Sioux River. The Chief Engineer is recommending amending the bypass qualification on 21 Big Sioux water rights. The intent is to bring uniformity to the bypass requirement placed on water rights in past years. Water Right(s) that you own or operate are included in those proposed to be amended.

Attached is the qualification to be deleted from the water right(s) and the proposed new qualifications.

The proposed amendment to your water right will not impose a more restrictive condition than currently is in place on your water right. In some cases the bypass requirement remains the same but generally the proposed amendment decreases the minimum bypass that must exist before a user is able to pump water from the river. The amendment does designate a US Geological Survey gaging station as the measuring point to determine if pumping is allowed. The gaging station has real time flow information that can be accessed on-line at <https://waterdata.usgs.gov/sd/nwis/rt>. Many, but not all, water rights referenced the bypass being located at the pump site where there isn't real time flow information.

A hearing before the Water Management Board is scheduled at 11:30 AM, Wednesday, March 7, 2018 in the Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre SD. Enclosed is the notice to be published on or before February 15, 2018, in one newspaper from each of the seven counties that the Big Sioux River flows through. This notice provides information on filing a petition in either support or opposition to the propose amendment. The filing of a petition must be postmarked by February 26, 2018. Additionally filing a petition affords you the opportunity to participate in the March 7th hearing before the Board if you choose.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or contact Mark Rath at 605 773-3352 or mark.rath@state.sd.us. If you have questions, please call. DENR is willing to work to answer any questions.

Sincerely,

Eric Gronlund

enclosure

Proposed Qualification Revisions

In order to standardize the bypass qualifications for the 14 existing water rights/permits containing bypass qualifications in the Big Sioux River reach between the USGS stream gaging station near Castlewood downstream to the USGS stream gaging station near Dell Rapids, the following changes are proposed.

Amendment to the qualifications contained in Water Right No. 6042-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is flowing past the Dell Rapids USGS Gaging Station, or unless written orders have been issued by the Chief Engineer. Diversions under this Permit are shall be in accordance with any written orders issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Review of Big Sioux River Water Rights and Report on Proposed Amendments

February 13, 2018

Introduction

The Big Sioux River is a prairie stream with headwaters located in the northern prairie coteau in southern Roberts, eastern Day and eastern Clark counties, in northeastern South Dakota. The river drains glacial till and outwash plains as it runs southward to its junction with the Missouri River near Sioux City, Iowa. The Big Sioux River physical geography is characterized by glaciated terrain and rolling plains. Rivers commonly follow the valleys formed by glacial lobes, which were glaciated as recently as 14,000 years ago. Drainages in this region formed after retreat of glaciers and are therefore poorly established in parts of the watershed. The poorly established drainage patterns are accompanied by numerous areas of internal drainages, or “potholes,” and are commonly referred to as the “Prairie Pothole Region” (Hoogestrat and Stamm, 2015).

As is typical of prairie streams in South Dakota, the peak runoff occurs during the spring months due to plains snowpack melt and from runoff of larger rain events. Runoff tends to decrease in the late summer months going in to fall and winter.

Qualification Status

A review of Water Right Program files shows there have been 163 water right permits (water permits) issued for the Big Sioux River, some with priority dates going back to statehood. Many of these have been cancelled due to abandonment or forfeiture, some have been incorporated into other water permits and some remain active. An examination of water right files found the Water Resources Commission placed the first bypass qualification, 20 cubic feet per second (cfs) bypass at the diversion point, on a Big Sioux River water permit in Moody County in 1960 (Water Rights, 2018).

After the Water Resources Commission placed the first bypass qualification on a Big Sioux River water permit in 1960, it appears from then until the mid-1990’s, with the advent of real-time accessible stream gaging, the management of water permits from the Big Sioux River was primarily addressed on a river reach basis and the presence of senior priority water permits. Water permits issued in a similar reach with relatively similar priority dates would have the same bypass requirements. Later when water permits were issued, the bypass requirement would be incrementally increased to account for protection of the senior priority water permits (Water Rights, 2018).

The northern most river reach, from the headwaters in southern Roberts County to the Brookings – Moody county line, only has a hand full of permits issued since 1960. Bypass qualifications range from 5 cfs for those water permits issued in the mid-1960’s to 35 cfs for those issued more recently (Water Rights, 2018).

In the Big Sioux River reach from the northern border of Moody County to Dell Rapids, which has the most water permits issued, the 20 cfs bypass requirement was placed on Big Sioux River water permits from 1960 until 1966 when the bypass requirement was raised to 30 cfs for new permits issued. In 1968 the bypass requirement was raised to 35 cfs and was then incrementally increased to 50 cfs by 1976. Many of these water permits have subsequently been cancelled due to abandonment or forfeiture. The most recent water permits issued in this reach contained a 43 cfs bypass requirement (Water Rights, 2018).

In the Big Sioux River reach immediately to the south between Dell Rapids where the Big Sioux River crosses Cliff Avenue on the eastern side of Sioux Falls there have been multiple water permits issued. These contain a 20 cfs bypass requirement. Earlier issued water permits require a 20 cfs bypassed at the diversion point while the later issued ones require a 20 cfs bypass at the United States Geologic Survey (USGS) stream gaging station at North Cliff Avenue in Sioux Falls (Water Rights, 2018 and USGS, 2018).

The southernmost river reach from where the river crosses North Cliff Avenue in eastern Sioux Falls to the confluence with Missouri River in southern Union County does not have any water permits with bypass requirements. This reach, even during drier climatic conditions has sufficient flow exceeding demand. The additional flow is attributed to effluent discharge from the Sioux Falls waste water treatment plant and contributions from downstream tributaries such as Split Rock Creek near Brandon (Water Rights, 2018).

Currently there are 59 active water permits authorized for the Big Sioux River from the headwaters in Roberts County to the mouth in Union County, Figure 1. There have been 49 water permits issued since 1960, when the first bypass requirement was enacted, to present which have subsequently been cancelled due to abandonment or forfeiture. Currently 21 of the existing water permits contain some sort of flow bypass qualification. When the water permits were issued with bypass qualifications, it was done because the senior priority water permits were active and being used, so the amount of the bypass requirement placed on the water permit was based on a level to protect senior priority water use. Since there has been significant attrition in the number of active water permits using Big Sioux River water since 1960, with many of them being cancelled, this leaves a somewhat disjointed system of bypass requirements for the remaining water permits. In addition, the City of Sioux Falls holds two active future use permits with 1977 priority dates reserving 30,000 acre-feet of Big Sioux River water in the river reach between the Dell Rapids gage and the North Cliff Avenue gage (Water Rights, 2018 and USGS, 2018).

Figure 1. Area map of the Big Sioux River showing the locations of the active water rights/permits and USGS Big Sioux River stream flow gaging stations (Water Rights, 2018 and USGS, 2018).

It is proposed that the existing bypass qualifications for each of the active water permits be reviewed, taking into account the amount of bypass required, the presence of existing rights, the location of the diversions points, and the historical river flow conditions along the various reaches of the river. This review will determine if it is justified to recommend modifications of the existing bypass qualifications.

Authority

SDCL 46-1-14 gives the Water Management Board the authority to amend water right permits. Water permits issued by the board may be amended by the board with priority retained upon amendment. The board may alter terms, conditions, restrictions, qualifications or quantifications.

South Dakota Codified Law

46-1-14. Terms and conditions of permits and licenses--Amendment. The Water Management Board may issue any permit or license subject to terms, conditions, restrictions, qualifications, quantifications, or limitations on perpetuity consistent with this chapter which it considers necessary to protect the public interest and which are related to matters within the jurisdiction of the board. Water rights issued pursuant to this section may be amended by the board and priority is retained upon amendment. Upon amendment the board may alter terms, conditions, restrictions, qualifications, or quantifications consistent with this chapter.

46-2-3.1. Delegation of authority to chief engineer--Restrictions. The Water Management Board may delegate to the chief engineer authority to act on its behalf concerning the quasi-judicial functions of interpreting, applying, and enforcing existing rules and laws and ordering action or abatement of action. The board may not delegate any other quasi-judicial functions as defined in § 1-32-1, except as otherwise provided by law. The board may promulgate rules pursuant to chapter 1-26 to delegate to the chief engineer the authority to issue permits pursuant to § 46-1-14.

46-2-17. Chief engineer's general enforcement authority. The chief engineer may:

- 1) Investigate the use of the waters of the state and compliance with the provisions of water permits, licenses, rules, regulations, and laws relating to water rights;
- 2) Institute enforcement and other proceedings before the Water Management Board;
- 3) Enforce orders of the board; and
- 4) Perform other acts authorized by statute or regulation.

46-2-18. Chief engineer's authority to order discontinuance of water use. The provisions of chapter 1-26 notwithstanding, the chief engineer may, after appropriate investigation, issue an order to any person to shut off or limit the person's use of surface or groundwater, or to plug or otherwise control a well. The order may be issued only to protect another user who has higher or earlier priority or to cause a user of water to discontinue the use of water to which the user has no legal right. Upon a refusal to obey the order, the chief engineer may request a court of proper jurisdiction to issue a temporary restraining order or injunction to effectuate the provisions of the order.

The 21 remaining active water permits authorized to divert water from the Big Sioux River having bypass requirements are subject to SDCL 46-2-3.1, 46-2-17, and 46-2-18, as are all water permits. These statutes give the Chief Engineer the ability to issue written orders within the context of authority granted under the statutes. The remaining 37 active water permits without any bypass requirements authorized to use Big Sioux River water either have priority dates senior to 1960 or are located in the river reach between the North Cliff Avenue gage and the confluence with the Missouri River. There is no intent with this effort to place bypass qualifications on these 37 water permits that do not currently have bypass qualifications.

Evaluation of the Existing Flow Bypass Qualifications and River Reach

The active Big Sioux water permits containing bypass qualifications vary on where the flow bypass is to be measured. The ones with earlier priority dates require a minimum flow past the diversion point. Because it is

impractical for the water user to measure flow at their pump site the more recently issued permits contained bypass qualifications referenced to a nearby United States Geological Survey (USGS) stream flow gaging stations.

In the section of river from southern Codington County to a point where the Big Sioux River crosses North Cliff Avenue in eastern Sioux Falls, three of the USGS gaging stations allowing access to real-time stream flow information have been used as measuring points for bypass limits from the river. See Table 1 (USGS, 2018).

Station Number	Station Name	Years Operated
06479525	Big Sioux River near Castlewood SD	1977-2017
06481000	Big Sioux River near Dell Rapids SD	1949- 2017
06482020	Big Sioux River at North Cliff Ave at Sioux Falls SD	1972- 2017

Table 1. USGS Big Sioux River stream flow gaging stations located near Castlewood, near Dell Rapids and at North Cliff Avenue in Sioux Falls SD (USGS, 2018).

The USGS has collected daily flow data at these gaging stations over several years. The USGS maintains an archive of historical flow and statistical flow data for these gaging stations that can be accessed by the public. A major concern in setting bypass qualifications is to identify the times when the river is experiencing lower flows and also to identify when those lower flows occurred. A review will focus on events when a particular stream segment experiences the lower half of the daily flow. Median, otherwise referred to as 50 percentile (50%), is used to help understand the central tendency of a set of statistical results with the lower half of measured daily flow values being at or less than the 50% value. Based on the period of record for each gage site, the daily flow value or less would be expected to occur on average 10 out of 20 years. At the 25 percentile (25%) flow value, the daily flow would be expected to be at or below that value an average of 5 out of 20 years. At the 10 percentile (10%) flow value, the daily flow would be expected to be at or below that value an average of 2 out of 20 years, (USGS, 2018).

Analysis and Proposed Qualification Revisions

A fresh look was taken of the original bypass requirements to determine whether the original bypass levels would be effective limits for the existing active water rights. The review took into consideration the existing water rights, the qualifications, the authorized use, the location of the diversion points, the annual period of use, and historic stream flow data.

Based upon this review, the river was broken into four separate bypass management reaches. The upper most reach is from the headwaters down to the Castlewood gage. The next reach is from the Castlewood gage to the Dell Rapids gage. The third reach is from the Castlewood gage to the North Cliff Avenue gage at Sioux Falls, and the final reach is from the North Cliff Avenue gage to the confluence with the Missouri River at North Sioux City.

The bypass qualifications originally adopted in the 1960's by the Water Resources Commission of 5 cfs for the reach north of Castlewood and 20 cfs for the reach between Castlewood to Dell Rapids were based on Water Rights staff recommendations. The recommendations were based on water use and flow history for each of those reaches. The 20 cfs bypass requirement for the river reach between Dell Rapids and Sioux Falls was first placed on a water permit in 1989 by the Water Management Board, a successor to the Water Resources Commission, following a low flow analysis by Water Rights staff for the Big Sioux River in that reach (Water Rights, 2018).

Of the 21 existing water permits containing some sort of flow bypass qualification all but two are for irrigation use. The two permits not for irrigation are for municipal use and are held by the City of Sioux Falls. Since most of the water permits having bypass qualifications were issued for irrigation, the following discussion

references a typical crop irrigation season of May 1 to October 15. The analysis focused on the typical irrigation season because this is characteristically when water management actions, such as issuing of shutoff orders by the Chief Engineer, would occur.

The irrigation season for grasses, as would be grown on golf courses and parks, may extend outside the typical irrigation season and run from the early April through late October. Of the four existing water permits for irrigation one is for a golf course at Dell Rapids and three are for irrigating golf courses and soccer fields in Sioux Falls (Water Rights, 2018).

Headwaters to Castlewood Reach

On the upper Big Sioux River there are four existing water permits, two are for storage in lakes Pelican and Kampeska and the other two are for irrigation. The two irrigation water permits containing a bypass qualification both are located approximately five miles upstream from the USGS stream gaging station near Castlewood. The total current authorized diversion rate for this reach is 4.26 cfs. Figure 2 shows the total annual appropriated volume and reported usage volume for the years 1983 to 2016 (Water Rights, 2018).

Figure 2. Total irrigation allocation and reported use from the Big Sioux River for the river reach upstream from the USGS gaging station near Castlewood (Water Rights, 2018).

On November 8, 1967, the Water Resources Commission set the initial bypass limit of 5 cfs on a water permit located in the upper river reach north of the Castlewood gage. The application for this water permit had been opposed at a previous meeting so the Commission deferred action and directed staff to investigate. At that time, staff determined excess water was available most years May through July, sometimes available in August and seldom available in September and October. In 2012, a permit was issued in this reach with a 35 cfs bypass qualification. This bypass requirement was the same one

previously placed on a downstream senior priority water permit located in the Castlewood to Dell Rapids reach (Water Rights, 2018).

Figure 3, is a hydrograph for the Castlewood gage showing the 50, 25 and 10 percentile daily flows for the 41 year period of record, 1977 to 2017. In Figure 3, the 10 percentile curve is above the 5 cfs line from the beginning of the irrigation season until the last 10 days of July. The 25 percentile curve is greater than 5 cfs throughout the irrigation season.

Figure 3. Daily percentile flow hydrographs for the USGS Big Sioux River near Castlewood 1977-2017, contributing drainage area 579 mi² (USGS, 2018).

The frequency of low flow events in the upper most river reach was examined by considering how many actual days the average daily flow was less than 5 cfs during the typical irrigation season of May through mid-October over the 41 year period of record. During that time frame 9.2% of the days that had flow less than 5 cfs fell within the May to mid-October irrigation season (USGS, 2018).

Figure 4 shows for the period of record at the Castlewood gage, the total number of days each year the average daily flow in the Big Sioux River was less than 5 cfs. This figure indicates this reach experiences dry climatic conditions causing several day periods of low flow less than 5cfs. The figure also shows there are many more years when the 5 cfs threshold is not met.

Figure 4. Total number of days for each year during the period of record the average daily flow in the Big Sioux River measured at the USGS gaging station near Castlewood was less than 5 cfs (USGS, 2018).

In this reach it is proposed for both of the existing irrigation water permits, the existing bypass qualification be amended to:

- Low flows as needed for downstream domestic use including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 5 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

Castlewood to Dell Rapids Reach

The river reach between the Castlewood gage and the Dell Rapids gage contains 29 active water permits. One of existing water permits is for flood flow diversion, two are for storage in Poinsett and Dry lakes and two water permits are for instream storage in Flandreau Dam and Dell Rapids Dam. The remaining 24 existing water permits are for irrigation, with 14 water permits containing bypass qualifications. The total current authorized diversion rate for this reach is 31.86 cfs. Figure 5 shows the total annual appropriated volume and reported usage volume for the years 1983 to 2016 (Water Rights, 2018).

In this Big Sioux River reach the original 20 cfs bypass requirement was placed on Big Sioux River water permits in April of 1960 by the Water Resources Commission based upon Water Rights staff review and recommendation to set bypass levels on permits. The bypass requirement was raised in 1966 to 30 cfs and was incrementally increased to 50 cfs by 1976. As stated earlier, many of these water permits have subsequently been cancelled due to abandonment or forfeiture (Water Rights, 2018).

Figure 5. Total irrigation allocation and reported use from the Big Sioux River for the river reach between the USGS gaging stations near Castlewood to the gaging station near Dell Rapids (Water Rights, 2018).

The current bypass limits on existing water permits in this reach range from 20 cfs to 50 cfs with some of the limits set at the diversion point and some measured at the Dell Rapids gage. Using the original 20 cfs bypass as the benchmark, this bypass level was compared to the historic flow record for the Dell Rapids gage. Figure 6 shows the daily percentile flow hydrographs for a 68 year period of record dating back to 1948 for the USGS stream gaging station near Dell Rapids. The 10 percentile curve is above 20 cfs value from the beginning of the irrigation season until the last ten days of August (USGS, 2018).

Figure 6. Daily percentile flow hydrographs for the USGS Big Sioux River gage near Dell Rapids 1949-2017, contributing drainage area 3057 mi² (USGS, 2018).

The frequency of low flow events in this reach was examined by considering how many actual days the average daily flow was less than 20 cfs during the typical irrigation season of May through mid-October over the 69 year period of record. During that time frame 7.2% of the days had flow less than 20 cfs within May to mid-October irrigation season (USGS, 2018).

Figure 7 shows for period of record at the Dell Rapids gage the total number of days for each year the average daily flow in the Big Sioux River was less than 20 cfs. Similar to what is seen in the upstream reach, this reach also experiences dry climatic conditions causing several days of low flow less than 20 cfs. The figure also shows there are many more years when the 20 cfs threshold is exceeded.

Figure 7. Total number of days for each year during the period of record the average daily flow in the Big Sioux River measured at the USGS gaging station near Dell Rapids was less than 20 cfs (USGS, 2018).

In this reach it is proposed for the 14 existing irrigation water permits the existing bypass qualification be amended to:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

Dell Rapids to North Cliff Avenue at Sioux Falls Reach

In the river reach between the Dell Rapids gage and the North Cliff Avenue at Sioux Falls gage there are six existing water permits. The total current authorized diversion rate for this reach is 87.33 cfs. One right is for instream storage at Baltic Dam, two of the existing rights are for municipal use, and three are for irrigation. The bypass requirement for five existing rights with qualifications is 20 cfs. Three of the water permits require 20 cfs bypassing the diversion point and two requiring measurement of the flow bypass at the North Cliff Avenue gage. It should also be noted the City of Sioux Falls holds two future use permits located in this reach reserving up to 30,000 acre-feet from the Big Sioux River. The Water Management Board did a seven year status review of these permits in July of 2016. The Board ruled to allow these future use permits to remain in effect for the full 30,000 acre-feet for an additional seven years. Figure 8 shows the total annual appropriated volume and reported irrigation usage volume for the years 1983 to 2016, and Figure 9 shows the total annual appropriated volume and reported municipal usage volume for the years 1983 to 2016 in this reach (Water Rights, 2018).

Figure 8. Total irrigation allocation and reported use from the Big Sioux River for the river reach between the USGS gaging stations near Dell Rapids to the gaging station at North Cliff Avenue at Sioux Falls (Water Rights, 2018).

Figure 9. Total municipal allocation and reported use from the Big Sioux River for the river reach between the USGS gaging stations near Dell Rapids to the gaging station at North Cliff Avenue at Sioux Falls (Water Rights, 2018).

Figure 10 shows the daily percentile flow hydrographs for a 45 year period of record dating back to 1971 for the USGS stream gaging station at North Cliff Avenue at Sioux Falls. The 10 percentile curve is above 20 cfs value from the beginning of the irrigation season until the curve drops slightly below 20 cfs line for a few days the first part of September before rising above 20 cfs for the remainder of the irrigation season (USGS, 2018).

Figure 10. Daily percentile flow hydrographs for the USGS Big Sioux River gage at North Cliff Ave at Sioux Falls 1971-2017, contributing drainage area 3778 mi² (USGS, 2018).

The frequency of low flow events in this reach was examined by considering how many actual days the average daily flow was less than 20 cfs during the typical irrigation season of May through mid-October over the 45 year period of record. During that time frame 2.6% of the days had flow less than 20 cfs fell within May to mid-October irrigation season (USGS, 2018).

Figure 11 shows for period of record at the North Cliff Avenue gage the total number of days for each year the average daily flow in the Big Sioux River was less than 20 cfs. Similar to what was experienced in the upstream reaches, this reach can also experience during dry climatic conditions causing several day periods of low flow less than 20 cfs. The figure also shows there are many more years when the 20 cfs threshold is exceeded.

Figure 11. Total number of days for each year during the period of record the average daily flow in the Big Sioux River measured at the USGS gaging station at North Cliff Avenue at Sioux Falls was less than 20 cfs (USGS, 2018).

The five existing water permits in this Big Sioux River reach all contain a 20 cfs bypass requirement. The earlier issued water permits required 20 cfs bypassed at the diversion point while the later issued ones required a 20 cfs bypass at the USGS gaging station at North Cliff Avenue in Sioux Falls (Water Rights, 2018). In this reach it is proposed the existing bypass qualification on these five permits retain the 20 cfs bypass requirement but the qualification be amended to:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

North Cliff Avenue at Sioux Falls to the Missouri River Confluence Reach

The southern reach of the Big Sioux River from the North Cliff Gage to the confluence with the Missouri River in southern Union County does not have any active water permits having bypass qualifications. As shown in Figure 12, the 10 percentile curve is above 50 cfs value throughout the entire irrigation season. This reach has not historically experienced a water shortage, and the Chief Engineer has not had to issue shutoff orders for any of the existing water permits located in this reach. There is not a proposal to amend any of the existing water permits in this lower reach of the Big Sioux River (USGS, 2018).

Figure 12. Daily percentile flow hydrographs for the USGS Big Sioux River gage at Akron IA 1971-2017, contributing drainage area 6995 mi² (USGS, 2018).

Considering Future Water Use

Anticipating future water demands from the Big Sioux River and climatic conditions may change over time. Particularly with the City of Sioux Falls holding two future use permits bearing a 1977 priority date reserving up to 30,000 acre-feet of water. It is proposed the following qualification be placed on all of the water permits being amended:

- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

The existing water permits without bypass qualifications and not targeted to be amended by this effort, will continue to be managed based upon their individual priority dates and location along the river.

Specific Proposed Qualification Revisions by Water Permit

In order to standardize the bypass qualifications for the existing water permits containing bypass qualifications in the Big Sioux River reach upstream from the USGS stream gaging station near Castlewood, the following changes are proposed.

Amendment to the qualifications contained in Water Right No. 1437-3

Delete Qualification:

- Diversions of water under this permit can only be made when there is flow of 5 or more cubic feet per second of water flowing at the diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 5 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Permit No. 7350-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 35 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood, unless written orders have been issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 5 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

To standardize the bypass qualifications for the 14 existing water rights/permits containing bypass qualifications in the Big Sioux River reach between the USGS stream gaging station near Castlewood downstream to the USGS stream gaging station near Dell Rapids, the following changes are proposed.

Amendment to the qualifications contained in Water Right No. 956-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Permit is granted allowing withdrawals of water whenever 20 cfs or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1175-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Permit is granted allowing withdrawals of water whenever 20 cfs or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1302-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Permit is granted allowing withdrawals of water whenever 20 cfs or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1350-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Permit is granted allowing withdrawals of water whenever 30 cfs or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids

when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1500-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Permit is granted allowing withdrawals of water whenever 30 cfs or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1696-3

Delete Qualification:

- Natural flows in the Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This Sioux River portion of this permit is granted allowing withdrawals of water whenever 35 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1801-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This permit is granted allowing withdrawals of water whenever 35 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 1812-3**Delete Qualification:**

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This permit is granted allowing withdrawals of water whenever 35 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 2065-3**Delete Qualification:**

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This permit is approved allowing withdrawals whenever 45 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 2952-3**Delete Qualification:**

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This permit is approved allowing withdrawals whenever 40 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 6042-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River unless at least 41 cfs is flowing past the Dell Rapids USGS Gaging Station, or unless written orders have been issued by the Chief Engineer. Diversions under this Permit are shall be in accordance with any written orders issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 6124-3

Delete Qualification:

- Natural flows in the Big Sioux River are not a dependable source of water during the latter part of the summer. Prior appropriative rights and downstream domestic use must be respected. This permit is approved allowing withdrawals whenever 50 cfs of water or more is flowing past your diversion point.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 7110-3

Delete Qualification:

- Low flows as needed for domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 43 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, or unless written orders have been issued by the Chief Engineer. Diversions under this permit are shall be in accordance with any written orders issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 8195-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 20 cfs is flowing at the North Cliff Avenue USGS Gaging Station No. 06482020 and 43 cfs is flowing at the Dell Rapids USGS Gaging Station No. 06481000, unless written orders have been issued by the Chief Engineer. Diversions under this Permit are shall be in accordance with any written orders issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

To standardize the qualifications for the 5 existing water rights/permits containing bypass qualifications in the Big Sioux River reach between the USGS stream gaging station near Dell Rapids downstream to the USGS stream gaging station at North Cliff Avenue at Sioux Falls, the following changes are proposed.

Amendment to the qualifications contained in Water Right No. 5431-3

Delete Qualification:

- Permit No. 5431-3 does not authorize pumping from the Big Sioux River unless at least 20 cfs can be bypassed when pumping.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 5512-3

Delete Qualification:

- Permit No. 5512-3 does not authorize pumping from the Big Sioux River unless at least 20 cfs is being bypassed when pumping.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 5698-3

Delete Qualification:

- Permit No. 5698-3 does not authorize pumping from the Big Sioux River unless at least 20 cfs is being bypassed when pumping.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 6210-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River,

when pumping, unless at least 20 cfs is flowing at the Cliff Avenue USGS Gaging Station, or unless written orders have been issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Amendment to the qualifications contained in Water Right No. 6210A-3

Delete Qualification:

- Low flows as needed for downstream domestic use, including livestock water and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 20 cfs is flowing at the North Cliff Avenue USGS Gaging Station No. 06482020, or unless written orders have been issued by the Chief Engineer. Diversions under this Permit are subject to senior water rights and any written orders issued by the Chief Engineer.

Add Qualifications:

- Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
- The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

Conclusions

1. Currently there are 58 active water permits authorized for the Big Sioux River from the headwaters in Roberts County to the mouth in Union County. Currently 21 of the existing water permits contain some sort of flow bypass qualification.
2. Since many water permits have been cancelled over the years, the system of various bypass requirements on several existing Big Sioux water permits are not putting water to beneficial use to the highest extent possible for the current water permit holders. The system is also difficult to manage for the Water Rights Program.
3. A fresh look was taken of the original bypass requirements to determine whether the original bypass levels would be effective limits for the existing active water rights. The review was completed of the original bypass requirements taking into consideration the existing water rights, the qualifications placed on them, their authorized use, the location of their diversion points, their annual period of use and historic stream flow data.

4. Based upon this review, the river was broken into four separate bypass management reaches and standardized qualifications are proposed for each of these reaches.
5. Anticipating future water demands from the Big Sioux River and climatic conditions may change over time, the amendments to the water permits being amended should also contain a qualification allowing the Water Management Board to retain jurisdiction to address future issues if as necessary.
6. On the reach upstream from the Castlewood gaging station, for the two water permits containing bypass requirements replace those qualifications with:
 - Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 5 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
 - The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.
7. On the reach between the Castlewood gaging station and the Dell Rapids gaging station, for the 14 water permits containing bypass requirements replace those qualifications with:
 - Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
 - The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.
8. On the reach upstream from the Dell Rapids gaging station to the North Cliff Avenue gaging station, for the five water permits containing bypass requirements replace those qualifications with:
 - Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06482020 at North Cliff Avenue when pumping, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
 - The Water Management Board is retaining jurisdiction of this permit in the event additional information shows that adjustments need to be made to the bypass requirements.

9. The existing water permits without bypass qualifications and not targeted to be amended by this effort, will continue to be managed based upon their individual priority dates and location along the river.

Mark D. Rath

NOTICE OF HEARING ON CHIEF ENGINEER'S RECOMMENDATION FOR BIG SIOUX RIVER WATER RIGHTS

Notice is given that the Water Rights Program, Department of Environment and Natural Resources, 523 E Capitol Avenue, Pierre SD 57501 proposes that the Water Management Board amend conditions placed on many Big Sioux River water rights in South Dakota. The objective is to bring consistency among water rights from the river and the ability for the Chief Engineer to issue written orders to allow pumping to continue if climatic conditions are favorable. The amendments will not increase either the authorized diversion rate or number of irrigated acres authorized under existing Big Sioux River water rights.

Currently, water rights differ in the amount of water that must be bypassed at the pump site or at a United States Geological Survey (USGS) gaging station in order for pumping to occur. The Water Rights Program has reviewed all Big Sioux River water rights and determined that the conditions can be modified to a standard bypass at one of three gaging stations depending on the stream segment where the water right is located. It is proposed that the bypass condition along the river is best managed in three segments identified by USGS gaging stations as follows:

1. River reach upstream from the USGS gaging station near Castlewood;
2. River reach between USGS gaging station near Castlewood downstream to gaging station near Dell Rapids;
3. River reach between USGS gaging station near Dell Rapids downstream to gaging station near North Cliff Avenue in Sioux Falls.

Water rights that currently have a bypass condition will be amended such that those water rights upstream of the Castlewood gaging station will have a 5 cubic feet of water per second (cfs) bypass requirement. Those water rights in the two other reaches described above will have a 20 cfs bypass requirement referenced to either the Dell Rapids or North Cliff Avenue gaging station depending on the location of the water right. Water rights with senior priority dates that do not currently have a bypass requirement will see no change.

The proposed amendment will not impose any conditions more restrictive than the conditions currently in place on any water right. Big Sioux River water right holders whose bypass condition is proposed for amendment will be provided personal notice of the proposed amendment to their water right.

The Chief Engineer recommends that the Water Management Board approve deletion of the existing bypass condition on applicable water rights and add the following qualifications specific to the bypass flow at a referenced gaging station depending on the location of the water right.

1. Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This water right does not authorize diversion of water from the Big Sioux River, when pumping, unless at least "X" cfs is flowing past the USGS Gaging Station "IDENTIFY APPLICABLE STATION" unless written orders have been issued by the Chief Engineer. Diversions under this water right shall be in accordance with any written orders issued by the Chief Engineer.
2. The Water Management Board is retaining jurisdiction of this water right in the event additional information shows that adjustments need to be made to the bypass requirements.

Any interested person opposing or supporting the proposed amendment and intending to participate in the hearing shall file a petition with the Chief Engineer. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)". A petition filed by either an interested person or a water right holder must be filed by February 26, 2018.

The petition may be informal, but shall be in writing and shall include a statement describing the petitioner's interest, the petitioner's reasons for opposing or supporting the proposed change, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. The hearing is an adversary proceeding and any party has the right to be present at the hearing and to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised at the hearing and decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided above.

The Water Management Board will consider the proposed changes at 11:30 a.m. on March 7, 2018, in the Matthew Training Center, Joe Foss Bldg, 523 E. Capitol Ave. Pierre SD. The hearing will be held pursuant to the provisions of SDCL 46-1-14 and 46-2-17.

The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) modify, 3) defer, or 4) deny the proposed amendments after it reaches a conclusion based on facts at the public hearing. The Board has legal authority and jurisdiction to consider this matter pursuant to SDCL 46-2-9 and 46-2-11.

The March 7, 2018 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from any person who has filed a petition to oppose or support the proposed change. The request for an automatic delay must be filed by February 26, 2018. If an automatic delay is requested, the hearing will be rescheduled for a future Board meeting and personal notice will be provided to all petitioners regarding the time, date and location.

Notice is given to individuals with disabilities that this hearing is being held in a physically accessible place. Please notify the Department of Environment and Natural Resources at least 48 hours before the hearing if you have a disability for which special arrangements must be made at the hearing. The telephone number for making arrangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any contested case, if the amount in controversy exceeds \$2,500.00 "or if a property right may be terminated, any party to the contested case may require the agency to use the Office of Hearing Examiners by giving notice of the request to the agency no later than ten days after service of a notice of hearing issued pursuant to SDCL 1-26-17." If you choose to use the Office of Hearing Examiners rather than the hearing procedure before the Water Management Board set forth above, you need to notify the Chief Engineer (Water Rights Program, 523 E Capitol Avenue, Pierre SD) by February 26, 2018.

amendments will not increase either the authorized diversion rate or number of irrigated acres authorized under existing Big Sioux River water rights. Currently, water rights differ in the amount of water that must be bypassed at the pump site or at a United States Geological Survey (USGS) gaging station in or near the water right. The Water Rights Program has reviewed all Big Sioux River water rights and determined that the conditions can be modified to a standard bypass of one of three gaging stations depending on the stream segment where the water right is located. It is proposed that the bypass condition along the river is best managed in three segments identified by USGS gaging stations as follows:

1. River reach upstream from the USGS gaging station near Castlewood;
2. River reach between USGS gaging station near Castlewood downstream to gaging station near Dell Rapids;
3. River reach between USGS gaging station near Dell Rapids downstream to gaging station near North Cliff Avenue in Sioux Falls.

Water rights that currently have a bypass condition will be amended such that those water rights upstream of the Castlewood gaging station will have a 5 cubic feet per second (cfs) bypass requirement. Those water rights in the two other reaches described above will have a 20 cfs bypass requirement referenced to either the Dell Rapids or North Cliff Avenue gaging station depending on the location of the water right. Water rights with senior priority dates that do not currently have a bypass requirement will see no change.

The proposed amendment will not impose any conditions more restrictive than the conditions currently in place on any water right. Big Sioux River water right holders whose bypass condition is proposed for amendment will be provided personal notice of the proposed amendment to their water rights in South Dakota. The objective is to bring consistency among the Water Rights Program and the ability for the Chief Engineer to issue written condition orders to allow pumping to continue if climatic conditions are favorable. The referenced gaging station depending on the location of the water right.

1. Low flows as needed for downstream domestic use, including livestock water, and prior rights must be bypassed. This water right does not authorize diversion of water from the Big Sioux River, when pumping, unless at least "X" cfs is flowing past the USGS Gaging Station "IDENTIFY APPLICABLE STATION" unless written orders have been issued by the Chief Engineer.
2. The Water Management Board is retaining jurisdiction of this water right in the event additional information shows that adjustments need to be made to the bypass requirements. Any interested person opposing or supporting the proposed amendment and intending to participate in the hearing shall file a petition with the Chief Engineer. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E. Capitol, Pierre SD 57501 (605 773-3352)". A petition filed by either an interested person or a water right holder must be filed by February 26, 2018.

The petition may be informal, but shall be in writing and shall include a statement describing the petitioner's interest, the petitioner's reasons for opposing or supporting the proposed change, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if the hearing is an adversary proceeding and any party has the right to be present at the hearing and to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised at the hearing and decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided above.

The Board will consider the proposed changes at 11:30 a.m. on March 7, 2018, in the Matthew Training Center, Joe Foss Bldg, 523 E. Capitol Ave, Pierre SD. The hearing will be held pursuant to the provisions of SDCL 46-1-14 and 46-2-17. The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to: 1) approve, 2) modify, 3) defer, or 4) deny the proposed amendments after it reaches a conclusion based on facts of the public hearing. The Board has legal authority and jurisdiction to consider this matter pursuant to SDCL 46-2-9 and 46-2-11.

The March 7, 2018 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from any person who has filed a petition to oppose or support the proposed change. The request for an automatic delay must be filed by February 26, 2018. If an automatic delay is requested, the hearing will be rescheduled for a future Board meeting. The Chief Engineer's and personal notice will be provided to all petitioners regarding the time, date and location.

Notice is given to individuals with disabilities that this hearing is being held in a physically accessible place. Please notify the Department of Environment and Natural Resources at least 48 hours before the hearing if you have a disability for which special arrangements must be made at the hearing. The telephone number for making arrangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any contested case, if the amount in controversy exceeds \$2,500.00 "or if a party's right may be terminated, any party to the contested case may require the agency to use the Office of Hearing Examiners by giving notice of the request to the agency no later than ten days after service of a notice of hearing issued pursuant to SDCL 1-26-17." If you choose to use the Office of Hearing Examiners rather than the hearing procedure before the Water Management Board, you need to notify the Chief Engineer (Water Rights Program, 523 E. Capitol Avenue, Pierre SD) by February 26, 2018.

WATER RIGHTS
PROGRAM

NOTICE OF HEARING ON CHIEF ENGINEER'S RECOMMENDATION FOR BIG SIOUX RIVER WATER RIGHTS

Notice is given that the Water Rights Program, Department of Environment and Natural Resources, 523 E Capitol Avenue, Pierre SD 57501 proposes that the Water Management Board amend conditions placed on many Big Sioux River water rights in South Dakota. The objective is to bring consistency among water rights from the river and the ability for the Chief Engineer to issue written orders to allow pumping to continue if climatic conditions are favorable. The amendments will not increase either the authorized diversion rate or number of irrigated acres authorized under existing Big Sioux River water rights.

Currently, water rights differ in the amount of water that must be bypassed at the pump site or at a United States Geological Survey (USGS) gaging station in order for pumping to occur. The Water Rights Program has reviewed all Big Sioux River water rights and determined that the conditions can be modified to a standard bypass at one of three gaging stations depending on the stream segment where the water right is located. It is proposed that the bypass condition along the river is best managed in three segments identified by USGS gaging stations as follows:

1. River reach upstream from the USGS gaging station near Castlewood;
2. River reach between USGS gaging station near Castlewood downstream to gaging station near Dell Rapids;
3. River reach between USGS gaging station near Dell Rapids downstream to gaging station near North Cliff Avenue in Sioux Falls.

Water rights that currently have a bypass condition will be amended such that those water rights upstream of the Castlewood gaging station will have a 5 cubic feet of water per second (cfs) bypass requirement. Those water rights in the two other reaches described above will have a 20 cfs bypass requirement referenced to either the Dell Rapids or North Cliff Avenue gaging station depending on the location of the water right. Water rights with senior priority dates that do not currently have a bypass requirement will see no change.

The proposed amendment will not impose any conditions more restrictive than the conditions currently in place

on any water right. Big Sioux River water right holders whose bypass condition is proposed for amendment will be provided personal notice of the proposed amendment to their water right.

The Chief Engineer recommends that the Water Management Board approve deletion of the existing bypass condition on applicable water rights and add the following qualifications specific to the bypass flow at a referenced gaging station depending on the location of the water right.

1. Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This water right does not authorize diversion of water from the Big Sioux River, when pumping, unless at least "X" cfs is flowing past the USGS Gaging Station "IDENTIFY APPLICABLE STATION" unless written orders have been issued by the Chief Engineer. Diversions under this water right shall be in accordance with any written orders issued by the Chief Engineer.

2. The Water Management Board is retaining jurisdiction of this water right in the event additional information shows that adjustments need to be made to the bypass requirements.

Any interested person opposing or supporting the proposed amendment and intending to participate in the hearing shall file a petition with the Chief Engineer. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)". A petition filed by either an interested person or a water right holder must be filed by February 26, 2018.

The petition may be informal, but shall be in writing and shall include a statement describing the petitioner's interest, the petitioner's reasons for opposing or supporting the proposed change, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. The hearing is an adversary proceeding and any party has the right to be present at the hearing and to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised at the hearing and decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the

Attorney for _____

Water Rights Program address provided above.

The Water Management Board will consider the proposed changes at 11:30 a.m. on March 7, 2018, in the Matthew Training Center, Joe Foss Bldg, 523 E. Capitol Ave. Pierre SD. The hearing will be held pursuant to the provisions of SDCL 46-1-14 and 46-2-17.

The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) modify, 3) defer, or 4) deny the proposed amendments after it reaches a conclusion based on facts at the public hearing. The Board has legal authority and jurisdiction to consider this matter pursuant to SDCL 46-2-9 and 46-2-11.

The March 7, 2018 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from any person who has filed a petition to oppose or support the proposed change. The request for an automatic delay must be filed by February 26, 2018. If an automatic delay is requested, the hearing will be rescheduled for a future Board meeting and personal notice will be provided to all petitioners regarding the time, date and location.

Notice is given to individuals with disabilities that this hearing is being held in a physically accessible place. Please notify the Department of Environment and Natural Resources at least 48 hours before the hearing if you have a disability for which special arrangements must be made at the hearing. The telephone number for making arrangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any contested case, if the amount in controversy exceeds \$2,500.00 "or if a property right may be terminated, any party to the contested case may require the agency to use the Office of Hearing Examiners by giving notice of the request to the agency no later than ten days after service of a notice of hearing issued pursuant to SDCL 1-26-17." If you choose to use the Office of Hearing Examiners rather than the hearing procedure before the Water Management Board set forth above, you need to notify the Chief Engineer (Water Rights Program, 523 E Capitol Avenue, Pierre SD) by February 26, 2018.

Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

DEPT OF EN-
VIRONMENT
AND NATURAL
RESOURCES

NOTICE OF HEARING
ON CHIEF ENGINEER'S
RECOMMENDATION FOR BIG
SIOUX RIVER WATER RIGHTS
Notice is given that the Water
Rights Program, Department
of Environment and Natural
Resources, 523 E Capitol Avenue,
Pierre SD 57501 proposes that
the Water Management Board
amend conditions placed on
many Big Sioux River water rights
in South Dakota. The objective is
to bring consistency among water
rights from the river and the ability
for the Chief Engineer to issue
written orders to allow pumping to
continue if climatic conditions are
favorable. The amendments will
not increase either the authorized
diversion rate or number of
irrigated acres authorized under
existing Big Sioux River water
rights.

Currently, water rights differ in
the amount of water that must be
bypassed at the pump site or at a
United States Geological Survey
(USGS) gaging station in order
for pumping to occur. The Water
Rights Program has reviewed all
Big Sioux River water rights and
determined that the conditions
can be modified to a standard
bypass at one of three gaging
stations depending on the stream
segment where the water right is
located. It is proposed that the
bypass condition along the river is
best managed in three segments
identified by USGS gaging
stations as follows:

1. River reach upstream from
the USGS gaging station near
Castlewood;
2. River reach between USGS
gaging station near Castlewood
downstream to gaging station
near Dell Rapids;
3. River reach between USGS
gaging station near Dell Rapids
downstream to gaging station
near North Cliff Avenue in Sioux
Falls.

Water rights that currently have a
bypass condition will be amended
such that those water rights
upstream of the Castlewood
gaging station will have a 5 cubic
feet of water per second (cfs)
bypass requirement. Those water
rights in the two other reaches
described above will have a 20 cfs
bypass requirement referenced to
either the Dell Rapids or North Cliff
Avenue gaging station depending
on the location of the water right.
Water rights with senior priority
dates that do not currently have
a bypass requirement will see no
change.

The proposed amendment will
not impose any conditions more
restrictive than the conditions
currently in place on any water
right. Big Sioux River water right
holders whose bypass condition
is proposed for amendment will
be provided personal notice of
the proposed amendment to their
water right.

The Chief Engineer recommends
that the Water Management
Board approve deletion of the
existing bypass condition on
applicable water rights and add
the following qualifications specific
to the bypass flow at a referenced
gaging station depending on the
location of the water right.

1. Low flows as needed for
downstream domestic use,
including livestock water, and
prior rights must be by-passed.
This water right does not
authorize diversion of water
from the Big Sioux River, when
pumping, unless at least "X"
cfs is flowing past the USGS
Gaging Station "IDENTIFY
APPLICABLE STATION" unless
written orders have been
issued by the Chief Engineer.
Divisions under this water right
shall be in accordance with any
written orders issued by the
Chief Engineer.

2. The Water Management
Board is retaining jurisdiction
of this water right in the
event additional information
shows that adjustments need
to be made to the bypass
requirements.

Any interested person opposing
or supporting the proposed
amendment and intending to
participate in the hearing shall file
a petition with the Chief Engineer.
The Chief Engineer's address is
"Water Rights Program, Foss
Building, 523 E Capitol, Pierre SD
57501 (605 773-3352)". A petition
filed by either an interested person
or a water right holder must be
filed by February 26, 2018.

The petition may be informal,
but shall be in writing and shall
include a statement describing
the petitioner's interest, the
petitioner's reasons for opposing
or supporting the proposed
change, and the signature and
mailing address of the petitioner
or the petitioner's legal counsel,
if legal counsel is obtained.

The hearing is an adversary
proceeding and any party has the
right to be present at the hearing
and to be represented by a lawyer.
These and other due process
rights will be forfeited if they are
not exercised at the hearing and
decisions of the Board may be
appealed to the Circuit Court and
State Supreme Court as provided
by law.

The staff report including affected
water rights and the proposed
changes is available at <http://denr.sd.gov/public> or contact Eric
Gronlund for this information, or
other information, at the Water
Rights Program address provided
above.

The Water Management Board
will consider the proposed
changes at 11:30 a.m. on March
7, 2018, in the Matthew Training
Center, Joe Foss Bldg, 523 E.
Capitol Ave, Pierre SD. The
hearing will be held pursuant to
the provisions of SDCL 46-1-14
and 46-2-17.

The Chief Engineer's
recommendation is not final or
binding upon the Board. The
Board is authorized to 1) approve,
2) modify, 3) defer, or 4) deny the
proposed amendments after it
reaches a conclusion based on
facts at the public hearing. The
Board has legal authority and
jurisdiction to consider this matter
pursuant to SDCL 46-2-9 and 46-
2-11.

The March 7, 2018 hearing date
will be automatically delayed
for at least 20 days upon written
request to the Chief Engineer
from any person who has filed a
petition to oppose or support the
proposed change. The request
for an automatic delay must be
filed by February 26, 2018. If
an automatic delay is requested,
the hearing will be rescheduled
for a future Board meeting and
personal notice will be provided to
all petitioners regarding the time,
date and location.

Notice is given to individuals with
disabilities that this hearing is be-
ing held in a physically accessible
place. Please notify the Depart-
ment of Environment and Natural
Resources at least 48 hours before
the hearing if you have a disabili-
ty for which special arrangements
must be made at the hearing. The
telephone number for making ar-
rangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any
contested case, if the amount in
controversy exceeds \$2,500.00
"or if a property right may be
terminated, any party to the
contested case may require the
agency to use the Office of Hearing
Examiners by giving notice of the
request to the agency no later than
ten days after service of a notice of
hearing issued pursuant to SDCL
1-26-17." If you choose to use the
Office of Hearing Examiners rather
than the hearing procedure before
the Water Management Board
set forth above, you need to notify
the Chief Engineer (Water Rights
Program, 523 E Capitol Avenue,
Pierre SD) by February 26, 2018.
Steven M. Pinner, Secretary, De-
partment of Environment and Nat-
ural Resources.

(Title)2-14-2018
(Date Signed)**NOTICE OF HEARING ON CHIEF
ENGINEER'S RECOMMENDA-
TION FOR BIG SIOUX RIVER
WATER RIGHTS**

Notice is given that the Water Rights Program, Department of Environment and Natural Resources, 523 E Capitol Avenue, Pierre SD 57501 proposes that the Water Management Board amend conditions placed on many Big Sioux River water rights in South Dakota. The objective is to bring consistency among water rights from the river and the ability for the Chief Engineer to issue written orders to allow pumping to continue if climatic conditions are favorable. The amendments will not increase either the authorized diversion rate or number of irrigated acres authorized under existing Big Sioux River water rights.

Currently, water rights differ in the amount of water that must be bypassed at the pump site or at a United States Geological Survey (USGS) gaging station in order for pumping to occur. The Water Rights Program has reviewed all Big Sioux River water rights and determined that the conditions can be modified to a standard bypass at one of three gaging stations depending on the stream segment where the water right is located. It is proposed that the bypass condition along the river is best managed in three segments identified by USGS gaging stations as follows:

River reach upstream from the USGS gaging station near Castlewood;

River reach between USGS gaging station near Castlewood downstream to gaging station near Dell Rapids;

River reach between USGS gaging station near Dell Rapids downstream to gaging station near North Cliff Avenue in Sioux Falls.

Water rights that currently have a bypass condition will be amended such that those water rights upstream of the Castlewood gaging station will have a 5 cubic feet of water per second (cfs) bypass requirement. Those water rights in the two other reaches described above will have a 20 cfs bypass requirement referenced to either the Dell Rapids or North Cliff Avenue gaging station depending on the location of the water right. Water rights with senior priority dates that do not currently have a bypass requirement will see no change.

The proposed amendment will not impose any conditions more restrictive than the conditions currently in place on any water right. Big Sioux River water right holders whose bypass condition is proposed for amendment will be provided personal notice of the proposed amendment to their water right.

The Chief Engineer recommends that the Water Management Board approve deletion of the existing bypass condition on applicable water rights and add the following qualifications specific to the bypass flow at a referenced gaging station depending on the location of the water right.

Low flows as needed for downstream domestic use, including live-stock water, and prior rights must be by-passed. This water right does not authorize diversion of water from the Big Sioux River, when pumping, unless at least "X" cfs is flowing past the USGS Gaging Station "IDENTIFY APPLICABLE STATION" unless written orders have been issued by the Chief Engineer. Diversions under this water right shall be in accordance with any written orders issued by the Chief Engineer.

The Water Management Board is retaining jurisdiction of this water right in the event additional information shows that adjustments need to be made to the bypass requirements.

Any interested person opposing or supporting the proposed amendment and intending to participate in the hearing shall file a petition with the Chief Engineer. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)". A petition filed by either an interested person or a water right holder must be filed by February 26, 2018.

The petition may be informal, but shall be in writing and shall include a statement describing the petitioner's interest, the petitioner's reasons for opposing or supporting the proposed change, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. The hearing is an adversary proceeding and any party has the right to be present at the hearing and to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised at the hearing and decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided above.

The Water Management Board will consider the proposed changes at 11:30 a.m. on March 7, 2018, in the Matthew Training Center, Joe Foss Bldg, 523 E. Capitol Ave. Pierre SD. The hearing will be held pursuant to the provisions of SDCL 46-1-14 and 46-2-17.

The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) modify, 3) defer, or 4) deny the proposed amendments after it reaches a conclusion based on facts at the public hearing. The Board has legal authority and jurisdiction to consider this matter pursuant to SDCL 46-2-9 and 46-2-11.

The March 7, 2018 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from any person who has filed a petition to oppose or support the proposed change. The request for an automatic delay must be filed by February 26, 2018. If an automatic delay is requested, the hearing will be rescheduled for a future Board meeting and personal notice will be provided to all petitioners regarding the time, date and location.

Notice is given to individuals with disabilities that this hearing is being held in a physically accessible place. Please notify the Department of Environment and Natural Resources at least 48 hours before the hearing if you have a disability for which special arrangements must be made at the hearing. The telephone number for making arrangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any contested case, if the amount in controversy exceeds \$2,500.00, "or if a property right may be terminated, any party to the contested case may require the agency to use the Office of Hearing Examiners by giving notice of the request to the agency no later than ten days after service of a notice of hearing issued pursuant to SDCL 1-26-17." If you choose to use the Office of Hearing Examiners rather than the hearing procedure before the Water Management Board set forth above, you need to notify the Chief Engineer (Water Rights Program, 523 E Capitol Avenue, Pierre SD) by February 26, 2018.

NOTICE OF HEARING ON CHIEF ENGINEER'S RECOMMENDATION FOR BIG SIOUX RIVER WATER RIGHTS

Notice is given that the Water Rights Program, Department of Environment and Natural Resources, 523 E Capitol Avenue, Pierre SD 57501 proposes that the Water Management Board amend conditions placed on many Big Sioux River water rights in South Dakota. The objective is to bring consistency among water rights from the river and the ability for the Chief Engineer to issue written orders to allow pumping to continue if climatic conditions are favorable. The amendments will not increase either the authorized diversion rate or number of irrigated acres authorized under existing Big Sioux River water rights.

Currently, water rights differ in the amount of water that must be bypassed at the pump site or at a United States Geological Survey (USGS) gaging station in order for pumping to occur. The Water Rights Program has reviewed all Big Sioux River

water rights and determined that the conditions can be modified to a standard bypass at one of three gaging stations depending on the stream segment where the water right is located. It is proposed that the bypass condition along the river is best managed in three segments identified by USGS gaging stations as follows:

1. River reach upstream from the USGS gaging station near Castlewood;

2. River reach between USGS gaging station near Castlewood downstream to gaging station near Dell Rapids;

3. River reach between USGS gaging station near Dell Rapids downstream to gaging station near North Cliff Avenue in Sioux Falls.

Water rights that currently have a bypass condition will be amended such that those water rights upstream of the Castlewood gaging station will have a 5 cubic feet of water per second (cfs) bypass requirement. Those water rights in the two other reaches described above will have a 20 cfs bypass requirement referenced to either the Dell Rapids or North Cliff Avenue gaging station depending on the location of the water right. Water rights with senior priority dates that do not currently have a bypass requirement will see no change.

RECEIVED

FEB 20 2018

WATER RIGHTS
PROGRAM

The proposed amendment will not impose any conditions more restrictive than the conditions currently in place on any water right. Big Sioux River water right holders whose bypass condition is proposed for amendment will be provided personal notice of the proposed amendment to their water right.

The Chief Engineer recommends that the Water Management Board approve deletion of the existing bypass condition on applicable water rights and add the following qualifications specific to the bypass flow at a referenced gaging station depending on the location of the water right.

1. Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This water right does not authorize diversion of water from the Big Sioux River, when pumping, unless at least "X" cfs is flowing past the USGS Gaging Station "IDENTIFY APPLICABLE STATION" unless written orders have been issued by the Chief Engineer. Diversions under this water right shall be in accordance with any written orders issued by the Chief Engineer.

2. The Water Management Board is retaining jurisdiction of this water right in the event additional information

shows that adjustments need to be made to the bypass requirements.

Any interested person opposing or supporting the proposed amendment and intending to participate in the hearing shall file a petition with the Chief Engineer. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)". A petition filed by either an interested person or a water right holder must be filed by February 26, 2018.

The petition may be informal, but shall be in writing and shall include a statement describing the petitioner's interest, the petitioner's reasons for opposing or supporting the proposed change, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. The hearing is an adversary proceeding and any party has the right to be present at the hearing and to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised at the hearing and decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The staff report including affected water rights and the proposed changes is available at <http://denr.sd.gov/public> or

contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided above.

The Water Management Board will consider the proposed changes at 11:30 a.m. on March 7, 2018, in the Matthew Training Center, Joe Foss Bldg, 523 E. Capitol Ave. Pierre SD. The hearing will be held pursuant to the provisions of SDCL 46-1-14 and 46-2-17.

The Chief Engineer's recommendation is not final or binding upon the Board. The Board is authorized to 1) approve, 2) modify, 3) defer, or 4) deny the proposed amendments after it reaches a conclusion based on facts at the public hearing. The Board has legal authority and jurisdiction to consider this matter pursuant to SDCL 46-2-9 and 46-2-11.

The March 7, 2018 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from any person who has filed a petition to oppose or support the proposed change. The request for an automatic delay must be filed by February 26, 2018. If an automatic delay is requested, the hearing will be rescheduled for a future Board meeting and personal notice will be provided to all petitioners regarding the

time, date and location.

Notice is given to individuals with disabilities that this hearing is being held in a physically accessible place. Please notify the Department of Environment and Natural Resources at least 48 hours before the hearing if you have a disability for which special arrangements must be made at the hearing. The telephone number for making arrangements is (605) 773-3352.

Under SDCL 1-26-18.3, in any contested case, if the amount in controversy exceeds \$2,500.00 "or if a property right may be terminated, any party to the contested case may require the agency to use the Office of Hearing Examiners by giving notice of the request to the agency no later than ten days after service of a notice of hearing issued pursuant to SDCL 1-26-17." If you choose to use the Office of Hearing Examiners rather than the hearing procedure before the Water Management Board set forth above, you need to notify the Chief Engineer (Water Rights Program, 523 E Capitol Avenue, Pierre SD) by February 26, 2018.

Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

SENT VIA U.S. MAIL AND EMAIL TO: DENRINTERNET@STATE.SD.US

Ms. Jeanne Goodman
Chief Engineer
Water Rights Program, DENR
523 E. Capitol Avenue,
Pierre, SD 57501

Re: Big Sioux River Recommendations

Dear Ms. Goodman,

Please consider this letter as the City of Sioux Falls' Petition to Intervene in the pending Big Sioux River Water Rights matter now scheduled for March 7, 2018.

The City of Sioux Falls ("*Sioux Falls*") appreciates the the Department of Environment & Natural Resources ("*DENR*") objective of bringing consistency to the water right permits and their administration along the Big Sioux River ("*BSR*"). Changing the qualifications to ensure they are all based on USGS river gages is a good thing. Sioux Falls does have some concerns that it would like to share with the South Dakota Water Management Board ("*Board*").

The proposed new qualifications for each stretch of the BSR would be based on the next USGS gage below the water permit involved. For example, irrigation above the Castlewood gage would be allowed so long as the Castlewood gage was at 5 cfs or more. As such, this qualification would tend to assure these upstream irrigators have the right to irrigate so long as the stream gage below them meets a particular criteria, without regard to what is happening to senior users further downstream. Under this scenario, a junior irrigator above the Castlewood gage could irrigate if the Castlewood gage was at 5 cfs regardless of whether the gages at Dell Rapids and Sioux Falls were below 20 cfs. At the same time, a senior appropriator would be constrained by the 20 cfs qualification at the downstream gages. While I understand these qualifications are intended to provide for flexibility by the Chief Engineer and as such, the Chief Engineer could seek cooperation among the upstream junior appropriators, the language of these qualifications seems to reduce the legal means for the senior water right holders to take action against junior water right holders that impair water rights downstream.

Ms. Jeanne Goodman
Page 2
February 23, 2018

Sioux Falls would suggest all downstream gage criteria be incorporated in the qualifications. For the two permits above Castlewood, we would propose the qualification state as follows:

Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 5 cfs is flowing past the USGS Gaging Station No. 06479525 near Castlewood, at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids, and at least 20 cfs is flowing past USGS Gaging Station No. 6482020 at North Cliff Avenue in Sioux Falls, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

Similarly, for the 14 permits above Dell Rapids, we would propose the qualification state as follows:

Low flows as needed for downstream domestic use, including livestock water, and prior rights must be by-passed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 20 cfs is flowing past the USGS Gaging Station No. 06481000 near Dell Rapids, and at least 20 cfs is flowing past USGS Gaging Station No. 6482020 at North Cliff Avenue in Sioux Falls, unless written orders have been issued by the Chief Engineer. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

We appreciate the fact that administering these diversions during severe drought will be a challenge. We would respectfully submit, however, that the qualifications, as stated above, would protect the senior water rights and also be a better means to protect the flows in the river for the entire stretch impacted.

We also reserve our right to address any other issues that may be presented by other intervenors or the Board at a hearing.

At the hearing Sioux Falls may also address the extent to which releases from the Sioux Falls Water Reclamation Plant augment other available flows in the BSR.

Due to scheduling constraints, Sioux Falls is exercising its right to automatically delay the hearing for at least twenty (20) days as provided by state law.

Sincerely,

Diane P. Best
Assistant City Attorney

DPB/amr

Sioux Falls Ordinances

§ 53.015 USE OF PUBLIC SEWERS REQUIRED.

(a) It shall be unlawful for any person to place, deposit or permit to be deposited in any unsanitary manner on public or private property within the city, or in any area under the jurisdiction of the city, any human or animal excrement, garbage or other objectionable waste.

(b) It shall be unlawful to discharge to any natural outlet within the city or in any area under the jurisdiction of the city any wastewater or other polluted waters, except where suitable treatment has been provided in accordance with this subchapter, or permitted by the DENR or EPA.

(c) Except as provided in this subchapter, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool or other facility intended or used for the disposal of wastewater.

(d) The owner of each house, building or property used for human occupancy, employment, recreation or other purposes, in the city and abutting on any street, alley or right-of-way in which there is located or may be located a public sanitary sewer of the city, shall at the owner's expense install suitable toilet facilities therein, and connect the facilities directly with the proper public sewer in accordance with the provisions of this subchapter, within five years after the date of official notice to do so, provided that the public sewer is within 200 feet of the property line and reasonably accessible as determined by the city engineer.

(1992 Code, § 41-111) (Ord. 47-81, passed 6-1-1981; Ord. 57-93, passed 7-12-1993; Ord. 102-96, passed 9-3-1996; Ord. 48-03, passed 6-9-2003) Penalty, see § 53.999

§ 53.016 PRIVATE WASTEWATER DISPOSAL.

(a) Where a public sanitary sewer is not available under the provisions of § 53.015(d), the building sewer shall be connected to a private wastewater disposal system complying with the provisions of this subchapter and State of South Dakota Administrative Rules for individual and small on-site wastewater systems (ARSD Chapter 74:03:01).

(b) Before commencement of construction of a private wastewater disposal system, the owner shall first obtain a written permit signed by the city engineer. The application for the permit shall be made on a form furnished by the city which the applicant shall supplement by any plans, specifications and other information deemed necessary by the city. A permit and inspection fee established by ordinance shall be paid to the city when the application is filed.

(c) A permit for a private wastewater disposal system shall not become effective until the installation is completed to the satisfaction of the city engineer. The city engineer shall be allowed to inspect the work at any stage of construction, and in any event, the applicant for the permit shall notify the city engineer when the work is ready for final inspection, and before any underground portions are covered. The inspection shall be made within three hours of the receipt of notice by the city engineer.

(d) The type, capacity, location and layout of a private wastewater disposal system shall comply with all recommendations of the state department of health. For persons with a public water supply, no permit shall be issued for any private wastewater disposal system employing subsurface soil absorption facilities where the area of the lot is less than one-half acre. For persons with a private well, no permit shall be issued for any private wastewater disposal system employing subsurface soil absorption facilities where the area of the lot is less than one acre. No septic tank or cesspool shall be permitted to discharge to any natural outlet.

(e) When a public sewer becomes available to a property served by a private wastewater disposal system, as provided in § 53.015(d), a direct connection shall be made to the public sewer within five years in compliance with this subchapter, and any septic tanks, cesspools and similar private wastewater disposal facilities shall be cleaned of sludge and filled with suitable material.

(f) The owner shall operate and maintain the private wastewater disposal facilities in a sanitary manner at all times, at no expense to the city.

(g) No statement contained in this subchapter shall be construed to interfere with any additional requirements that may be imposed by a health officer.

(1992 Code, § 41-112) (Ord. 47-81, passed 6-1-1981; Ord. 19-82, passed 3-8-1982; Ord. 57-93, passed 7-12-1993; Ord. 102-96, passed 9-3-1996; Ord. 48-03, passed 6-9-2003)

PO Box 7402
Sioux Falls SD 57117-7402

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: Automatic Delay of Hearing to Amend Conditions Placed on Many Big Sioux River
Water Rights

The city of Sioux Falls filed a petition to intervene in response to the public notice regarding the Water Management Board hearing to consider an amendment to the conditions on many Big Sioux River water rights. The city's petition included a request for an automatic delay of the March 7, 2018 hearing date. Therefore, the hearing on this matter is automatically delayed pursuant to SDCL 46-2A-4 and 46-2A-5 and will not be held on March 7, 2018.

The hearing to consider amendment to the conditions on many Big Sioux River water rights is tentatively scheduled for the Water Management Board meeting to be held May 2 - 3, 2018, in Pierre. The Board will formalize its next meeting date at their March 7th meeting. Future notice of the time and place of the hearing will be provided.

Please contact Eric Gronlund at (605) 773-3352 if you have questions regarding the hearing process.

c: Ann Mines Bailey, Assistant Attorney General

CERTIFICATION

I hereby certify that on February 27, 2018, I have personally deposited with the United States mail at Pierre, South Dakota, first class postage, prepaid envelopes containing a Notice dated February 27, 2018, regarding automatic delay of the hearing to consider amendment to the conditions on many Big Sioux River water rights, as addressed below:

SUBJECT: Scheduling of Hearing to Amend Conditions Placed on Many Big Sioux River
Water Rights

The city of Sioux Falls filed a petition to intervene in response to the public notice published in the Argus Leader regarding proposed amendment to conditions placed on many Big Sioux River water rights. The March 7, 2018, hearing was postponed at the city's request. This notice reschedules the hearing for May 3, 2018.

The Water Management Board will now conduct a hearing to consider proposed amendment to conditions placed on many Big Sioux River water rights at 8:30 AM (Central Time) on Thursday, May 3, 2018, at the Floyd Matthew Training Center, Joe Foss Building, 523 E. Capitol Avenue, Pierre SD. The agenda time is an estimate and may be delayed due to prior items. Future notice will be provided to all parties if there is a significant change to the hearing time.

Applicable provisions of the public notice of hearing published in the Argus Leader on February 15, 2018, still apply.

Questions regarding the hearing process may be directed to Eric Gronlund, Water Rights Program at (605) 773-3352 or eric.gronlund@state.sd.us.

Water Rights Program

SUBJECT: Reporting Requirement for 2021 Irrigation Questionnaire(s)

Our records indicate your 2021 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 22, 2021. The Water Management Board has directed that owners of water permits who have not submitted the 2021 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 2, 2022 at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12; **Due to a past violation, the recommendation to the Board will be for a three year suspension.**
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 2, 2022** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. **If you prefer, you can complete the questionnaire online at the following link: <https://danr.sd.gov/iq> using this password: VVDBMJ**

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

March 3, 2022

NOTICE OF ENTRY OF ORDER OF THREE-YEAR SUSPENSION OF WATER RIGHTS

TO: Scott Jensen, 24348 478th Ave., Dell Rapids SD 57022

FROM: Eric Gronlund, Chief Engineer
Water Rights Program *Eric Gronlund*

SUBJECT: Three Year Suspension of Water Right Nos. 1350-3 & 6042-3

On March 2, 2022, the Water Management Board ordered:

That effective April 4, 2022, Water Right Nos. 1350-3 & 6042-3 be suspended for the 2022, 2023 and 2024 irrigation seasons for failure to submit your 2021 irrigation questionnaires.

If the 2021 irrigation questionnaires are received prior to April 4, 2022, the suspensions will not take effect.

Suspension means water may not be pumped during the 2022, 2023 and 2024 irrigation seasons. Consistent with the Board's order, you are not permitted to irrigate for three years unless the irrigation questionnaires are submitted by April 4, 2022.

After April 4th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2021 irrigation questionnaire and a letter to our office requesting time on the agenda for the Water Management Board meeting scheduled for May 4-5, 2022, in Pierre, SD. The letter should include your reasons for not completing the 2021 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath at (605) 773-3352, if you have any questions.

CERTIFICATION

I hereby certify that on March 3, 2022, I have personally deposited with the United States mail at Pierre, South Dakota, a first class postage prepaid envelopes containing a "Notice" dated March 3, 2022, concerning Board action to amend and/or suspend water rights to the following:

Amendments:

No. 3487-3: Dave Hanson, 31489 455th Ave., Meckling SD 57069
 No. 2460-3: Ryan Patterson, 10946 425th Ave., Britton SD 57430
 Patterson Farm Inc, 42474 SD Hwy 10, Britton SD 57430

Amend & Suspend:

Nos. 1397-2, 2647-2 & 2701-2: Cody Burull, 25299 Deer Valley Rd, Reliance SD 57569

Nos. 2072-3, 2126-3, 3204-3, 7236-3 & 7237-3:

- David Ulvestad, 46720 201st St., Bruce SD 57220
- Darwin Ulvestad, 46679 201st St, Bruce SD 57220

Three year suspensions:

No. 410B-2: Kathi Koester, PO Box 206, Custer SD 57730-0206

Dell Rapids SD 57022

Dear Mr. Jensen:

On March 2, 2022, the Water Management Board ordered Water Right Nos. 1350-3 and 6042-3 be suspended for a period of three years if the 2021 irrigation questionnaires were not received prior to April 4, 2022. The questionnaire information for your water rights has been received.

Since the irrigation questionnaires are on file, no violations have occurred, and no suspensions will take place. You may irrigate during the 2022 irrigation season.

If you have any questions, please contact us.

Sincerely,

Ron Duvall
Water Rights Permitting Administrator

NOTICE

TO: SCOTT JENSEN, MGR, 24348 478TH AVE, DELL RAPIDS, SD 57022

FROM: Ron Duvall, Water Rights Permitting Administrator
for Eric Gronlund, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2022 Irrigation Questionnaire(s)

Our records indicate your 2022 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 21, 2022. The Water Management Board has directed owners of water permits who have not submitted the 2022 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 8, 2023 at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12; **Based on a past violation for each water right, the recommendation to the Board will be for a three year suspension for Water Right Nos. 1350-3 and 6042-3.**
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 8, 2023** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. **If you prefer, you can complete the questionnaire online at the following link: <https://danr.sd.gov/iq> using this password: ITTLBU**

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

NOTICE

TO: SCOTT JENSEN, MANAGER, 24348 478TH AVE, DELL RAPIDS, SD 57022

FROM: Ron Duvall, Engineer III
for Eric Gronlund, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2024 Irrigation Questionnaire(s)

Our records indicate your 2024 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 1350-3 & 6042-3. The request for the Questionnaire was dated October 23, 2024. The Water Management Board has directed owners of water permits who have not submitted the 2024 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 1350-3 & 6042-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held on **Wednesday, March 5, 2025, at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 1350-3 & 6042-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 5, 2025**, hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Amanda Dewell at (605) 773-3352 or email at amanda.dewell@state.sd.us. **If you prefer, you can complete the questionnaire online at the following link: <https://danr.sd.gov/iq> using this password: QXXPUR**

NOTE: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.

6042-3

Smith, Miranda

From: Smith, Miranda
Sent: Friday, February 28, 2025 2:51 PM
To: pullingcoe@yahoo.com
Subject: Transfer of Ownership
Attachments: 1350-3 Ownership Transfer.pdf

Scott,

Thank you for submitting the 2024 annual irrigation water use information for Water Right Nos. 1350-3 & 6042-3, both of which have been removed from the South Dakota Water Management Board's March agenda. A letter to that effect will be mailed to you.

In reviewing the permit files, it appears that ownership of both water rights is in "limbo". Our program has noted the unfortunate passing of your father, Raymond Jensen, however the water rights are both still held in his name with a note on the file that they should either be transferred to yourself or your mother.

For your convenience I have attached a partially completed "Notice of Transfer of Ownership" form for each water right. Please complete the blank portions and return them to myself. Fees for the transfer would total \$100.00 (\$50/transfer) and can be made by mailing a check (payable to SD Water Rights) to: DANR – Water Rights, 523 E Capitol Ave, Pierre SD 57501, or by calling our Fiscal Office at (605) 773-5559 and submitting payment over the phone with a card.

Please let me know if you have any questions or concerns.

Thanks,

Miranda Smith
