Dear Mr. Young:

I am writing in regard to a well driller's report filed by Pullman Well Drilling. The report indicates a well was completed for Meadow Creek Golf Course on April 28, 1999. A review of our files indicates that Meadow Creek Golf Course holds Water Permit No. 5849-3 for 1.2 cubic feet of water per second from a dugout located in the SW ¼ SE ¼ Section 23 to irrigate 84 acres within the 180 acre golf course located in portions of Section 23 and 26; all in T110N-R51W.

A new water permit will be required for use of the well, by the golf course, since it is a different water source than authorized by the existing permit. Enclosed are application forms and instructions.

If you have any questions, please contact me.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6194-3, Meadow Creek Golf Course**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6194-3, Meadow Creek Golf Course, c/o Harvey G. Young, Manager, Box 511, Volga, SD 57071.

The Chief Engineer is recommending APPROVAL of Application No. 6194-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 6194-3 shall be constructed by a licensed well driller and construction shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.
4. Water Permit Nos. 5849-3 and 6194-3, combined, authorize an annual volume not to exceed 2 acre feet of water delivered to the land.

See report on application for additional information.

REPORT ON WATER PERMIT APPLICATION NO. 6194-3
for Meadow Creek Golf Course
May 8, 2000

Application No. 6194-3 proposes to appropriate 0.67 cfs (300 gpm) from one well approximately 280 feet deep located in the SW 1/4 SE 1/4 of Section 23 to irrigate 84 acres within the 180 acre golf course area located in the E 1/2 SW 1/4, SE 1/4 of Section 23, NE 1/4 NW 1/4 of Section 26; all in T110N-R51W in Brookings County. The well will be used as a supplement to the dugout authorized by Water Permit No. 5849-3. Water from the well may be diverted to the existing dugout or directly to the irrigated acreage.

AQUIFER - HOWARD (HO)

The Howard aquifer is a buried outwash (sand and gravel) which is under confined or artesian conditions in this area. The aquifer underlies 835 square miles and contains an estimated 3.0 million acre feet of water in storage in western Brookings County and eastern Kingsbury County (Hamilton, 1989). Ground water movement is from west to east across the area of this application. The aquifer is areally extensive into Hamlin and Clark Counties to the north and into Lake, Moody and Miner Counties to the south.

The driller's log filed with the application indicates fine sand from 191 to 217 feet and also from 235 to 280 feet all below land surface. The well was completed to a depth of 265 feet and has 40 feet of screen on the bottom. The completed well had a static water level of seven feet below land surface and was capable of producing 150 gpm at a pumping level of 21 feet below land surface after two hours. This equates to a specific capacity of about 10.7 gpm/ft of drawdown.

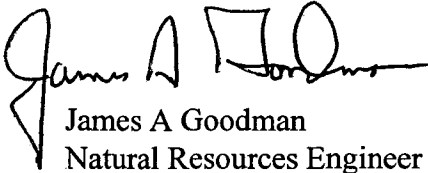

The Water Rights Program does not monitor any observation wells completed into the Howard aquifer in this area. The nearest observation well completed into the Howard aquifer is located about 16 miles south of this application in Lake County and is observation well LK-81A. Water levels for this well do respond to climatic conditions, that is, rising during wet years and gradually declining during dry years. A hydrograph for this observation well is included with this report (Water Rights, 2000).

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There is one existing water permit No. 5955-3 for ground water from the Howard aquifer located about one mile northeast of this application. This application is for 0.444 cfs from a 235 feet deep well for the SD Soybean Processors. Drawdown will occur as a result of pumping. Interference is not expected to be a concern.

CONCLUSIONS

1. Water is available from the Howard aquifer.
2. Drawdown will occur as a result of pumping. Interference is not expected to be a problem.
3. This well will be used to supplement an existing source of water authorized by Water Permit No. 5849-3.
4. This application allows water to be diverted from the well to the dugout authorized by Water Permit No. 5849-3 and then pumped from the dugout for irrigation. This accomplishes two things, one, mixing water from the well (which is relatively poor quality) with surface water or ground water already in the dugout and allowing for a greater diversion from the dugout than just this well. Also, if the dugout does not hold water (is a ground water dugout), then pumping into the dugout may not be advisable because of the potential to lose water into the shallow aquifer.
5. The combination of this application and Water Permit No. 5849-3 can only authorize a diversion volume of 2 acre feet per acre of irrigated lands.
6. The well authorized by this application, if approved, must be constructed in accordance with SD Well Construction Standards.

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION OF WATER RIGHTS

TO: Josh Oakley, Meadow Creek Golf Course, PO Box 511, Volga SD 57071-0511

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right Nos. 5849-3 and 6194-3

On February 26, 2020, the Water Management Board ordered:

Effective March 26, 2020, Water Right Nos. 5849-3 and 6194-3 be suspended for the 2020 irrigation season for failure to submit the 2019 irrigation questionnaires.

If the 2019 irrigation questionnaires are received prior to March 26, 2020, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2020 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2020 unless the 2019 irrigation questionnaires are submitted by March 26, 2020.

After March 26th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2019 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 6-7, 2020 in Pierre, SD. The letter should include your reasons for not completing the 2019 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

SUBJECT: Reporting Requirement for 2022 Irrigation Questionnaire(s)

Our records indicate your 2022 Irrigation Questionnaire(s) has not been submitted for Permit No(s) 5849-3 & 6194-3. The request for the Questionnaire was dated October 21, 2022. The Water Management Board has directed owners of water permits who have not submitted the 2022 Irrigation Questionnaire(s) be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine what action is to be taken for violation of Water Permit No(s) 5849-3 & 6194-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 8, 2023 at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 5849-3 & 6194-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire(s) is (are) received in this office before the **March 8, 2023** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaire(s) for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. **If you prefer, you can complete the questionnaire online at the following link: <https://danr.sd.gov/iq> using this password: LEYKHZ**
