4) Diversion point is actually an equalization pond located just east of the Lake Francis Case reservoir in Sec. 4, Town. 95 N, Range 65 W, NW of SW quarter. Pond is fed by an underwater culvert from reservoir and separated by a earthen dike. Pond fluctuates with the level of the reservoir, which ranges from 1375 ft. at maximum pool down to 1340 minimum, average is 1355 ft.

8) Project description

Proposed project involves obtaining water from Missouri River Reservoir for the purpose of irrigating the Randall Hills Country Club golf course at Pickstown, SD. The need arises from necessity of obtaining our own water source instead of purchasing water from Randall Water District. We may be cut off from them at any time if their demand is needed elsewhere and from an economic standpoint we are far better off to run this line ourselves. The plan is to pipe water approximately 6000 ft. from reservoir to a holding pond located on the golf course located in Out lot 16, Twn. 95N, Range 65 W. Water would be pumped at night to the holding pond to be irrigated from that point as needed.

Dear Mr. Peters:

Thank you for submitting the *Application for a Permit to Appropriate Water* for irrigation of the Randall Hills Country Club.

A review of our files indicates that Water Right No. 5171A-3 authorizes irrigation of 38 acres from a backflush lagoon of the Randall Community Water District. Enclosed is a copy of Water Right No. 5171A-3. The new application requests irrigation of 45 acres. Which number of acres is correct? Is it your intention to eventually discontinue irrigation completely from the backflush lagoon?

If you have any questions, please contact me.

REPORT ON WATER PERMIT APPLICATION 6220-3

**Fort Randall Recreation Inc.
Randall Hills Country Club
PO Box 227 Pickstown, SD 57367
August 18, 2000**

Water Permit Application No. 6220-3, Fort Randall Recreation Inc., proposes to appropriate 0.67 cubic feet of water per second (300 gpm) from the Missouri River in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 4 T95N R65W to irrigate 38 acres of the club's golf course located in the E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 4 and W $\frac{1}{2}$ SW $\frac{1}{4}$ of Section 3 T95N R65W (Attachment 1). The period of annual use would be from May 1 to October 31. Water would be diverted through a 6000-foot long pipeline from an equalizing pond connected to Lake Francis Case to a 6 acre-foot storage dugout. Water would be pumped from the dugout to irrigate the golf course as needed.

Project Review and Discussion

Water Permit No. 5171-3 issued to Fort Randall Recreation Inc. in 1988 authorized the withdrawal of 0.54 cubic feet per second (cfs) of water from the Missouri River in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ to a dugout in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ both in Section 4 T95N R65W. The acreage to be irrigated from the dugout was in the E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 4 and the W $\frac{1}{2}$ SW $\frac{1}{4}$ Section 3, all in T95N R65W. These are the same location descriptions for diversion point, dugout, and irrigated land listed in this application.

Water Permit Application No. 5171A-3 requested an additional diversion point from the Randall Community Water District's back flush lagoon. About 0.18 cubic feet per second (cfs) of water was to come from the back flush lagoon and 0.36 cfs from the Missouri River. Subsequently, the applicable portions of Water Permit No. 5171-3 were incorporated into Water License No. 5171A-3 which was issued in 1994 authorizing the appropriation of 0.54 cfs of water from the back flush lagoon, only.

From 1988 to the present time, Fort Randall Recreation Inc. was actually purchasing water from Randall Community Water District. A pipeline from the diversion point to the dugout described in Permit No. 5171-3 was never constructed. Water was supplied from the back flush lagoon and the Missouri River to the dugout through a pipeline owned and operated by Randall Community Water District.

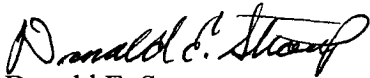

Under this project, Fort Randall Recreation Inc. proposes an increase in the diversion rate to 0.67 cfs and to construct and operate a pipeline from the proposed Missouri River diversion point to the dugout. As an emergency standby this pipeline will also be connected to the Randall Community Water District's back flush lagoons, in case the need arises to utilize this water.

Review of Water Source

The water source for the proposed project is the Missouri River. South Dakota Codified Law (SDCL) 46-5-6.1 allows the for appropriation of water from the Missouri River for irrigation purposes without the one cfs per seventy-acre restriction contained in SDCL 46-5-6.

Conclusions

1. This application proposes to appropriate 0.67 cfs from the Missouri River to irrigate 38 acres of a golf course.
2. There is non-appropriated water available in the Missouri River for Water Permit Application 6220-3.
3. South Dakota Codified Law (SDCL) 46-5-6.1 allows for the appropriation of water from the Missouri River for irrigation purposes without the one cfs per seventy-acre restriction contained in SDCL 46-5-6. The annual volume delivered to the land may not be greater than three acre-feet per acre.
4. Approval of Water Permit Application 6220-3 is in the public interest and constitutes beneficial use of the water.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6220-3, Ft. Randall Recreation, Inc.**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6220-3, Ft. Randall Recreation, Inc., c/o Chad Peters, P.O. Box 227, Pickstown, SD 57367.
