

WATER PERMIT NO. 6339-3

Name of Applicant: Allen Gatzke

Address: 39351 187th St, Hitchcock SD 57348

Phone: 605 266-2711

Amount of Water Claimed: 3.56

Total Acres: 320

Source of Water Supply: groundwater

Water to be used for: irrigation

County: Spink

Type of Waste Disposal System:

Location: 4 miles northeast of Hitchcock

PRIORITY

Date Received: 7-12-2002

Application/License Fee: \$375

Corrected Application Received:

Period of Annual Use: April 1 – September 30

Remarks:

Diversion Point: centers of NW ¼ & SW ¼ Sec 14-T114N-R63W

Land to be Irrigated: W ½ Sec 14-T114N-R63W

Depth of Well: 60

Well Driller: :

Remarks:

Type of Map: aerial

Notice of Hearing - date to intervene: _____

SOUTH DAKOTA
WATER PERMIT NO. 6339-3 FOR IRRIGATION

Date of first receipt of application July 12, 2002.

The Water Management Board approved Water Permit No. 6339-3 on December 4, 2002 for Allen Gatzke, 39351 187th St, Hitchcock SD 57348 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 6339-3 appropriates 3.56 cubic feet per second from two wells (Tulare: Hitchcock Aquifer) 60 feet deep located in the centers of the NW $\frac{1}{4}$ and SW $\frac{1}{4}$ Section 14 to irrigate 320 acres located in the W $\frac{1}{2}$ Section 14; all in T114N-R63W.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period April 1 – October 31.
3. The date from which applicant may claim right is July 12, 2002.
4. One-fifth of the construction is to be completed on or before June 4, 2005.
5. All construction is to be completed on or before December 4, 2007.
6. Water is to be put to beneficial use on or before December 4, 2011.
7. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The wells authorized by Permit No. 6339-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

REPORT ON WATER PERMIT NOS. 6330-3, 6331-3, 6332-3, 6336-3, 6337-3, 6338-3, 6339-3, 6340-3, 6343-3, 6344-3, 6345-3, 6346-3, 6348-3, 6353-3 FOR WATER FROM THE TULARE HITCHCOCK AQUIFER AND WATER PERMIT NOS. 6333-3, 6334-3, 6347-3, 6351-3, 6352-3 FOR WATER FROM THE TULARE WESTERN SPINK AQUIFER

September 10, 2002

These applications are all for irrigation and propose to appropriate a total of 62.87 cfs for irrigation of 4,604.4 acres located in Beadle and Spink County. Specifically, these applications request 45.85 cfs for irrigation of 3,397 acres from the Tulare Hitchcock aquifer and 17.02 cfs for irrigation of 1,207.4 acres from the Tulare Western Spink aquifer.

AQUIFER – TULARE WESTERN SPINK (T-WS), TULARE HITCHCOCK (T-H)

The Tulare Western Spink is a mostly buried outwash (sand and gravel) which is under predominantly confined or artesian conditions. The Tulare Hitchcock is a predominantly surficial outwash (sand and gravel) which is under water table conditions. The Tulare Western Spink is hydraulically connected to the Tulare Hitchcock and ground water movement is from southwest to northeast and towards the James River (Hamilton, 1996). For practical purposes the two management units are the same aquifer system. The Hamilton report refers to the Tulare aquifer in general terms whereas the terms Tulare Hitchcock and Tulare Western Spink are management units of the Tulare aquifer as defined in an earlier report (Hedges, 1982). The boundary line between the two management units roughly follows a line from the town of Hitchcock to the town of Tulare. Everything east of that imaginary line is Tulare Hitchcock and everything west of the line is Tulare Western Spink. The Water Rights Program has continued to use the management units as described in the Hedges report for water use and water allocation purposes. However, because of the similarities between the aquifer management units and because of continuing irrigation development from both management units, the management units need to be combined to fully utilize the development potential of the aquifer. This report will consider the Tulare Western Spink and the Tulare Hitchcock management units as the same aquifer.

The Tulare Hitchcock underlies 96,000 acres and contains an estimated 360,000 acre-feet of recoverable water in Spink County and underlies 53,800 acres and contains an estimated 333,000 acre-feet of recoverable water in storage in Beadle County (Hedges, 1982). This totals to 149,800 acres and 693,000 acre-feet of recoverable water in storage for the entire aquifer. Recharge to the aquifer has been estimated to approximate 0.83 inches per year (Kuiper, 1984). This equates to an average recharge of 6,640 acre-feet per year for Spink County and 3,720 acre-feet per year for Beadle County. The total annual recharge for the Tulare Hitchcock is approximately 10,360 acre-feet.

The Tulare Western Spink aquifer underlies 57,000 acres and contains an estimated 162,000 acre-feet of recoverable water in storage in Beadle County, underlies 72,300 acres and contains an estimated 270,930 acre-feet of recoverable water in storage in

Spink County and underlies 9,600 acres and contains an estimated 86,400 acre-feet of recoverable water in storage in Hand County (Hedges, 1982). This totals to 138,900 acres and 519,330 acre-feet of recoverable water in storage for the entire Tulare Western Spink. Recharge to the aquifer has been estimated to approximate 0.83 inches per year (Kuiper, 1984). This equates to an average recharge of 3,940 acre-feet per year for Beadle County, 5,000 acre-feet per year for Spink County and 664 acre-feet per year for Hand County. The total annual recharge for the Tulare Western Spink management unit is approximately 9,600 acre-feet.

The combined aquifer statistics for the Tulare Western Spink and Tulare Hitchcock management units would include, 288,700 acres underlain by aquifer, 1.212 million acre-feet of recoverable water in storage, and 19,960 acre-feet of annual recharge to the entire aquifer system.

Water use from the Tulare Hitchcock aquifer in Beadle County has exceeded the estimated average annual recharge (3,720 acre-feet) to the aquifer five times in the last 23 years. Water use from the Tulare Hitchcock aquifer in Spink County has never exceeded the estimated average annual recharge (6,640 acre-feet) to the aquifer and has peaked at 4,813.5 acre-feet as reported in 2001. However, there are twelve recently approved water permits located in Spink and Beadle County that have either not reported irrigation or have not fully developed yet. If these permits develop completely and use water at a rate comparable to the existing users, then the water use from the Tulare Hitchcock would increase by about 1,600 acre-feet. This calculated volume added to the reported use of 4,813.5 acre-feet in 2001 would approach the average annual recharge estimate for Spink County. In all likelihood, pumping the Tulare Hitchcock management unit in Spink County would probably exceed average annual recharge during a drought.

The combined water use for Spink and Beadle Counties for the Tulare Hitchcock has never exceeded the combined estimated recharge (10,360 acre-feet) but a peak volume of 9,874 acre-feet was pumped in 1989. Adding in the estimated pumping volumes of 1,600 acre-feet (the newer permits) would mean that pumping from the Tulare Hitchcock would have exceeded the annual recharge estimate three times since 1979. Combining pumping volumes from the two counties in this manner indicates that the aquifer is probably fully appropriated based upon actual plus estimated potential water use.

Water use for the Tulare Western Spink peaked at just over 5,100 acre-feet in 1989. With a total recharge to the aquifer of about 9,600 acre-feet annually, there is water available for appropriation from this aquifer. There are no newer water permits from the Tulare Western Spink to account for. The only other major user of water from this aquifer is the small rural water system, Water Right No. 4774-3 that uses 70 to 80 acre-feet of water per year (personal communication with Scott Gross, operator of the rural water system on September 9, 2002). Also, this system will apparently begin using water from Mid Dakota RWS when that water is available in the next year or two and abandon the Tulare Western Spink as a water source.

Combining the two management units and considering them as a unit indicates a total recharge of 19,960 acre-feet annually. Also, a maximum water use of 14,981 acre-feet occurred in 1989. These estimates leave about 5,000 acre-feet available for appropriation from the entire combined aquifer minus 1,600 acre-feet to account for development of permits issued but not yet utilized. This would leave approximately 3,400 acre-feet of water use to be developed from the combined aquifer.

The Water Rights Program monitors 24 observation wells completed into the Tulare Hitchcock in Spink and Beadle Counties and 26 observation wells completed into the Tulare Western Spink in Beadle, Spink and Hand counties. Water levels for these wells indicate fluctuation due to climatic conditions, that recharge does occur and that the effects of pumping are generally not significant. Hydrographs for observation wells (SP-53A, SP-53B, BD-77A and BD-66A) are included with this report. These records are representative of the general water level trends for both management units. The historical water level record is excellent and accurately reflects the conditions of the aquifer in this area for the last 50 years.

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are 77 existing water permits/rights that obtain water from the Tulare Hitchcock in Spink and Beadle Counties. These permits/rights appropriate 156.07 cfs and potentially irrigate 12,990 acres in Spink and Beadle Counties. There are 50 water permits/rights that obtain water from the Tulare Western Spink aquifer in Hand, Beadle and Spink Counties. These permits/rights appropriate 91.604 cfs and potentially irrigate 7,691.9 acres in these three counties. Interference has never been a problem for either aquifer. The Tulare Hitchcock is under water table conditions and drawdown created by pumping does not extend very far from individual production well. This is shown by the hydrographs for SP-53A, SP-77A and BD-66A. The Tulare Western Spink is a confined aquifer and fluctuation due to pumping does occur. The drawdown has not been significant and has not created adverse impacts. This is shown by the hydrograph for SP-53B and by water level records for the other observation wells in the area (Water Rights, 2002).

SDCL 46-6-3.1 states that "no application to appropriate groundwater may be approved if, according the best information reasonably available, it is probable that the quantity of water withdrawn annually from a groundwater source will exceed the quantity of the average estimated annual recharge of water to the groundwater source. An application may be approved, however, for withdrawals of groundwater from any groundwater formation older than or stratigraphically lower than the greenhorn formation in excess of the average estimated annual recharge for use by water distribution systems." Clearly the intent of this statute is to limit development of aquifers to a volume of water which approximates average annual recharge. The only exception to the statute would be for water distribution systems that obtain water from formations older than or stratigraphically lower than the Greenhorn Formation. All the applications in this report fail both of tests of the exception to the statute.

CONCLUSIONS

1. Water is available from the combined Tulare Western Spink and Tulare Hitchcock management units.
2. Based upon water use plus estimates for undeveloped permits there is approximately 3,400 acre-feet of water available for appropriation from the combined Tulare Hitchcock and Tulare Western Spink management units. Conservatively this volume would allow about 2,500 acres of additional irrigation.
3. The wells authorized by these applications, if approved, must be constructed in accordance with SD Well Construction Standards.
4. Interference is not expected to be a concern. The observation well data clearly shows that drawdown created by existing withdrawals does not seriously impact water levels over most of the aquifer especially the Tulare Hitchcock management unit.
5. Application Nos. 6330-3, 6331-3, 6332-3, 6333-3, 6334-3, 6336-3, 6337-3, 6338-3, 6339-3, 6340-3 and 6343-3 all obtain water from the Tulare Hitchcock or Tulare Western Spink management units and can be approved. These permits total about 2,554 acres of additional irrigation. The estimated water use for these permit applications should be about 3,400 acre-feet.
6. The Tulare Hitchcock and Tulare Western Spink management units of the Tulare aquifer should be declared fully appropriated and no additional permits from the aquifer will be considered until abandonment and/or forfeiture of existing rights non-development of a recently approved water permit, or additional information becomes available on the recharge rate to the aquifer.

James A Goodman
Natural Resources Engineer

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6339-3, Allen Gatzke**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6339-3, Allen Gatzke, 39351 187th Street, Hitchcock SD 57348.

The Chief Engineer is recommending APPROVAL of Application No. 6339-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The wells authorized by Permit No. 6339-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Garland Erbele, Chief Engineer
October 30, 2002

NOTE: The Water Rights Program received twenty two applications to appropriate water from the Tulare:Hitchcock and Tulare:Western Spink Aquifer. The Chief Engineer's recommendation is to approve eleven of these applications based upon priority. The Chief Engineer is recommending denial of eleven applications because the aquifer is fully appropriated. Please review the staff report carefully.

If the Board accepts the recommendation at their December 4th hearing, the aquifer will be considered fully appropriated. In that event, the Water Rights Program will recommend denial of new appropriations from this aquifer unless water becomes available by 1) abandonment and/or forfeiture of existing water rights, 2) non-development of a recently approved water permit, or 3) additional information becomes available on the recharge rate to the aquifer.

Applicants that obtain a water permit need to be aware that the works must be completed within 5 years of obtaining the permit and water put to beneficial use within an additional four years. Also, in accordance

with state law, if one-fifth of work is not completed within 2½ years of obtaining the permit, the Board may accept and approve a new application for the use of all or any of the water included in the original permit and the right to use water under the original permit shall be forfeited.

Affidavit of Publication

Davis the undersigned, am Publisher of said newspaper in charge of the advertising department thereof, and have personal knowledge of all the facts stated in this affidavit and that the legal or official notice entitled:

#271 Notice of Hearing

A printed copy of which is hereto attached, printed and published in said newspaper successive issues, to wit: The first publication being made on November 6, 2002 and the last publication being made on November 13, 2002; that the full amount of the fee charged for publishing the same to-wit: the sum of Forty and 60/100 Dollars, insures to the benefit of the publisher of THE REDFIELD PRESS, that no agreement or understanding for the diversion thereof has been made with any other person and that no part thereof has been agreed to be paid to any person whomsoever.

Subscribed and sworn to before me this 13th day of November, 2002.

Notary Public, South Dakota

My term expires 08/16/08

Notice of Hearing

No. 271

NOTICE OF HEARING

Notice of Hearing on Application Nos. 6338-3, 6339-3 and 6340-3 to Appropriate Water

Notice is given that Allen Gatzke, 39351 187 St., Hitchcock SD 57348 has filed the following applications for a water permit.

Application No. 6338-3 appropriates 3.56 cubic feet of water per second (cfs) from two wells (Tulare: Hitchcock Aquifer) 60 feet deep located in the centers of the NE 1/4 and SW 1/4 Section 10 to irrigate 320 acres located in the NE 1/4, SW 1/4 Section 10; all in T114N-R63W.

Application No. 6339-3 appropriates 3.56 cfs from two wells (Tulare: Hitchcock Aquifer) 60 feet deep located in the centers of the NW 1/4 and SW 1/4 Section 14 to irrigate 320 acres located in the W 1/2 Section 14; all in T114N-R63W.

Application No. 6340-3 appropriates 1.78 cfs from one well (Tulare: Hitchcock Aquifer) 60 feet deep located in the center of the NE 1/4 Section 15 to irrigate 160 acres located in the NE 1/4 Section 15; all in T114N-R63W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 6338-3, 6339-3 & 6340-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

Any person interested in opposing or supporting these applications must file a written petition with BOTH the applicant and Chief Engineer. The applicant must also file a petition if opposed to the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by November 25, 2002. The petition may be informal, but must include a statement describing the petitioner's interest in the applications, the petitioner's reasons for opposing or supporting the applications, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

The Water Management Board will consider these applications at 1:30

M. December 4, 2002 in the Matthew Ainsworth Center, Foss Building, 523 E Capitol, Pierre, SD. The Chief Engineer's recommendations are not final or binding upon the Board. The Board is authorized to 1) approve, 2) deny with qualifications, 3) defer, or 4) deny these applications based on facts presented at the public hearing. The December 4, 2002 hearing will be automatically delayed for at least 20 days upon written request to the Chief Engineer from the applicant or any interested person opposing the applications. The request for an automatic delay must be filed by November 20, 2002.

Any hearing will be an adversary proceeding. Any person filing a petition for the application have the right to be represented by a lawyer and may present evidence or cross-examine witnesses according to SDCL 1-26. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court provided by law. Contact Eric Lund by November 25, 2002, at above Water Rights Program address to request copies of information pertaining to these applications, to assure access to the hearing by the handicapped or to obtain an interpreter for the hearing impaired.

These applications are made pursuant to SDCL 46-1-1 thru 46-1-9, 46-1-12 thru 46-1-16; 46-2-3.1, 46-2-9, 46-2-11, 46-2-13, 46-2-17; 46-2A-1 thru 46-2A-10, 46-2A-12, 46-2A-14, 46-2A-15, 46-2A-20, 46-2A-21; 46-5-1 thru 46-5-11, 46-5-13 thru 46-5-15, 46-5-24, 46-5-25, 46-5-30.2, 46-5-30.4, 46-5-31; 46-6-3, 46-6-3.1, 46-6-6.1, 46-6-10, 46-6-13, 46-6-14, 46-6-26; and Board Rules ARSD 74:02:01:01 thru 74:02:01:15. Steven M. Pimer, Secretary, Department of Environment and Natural Resources.

NOTICE OF HEARING on Application Nos. 6338-3, 6339-3 and 6340-3 to Appropriate Water

Notice is given that Allen Gatzke, 39351 187th St., Hitchcock SD 57348 has filed the following applications for a water permit.

Application No. 6338-3 appropriates 3.56 cubic feet of water per second (cfs) from two wells (Tulare: Hitchcock Aquifer) 60 feet deep located in the centers of the NE ¼ and SW ¼ Section 10 to irrigate 320 acres located in the NE ¼, SW ¼ Section 10; all in T114N-R63W.

Application No. 6339-3 appropriates 3.56 cfs from two wells (Tulare: Hitchcock Aquifer) 60 feet deep located in the centers of the NW ¼ and SW ¼ Section 14 to irrigate 320 acres located in the W ½ Section 14; all in T114N-R63W.

Application No. 6340-3 appropriates 1.78 cfs from one well (Tulare: Hitchcock Aquifer) 60 feet deep located in the center of the NE ¼ Section 15 to irrigate 160 acres located in the NE ¼ Section 15; all in T114N-R63W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends DENIAL of Application Nos. 6338-3, 6339-3 & 6340-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

Any person interested in opposing or supporting these applications must file a written petition with BOTH the applicant and Chief Engineer. The applicant must also file a petition if opposed to the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by November 25, 2002. The petition may be informal, but must include a statement describing the petitioner's interest in the applications, the petitioner's reasons for opposing or supporting the applications, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

The Water Management Board will consider these applications at 1:30 P.M. December 4, 2002 in the Matthew Training Center, Foss Building, 523 E Capitol, Pierre, SD. The Chief Engineer's recommendations are not final or binding upon the Board. The Board is authorized to 1) approve, 2) approve with qualifications, 3) defer, or 4) deny these applications based on the facts presented at the public hearing. The December 4, 2002 hearing date will be automatically delayed for at least 20 days upon written request to the Chief Engineer from the applicant or any interested person opposing the applications. The request for an automatic delay must be filed by November 25, 2002.

Any hearing will be an adversary proceeding. Any person filing a petition and/or the applicant have the right to be represented by a lawyer and may present evidence or cross-examine witnesses according to SDCL 1-26. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law. Contact Eric Gronlund by November 25, 2002, at the above Water Rights Program address to request copies of information pertaining to these applications, to assure access to the hearing by the handicapped or to obtain an interpreter for the hearing impaired.

These applications are made pursuant to SDCL 46-1-1 thru 46-1-9, 46-1-12 thru 46-1-16; 46-2-3.1, 46-2-9, 46-2-11, 46-2-13, 46-2-17; 46-2A-1 thru 46-2A-10, 46-2A-12, 46-2A-14, 46-2A-15, 46-2A-20, 46-2A-21; 46-5-1 thru 46-5-11, 46-5-13 thru 46-5-15, 46-5-24, 46-5-25, 46-5-30.2, 46-5-30.4, 46-5-31; 46-6-3, 46-6-3.1, 46-6-6.1, 46-6-10, 46-6-13, 46-6-14, 46-6-26; and Board Rules ARSD 74:02:01:01 thru 74:02:01:15. Please send the Water Rights Program the first publication immediately for notices that are published. The publications are checked for accuracy so any corrections can be made in the second publication. You may send to Water Rights Program at 523 E. Capitol Avenue, Pierre SD 57501 or fax to the attention of Karen Schlaak at (605) 773-4068. Publication errors can invalidate the public notice.

After the second publication, **please send us an affidavit or use the enclosed Proof of Publication form for each published notice.** The applicant pays the cost of publication, but the Water Rights Program records require an affidavit or Proof of Publication. Delays in receiving the affidavit can be costly to the applicant.

Sincerely,

Eric Gronlund

NOTE: TO BE SURE OF PUBLICATION ON
THE CORRECT DATES, CONTACT
THE NEWSPAPER RIGHT AWAY IF
YOU WANT TO PROCEED.

October 30, 2002

Allen Gatzke
39351 187th Street
Hitchcock SD 57348

Dear Mr. Gatzke :

The water permit applications you filed for irrigation use have been examined and found to comply with the South Dakota Water Laws and applicable rules. The Chief Engineer's recommendation is for APPROVAL of Application Nos. 6338-3, 6339-3, 6340-3 and DENIAL of the Application No. 6348-3. Enclosed for your information are, separate notices for the approval of Application Nos. 6338-3, 6339-3, 6340-3 and the denial of Application No. 6348-3, the recommendations of the Chief Engineer and a staff report. Please review the notices prior to authorizing publication and notify this office, if you have any corrections or questions.

In the case of Application Nos. 6338-3, 6339-3 and 6340-3, a notice of hearing has been sent to the publisher of the Redfield Press printed at Redfield (ph# 472-0822). Be sure to contact the newspaper immediately to authorize publication of your notice of hearing and to arrange for payment so these applications are scheduled for the December 4th Board meeting. Early contact with the paper can eliminate delays. Upon receiving authorization, the publisher has been instructed to publish your notice once each week for two consecutive weeks with the last publication to occur twenty days before the board meeting.

If you wish to proceed to hearing with Application No. 6348-3 and schedule a December 4, 2002 hearing before the Water Management Board, you must also authorize publication of the notice on this application by contacting the Redfield Press (ph# 472-0822) to publish. A copy of this notice was also sent to the newspaper with instructions to publish only if you authorize publication. Since we are on a tight scheduling timeframe for the upcoming meeting, you must contact the newspaper immediately if you want to proceed with a December 4th hearing.

If the notices are published on November 6 and 13, 2002, a hearing will then be scheduled at 1:30 PM, December 4, 2002 in the Matthew Training Center, Joe Foss Building, 523 E. Capitol Avenue in Pierre SD.

State law provides that if the Chief Engineer recommends denial of an application, the applicant has 20 days from the date the recommendation was mailed to state whether they intend to oppose the recommendation. Failure to submit a statement of intent to oppose the recommendation to deny constitutes withdrawal of the application. If you authorize the newspaper to publish the notice this will constitute your formal intent to oppose the recommendation and schedule a Board hearing on December 4, 2002. You may also choose to delay consideration of the application until the March Board meeting. If you want to delay the hearing, do not authorize publication of the notice on Application No. 6348-3 at this time. Contact me by November 20th to state your intent to proceed with the application but wait until the March 5 - 6, 2003 meeting. Failure to: 1) authorize publication of the notice scheduling a December 4th hearing, 2) contact me by November 20th to delay consideration until the March meeting, or 3) submit a written statement of intent to oppose the recommendation to deny Application No. 6348-3 by November 20, 2002, will constitute withdrawal of the application.

Mr. Gatzke, I realize this may be somewhat confusing, please contact Karen Schlaak or myself if you have any questions on the recommendation or the process of scheduling these applications for the December meeting.

Sincerely,

Eric Gronlund
Natural Resources Engineer

RE: Pending applications

COMMENTS:

Allen Gatzke stated the amount of water claimed on each of these applications should be 1600 gallons per minute (3.56 cubic feet of water per second). Each pivot needs 800 gpm to operate. I told Mr. Gatzke I would make that change on the applications.

PO Box 208
Turton SD 57477

Dear Mr. Dykstra:

Please find enclosed a copy of the report, recommendations, notice of hearings for the applications filed by the Gatzke's. Also enclosed is a summary table of the twenty-two applications we processed from the Tulare:Hitchcock and Tulare:Western Spink aquifers.

The notices to schedule a December 4th hearing before the Water Management Board have been sent to the Redfield Press. Since we are on a tight timeframe to get these applications scheduled for the December 4th meeting, the applicants will need to contact the newspaper immediately to authorize publication of the notices. The newspaper has been instructed not to publish unless the applicant or a representative of the applicant calls and authorizes publication.

If you have any questions, please contact me.

Sincerely,

Eric Gronlund

December 18, 2002

Allen Gatzke
39351 187th Street
Hitchcock SD 57348

Dear Mr. Gatzke:

Enclosed are application forms to transfer acres under an existing water permit to new lands. I have also included an instruction sheet and tried to provide some direction on how to complete the application. The application filing fee to amend a permit by transferring acres is \$50. You will also be responsible for the cost of publication of the notice of hearing.

I am providing you a copy of the statute regarding irrigation rights being appurtenant to the land and the conditions which allow for transferring to new land.

46-5-34. Irrigation rights appurtenant to land -- Amendment of permit required for severance and transfer. All water used in this state for irrigation purposes shall remain appurtenant to the land upon which it is used. However, if for any reason it should become impracticable to use all or any part of the water beneficially or economically for irrigation of any land to which the right of its use is appurtenant, all or any part of the right may be severed from the land and simultaneously transferred and become appurtenant to other land without losing priority of right previously established, subject to existing rights, upon approval of an application for an amended permit. No increase in total acres irrigated may be allowed under this section.

I believe the application needs to include some justification for why it is impracticable on the current acres.

Finally, I note on the application you filed for Water Permit No. 6339-3 that you lease this ground and that you own the land proposed under deferred Application No. 6348-3. Water rights are appurtenant to the land so the potential exists that the owner of the land authorized for irrigation under Water Permit No. 6339-3 could have input into whether this transfer is allowed to take place. Please provide the name and address of the owner of the land in the W ½ Section 14, T114N, R63W. The owner will be provided notice of this intended action.

Please feel free to contact me if you have any questions.

Sincerely,

Eric Gronlund

Dear Mr. Gatzke:

Enclosed are Water Permit No. 6338-3, 6339-3, and 6340-3 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

Form 10, *Notice of Completion of Works and Application of Water to Beneficial Use*, is enclosed. Please return this completed form after you have finished the system and have put the water to beneficial use. An investigation can then be scheduled so the water license may be issued, thus completing the acquisition of a water right.

An informational sheet *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Garland Erbele, Chief Engineer
Water Rights Program
(605) 773-3352

enclosures

Water Permit No. 6339-3 is being divided and reissued based on action by Water Management Board taken on March 5, 2003 which transferred portions of the acreage to be irrigated and point of diversion to other lands.

Water Permit No. 6339A-3 authorizes 1.78 cfs from one well (Tulare:Hitchcock Aquifer) located in the approximate center of the NW $\frac{1}{4}$ Section 19 to irrigate 160 acres located in the NW $\frac{1}{4}$ Section 19-T114N-R62W.

Water Permit No. 6339B -3 authorizes 1.78 cfs from one well (Tulare:Hitchcock Aquifer) located in the approximate center of the quarter-quarter line between the NW $\frac{1}{4}$ and the SW $\frac{1}{4}$ Section 14 to irrigate 160 acres located in the S $\frac{1}{2}$ NW $\frac{1}{4}$, N $\frac{1}{2}$ SW $\frac{1}{4}$ Section 14 with the well; all in T114N-R63W.
