Dear Mr. Young:

Enclosed is Water License No. 6458B-3 for your records. Based on the ownership change filed by Rex Bye, Water Right No. 6458-3 was divided and reissued to reflect separate ownership as follows:

- Water Right No. 6458A-3 authorizing the irrigation of 194 acres within the W $\frac{1}{2}$ NE $\frac{1}{4}$ and NW $\frac{1}{4}$ of Section 36, T93N, R54W.
- Water Right No. 6458B-3 authorizing the irrigation of 68 acres within the S $\frac{1}{2}$ SW $\frac{1}{4}$ of Section 25, T93N, R54W

For your information SDCL 46-6-27 requires that if in the future, the owner of an existing well, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

So long as you use the water beneficially, as stated in the Water License, State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Eric Gronlund, Chief Engineer

NOTE: While this Water Right includes diversion from both wells, access to wells on private property is not afforded under this license. Access arrangements would need to be made with the adjacent landowner.
