RE: Applications to Appropriate Water

To Whom It May Concern:

The Clay Rural Water System has taken note of the eleven applications to appropriate water in Riverside Township, Clay County and would like to provide comment.

The proposed site of these diversions is within two to six miles of the Clay Rural Water System well field. All but one of the diversions is located in the same aquifer - the Lower Vermillion-Missouri - as the Clay Rural Water well field.

Our initial concern regarding these applications is the impact it could have on the Clay Rural Water Systems' sole supply. Clay Rural Water supplies water to over 4,200 residents in southeast South Dakota.

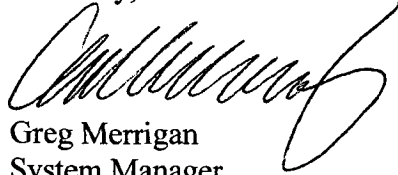

The applications request total withdrawals of 21.2 cubic feet per second. In discussions with Jim Goodman of your program, indications are that this withdrawal is not of concern for this aquifer. Mr. Goodman states that no safe withdrawal rate has been set for the aquifer, as the current diversion is not significant. Clay Rural Water acknowledges these statements.

An additional concern is that of possible use of the irrigation units for chemigation. The proposed diversions are located within one to five miles of the Clay Rural Water Source Water Protection Area. As chemigation can present a direct link to the aquifer in the event of an equipment malfunction, the possible threat to the aquifer could be significant. The Clay Rural Water System requests that any chemigation from these units require a permit and be routinely monitored.

In closing, the requested diversions are a substantial increase in the amount of irrigation that has historically taken place in this area. We hope DENR will review them closely and monitor all activity granted as a result of approval of the applications.

Thank you for the opportunity to comment and please contact me if you have any additional questions.

Sincerely,

RE: Applications to Appropriate Water

To Whom It May Concern:

This letter is a follow up to my letter of March 10, 2005 regarding the Applications to Appropriate Water from Hansen Properties in Riverside Township, Clay County.

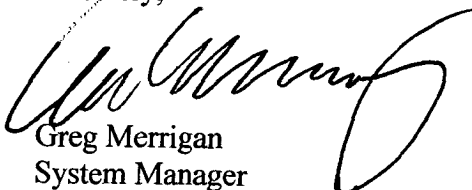

I have had the opportunity to meet with Mr. Hansen and discuss the applications. At his request I am writing this letter to clarify our comments.

The Clay Rural Water System is not opposed to the issuance of these permits and is not requesting a hearing before the Water Rights Board. We are not requesting the applicant obtain a special permit for any chemigation activities, only that it be inspected and regulated as per existing DENR protocol.

The intent of our original letter was to make our concerns known. If existing DENR regulations are followed it appears the diversions will not have an adverse effect on the Clay Rural Water System or its members.

Thank you again for the opportunity to comment and please contact me if you have any additional questions.

Sincerely,

Re: Water appropriation applications # 6563-3 through # 6573-3

Dear Eric,

Upon further discussion with my attorney, we will be recording the eleven water appropriation permits. To be most correct and cover any previously discussed forms, the permits should be issued in the name of: Roger A. Hansen, dba Hansen Properties, P.O. Box B, Centerville, SD (Ph. # 605-563-2212) Hansen Properties is a sole proprietorship of Roger A. Hansen, not a corporation or L.L.C.

Thank you for your assistance in the various steps along the way to get these permits issued.

RE: Applications to Hansen Properties to Appropriate Water; Clay County

To Whom It May Concern:

As a rural resident, customer of rural water, and landowner in Clay County, I have noted the 11 applications by Hansen Properties to appropriate water in Riverside Township, Clay County. I have also sought information from officials of the state Water Management Board, the South Dakota Geological Survey and the Clay Rural Water System in an effort to determine whether the proposed water appropriation would be in the public interest, as required by state water rights laws and regulations.

Though no safe withdrawal rate has been determined, both Jim Goodman, state Groundwater Supervisor, and Derric Iles of SD Geological Survey indicated their belief that, given the capacity of the Missouri-Lower Vermillion Aquifer, the withdrawal of 21.2 cubic feet per second will not pose a threat to the public water supply.

I have not, however, received satisfactory assurance from any of the several persons with whom I have spoken, that the use of the proposed irrigation systems for the application of chemicals and fertilizer will not pollute the aquifer, which is vital to the 4,200 residents who rely on the Clay Rural Water System. Given that no alternative source of water is available to county residents, I believe that the public interest, protected by state law, must ensure that no pollution of the aquifer be allowed.

Borings by the SD Geological Survey indicate that in at least four of the 10 sections for which permits are requested -- sections 11, 14, 22 and 28 -- the Missouri-Lower Vermillion is a shallow aquifer, possibly as near as 10 to 20 feet below the surface, and with little or no clay layer between the very porous sand and gravel soil and the water, a condition that presents the possibility of nitrogen or chemicals leaching into the aquifer, especially if water and or chemicals are over-applied, or in the case of equipment malfunction.

I understand that the SD Geological Survey has two monitoring wells in section two of Riverside Township, and that in the shallower of these two wells, nitrates above the drinking water standard of 10 milliliters per liter were detected in 2002. But these monitoring wells are up-gradient from the proposed 11 well sites, so they would not be likely to detect any pollution that might occur as a result of the proposed

developments.

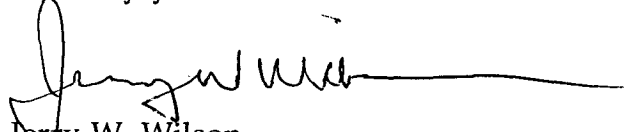

I understand that the Chief Engineer has tentatively determined that this project is in the public interest. I do not know whether the approval of these permits could lead to degradation of water quality for residents of Clay County at any future time, but if the county's water supply is in any way put at risk by this very large project, then I question whether the approval is in the public interest, or only a private interest.

I propose that one or two conditions be attached if these applications are to be approved:

1. Stipulate that no chemigation of any sort will be allowed over the shallow aquifer; and/or
2. Establish a monitoring well or wells down-gradient (i.e., between the closest of the proposed wells and the well-field of the Clay Rural Water System), and stipulate that any increase in nitrates or chemical pollutants detected by the monitoring well(s) will trigger the shut-down of these wells.

Thank you for your defense of the public interest. Nothing is more important to the public this year, in 10 years, in 100 years and far beyond, than clean, safe water.

Sincerely yours,

Dear Mr. Wilson:

The Water Rights Program received your letter regarding the eleven permit applications to appropriate water for irrigation filed by Roger Hansen. Since your letter was submitted after the March 14, 2005, published date to file a petition to intervene a hearing will not be scheduled before the Water Management Board. Water Rights law directs the Chief Engineer to issue the water permits as recommended.

We do however note your concerns regarding potential pollution to the aquifer from applying of chemicals and fertilizer through the irrigation systems. There are state requirements that irrigators, who apply chemicals through an irrigation system, must follow to prevent the sort of concerns which you express. These rules are intended to protect the environment by prohibiting the back flow of fluid towards the water source and shutting down the system if any component malfunctions. A copy of these rules is attached.

The handling, disposal, transportation and storage of fertilizers and pesticides are subject to additional requirements administered by the South Dakota Department of Agriculture. I encourage you contact the Department of Agriculture at (605) 773-4432 if you have questions on the regulations they administer.

If you have any questions on the water right permitting process, please feel free to contact us.

Sincerely,

REPORT ON WATER PERMIT APPLICATION NO. 6566-3

For Roger Hansen

January 28, 2005

Application No. 6566-3 proposes to appropriate 1.22 cfs (550 gpm) from a well approximately 44 feet deep located in the SE ¼ NW ¼ of section 14 to irrigate 86 acres located in the NW ¼, NE ¼ SW ¼ of section 14; all in T95N R52W in Clay County.

AQUIFER – LOWER VERMILLION MISSOURI (LVM)

At this site the Lower Vermillion Missouri is a surficial outwash (sand and gravel) that is probably under water table conditions but over most of Clay County is buried aquifer that can be under either artesian or water table conditions. The aquifer underlies 100,800 acres and contains an estimated 1.5 million acre-feet of recoverable water in storage in Clay County (Hedges, 1982). The aquifer extends into Turner and Lincoln County to the north (where it blends into the Parker Centerville and Upper Vermillion Missouri aquifers), to the south where the aquifer blends into the Missouri Elk Point aquifer and also the aquifer is hydraulically connected to the Vermillion River. The aquifer appears to be under slightly confined conditions at this site but generally behaves like it is under water table conditions over most of Clay County. Ground water movement has a basic component of northwest to southeast with locally movement toward the Vermillion River (Christensen, 1967). This means most of the time the river is a discharge zone for ground water.

There is an existing irrigation well at this proposed site. The information available indicates that this well consists of sand and gravel from near the surface to a depth of 44 feet and had a static water level about 8 feet below land surface. That well was capable of producing 900 gpm when drilled according to an inspection done in 1957. Also, it appears from the county study mapping that the aquifer could be as much as 150 to 175 feet thick in this area (Christensen, 1967). This probably means that at a depth of 44 feet a clay layer was present which if penetrated would have encountered more sand and gravel probably to a depth of about 175 feet or more.

The Water Rights Program monitors an observation well CL-66A located about one and one-half miles southwest of the well for this application and CL-80K located about two miles northeast of the well for this application. Water levels for these observation wells show good response to climatic conditions, that is, rising water levels during wet years (recharge) and gradually declining water levels during dry years. Hydrographs of these observation wells are included with this report. In general, the water level record indicates that the aquifer is capable of sustaining additional withdrawals (Water Rights, 2005).

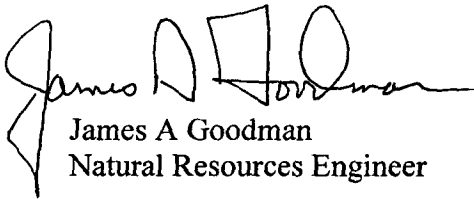

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There is an existing irrigation well within one-half mile of this application. The nearest existing irrigation well (Water Right No. 974-3) is located about one-half mile southeast

of the well for this application. There is one proposed well for water permit application No. 6567-3 located just over one-half mile south of this application. Interference is not expected to be a problem. The observation well record presently does not indicate that drawdown created by pumping is significant. This is shown by the observation well hydrographs.

CONCLUSIONS

1. Water is available from the Lower Vermillion Missouri aquifer.
2. The aquifer appears to be under water table conditions at this site. Pumping is not expected to create significant drawdown. Interference is not a concern.
3. This is an existing well authorized by Water Right No. 214-3. There is not sufficient information available to determine if this well is constructed in accordance with SD Well Construction Standards.
4. Apparently Water Right No 214-3 has been abandoned and is subject to cancellation upon approval of this application.
5. It is assumed that the effective priority date for application Nos. 6563-3 through 6573-3 would be arranged by the permit number. That is, first priority would be 6563-3 and the last priority would be 6573-3 all following in numerical order.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6566-3, Roger Hansen**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6566-3, Roger Hansen, Box B, Centerville SD 57014.

The Chief Engineer is recommending APPROVAL of Application No. 6566-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.
3. Water Right No. 214-3 is cancelled for nonuse.

NOTICE OF APPLICATIONS TO APPROPRIATE WATER

Notice is given that Hansen Properties, Box B, Centerville SD 57014 has filed eleven applications for water permits to irrigate in Clay County. Specifics on each application are as follows:

Application No. 6563-3 proposes to appropriate an additional 1.56 cubic feet of water per second (cfs) and irrigate 248 additional acres to what is currently authorized by Water Right No. 1569-3. Water Right No. 1569-3 is currently diverting 1.78 cfs from one existing well completed into the Lower Vermillion Missouri Aquifer (158 feet deep) located in the SW 1/4 NW 1/4 Section 15 to irrigate 132 acres located in the NW 1/4 Section 15, T95N-R52W. Water Permit No. 6009-3 changed the well location to the present location. This application proposes to appropriate an additional 1.56 cfs from the existing well to irrigate an additional 248 acres located in the N 1/2 and SW 1/4 Section 15-T95N-R52W. When developed, a total of 3.34 cfs will be appropriated from this existing well to irrigate 380 acres.

Dear Mr. Hansen:

Enclosed is Water License No. 6566-3. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 6566-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer

According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 7003-3, 7383-3, 7693-3, 7994-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Amend Permit No(s) 974-3 & 1813-3 to require the Irrigation Water Use Questionnaire to be submitted each year;
3. Postpone any action or take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaires are received in this office before the **March 3, 2021** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION AND/OR AMENDMENT OF
WATER RIGHTS AND WATER PERMITS

TO: Roger Hansen, Hansen Ventures LLC, 700 W Broadway, Centerville SD 57014

FROM: Eric Gronlund, Chief Engineer *Eric Gronlund*
Water Rights Program

SUBJECT: One Year Suspension of Water Right or Permit Nos. 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 7003-3, 7383-3, 7693-3, 7994-3 and Amendment of Water Right Nos. 974-3 & 1813-3

On March 3, 2021, the Water Management Board ordered:

Effective April 3, 2021, Water Right or Permit Nos. 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 7003-3, 7383-3, 7693-3, 7994-3 be suspended for the 2021 irrigation season for failure to submit the 2020 irrigation questionnaires.

If the 2020 irrigation questionnaires are received prior to April 3, 2021, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2021 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2021 unless the 2020 irrigation questionnaires are submitted by April 3, 2021.

After April 3rd, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2020 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 5-6, 2021 in Pierre, SD. The letter should include your reasons for not completing the 2020 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The Water Management Board also amended Water Right Nos. 974-3 & 1813-3 to include the following qualification:

- "This water right is subject to the Irrigation Water Use Questionnaire being submitted each year."

March 4th
Roger Hansen
Hansen Ventures LLC
Page 2

The addition of this qualification to your water right means that failure to submit the required irrigation questionnaires in the future could result in suspension of the water rights with no use of water for up to one year for the first violation.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

Dear Mr. Hansen:

On March 3, 2021, the Water Management Board ordered Water Permit/Right Nos. 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 6822-3, 7003-3, 7383-3, 7693-3, 7994-3, 8070-3 and 8071-3 suspended if the 2020 irrigation questionnaires were not received prior to April 3, 2021.

The questionnaire information for the above listed permits and rights was received on April 1st. Since the irrigation questionnaires are on file, no violations have occurred, and no suspensions will take place. You may irrigate during the 2021 irrigation season.

In the future, the Board may not grant the additional 30-day grace period after the hearing is held. I would caution you against waiting so long to get the forms in.

If you have any questions, please contact us.

RE: aquifer designation

COMMENTS:

Jensen (2025) as part of a review of the Lower Vermillion Missouri aquifer (LVM) determined that Water Right Nos. 973-3, 974-3, 1813-3, 1916-3, 3905-3, 4731-3, 5979-3, 6563-3, 6565-3, 6566-3, 6569-3, 6571-3, 6572-3, 6808-3, 6813-3, 6815A-3, 6817-3, 6818-3, 6819-3, 6821-3, 6822-3, 7001-3, 7003-3, 7383-3, & 7693-3, should have the aquifer reassigned. In reviewing the best information currently available for aquifer and management unit naming

conventions, the best aquifer designation for Water Rights previously listed is the Southern management unit of the Upper Vermillion Missouri aquifer (UVM:S) shown in Figure 1.

This change of aquifer designation, to the Southern management unit of the Upper Vermillion Missouri aquifer, does not represent a physical change in the water source. It is an update to the name of the aquifer materials to reflect the currently best available information for aquifer extents. This update to the aquifer name does not authorize any increase in the amount of water appropriated by Water Right Nos. 973-3, 974-3, 1813-3, 1916-3, 3905-3, 4731-3, 5979-3, 6563-3, 6565-3, 6566-3, 6569-3, 6571-3, 6572-3, 6808-3, 6813-3, 6815A-3, 6817-3, 6818-3, 6819-3, 6821-3, 6822-3, 7001-3, 7003-3, 7383-3, & 7693-3, relocation of existing wells, or completion of additional wells into the aquifer. Going forward, issuance of any pertinent documents will reflect the updated aquifer designation.

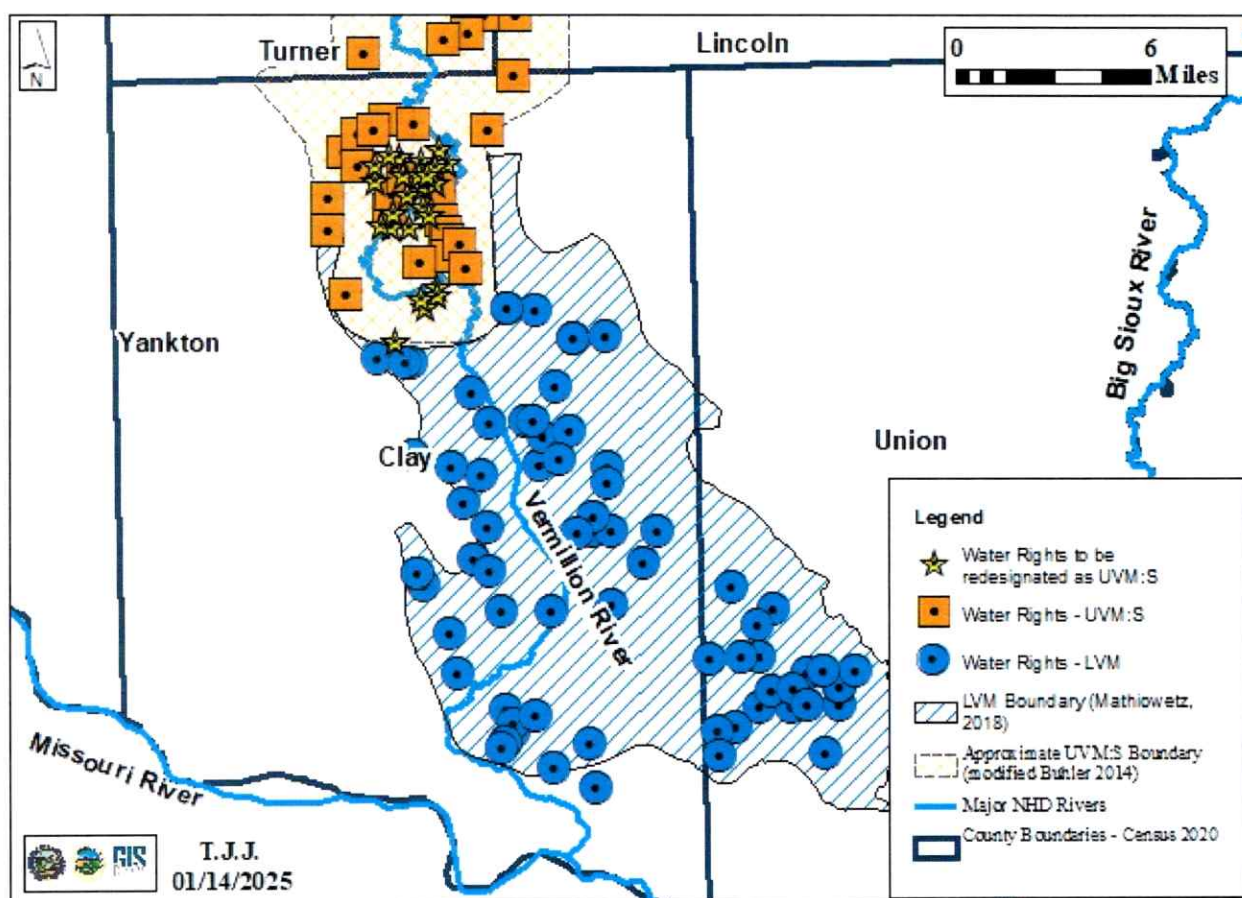

Figure 1. Map of the approximate Upper Vermillion Missouri: South aquifer boundary (Buhler, 2014), map of the approximate Lower Vermillion Missouri aquifer boundary (Mathiowetz, 2018), Water Rights/Permits for Upper Vermillion Missouri: South aquifer, Water Rights/Permits for Lower Vermillion Missouri aquifer, and Water Rights/Permits for Upper Vermillion Missouri: South aquifer previously assigned Lower Vermillion Missouri aquifer.
