RE: Twelve applications filed by Hansen Properties

COMMENTS:

Mr. Hansen stopped in the Water Rights Program office on February 20th to file 12 applications. He later that week mailed one additional application. I helped him complete the application form and the map. The maps depict the area he showed me that are proposed to be irrigated. In some instances the number of acres listed on the application appears to be greater than the area portrayed on the map. Mr. Hansen obtained the estimated acres from his irrigation system supplier. Upon development of the irrigation system, the water license will be issued for the amount of irrigation actually taking place.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 6818-3, Hansen Properties**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 6818-3, Hansen Properties, c/o Roger Hansen, Box B, Centerville SD 57014.

The Chief Engineer is recommending APPROVAL of Application No. 6818-3 because; 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualification:

1. The well approved under this Permit No. 6818-3 will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights. The proposed well shall be located a minimum of 1320 feet from the Vermillion River.
2. The well authorized by Permit No. 6818-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

REPORT ON WATER PERMIT NO. 6818-3
For Hansen Properties
March 28, 2007

Application No. 6818-3 proposes to appropriate 1.55 cfs from one well approximately 100 feet deep located in the approximate center of the NE $\frac{1}{4}$ of section 28 to irrigate 117 acres located in the N $\frac{1}{2}$ of section 28; all in T95N R52W in Clay County.

AQUIFER – LOWER VERMILLION MISSOURI (LVM)

The Lower Vermillion Missouri is a buried outwash (sand and gravel) that appears to be under water table conditions at this site. The Lower Vermillion Missouri underlies 100,800 acres and contains an estimated 1.5 million acre-feet of recoverable water in storage in Clay County (Hedges, 1982). The aquifer extends into Union County to the southeast, blends into the Upper Vermillion Missouri aquifer to the north, and blends into the Missouri Elk Point aquifer to the south. Just to the northeast of this application the Lower Vermillion Missouri aquifer appears to be hydraulically connected to the overlying Parker Centerville aquifer and is also hydraulically connected to the Vermillion River. Ground water movement has a basic component of northwest to southeast in Clay County with local movement toward the Vermillion River (Christensen, 1967). This would mean most of the time the aquifer is discharging to the river.

No test well was drilled for this application. At this site a well would probably encounter 150 to 175 feet of saturated sands and gravels (Christensen, 1967). The well should be completed as deep as possible into the source for a more reliable well. This is because the greater saturated thickness allows for a higher capacity well. There is a log for a domestic well in section 28 indicating clay from the surface to a depth of 70 feet followed by sand and gravel to a total depth of 109 feet and had a static water level 70 feet below land surface. That domestic well is located on top of the bluff where as this proposed well would be on the floodplain bottom. The well depth here could vary from 50 to 170 feet depending upon depending upon aquifer characteristics.

There is a concern with the location of this proposed well in relation to the Vermillion River. This location is within a few hundred feet of the river. This well site should be 1,320 feet from the river to minimize any potential impacts on river flows resulting from pumping the irrigation well. At this site the well could be moved to the west to obtain that distance with little change in the makeup of the system design. There could be other economic factors that influence the well location that are not apparent from the application.

The Water Rights Program monitors an observation well CL-66A (located about one and one-half miles northeast of this application and completed into the Lower Vermillion Missouri aquifer. Water levels for this well shows good response to climatic conditions, that is rising water levels during wet years (recharge) and gradually declining water levels during dry years. In general, the water record indicates that the aquifer is capable

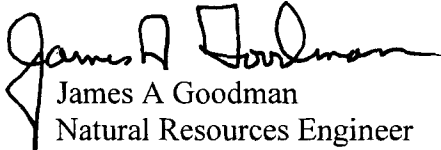

of sustaining additional withdrawals (Water Rights, 2007). A hydrograph for this observation well is included with this report.

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are three proposed or existing irrigation wells (Water Permit No. 6572-3 located about one-half mile south, Water Permit No. 6573-3 and water permit application No. 6816-3 located about one-half mile west and Water Permit No. 6816-3 located about one-half mile north) within one-half mile radius mile of this application. Interference is not expected to be a concern. At this distance between wells drawdown is not expected to be significant. This is verified by the observation well record.

CONCLUSIONS

1. Water is available from the Lower Vermillion Missouri aquifer.
2. Interference is not expected to be a concern. The observation well records indicate drawdown is not significant in this area (see hydrograph for observation well CL-66A). The aquifer appears to be under water table conditions at the well site.
3. The well authorized by this application must be constructed in accordance with SD Well Construction Standards and will be more than likely be shallower than 100 feet applied for. The applicant will need to do testing to evaluate the aquifer thickness and production in this area.
4. The well location for this application is not properly spaced from the river. This production well should be at least 1,320 feet from the Vermillion River to minimize any potential impacts pumping may have on flows in the river.

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION AND/OR AMENDMENT OF
WATER RIGHTS AND WATER PERMITS

TO: Roger Hansen, Hansen Ventures LLC, 700 W Broadway, Centerville SD 57014

FROM: Eric Gronlund, Chief Engineer *Eric Gronlund*
Water Rights Program

SUBJECT: One Year Suspension of Water Right or Permit Nos. 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 7003-3, 7383-3, 7693-3, 7994-3 and Amendment of Water Right Nos. 974-3 & 1813-3

On March 3, 2021, the Water Management Board ordered:

Effective April 3, 2021, Water Right or Permit Nos. 6565-3, 6566-3, 6817-3, 6818-3, 6819-3, 7003-3, 7383-3, 7693-3, 7994-3 be suspended for the 2021 irrigation season for failure to submit the 2020 irrigation questionnaires.

If the 2020 irrigation questionnaires are received prior to April 3, 2021, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2021 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2021 unless the 2020 irrigation questionnaires are submitted by April 3, 2021.

After April 3rd, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2020 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 5-6, 2021 in Pierre, SD. The letter should include your reasons for not completing the 2020 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

The Water Management Board also amended Water Right Nos. 974-3 & 1813-3 to include the following qualification:

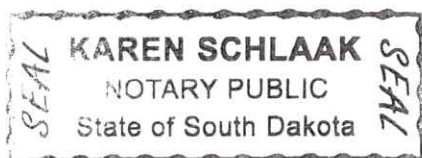

- "This water right is subject to the Irrigation Water Use Questionnaire being submitted each year."

March 4th
Roger Hansen
Hansen Ventures LLC
Page 2

The addition of this qualification to your water right means that failure to submit the required irrigation questionnaires in the future could result in suspension of the water rights with no use of water for up to one year for the first violation.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

RE: aquifer designation

COMMENTS:

Jensen (2025) as part of a review of the Lower Vermillion Missouri aquifer (LVM) determined that Water Right Nos. 973-3, 974-3, 1813-3, 1916-3, 3905-3, 4731-3, 5979-3, 6563-3, 6565-3, 6566-3, 6569-3, 6571-3, 6572-3, 6808-3, 6813-3, 6815A-3, 6817-3, 6818-3, 6819-3, 6821-3, 6822-3, 7001-3, 7003-3, 7383-3, & 7693-3, should have the aquifer reassigned. In reviewing the best information currently available for aquifer and management unit naming

conventions, the best aquifer designation for Water Rights previously listed is the Southern management unit of the Upper Vermillion Missouri aquifer (UVM:S) shown in Figure 1.

This change of aquifer designation, to the Southern management unit of the Upper Vermillion Missouri aquifer, does not represent a physical change in the water source. It is an update to the name of the aquifer materials to reflect the currently best available information for aquifer extents. This update to the aquifer name does not authorize any increase in the amount of water appropriated by Water Right Nos. 973-3, 974-3, 1813-3, 1916-3, 3905-3, 4731-3, 5979-3, 6563-3, 6565-3, 6566-3, 6569-3, 6571-3, 6572-3, 6808-3, 6813-3, 6815A-3, 6817-3, 6818-3, 6819-3, 6821-3, 6822-3, 7001-3, 7003-3, 7383-3, & 7693-3, relocation of existing wells, or completion of additional wells into the aquifer. Going forward, issuance of any pertinent documents will reflect the updated aquifer designation.

Map of the approximate Upper Vermillion Missouri: South aquifer boundary (Buhler, 2014), map of the approximate Lower Vermillion Missouri aquifer boundary (Mathiowetz, 2018), Water Rights/Permits for Upper Vermillion Missouri: South aquifer, Water Rights/Permits for Lower Vermillion Missouri aquifer, and Water Rights/Permits for Upper Vermillion Missouri: South aquifer previously assigned Lower Vermillion Missouri aquifer.
