Rock Valley IA 51247

Dear Ms. Russ:

Thank you for submitting the two *Applications for a Permit to Appropriate Water* for irrigation.

Regarding the application to irrigate in Section 3, please clarify the location and acreage proposed to be irrigated. The acres identified on the application total 200 acres. By our estimation, the area to be irrigated is approximately 166 acres (see the map which we prepared).

We estimate the acres to be irrigated is as follows:

NW ¼ SW ¼	25 ac	SW ¼ NW ¼	4 ac	NW ¼ SE ¼	24 ac
NE ¼ SW ¼	40 ac	SE ¼ NW ¼	17 ac	SW ¼ SE ¼	11 ac
SW ¼ SW ¼	11 ac				
SE ¼ SW ¼	29 ac	SW ¼ NE ¼	5 ac		total 166 acres

Please make whatever changes are necessary on either the maps and/or the acreage amounts. It is our goal to have the applications accurately reflect your proposed projects.

The application/license filing fee is based on the number of acres to be irrigated. A check for \$400 was submitted. The fee for the application in Section 4 is \$350.00. If you are proposing to irrigate 200 acres in Section 3, an additional \$275.00 will be required. If our estimation of 166 acres is correct, an additional \$250.00 will be required.

If you have any questions, please contact me.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 7067-3, Marion Rus**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 7067-3, Marion Rus, 3283 Dogwood Avenue, Rock Valley IA 51247.

The Chief Engineer is recommending APPROVAL of Application No. 7067-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The wells authorized by Permit No. 7067-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Garland Erbele, Chief Engineer
December 17, 2008

REPORT ON WATER PERMIT APPLICATION NO. 7067-3
For Marion Rus
November 5, 2008

Application No. 7067-3 proposes to appropriate 3.11 cfs from two wells approximately 200 feet deep and located in the approximate centers of the NW ¼ and the NE ¼ of section 4 to irrigate 268 acres located in the N ½ of section 4; all in T109N R47W in Brookings County.

AQUIFER – RUTLAND (RUT)

The Rutland aquifer is a buried outwash (sand and gravel) that is under artesian conditions at this site. The aquifer underlies 240 square miles and contains an estimated 400,000 acre-feet of water in storage in Brookings County (Hamilton, 1989). The aquifer extends into Deuel County to the north, Minnesota to the east and Moody County to the south. Ground water movement is from east to west in this area (Hamilton, 1989). An aquifer map for the Rutland published by Hamilton and showing thickness of the aquifer is included with this report. There is no estimate for recharge to the Rutland aquifer available at this time.

Test wells were drilled in both proposed well locations. Test #1 is located near the center of the NW ¼ indicates two layers of sand from 137 to 153 feet and 179 to 186 feet below land surface for a thickness of sixteen feet and seven feet respectively. Test well #2 located near the center of the NE ¼ indicates a layer of sand from 147 to 175 feet below land surface for a thickness of 28 feet. Of these two tests #2 appears to have the best potential. Based upon surrounding water level information it is expected the water level would be about 50 feet below land surface. No test pumping information is available for this area.

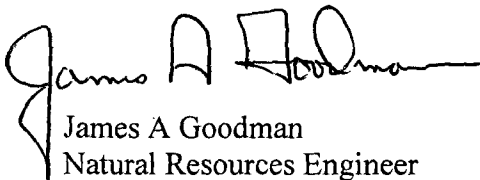

The Water Rights Program monitors two observation wells within three miles of this application. These are observation wells BG-78F (located about three miles to the northwest) and BG-78E (located about two miles northwest) from this application. Water levels for these observation wells fluctuate with area pumping both irrigation and dairy development. BG-78E has historically fluctuated nearly 50 feet during the irrigation season. This observation well is located about one half mile from existing production wells. Hydrographs for these two observation wells are included with this report (Water Rights, 2008).

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are two existing water rights Nos. 6403-3 (1.78 cfs, 100 acres) and 3047-3 (1.88 cfs, 132 acres) with those existing wells located about one quarter mile and one half mile from proposed site #2 and about one half and three fourths mile from proposed site #1 respectively. Interference will occur. The effects can not be determined until production wells are drilled and pumped. However the existing rights must be protected from adverse interference if that occurs. Also application No. 7068-3 was filed at the same time and therefore has the same priority date also requests to drill two more wells within a short distance to the east and south of this application. In order to prevent potential problems over priority of wells for these two proposed permits application No. 7067-3 is assumed to have priority over No. 7068-3 because it was a completed application first and was numbered first.

CONCLUSIONS

1. Water is available from the Rutland aquifer.
2. The aquifer is under artesian conditions at this site. Drawdown will be significant and interference will occur. Until installation and pumping of production wells it can not be determined if interference will be adverse.
3. In order to avoid potential conflicts over priority dates assigned to diversion points this application No. 7067-3 will take priority over No. 7068-3 for regulatory purposes.
4. The wells authorized by this application must be constructed in accordance with SD Well Construction Standards.
5. Test wells were constructed for this application. Both show some irrigation potential with Test #2 showing by far the best potential. Test well #1 does not show good potential with two layers of sand separated by clay. It is assumed for this report that these layers are hydraulically connected and a production well could be developed into both layers.
6. Water Permit Nos. 6414-3 and 6403-3 located in this immediate area and from the Rutland aquifer were issued in 2003 after contested case hearings because of opposition from an irrigator in Minnesota who was concerned about potential interference problems.

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, September 14, 2011, made a thorough examination of the water use system constructed by Marion Rus, 3283 Dogwood Avenue, Rock Valley IA 51247 holder of Permit No. 7067-3, bearing the priority of September 5, 2008 authorizing the diversion of 3.11 cu. ft. per second from the Rutland Aquifer for irrigation purposes, in Brookings County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

Two wells in place each with a 60 HP pump/motor

B. Works used to transport water to place of use:

Well heads are located approximately at the center of each quarter section being irrigated.

C. Works used to apply water to beneficial use:

Two 6 tower Valley center pivots

The system is in the following condition excellent. The points of diversion (wells) are located specifically Well 1 - Lat 44.27927 Lon -96.48155 --- approx. 1,130' South and 1,320' east of NW corner Section 4, T109N, R47W (near center of NW 1/4) and Well 2 Lat 44.27903 Lon -96.47160 --- approx. 1,150' South and 1,320' west of NE corner Section 4, T109N, R47W (near center of NE 1/4) The works are capable of diverting a total of 3.34 cfs from the two wells which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

All in Section 4, T109N, R47W

NW ¼ NW ¼	29 acres	NW ¼ NE 1/4	29 acres
NE ¼ NW ¼	29 acres	NE ¼ NE 1/4	29 acres
SW ¼ NW ¼	28 acres	SW ¼ NE 1/4	28 acres
SE ¼ NW ¼	28 acres	SE ¼ NE 1/4	28 acres

This breakdown of acres is a best estimate based on 1) information provided and 2) viewing the 2010 FSA aerial using ArcMap,

comprising a total of 228 acres of land and the license should be issued for 2.67 cfs based on the capacity of the two wells.

Applicable permit qualifications have been complied with: **Yes**

Exceptions to compliance are: none Date Report Completed: January 13, 2012

COMMENTS:

- Notice of Completion of Works filed January 2012
- Irrigation questionnaire reflect that irrigation began in 2009
- Pump information obtained from Steffl Drilling
- Water Permit authorizes 268 acres of irrigation. The annual submittal of the irrigation questionnaire states the entire 268 acres are being irrigated. However, based on the FSA aerial and length of the pivot (as documented on the specification sheet in the control box at the pivot center) each pivot irrigates 114 acres for a total of 228 acres. There are 6 tower pivots on these quarter sections in that the N ½ of this section is not a full sized 640 acre section. Licensing for 228 acres gives the permit holder the benefit that the end gun is run continuously, where in reality it is likely the end gun has stops on the southern portion of its rotation.
- The irrigation questionnaire report each pivot operates at 600 gpm. Also the specification box states 600 gpm for each system. However, the information supplied by the ^{driller} ~~drilling~~ states the pumps produce 750 gpm each. The license should be issued based system capacity of the pivot listed in the control box as 600 gpm (2 times 600 gpm = 1200 gpm which equates to 2.67 cfs). This matches with annual irrigation questionnaire submittal.

Dear Mr. Rus:

Enclosed is Water License No. 7067-3. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 7067-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Garland Erbele, Chief Engineer

NOTICE OF ENTRY OF ORDER OF ONE YEAR SUSPENSION OF WATER RIGHTS

TO: Marion J Rus, 3283 Dogwood Ave., Rock Valley IA 51247

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right Nos. 7067-3 & 7068-3

On March 4, 2015, the Water Management Board ordered:

Effective April 4, 2015, Water Right Nos. 7067-3 & 7068-3 be suspended for the 2015 irrigation season for failure to submit the 2014 irrigation questionnaires.

If the 2014 irrigation questionnaires are received prior to April 4, 2015 the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2015 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2015 unless the irrigation questionnaires are submitted by April 4th.

After April 4th, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2014 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 6-7, 2015 in Pierre, SD. The letter should include your reasons for not completing the 2014 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.
