

WATER PERMIT NO. 7070-3

Name of Applicant: Jerry Kiihl

Address: PO Box 204, Castlewood SD 57223

Phone: 605 793-2689

Amount of Water Claimed: 1.78 cfs

Total Acres: 160

Source of Water Supply: groundwater (2 wells)

Water to be used for: irrigation

County: Hamlin

Type of Waste Disposal System:

Location: ^{miles}
5 south of Castlewood

PRIORITY

Date Received: 9-18-08

Application/License Fee: \$300

Corrected Application Received: 9-23-08

Period of Annual Use: June 1 – Sept 30

Remarks:

Diversion Point: approximate center & SE ¼ NE

¼ Sec 25-T114N-R52W

Land to be Irrigated: NE ¼ Secc 25-T114N-R52W

Depth of Well: 75 feet deep

Well Driller: Kaiser Well Drilling

Remarks:

Type of Map: aerial

**SOUTH DAKOTA
WATER PERMIT NO. 7070-3**

Date of first receipt of application September 18, 2008.

Date of return to applicant for corrections, amendments or changes September 18, 2008.

Date of receipt of corrected application September 23, 2008.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 7070-3 to Jerry Kiihl, Box 204, Castlewood SD 57223 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 7070-3 appropriates 1.78 cubic feet of water per second from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in approximate center of the NE ¼ and SE ¼ NE ¼ Section 25 to irrigate 160 acres located in the NE ¼ Section 25; all in T114N-R52W.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: June 1 – September 30.
3. The date from which applicant may claim right is September 18, 2008.
4. The date of approval of Permit No. 7070-3 is December 29, 2008.
5. One-fifth of the construction is to be completed on or before June 29, 2011.
6. All construction is to be completed on or before December 29, 2013.
7. Water is to be put to beneficial use on or before December 29, 2017.
8. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The wells authorized by Permit No. 7070-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 7070-3, Jerry Kiihl**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 7070-3, Jerry Kiihl, PO Box 204, Castlewood SD 57223.

The Chief Engineer is recommending APPROVAL of Application No. 7070-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The wells approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The wells authorized by Permit No. 7070-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Garland Erbele, Chief Engineer
December 4, 2008

REPORT FOR WATER PERMIT APPLICATION NOS. 7070-3 & 7071-3
JERRY KIIHL
OCTOBER 27, 2008

Water Permit Application No. 7070-3 proposes to appropriate 1.78 cubic feet of water per second (cfs) from two wells to be completed into the Brookings management unit of the Big Sioux aquifer (approximately 75 feet deep). The wells are to be located in the approximate center of the NE¼ and in the SE¼ NE¼ Section 25, T114N-R52W. The water will be used to irrigate 160 acres located in the NE¼ Section 25, T114N-R52W, Hamlin County.

Water Permit Application No. 7071-3 proposes to appropriate 1.78 cfs from two wells to be completed into the Brookings management unit of the Big Sioux aquifer (approximately 75 feet deep). The water will be used to irrigate 147 acres located in the SE¼ Section 25, T114N-R52W, Hamlin County.

AQUIFER: Big Sioux: Brookings (BS:B)

SDCL 46-2A-9 requires

“A permit to appropriate water may be issued only if there is reasonable probability that there is unappropriated water available for the applicant's proposed use, that the proposed diversion can be developed without unlawful impairment of existing rights and that the proposed use is a beneficial use and in the public interest.”

This report will address the availability of unappropriated water from the Brookings management unit of the Big Sioux aquifer and the potential impacts to existing rights. The beneficial use and public interest of this proposed irrigation permit will not be addressed in this report.

AQUIFER CHARACTERISTICS:

The Big Sioux aquifer is an alluvium mantled outwash deposit consisting of silt, fine to coarse sand, and gravel. The aquifer thickness ranges from about 2 to 123 feet (Kume, 1985). The Brookings management unit of the Big Sioux aquifer extends from Codington County to Moody County, see figure 1. The management unit is hydraulically connected to the Aurora, North Deer Creek, Six Mile Creek and Unnamed Creek management units. The Brookings management unit underlies an estimated 191,100 acres and contains an estimated 642,230 acre-feet of recoverable water in storage (Hedges and others, 1982). In general, the aquifer is exposed at the surface and is unconfined (a water table aquifer) although confined portions may be present. The aquifer is hydraulically connected to the Big Sioux River and its tributaries, to Lake Poinsett and to Oakwood Lakes. Recharge to the aquifer is from groundwater inflow from glacial till, streamflow and lake recharge, and infiltration of precipitation on the aquifer surface. Average annual recharge is estimated to be 6.57 inches per year to the water table portion of the aquifer, and 3.29 inches per year to the artesian part of the aquifer (Koch, 1980). Discharge from the aquifer occurs through pumping from wells, evapotranspiration, and flow to streams and lakes.

The completion report for a test well that was submitted with Application No. 7070-3 identifies aquifer material from 1.5-18 feet below grade, clay from 18-22 feet below grade and aquifer material from 22-47 feet grade, with a static water level of four feet below grade at this well site. The log for the test well submitted for Application No. 7071-3 identifies aquifer material from surface to 28 feet below grade with a static water level of six feet.

Figure 1. Map showing the areal extent of the Brookings Management Unit of the Big Sioux Aquifer and the proposed location of 7070-3 and 7071-3 (Modified from Hedges and others, 1982)

WATER AVAILABILITY

The availability of unappropriated water from the Brookings management unit of the Big Sioux aquifer can be evaluated by considering SDCL 46-6-3.1 which requires that:

“No application to appropriate groundwater may be approved if, according to the best information reasonably available, it is probable that the quantity of water withdrawn annually from a groundwater source will exceed the quantity of the average estimated annual recharge of water to the groundwater source.”

Two approaches can be used to assess water availability in respect to SDCL 46-6-3.1: a water balance; and observation well data.

Water Balance:

Water Use:

There are 180 Water Rights, 31 Water Permits and nine future use reservations appropriating water from the Brookings management of the Big Sioux aquifer.

The Brookings management unit is used primarily for irrigation use and rural water system use. Irrigation use from the aquifer is shown in table 1.

2001	NA	NA
2000	NA	NA
1999	187.5	859.2
1998	355	835
1997	303.7	951.4
1996	207	NA
1995	350	NA

Table 3. Rural Water System usage reported from the Brookings management unit of the Big Sioux aquifer (Water Rights, 1995-2007)

In addition to the Water Permits/Rights shown in table 2, Future Use Permit No. 5094-3 reserves 390 ac-ft/yr for future use by Sioux RWS; Future Use Permit Nos. 3982-3 & 3982A-3 reserve 207 ac-ft/yr for future use by Brookings-Deuel RWS; and Future Use Permit No. 6988-3 reserves 2,809 ac-ft/yr for future use by Joint Well Field Inc. The total amount of water reserved for future use from the Brookings management unit of the Big Sioux aquifer is 3,406 ac-ft/yr.

Average annual irrigation use (8,285 ac-ft/yr) plus maximum rural water use (2,875 ac-ft/yr) plus the future use reservation from the Big Sioux: Brookings (3,406 ac-ft/yr) equals 14,566 ac-ft/yr.

Recharge:

The estimated average annual recharge to the Brookings management unit of the Big Sioux aquifer, assuming an area of 191,100 acres and a recharge rate of 6.57 inches per year, is approximately 104,627 ac-ft/yr.

Budget:

A simple water balance comparing the estimated average annual recharge and the “theoretical maximum” withdrawal by wells shows that unappropriated water is available from the Brookings management unit of the Big Sioux aquifer to satisfy this additional appropriation.

A water budget is not intended to suggest that all of the water that is in storage in the Big Sioux: Brookings aquifer or that all of the recharge to the aquifer is available for this appropriation, merely to demonstrate that in general the aquifer is an immense resource that is relatively untapped.

Observation Well Data:

The Water Rights Program monitors 80 observation wells completed into the Brookings management unit of the Big Sioux aquifer. There are six observation wells within approximately four miles of the well sites proposed by this application. Water level data shows the aquifer responds well to climatic conditions with “wet years” resulting in rising water levels and declining water levels during dry years. Hydrographs of the Big Sioux-Brookings observation wells located within approximately four miles of the wells proposed by this application are shown in figures 2-7.

Figure 2. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 1.75 miles south-southeast of 7070-3 & 7071-3

Figure 3. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 2.5 miles east-southeast of 7070-3 & 7071-3

Figure 4. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 3.25 miles north of 7070-3 & 7071-3

Figure 5. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 3.5 miles northwest of 7070-3 & 7071-3

Figure 6. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 3.75 miles west of 7070-3 & 7071-3

Figure 7. Hydrograph for Water Rights Observation Well completed into the Brookings management unit approximately 3.5 miles east-southeast of 7070-3 & 7071-3

In general the hydrographs show that over the period of record withdrawal has not exceeded recharge.

Review of Existing Water Permits/Rights:

There are nine Water Rights/Permits appropriating water within approximately one and one-half miles of the well sites proposed by Application Nos. 7070-3 and 7071-3. They are shown on figure 8 and table 4.

Figure 8. Water Rights/Permits within approximately one mile of the wells proposed by Application No. 7070-3

Table 4. Water Rights/Permits shown in Figure 8

Drawdown will occur if the wells proposed by this application are developed. The resulting interference to existing wells is not expected to be significant or a concern due to the distance between wells. This is apparent upon comparison of the hydrographs shown in figures 6 & 7. Observation well HN-77F (figure 7) is located only 1,750 feet from an irrigation well and Observation well HN-77D (figure 6) is approximately two miles from the nearest irrigation well, yet the hydrographs are nearly identical.

CONCLUSIONS:

1. The Brookings management unit of the Big Sioux aquifer is a viable aquifer and unappropriated water is available.
2. The Big Sioux: Brookings is predominately an unconfined aquifer and drawdown from pumped wells does not/should not adversely affect existing water rights.

NOTICE OF APPLICATION
NOS. 7070-3 AND 7071-3
TO APPROPRIATE WATER

Notice is given that Jerry Kiihl,
PO Box 204, Castlewood SD 57223
has filed the following applications
for a water permit.

Application No. 7070-3 proposes
to appropriate 1.78 cubic feet of wa-
ter per second from two wells to be
completed into the Big Sioux: Brook-
ings Aquifer (approximately 75 feet
deep) located in approximate cen-
ter of the NE 1/4 and SE 1/4 NE 1/4
Section 25 to irrigate 160 acres lo-
cated in the NE 1/4 Section 25; all in
T114N-R52W.

Application No. 7071-3 proposes
to appropriate 1.78 cfs from two wells
to be completed into the Big Sioux:
Brookings Aquifer (approximately 75
feet deep) located in the N 1/2 SE
1/4 Section 25 to irrigate 147 acres
located in the SE 1/4 Section 25; all
in T114N-R52W.

Pursuant to SDCL 46-2A-2, the
Chief Engineer recommends AP-
PROVAL of Application Nos. 7070-3
and 7071-3 because 1) unappropri-
ated water is available, 2) existing
rights will not be unlawfully impaired,
3) it is a beneficial use of water, and
4) it is in the public interest. In ac-
cordance with SDCL 46-2A-23, the
Chief Engineer will act on the appli-
cations, as recommended, unless a
petition is filed opposing the appli-
cations or the applicant files a peti-
tion contesting the Chief Engineer's

recommendations. If a petition op-
posing the applications or contesting
the recommendations is filed, then
a hearing will be scheduled and the
Water Management Board will con-
sider the applications. Notice of the
hearing will be given to the applicant
and any person filing a petition.

Any person interested in oppos-
ing or supporting these applications
or recommendations must file a writ-
ten petition with BOTH the applicant
and Chief Engineer. The applicant
must file a petition if contesting the
Chief Engineer's recommendations.
The Chief Engineer's address is
"Water Rights Program, Foss Build-
ing, 523 E Capitol, Pierre SD 57501
(605 773-3352)" and the applicant's
mailing address is given above. A
petition filed by either an interested
person or the applicant must be filed
by December 29, 2008.

The petition may be informal, but
must include a statement describ-
ing the petitioner's interest in the
application, the petitioner's reasons
for opposing or supporting the appli-
cation, and the signature and mail-
ing address of the petitioner or the
petitioner's legal counsel, if legal
counsel is obtained. Contact Eric
Gronlund at the above Water Rights
Program address to request copies
of information pertaining to these ap-
plications.

Steven M. Pirner, Secretary
Department of Environment and
Natural Resources.

ATTENTION: Legal Public Notice

Enclosed is a Notice on Application Nos. 7070-3 & 7071-3 to Appropriate Water to be published twice. Please publish the first notice on December 10, 2008 with the second publication 7 days later. The text of the notice can be e-mailed to your paper by contacting Karen Schlaak at (605) 773-3352.

The applicant must verify to you that the notice is to be published, before you make the first publication. **Please BILL the APPLICANT for the cost of publication.** The APPLICANT is Jerry Kiihl, PO Box 204, Castlewood SD 57223 (Ph # 605-793-2689).

Please send the Water Rights Program the first publication immediately. The publication is checked for accuracy so any corrections can be made in the second publication. You may use the form below or fax a copy of the first publication. Any fax should be sent to the attention of Karen Schlaak at (605) 773-4068. Publication errors can invalidate the public notice.

After the second publication, **please send us an affidavit or use the enclosed Proof of Publication form.** The applicant pays the cost of publication, but the Water Rights Program records require an affidavit or Proof of Publication. Delays in receiving the affidavit can be costly to the applicant.

Sincerely,

Eric Gronlund
Natural Resources Engineer

Dear Mr. Kiihl:

Water Permit Application Nos. 7070-3 & 7071-3 for irrigation use have been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice has been sent to the Publisher of the Hamlin County Herald Enterprise printed at Hayti SD (Ph #605-783-3636). You will need to contact the newspaper and authorize publication of this notice. For your information, a copy of the notice, the recommendations of the Chief Engineer and reports on the applications are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper to authorize publication of your Notice and to arrange for payment. Early contact with the paper can eliminate delays. Upon receiving authorization, the publisher has been instructed to publish your notice once each week for two consecutive weeks. The newspaper has also been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund
Natural Resources Engineer
(605) 773-3352

enclosures

NOTE: If you plan to contest any part of the Chief Engineer's recommendations, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the application.

Instruction to Newspaper - Publish first Notice on December 10, 2008 with the second publication 7 days later. The applicant is responsible for payment. The text of the notice can be e-mailed to your paper by contacting Karen Schlaak at (605) 773-3352 or email: Karen.schlaak@state.sd.us.

NOTICE OF APPLICATION NOS. 7070-3 and 7071-3 to Appropriate Water

Notice is given that Jerry Kiihl, PO Box 204, Castlewood SD 57223 has filed the following applications for a water permit.

Application No. 7070-3 proposes to appropriate 1.78 cubic feet of water per second from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in approximate center of the NE $\frac{1}{4}$ and SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25 to irrigate 160 acres located in the NE $\frac{1}{4}$ Section 25; all in T114N-R52W.

Application No. 7071-3 proposes to appropriate 1.78 cfs from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in the N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 25 to irrigate 147 acres located in the SE $\frac{1}{4}$ Section 25; all in T114N-R52W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 7070-3 and 7071-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on the applications, as recommended, unless a petition is filed opposing the applications or the applicant files a petition contesting the Chief Engineer's recommendations. If a petition opposing the applications or contesting the recommendations is filed, then a hearing will be scheduled and the Water Management Board will consider the applications. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting these applications or recommendations must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by December 29, 2008.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to these applications. Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

Jerry Kiihl
PO Box 204
Castlewood SD 57223

Dear Mr. Kiihl:

Enclosed are Water Permit Nos. 7070-3 & 7071-3 authorizing construction of your water diversion systems and beneficial use of the water, not exceeding the limits as specified in the Water Permits.

Form 10's, *Notice of Completion of Works and Application of Water to Beneficial Use*, are enclosed. Please return the completed forms after you have finished the systems and have put the water to beneficial use. An investigation can then be scheduled so the water licenses may be issued, thus completing the acquisition of a water right.

An informational sheet ? *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Garland Erbele, Chief Engineer

Approval of a Change of Diversion Points

NAME: Jerry Kiihl

ADDRESS: PO Box 204, Castlewood SD 57223

DATE: April 6, 2009 **COUNTY:** Hamlin **TELEPHONE:**

BACKGROUND:

Mr. Jerry Kiihl has filed an application to change the location of diversion points held under Water Permit Nos. 7070-3 and 7071-3. These two permits were issued in January 2009.

Water Permit No. 7070-3 appropriates 1.78 cfs from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in the approximate center of the NE $\frac{1}{4}$ and SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25 to irrigate 160 acres located in the NE $\frac{1}{4}$ Section 25; all in T114N, R52W.

Water Permit No. 7071-3 appropriates 1.78 cfs from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in the N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 25 to irrigation 147 acres located in the SE $\frac{1}{4}$ Section 25; all in T114N, R52W.

Mr. Jerry Kiihl has filed a request to change the well locations to the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25, T114N, R52W. This request proposes to construct two wells instead of four wells originally intended. The well locations will be the NW $\frac{1}{4}$ NE $\frac{1}{4}$ near the N $\frac{1}{4}$ corner of Section 25. This places the well to be completed under No. 7070-3 approximately 1,800 feet northwest of the original location. The well for No. 7071-3 will be approximately 3,500 feet northwest of its originally intended location. Mr. Kiihl stated during personal communication that the test drilling at the original location did not provide the production required. Well completion reports have been filed for the two wells in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25 and the meet well construction standards.

AUTHORITY:

Pursuant to SDCL 46-5-13.1, the location of a diversion point may be changed or additional diversion points may be licensed provided the following conditions are met and the potential for interference with other existing diversions is not increased:

- **Developed water source same as permitted source and no additional water appropriated**

The water source authorized by Water Permit Nos. 7070-3 and 7071-3 is the Big Sioux:Brookings Aquifer. The request indicates the source will continue to be the Big Sioux:Brookings Aquifer.

No additional appropriation of water is requested. Each water permit authorizes 1.78 cfs. Mr. Kiihl states that the production for each well is planned for 800 gpm which equates to 1.78 cfs for each well. No additional water will be appropriated by the change in the well locations.

- **Review of Existing Diversions**

A review of domestic wells and existing water rights in the surrounding sections was conducted.

Using the Water Rights Program's well log database a total of two domestic wells were found in the surrounding sections. The closest domestic well is a 30 feet deep well located at a farmstead in the SW ¼ NW ¼ of Section 30 which is the neighboring quarter section to the east of the Mr. Kiihl's property. The other domestic well is 80 feet deep located to the south in the SW ¼ of Section 36. The proposed change in well locations will move these irrigation wells farther away from the existing domestic wells than the original permitted location of the irrigation wells.

A review of water rights in the area was also conducted. There are a number of water rights that divert water from the Big Sioux:Brookings Aquifer in this area. The staff report on these applications states there are nine water rights/permits within approximately one and one-half miles of the wells sites proposed by the Application Nos. 7070-3 and 7071-3. The nearest water rights are Water Permit No. 6809-3 in the NW ¼ Section 25 (same section) and Water Right No. 2172-3 in the S ½ Section 24. The proposed change will have these two wells being constructed in closer proximity to these existing wells. The new wells will be a little over 1,500 feet from the existing irrigation wells.

This is not an area where complaints regarding interference between diversions have been received by the Water Rights Program. The original report on these permit applications concluded that "drawdown from pumped wells does not/should not adversely affect existing water rights". The report showed a comparison of two hydrographs from observation wells in the area. One observation is located 1,750 feet from a irrigation well while the other is two miles away from the nearest irrigation well, yet the hydrograph is nearly identical. The point is that interference between wells is not expected to be significant and therefore is not a concern in this area.

CONCLUSION

- The change in the well location does not appropriate additional water.
- The wells are completed into the Big Sioux:Brookings Aquifer.
- Interference is not expected to be a concern.
- Existing domestic wells should not be adversely impacted by authorizing this change in well location.

RECOMMENDED ACTION

Based on the above criteria, it is recommended that the change of diversion point be authorized under Water Permit Nos. 7070-3 and 7071-3.

Eric Gronlund
Water Rights Program

The Chief Engineer makes a finding pursuant SDCL 46-5-13.1 and ARSD 74:02:01:14.01 that:

This change of diversion point does not increase the potential for adverse effects to existing diversions.

Garland Erbele, Chief Engineer

Dear Mr. Kiihl:

I am writing in regard to the request filed to authorize changing the location of the wells authorized by Water Permit Nos. 7070-3 and 7071-3.

Water Permit No. 7070-3 appropriates 1.78 cfs from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in the approximate center of the NE $\frac{1}{4}$ and SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25 to irrigate 160 acres located in the NE $\frac{1}{4}$ Section 25; all in T114N, R52W.

Water Permit No. 7071-3 appropriates 1.78 cfs from two wells to be completed into the Big Sioux:Brookings Aquifer (approximately 75 feet deep) located in the N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 25 to irrigation 147 acres located in the SE $\frac{1}{4}$ Section 25; all in T114N, R52W.

This request is to change the location of the proposed four wells to two wells to now be located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25, T114N, R52W. Upon review of the request and pursuant to SDCL 46-5-13.1, the change in the well locations is authorized without application or publication of a notice of hearing pursuant to SDCL 46-2A-4.

If you have any questions, please contact Eric Gronlund at (605) 773-3352.

Sincerely,

Garland Erbele, Chief Engineer
Water Rights Program

Report of Examination of Works and/or Application of Water to Beneficial Use For Permit No. 7070-3 & 7071-3

I have this day, April 1, 2015, made a thorough examination of the water use system constructed by Jerry Kiihl, 304 S 5th St, Castlewood SD 57223 holder of Permit No. 7070-3 and 7071-3, both bearing the priority of September 18, 2008, each authorizing the diversion of 1.78 cu. ft. per second of the waters of Big Sioux Brookings aquifer for irrigation purposes, in Hamlin County.

Inspection contact & relationship **Jerry Kiihl**
to permit holder, if applicable:

A. Works used to divert the water:

Well Information:

- 1) Well Drilling Firm: Kaiser Well Drilling
- 2) No. of Wells 2
- 3) Depth(s) 55 (North well), 50 (South well) feet
- 4) Well log is available Y If no, explain in comments

Casing:

- 1) Diameter 16 (both) inches
- 2) Length 35 (North), 30 (South) feet
- 3) Type Plastic (both)

Screen:

- 1) Type Plastic (both)
- 2) Length 20 (both) feet
- 3) Static water level 8 (North), 6 (South) feet

Motor/Pump:

- 1) Make submersible (both)
- 2) Size 50 hp (North), 30 hp (South)
- 3) Capacity combined 650 GPM

B. Works used to transport water to place of use:

- 1) Type PVC
- 2) Size 8 inches
- 3) Length 5,075 feet

C. Works used to apply water to beneficial use:

Center pivot (both):

- 1) Make T&L
- 2) Number of towers 7
- 3) End gun Y, 48 psi
- 4) Capacity 650 GPM

Only a single pivot is operated at a time due to the capacity limit of both wells.

Chemigation Equipment (same for both center pivots):

- | | |
|--|---|
| 1) Does chemigate <u>Y</u> | 6) Interlock type <u>electrical</u> |
| 2) Main line check valve <u>Y at each well</u> | 7) Injection pump type <u>none on-site</u> |
| 3) Inspection port/air relief <u>Y</u> | 8) Injection check valve <u>none on-site</u> |
| 4) Low pressure drain <u>Y</u> | 9) Injection line check valve or positive displacement pump <u>none on-site</u> |
| 5) Discharge is 20' from source <u>hose needed</u> | |

D. Compliance with Permit Requirements:

- 1) Permit qualifications being abided by Y
- 2) Irrigation Questionnaires checked to determine if permit owner started irrigation by the end of construction period Y List any extended period of nonuse: none
- 3) Exceptions to compliance are: none

E. Condition and Location:

1. The system is in good condition with the point(s) of diversion located as follows: North well: 2,580 feet west and 225 feet south (NW1/4 NE1/4 – Latitude 44.65875, Longitude – 97.01670); South well: 2,600 feet west and 990 feet south (NW1/4 NE1/4 – Latitude 44.65664, Longitude – 97.01675) all from the NE corner of section 25-T114N-R52W.
2. The works are capable of diverting and conveying to the place of use 1.45 cu. ft. per second of water which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

All in section 25-T114N-R52W (No. 7070-3 in NE1/4, No. 7071-3 in SE1/4)

<u>NE1/4 NE1/4</u>	<u>34 ac</u>	<u>NE1/4 SE1/4</u>	<u>37 ac</u>
<u>NW1/4 NE1/4</u>	<u>34 ac</u>	<u>NW1/4 SE1/4</u>	<u>37 ac</u>
<u>SW1/4 NE1/4</u>	<u>35 ac</u>	<u>SW1/4 SE1/4</u>	<u>29 ac</u>
<u>SE1/4 NE1/4</u>	<u>35 ac</u>	<u>SE1/4 SE1/4</u>	<u>29 ac</u>

comprising a total of 270 acres of land and the license should be issued for 1.45 cfs.

3. All structures, wells and lands on map Y

F. Comments or other permit(s) associated with the project:

Since the same wells are used to irrigate the property covered by Nos. 7070-3 and 7071-3, the permits can be incorporated together under No. 7071-3. The well locations were corrected by the Chief Engineer on April 6, 2009.

Dear Mr. Kiihl:

Enclosed is Water License No. 7071-3. This is the final water right document completing your process of obtaining a Water Right. Also, included with your license is a map prepared by the staff engineer who conducted the investigation.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer
Water Rights Program
(605) 773-3352

Note: The applicable portions of No. 7070-3 are incorporated into Water License No. 7071-3.
