Report of Examination of Works and/or Application of Water to Beneficial Use For Permit No. 7292-3

I have this day, November 4, 2015, made a thorough examination of the water use system constructed by Allen Gatzke, 39351 187th Street, Hitchcock SD 57348 of Permit No. 7292-3, bearing the priority of December 15, 2011 authorizing the diversion of 1.78 cu. ft. per second of the Tulare:Western Spink Hitchcock aquifer for irrigation purposes, in Spink County.

Inspection contact & relationship **Allen Gatzke - owner**
to permit holder, if applicable:

Comment – Water Right No. 6339B-3 authorized irrigation of the S ½ NW ¼ and N ½ SW ¼ of Section 14. Water Permit No. 7292-3 authorized the N ½ NW ¼ and S ½ SW ¼ of Section 14. The pivot that was in place under No. 6339B-3 was moved 1,320 north to irrigate the NW ¼ of the section using the existing well; while a new pivot and well were constructed to irrigate the SW ¼ of Section 14. Issuance of Permit No. 7292-3 reflected that this would occur. This report of examination of works is for both Nos. 6339B-3 and 7292-2 with the intent to incorporate No. 6339B-3 into No. 7292-3. Then since each well supplies a separate pivot, I propose No. 7292-3 be split into No. 7292A-3 and 7292B-3 to reflect individual irrigation systems. There will be split priority dates based on the land.

A. Works used to divert the water:

Well Information:

- 1) Well Drilling Firm: Pullman
- 2) No. of Wells 2
- 3) Depth(s) north well 76 & south well 72 feet
- 4) Well log is available Yes If no, explain in comments

Comments: The well completion report for the north most well is presumed to be the well constructed on the ¼ line between the NW ¼ and SW 1/4 of Section 14 and filed October 13, 2015 by Pullman Drilling. The well location marked on the map in the report does not match the well location. However, the well location as marked on the report is land owned by Bill St. Clair so the assumption is the drill mis-marked its location.

Casing:

- 1) Diameter both 16 inches
- 2) Length north 56 & south 57 feet
- 3) Type plastic on north well

Screen:

- 1) Type north is plastic and south is stainless steel
- 2) Length north is 20 and south is 15 feet
- 3) Static water level north – 22 & south 15 feet

Pump:

- 1) Make submersible
- 2) Model _____
- 3) Size _____
- 4) Capacity 750 GPM (according to pivot capacity listed in pivot control box)

Motor:

- 1) Make _____
- 2) Model No. _____
- 3) Horsepower rating _____ hp

List any extended period of nonuse: No

- 3) Exceptions to compliance are: none

E. Condition and Location:

1. The system is in excellent, condition with the point(s) of diversion located as follows:
All from the southwest corner Section 14, T114N, R63W
north well approximately 2,650 feet north and 1,320 east (Latitude 44.68338 Longitude -98.37697) &
south well approximately 1,320 feet north and 1,320 east (Latitude 44.67983 Longitude -98.37705)
2. The works are capable of diverting and conveying to the place of use 3.34 cu. ft. per second of water including both wells under Nos. 6339B-3 and 7292-3 which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

All in Section 14, T114N, R63W

Priority date of July 12, 2002 established
by Water Right No. 6339B-3

SW ¼ NW ¼ - 33.25 acres

SE ¼ NW ¼ - 33.25 acres

NW ¼ SW ¼ - 33.25 acres

NE ¼ SW ¼ - 33.25 acres

Priority date of December 15, 2011 established
By Water Permit No. 7292-3

NW ¼ NW ¼ - 33.25 acres

NE ¼ NW ¼ - 33.25 acres

SW ¼ SW ¼ - 33.25 acres

SE ¼ SW ¼ - 33.25 acres

comprising a total of 266 acres of land and the license should be issued for 3.34 cfs (1.67 cfs per well).
Acreage based on Arcmap accounting for area along road where the endguns shut off as evidenced on the FSA aerial map.

3. All structures, wells and lands on map Yes

If no, describe:

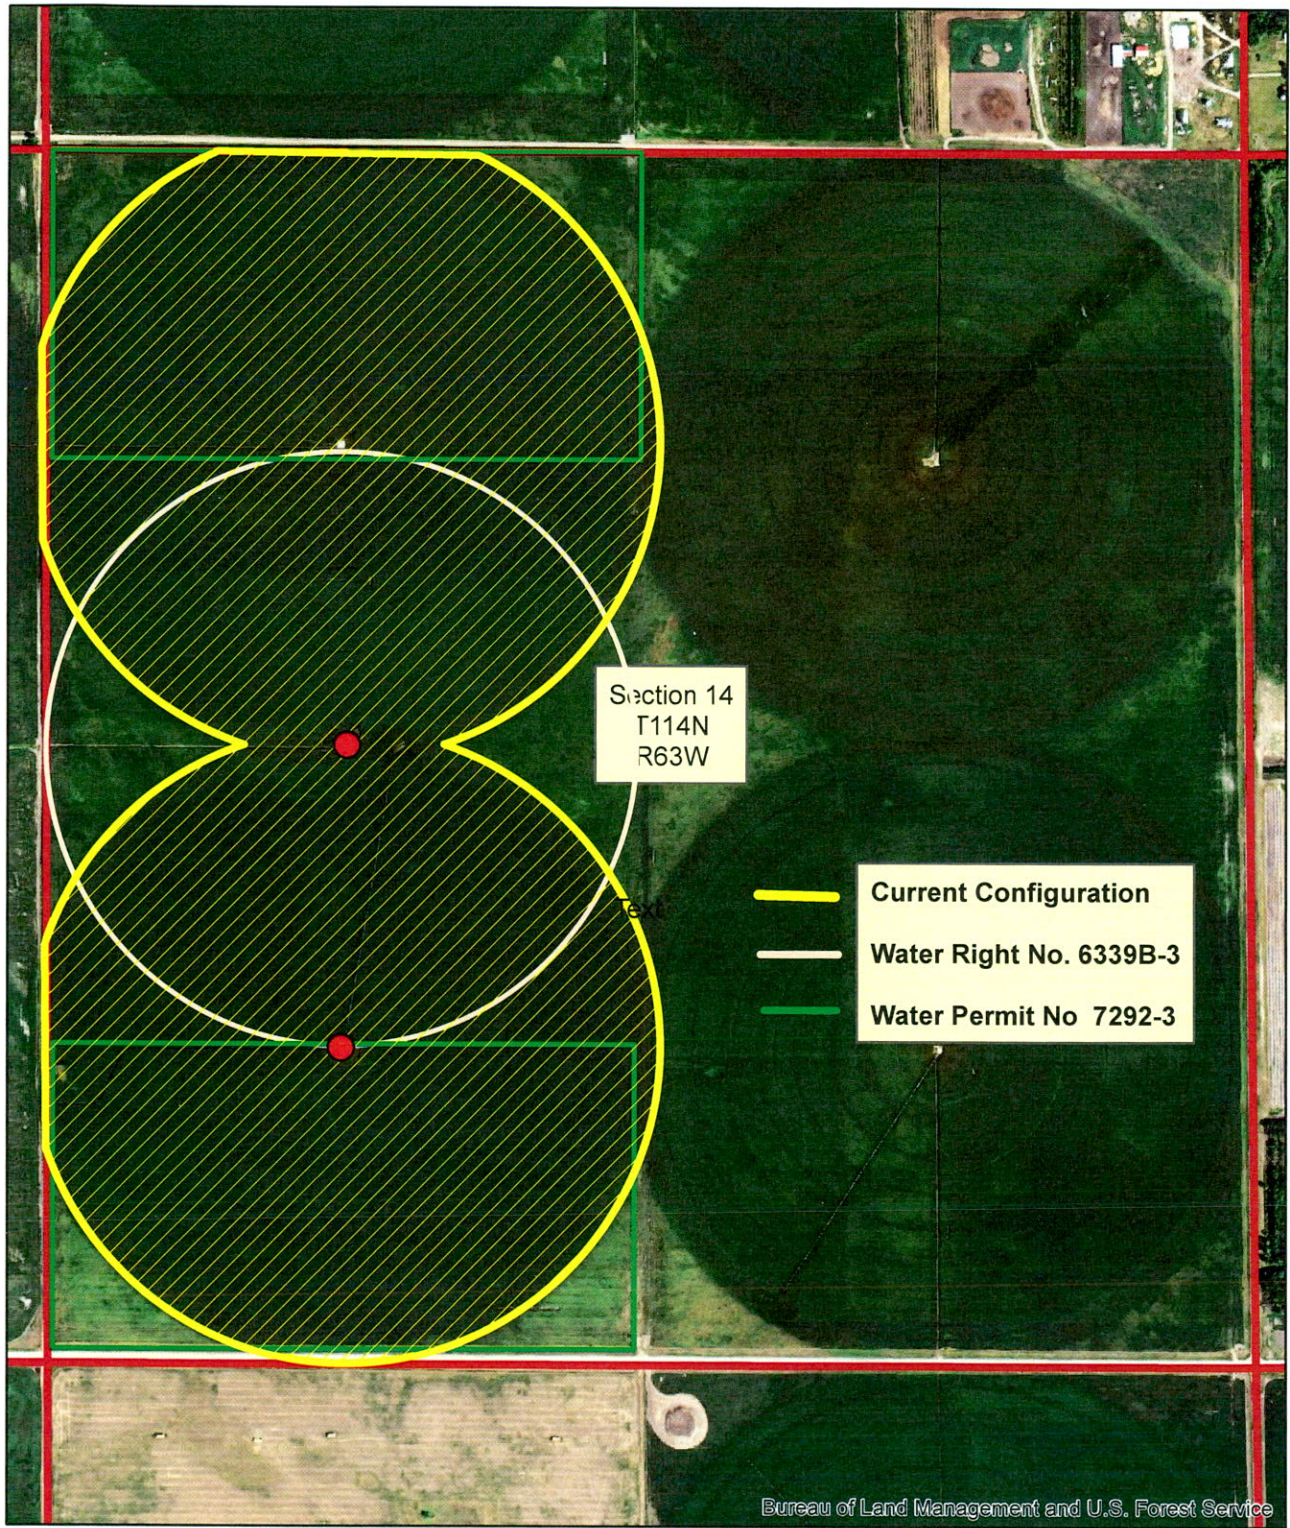

F. Comments or other permit(s) associated with the project:

The intent of this report is for Water Right No. 6339B-3 and Permit No. 7292-3 to be incorporated into one water right. Then since they are independent systems, Water Right No. 7292-3 can be split into 7292A-3 and 7292B-3 to reflect the separate systems. Priority dates should be based on land which would mean split priority dates between the divided water rights.

RE: Water Right Nos. 6339B-3, 7292-3, 7292A-3 and 7292B-3

Dear Mr. Gatzke:

Enclosed are Water License Nos. 7292-3, 7292A-3 and 7292B-3. A map prepared by the staff engineer who conducted the field investigation is included.

Water Permit No. 7292-3 was obtained to cover the additional acreage in the W ½ Section 14, T114N, R63W not authorized under Water Right No. 6339B-3. The applicable portions of Water Right No. 6339B-3 were incorporated into Water License No. 7292-3. With each pivot operating as an independent system, No. 7292-3 was then divided and reissued as 7292A-3 and 7292B-3 to reflect two separate systems.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the wells authorized by Water Right Nos. 7292A-3 and 7292B-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water Licenses, State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer
