RE: water permit application

I contacted Mr. Reiersen with the acreage requested on his application. I told him that based on the area he outlined on the map, I arrived at a total acreage of 320 acres requested. He agreed with that amount. I said I would do a acreage breakdown.

The application states the well is to be located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 18, T128N, R77W. However, the map shows the well located in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of this section. Mr. Reiersen said the map was right and the application should be changed to reflect the well location being the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 18.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 7615-3, Wayne H Reiersen**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 7615-3, Wayne H Reiersen, 30048 Reiersen Place, Pollock SD 57648.

The Chief Engineer is recommending APPROVAL of Application No. 7615-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 7615-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

NOTE: In most locations the Grand Aquifer has medium sodium hazard and high salinity hazard. DENR encourages you to have a soil water compatibility analysis performed to insure the water is suitable for irrigation. The Water Resources Institute at SDSU or other qualified soil scientist can assist you in making a soil water compatibility determination and recommend if there are water management techniques to implement to optimize crop production and protect the soil structure.

REPORT TO THE CHIEF ENGINEER
ON
WATER PERMIT APPLICATION NOS. 7615-3 and 7616-3
WAYNE H. REIERSON
MARCH 13, 2013

Water Permit Application No. 7615-3 proposes to appropriate up to 640 acre-feet of water annually (ac-ft/yr) at a maximum diversion rate of 2.67 cubic feet of water per second (cfs) from one well to be completed into the Grand aquifer. The well is expected to be approximately 195 feet deep and is to be located in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 18, T128N-R77W. Water is to be used for the irrigation of 320 acres located in the NW $\frac{1}{4}$, SE $\frac{1}{4}$, N $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, W $\frac{1}{2}$ NE $\frac{1}{4}$ Section 18, T128N-R77W in Campbell County.

Water Permit Application No. 7616-3 proposes to appropriate up to 310 acre-feet of water annually (ac-ft/yr) at a maximum diversion rate of 2.21 cubic feet of water per second (cfs) from one well to be completed into the Grand aquifer. The well is expected to be approximately 210 feet deep and is to be located in the approximate center of the SE $\frac{1}{4}$ Section 13, T128N-R78W. Water is to be used for the irrigation of 155 acres located in the SE $\frac{1}{4}$ Section 13, T128N-R78W in Campbell County.

AQUIFER: Grand aquifer (G)

GEOLOGY AND AQUIFER CHARACTERISTICS:

The Grand aquifer consists of glacial outwash and alluvium from the ancient Grand River and is under confined conditions in the area of the application (Koch, 1970). The Grand aquifer underlies portions of six counties with an approximate area of 45,100 acres and contains an estimate 3,637,000 ac-ft of water in storage (Hedges et. al, 1982). In Campbell County alone, the aquifer underlies 97,900 acres and contains an estimated 1,469,000 ac-ft of recoverable water in storage (Hedges et. al, 1982). The Grand aquifer is hydraulically connected to Lake Oahe, causing the aquifer to fluctuate with reservoir levels. The top of the aquifer ranges from 150 to 300 feet below ground surface, and has an average thickness of 100 feet (Koch, 1970). Test hole logs submitted with these applications identify the Grand aquifer from approximately 151 to 192 feet below ground surface, and gray shale below that. In most locations, the Grand aquifer has a high salinity hazard and a medium sodium hazard, so special management practices may be necessary (Koch, 1970).

SDCL 46-2A-9

Pursuant to SDCL 46-2A-9, a permit to appropriate water may be issued only if there is a reasonable probability that there is unappropriated water available for the applicant's proposed use, that the proposed diversion can be developed without unlawful impairment of existing rights and that the proposed use is a beneficial use and in the public interest. This report will address the availability of unappropriated water and effects on existing rights from the aquifer that are pertinent to this application.

WATER AVAILABILITY:

These applications propose to appropriate up to a total of 950 ac-ft/yr from the Grand aquifer. If these applications are approved, the actual water use will likely be less than the appropriations. The probability of unappropriated water being available from an aquifer can be evaluated by considering SDCL 46-6-3.1, which requires "No application to appropriate groundwater may be approved if, according to the best information reasonably available, it is probable the quantity of water withdrawn annually from a groundwater source will exceed the quantity of the average estimated annual recharge of the water to the groundwater source."

Hydrologic Budget:

Recharge:

Recharge to the Grand aquifer is by infiltration of precipitation through overlying sediments and from subsurface inflow from adjacent areas (Koch, 1970). The Grand aquifer may also receive recharge from the Missouri River during times of high flow and stage. Recharge to the Grand aquifer in Campbell County has not been quantified. However, Koch (1970) attempted to estimate recharge by calculating subsurface outflow of adjacent counties based on transmissivity, hydraulic gradient, and cross-sectional area. To maintain a constant potentiometric surface, recharge to the aquifer must equal discharge from the aquifer. The estimated outflow of the aquifer to adjacent counties is approximately 5,040 ac-ft/yr. This is not to say that 5,040 ac-ft/yr is the estimated recharge to the Grand aquifer in Campbell County, but it does provide insight to the order of magnitude of the recharge to the aquifer. Hedges and others (1985) also concluded that for management and development programs the recharge rate to confined aquifers is estimated to range from 0.15 to 0.60 inches per year.

Discharge:

Discharge from the Grand aquifer occurs due to outflow to adjacent subsurface areas, the Missouri River during periods of low flow and stage, and well withdrawals (Koch, 1970). There are 28 water rights/permits authorizing wells to withdraw water from the Grand aquifer in Campbell County (Water Rights, 2013b). There are also a number of domestic wells on file with the SD DENR-Water Rights program that are completed into the Grand aquifer (Water Rights, 2013c). The amount of water that can be expected to be withdrawn through water rights/permits authorizing water use for non-irrigation purposes at the current appropriation level can be estimated by assuming: 1) water rights/permits limited by an annual volume will pump the entire volume appropriated (20 ac-ft/yr), and 2) water rights/permits limited only by diversion rate will pump at the maximum permitted diversion rate 60 percent of the time (1,201 ac-ft/yr). Table 1 shows the non-irrigation appropriations and the estimated average annual volume of water pumped from the Grand aquifer in Campbell County. Table 2 shows the historic irrigation water use from the Grand aquifer in Campbell County.

Table 2- Historic irrigation water use from the Grand aquifer in Campbell County (Water Rights, 1979-2012)

Estimated average annual withdrawal from the Grand aquifer in Campbell County is expected to be less than 3,254 ac-ft/yr. Note that the most of the non-irrigation appropriations are municipal and are connected to rural water. Removing the municipal withdrawals, because they are primarily on rural water, from the total brings the estimated average annual withdrawal from the Grand aquifer in Campbell County to 2,068 ac-ft/yr. Discharge from the Grand aquifer in Campbell County due to well withdrawals is estimated to be less than 3,300 ac-ft/yr, which is less than the estimation from Koch (1970). Therefore, there is a reasonable probability that unappropriated water is available from the Grand aquifer for these proposed appropriations.

Observation Well Data:

Administrative Rule of South Dakota Section 74:02:05:07 requires that “the Water Management Board shall rely upon the record of observation well measurements to determine that the quantity of water withdrawn annually from the aquifer does not exceed the estimated average annual recharge of the aquifer.”

The DENR-Water Rights Program monitors 37 observation wells completed into the Grand aquifer with 17 in Campbell County (Water Rights, 2013a). The nearest observation wells are CA-78A, which is approximately 2.1 miles south-southeast of the well site proposed by Application No. 7615-3, and CA-80A, which is approximately 2.7 miles west of the well site proposed by Application No. 7616-3 (Water Rights, 2013a). The hydrographs for the observation wells are shown in figures 1 and 2. Water levels in the observation wells show good response to climatic conditions. The water levels rise (recharge) during wet years and gradually decline during dry years. The hydrographs show minimal effects from pumping, and it does not appear to be significant over the period of record. Note that the large variation of the water level as shown by the hydrograph is just a change in hydraulic head pressure. The top of the aquifer in this area is approximately 150 below ground surface. The climatic effects on water levels mask the temporal impacts of well withdrawal. Therefore, the hydrographs document that unappropriated water is available from the Grand aquifer for these proposed appropriations.

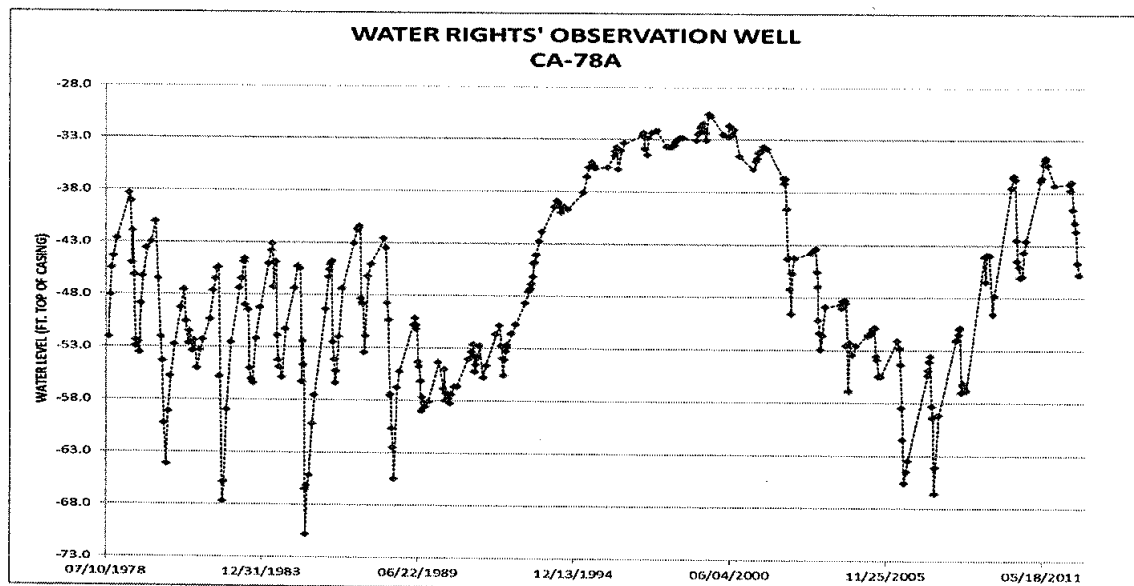

Figure 1- Hydrograph for observation well CA-78A (Water Rights, 2013a)

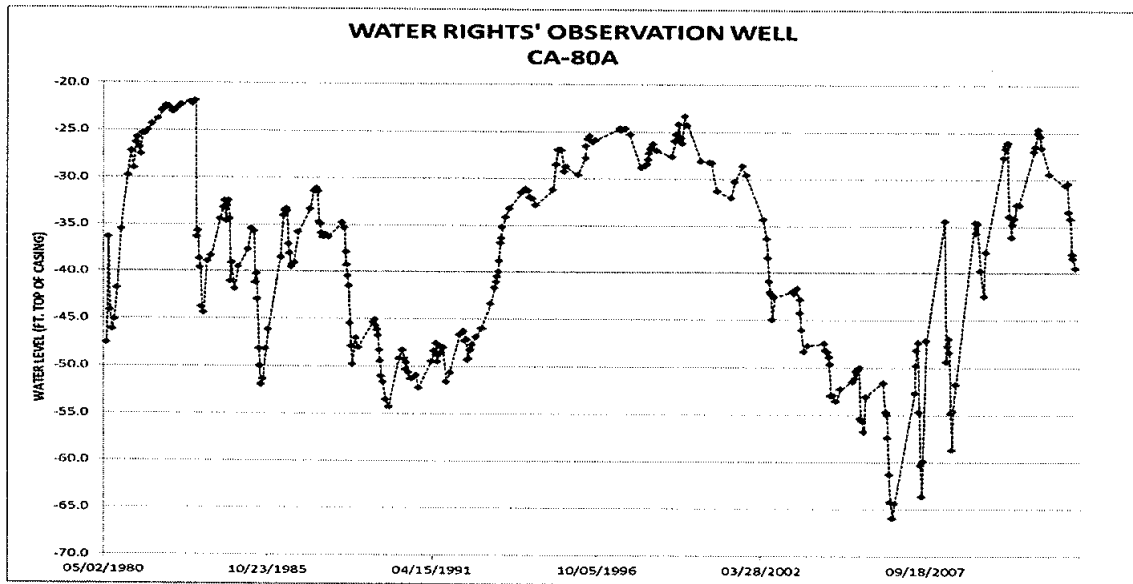

Figure 2- Hydrograph for observation well CA-80A (Water Rights, 2013a)

EXISTING WATER RIGHTS:

The wells authorized by Water Right No. 2012-3 and 5566-3 are the only appropriative wells within two miles of the proposed well sites (Water Rights, 2012b). Water Right Nos. 2012-3 and 5566-3 are approximately 1.8 miles south and 1.4 miles southeast of the proposed well sites, respectively. There are no domestic wells on file with the SD DENR-Water Rights Program within two miles of the proposed well sites that appear to be completed into the Grand aquifer (Water Rights, 2013c). That is reasonable because the area is served by WEB rural water. If there are domestic wells completed into the Grand aquifer that are not on file with the SD DENR-Water Rights Program, reasonable domestic use is assured by SDCL 46-6-6.1 and ARSD 74:02:04:20(7). SDCL 46-6-6.1 and ARSD 74:02:04:20(7) ensures not only that interference will not be adverse to domestic well users but also in existing appropriative rights. Depending on the exact characteristics of the Grand aquifer at the well site, some existing well owners may need to lower their pumps to accommodate for lower water levels. When considering SDCL 46-6-6.1 and ARSD 74:02:04:20(7), well interference from this proposed increase in diversion rate is not likely to be significant and there is a reasonable probability that any interference will not be adverse.

CONCLUSIONS:

1. Water Permit Application No. 7615-3 proposes to appropriate up to 640 ac-ft/yr at a maximum diversion rate of 2.67 cfs for the irrigation of 320 acres from one well to be completed into the Grand aquifer.
2. Water Permit Application No. 7616-3 proposes to appropriate up to 310 ac-ft/yr at a maximum diversion rate of 2.21 cfs for the irrigation of 155 acres from one well to be completed into the Grand aquifer.
3. There is a reasonable probability that unappropriated water is available from the Grand aquifer to supply these proposed appropriations.

4. There is a reasonable probability that the diversion rate requested by these applications can be made without adversely impacting existing water rights/permits and domestic users.

NOTICE OF ENTRY OF ORDER
FOR ONE YEAR SUSPENSION OF WATER RIGHT & WATER PERMITS

TO: Wayne Reiersen, 30048 Reiersen Pl, Pollock SD 57648

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right No. 5566-3 & Water Permit Nos. 7615-3 and 7616-3

On March 7, 2018, the Water Management Board ordered:

Effective April 7, 2018, Water Right No. 5566-3 and Water Permit Nos. 7615-3 and 7616-3 be suspended for the 2018 irrigation season for failure to submit the 2017 irrigation questionnaires.

If the 2017 irrigation questionnaires are received prior to April 7, 2018, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2018 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2018 unless the 2017 irrigation questionnaires are submitted by April 7th.

After April 7th, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2017 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 2-3, 2018, in Pierre, SD. The letter should include your reasons for not completing the 2017 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

AUTHORITY:

Pursuant to SDCL 46-5-13.1, the location of a diversion point may be changed or additional diversion points may be licensed provided the following conditions are met and the potential for interference with other existing diversions is not increased:

- **Developed water source same as permitted source and no additional water appropriated**

The water source is the Grand aquifer, same as permitted, with no additional water appropriated. The permit authorizes the diversion of water from one well located in the SE ¼ SW¼ Section 18-T128N-R77W. At the time of the permit licensing inspection, the well was located in the SW ¼ SW ¼ Section 18-T128N-R77W approx. 300 feet west of the location identified on the map provided with the permit application. GPS coordinates were taken at the location and are included in the inspection report.

- **If irrigation, no new land is irrigated**

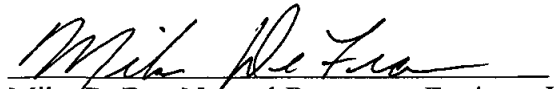

No new land is being irrigated.

- **Review of Existing Diversions**

There are three rights/permits within a two mile area which are authorized to divert water from this aquifer. Water Permit No. 7616-3 has yet to be developed and held by the owner of this permit. Water Rights Nos. 5566-3 and 2012-3, also authorized to appropriate water from this aquifer, are located approx. 1.4 and 1.8 miles southeast of this diversion point. In review of the application report for this permit, and the minimal distance the well was constructed as to its original permitted location, the potential for interference would not be expected.

RECOMMENDED ACTION

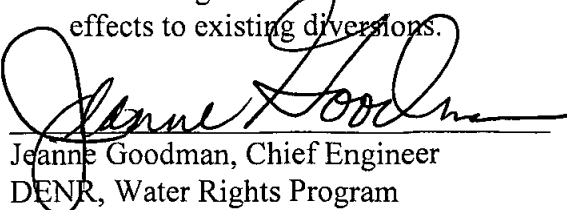

Based on the above criteria, it is recommended that the diversion point(s) be licensed as developed.

Mike DeFea, Natural Resources Engineer II
DENR, Water Rights Program

The Chief Engineer makes a finding pursuant SDCL 46-5-13.1 and ARSD 74:02:01:14.01 that:

This change in location and/or additional diversion point(s) does not increase the potential for adverse effects to existing diversions.

Dear Mr. Reiersen:

I am contacting you in regard to the pending licensing of Water Permit No. 7615-3. The water permit authorizes diversion of 1200 gpm from one well to irrigate 320 acres.

On September 27, 2016, Mike DeFea, a staff engineer with our program, conducted a field investigation of the water use system for licensing purposes. At the time of inspection, Mike found one well capable of 800 gpm irrigating 320 acres.

Water Permit No. 7615-3 states the water use system is to be constructed by April 1, 2018 with water put to beneficial use by April 1, 2022. The inspection conducted in September 2016 found the well producing 800 gallons per minute instead of the permitted 1,200 gallons per minute.

In order to proceed with licensing the permit we need the enclosed *"Notice of Completion of Works and Application of Water to Beneficial Use"* filled out and returned to us to show you were actually done with the system when the inspection was conducted. I have partially completed the form for you. Please complete and return the form to our office. An envelope is included for your convenience.

If you were not done and would like to try to increase production from the well up to the 1,200 gpm, we can conduct another inspection after the April 1, 2018 date. Thank you in advance for your assistance. If you have any questions, please contact me.

Sincerely,

NOTICE OF ENTRY OF ORDER
FOR ONE YEAR SUSPENSION OF WATER RIGHT & WATER PERMITS

TO: Wayne Reiersen, 30048 Reiersen Pl, Pollock SD 57648

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right No. 5566-3 & Water Permit Nos. 7615-3 and 7616-3

On March 7, 2018, the Water Management Board ordered:

Effective April 7, 2018, Water Right No. 5566-3 and Water Permit Nos. 7615-3 and 7616-3 be suspended for the 2018 irrigation season for failure to submit the 2017 irrigation questionnaires.

If the 2017 irrigation questionnaires are received prior to April 7, 2018, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2018 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2018 unless the 2017 irrigation questionnaires are submitted by April 7th.

After April 7th, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2017 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 2-3, 2018, in Pierre, SD. The letter should include your reasons for not completing the 2017 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

Dear Mr. Reiersen:

I am contacting you in regard to the pending licensing of Water Permit No. 7615-3.

Water Permit No. 7615-3 states the water use system was to be constructed by April 1, 2018. Since our staff engineer conducted the field investigation in 2016, we need to ensure you were completed with the system.

On July 11, 2017, I forwarded a partially completed "*Notice of Completion of Works and Application of Water to Beneficial Use*" form to you so you could verify you were actually done with the irrigation system. To date, we have not received a reply from you.

Water Permit No. 7615-3 authorizes the following:

- Diversion of 1200 gpm from one well to irrigate 320 acres located in portions of Section 18, T128N, R77W

The September, 2016 investigation of the water use system found the following:

- One well producing 800 gallons per minute to irrigate 320 acres located in portions of Section 18, T128N, R77W

Since we have not received any information from you regarding additional development, our intent is to issue the water license based on the September, 2016 field investigation. Please contact us by **June 15, 2018** as to whether or not additional development occurred. If we do not hear from you by then, the water license will be issued based on the 2016 investigation.

Sincerely,

A handwritten signature in black ink, appearing to read "Genny McMath".

Dear Mr. Reiersen:

Enclosed is Water License No. 7615-3. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

For your information SDCL 46-6-27 requires that if in the future, the owner of an existing well, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer

SUBJECT: One Year Suspension of Water Right Nos. 5566-3 & 7615-3 and Water Permit No. 7616-3

On March 3, 2021, the Water Management Board ordered:

Effective April 3, 2021, Water Right Nos. 5566-3 & 7615-3 and Water Permit No. 7616-3 be suspended for the 2021 irrigation season for failure to submit the 2020 irrigation questionnaires.

If the 2020 irrigation questionnaires are received prior to April 3, 2021, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2021 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2021 unless the 2020 irrigation questionnaires are submitted by April 3, 2021.

After April 3rd, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2020 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 5-6, 2021 in Pierre, SD. The letter should include your reasons for not completing the 2020 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION OF WATER RIGHT

TO: Wayne Reiersen, 30048 Reiersen Pl, Pollock SD 57648

FROM: Adam Mathiowetz, PE, Acting Chief Engineer
DANR - Water Rights Program

SUBJECT: One Year Suspension of Water Right Nos. 5566-3 & 7615-3

On March 4, 2026, the South Dakota Water Management Board ordered:

- Effective April 3, 2026, Water Right Nos. 5566-3 & 7615-3 suspended for the 2026 irrigation season.

This action was taken by the Board for failure to return the 2025 irrigation questionnaires. If the 2025 irrigation questionnaires are received prior to April 3, 2026, the suspensions will not take effect.

A one-year suspension of Water Right Nos. 5566-3 & 7615-3 means water may not be pumped during the 2026 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2026 unless the 2025 irrigation questionnaires are submitted prior to April 3, 2026.

After April 3, 2026, you may petition the Board to rescind the suspension. You will need to submit, to the Water Rights Program, the 2025 irrigation questionnaires and a letter including your reason for not completing the 2025 irrigation questionnaires within the allotted time and requesting time on the agenda for the next Water Management Board meeting. The next Water Management Board meeting is scheduled for May 6, 2026, in Pierre SD.

Decisions made by the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Please contact Amanda Dewell, Water Rights Permitting Administrator (605) 773-3352 with any questions.

NOTE: Water Rights staff will conduct unscheduled compliance checks of suspended water rights to ensure irrigation is not taking place.
