

WATER PERMIT NO. 7635-3

Name of Applicant: Richard Logue

Address: c/o Thomas Logue, 30565 455 Ave, Volin SD 57072

Phone: 605 661-2493

Amount of Water Claimed: 2.0 cfs

Total Acres: 320 acres

Source of Water Supply: groundwater (one well)

Water to be used for: irrigation

County: Clay

Type of Waste Disposal System:

Location: 15 miles northwest of Vermillion

PRIORITY

Date Received: 12-21-12

Application/License Fee: \$ 1350

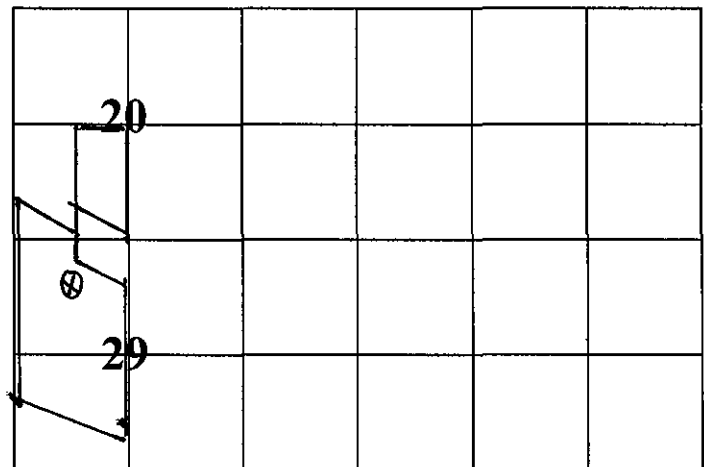

Corrected Application Received: 1-14-13

Period of Annual Use: April 1 – Nov 1

Remarks:

Diversion Point: center of the NW 1/4 Section 29-
T94N-R53W

Land to be Irrigated: N 1/2 SW 1/4, SE 1/4 SW
1/4, NW 1/4 NW 1/4, S 1/2 NW 1/4 Sec 29 and E
1/2 SW 1/4 Sec 20; T94N-R53W

Depth of Well: 100 feet deep

Well Driller: Wetmore Hammond

Remarks:

Type of Map: aerial

I, Memo Logue (30565 455 Ave Volin, SD 57072) 605-661-2493, the applicant, certify that I have read this application, have examined the attached map, and that the matters stated are true.

SOUTH DAKOTA
WATER PERMIT NO. 7635-3

Date of first receipt of application December 21, 2012.

Date of return to applicant for corrections, amendments or changes December 28, 2012.

Date of receipt of corrected application January 14, 2013.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 7635-3 to Richard Logue, c/o Thomas Logue, 30565 455th Ave, Volin SD 57072 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 7635-3 appropriates 2.0 cubic feet of water per second from one well to be completed into the Missouri:Elk Point Aquifer (100 feet deep) located in the NW 1/4 NW 1/4 Section 29 for irrigation of 320 acres located in the N 1/2 SW 1/4, SE 1/4 SW 1/4, NW 1/4 NW 1/4, S 1/2 NW 1/4 Section 29 and E 1/2 SW 1/4 Section 20; all in T94N-R53W.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: April 1 – October 31.
3. The date from which applicant may claim right is December 21, 2012.
4. The date of approval of Permit No. 7635-3 is April 1, 2013.
5. One-fifth of the construction is to be completed on or before October 1, 2015.
6. All construction is to be completed on or before April 1, 2018.
7. Water is to be put to beneficial use on or before April 1, 2022.
8. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 7635-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

Dear Mr. Logue:

Thank you for submitting the *Application for a Permit to Appropriate Water* on behalf of Richard L Logue for irrigation in Clay County. In order to complete the application, the following is required.

- Enclosed are the aerial photo maps submitted with the application. For your use, I have enclosed a map which includes Sections 20, 29 and 30; all in T94N-R53W. On this map, please outline the 320 acres to be covered by the proposed irrigation systems. Please mark the proposed well location with an "X". The acreage outlined needs to correspond with the acreage identified on Item No. 7 of the application.
- We have received the \$1,150.00 fee. The application/license filing fee for irrigation of 320 acres is \$1,350.00. Please submit an additional \$200.00.

If you have any questions, please contact me.

Sincerely,

Karen Schlaak

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 7635-3, Richard Logue**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 7634-3, Richard Logue, c/o Thomas Logue, 30565 455th Avenue, Volin SD 57072.

The Chief Engineer is recommending APPROVAL of Application No. 7635-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 7635-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Garland Erbele, Chief Engineer
March 12, 2013

REPORT TO THE CHIEF ENGINEER
ON
WATER PERMIT APPLICATION NO. 7635-3
RICHARD LOGUE
February 19, 2013

Water Permit Application No. 7635-3 proposes to appropriate up to 640 acre-feet annually (ac-ft/yr) at a maximum diversion rate of 2.0 cubic feet of water per second (cfs) from one well to be completed into the Missouri: Elk Point aquifer. The well will be located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 29, T94N-R53W and is expected to be approximately 100 feet deep. This application proposes to irrigate 320 acres located in the N $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, NW $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{2}$ NW $\frac{1}{4}$ of Section 29 and E $\frac{1}{2}$ SW $\frac{1}{4}$ of Section 20, all in T94N-R53W in Clay County.

AQUIFER: Elk Point management unit of the Missouri aquifer (M: EP)

GEOLOGY AND AQUIFER CHARACTERISTICS:

The Elk Point management unit of the Missouri aquifer is an alluvium mantled outwash composed of sand and gravel material (Stephens, 1967). The aquifer is under both unconfined and confined conditions, but appears that it may be confined in the area of this application. The Elk Point management unit of the Missouri aquifer encompasses regions of Clay, Union, and Yankton Counties. The proposed well site is located approximately one mile from the Clay and Yankton county line and along the border of the Lower James Missouri aquifer. The Missouri: Elk Point aquifer underlies approximately 119,500 acres of Clay and Yankton Counties combined and contains an estimated 1,792,500 acre-feet of recoverable water in storage between the two counties (Hedges and others, 1982). The aquifer is hydraulically connected to the Dakota, Lower James Missouri and the Lower Vermillion Missouri aquifers as well as the Missouri and Vermillion Rivers. The ground water in this aquifer generally moves from northwest to southeast in the area of this application (Stephens, 1967). There was not a test hole log submitted with this application. The average saturated thickness reported for nearby well sites is approximately 57 feet as shown in Table 1 (Water Rights, 2013a). There is approximately 9 feet of artesian head pressure available.

Well Log Identification	Saturated Thickness (ft)
Domestic Well for Frank Orr	52
Domestic Well for Wade Larson	69
Well Log for Water Right No. 7374-3	40
Domestic Well for Thomas Christensen	42
Domestic Well for Gary Freeburg	80

Table 1. Reported saturated thickness for nearby wells (Water Rights, 2013a).

SDCL 46-2A-9

In accordance with SDCL 46-2A-9, a permit may be issued to appropriate water only if there is reasonable probability that there is unappropriated water available for the applicant's proposed use, that the proposed diversion can be developed without unlawful impairment of existing rights and that the proposed use is a beneficial use and in the public interest. This report will review the availability of unappropriated water and existing rights within the Missouri: Elk Point aquifer.

WATER AVAILABILITY:

This application proposes to appropriate up to 640 ac-ft/yr from the Missouri: Elk Point aquifer. If this application is approved, it is likely that the actual water use will be less than the appropriated amount. The probability of unappropriated water available from the aquifer can be evaluated using SDCL 46-6-3.1 which requires "No application to appropriate groundwater may be approved if, according to the best information reasonably available, it is probable that the quantity of water withdrawn annually from a groundwater source will exceed the quantity of the average estimated annual recharge of water to the groundwater source."

Recharge versus Discharge:

Recharge:

Recharge to the Missouri: Elk Point aquifer occurs through infiltration and percolation of precipitation falling in areas where the aquifer is near land surface. Recharge is also provided to the aquifer from the Big Sioux, Lower Vermillion-Missouri, and Dakota aquifers as well as during times of high flow and stage from the Missouri River. The average annual recharge rate to the Missouri: Elk Point aquifer is estimated to be 3.8 in/yr based on observation well analysis (Hedges and others, 1985). Given the area of the management unit in Clay and Yankton Counties of 119,500 acres, average annual recharge to the aquifer in Clay and Yankton Counties alone is estimated to be 37,842 ac-ft/yr.

Discharge:

Discharge from the Missouri: Elk Point aquifer is by evapotranspiration, discharge to the Big Sioux and Missouri Rivers during low flow and to the underlying Dakota aquifer, and withdrawal from wells. There are a number of completion reports on file with the SD DENR-Water Rights Program for domestic use wells completed into the Missouri: Elk Point aquifer (Water Rights, 2013b) and there are currently 507 water rights/permits appropriating water from the Missouri: Elk Point aquifer (Water Rights, 2013c). In addition, there are five future use permits reserving water from the aquifer. There are 212 water rights/permits appropriating water from this aquifer in Clay and Yankton Counties (Water Rights, 2013c). All five of the future use permits reserving water from the aquifer are from Clay County. The distribution of these appropriations and their types are shown in Table 2.

Water Rights/Permits	Number
Commercial	4
Domestic	1
Fish & Wildlife Propagation	4
Industrial	3
Irrigation	190
Municipal	6
Rural Water System	2
Suburban Housing Development	2
Future Use Permits	Number
Lewis & Clark Rural Water System	4
City of Vermillion	1

Table 2. Water rights/permits from the Missouri: Elk Point aquifer in Clay and Yankton Counties (Water Rights, 2013c).

The amount of water that can be expected to be withdrawn through water rights/permits authorizing water use for non-irrigation purposes at the current appropriation level can be estimated by assuming:

1. Water rights/permits limited by an annual volume will pump the entire volume appropriated.
2. Water rights/permits limited only by diversion rate will pump at the maximum permitted diversion rate 60 percent of the time.
3. Future use permits can be fully developed.

The expected water use for non-irrigation purposes, including that reserved for future use, from the Missouri: Elk Point aquifer in Clay and Yankton Counties is less than 55,500 ac-ft/yr based on current water appropriations.

The annual reported water use from the Missouri: Elk Point aquifer for irrigation purposes is displayed in Table 3.

AVE	79.61	35769.31	5145.02

Table 3. Irrigation from the Missouri: Elk Point aquifer in Clay and Yankton Counties (Water Rights, 1979-2011)

Lewis and Clark Rural Water System currently reserves 13,000 ac-ft/yr for future use and has permits appropriating 32,165 ac-ft/yr (Water Rights, 2013b). These account for a significant portion of the annual water usage in Clay County, and most of the water from these wells will be induced from the Missouri River. More recharge can be induced with more pumping in particular from the Missouri River because it is hydraulically connected to the aquifer. In 2011, the reported pumping for irrigation was 4,818 ac-ft/yr in Clay and Yankton Counties (Water Rights, 1979-2011).

There are a number of new permits and pending applications from the Missouri: Elk Point aquifer. Once they are developed, the average pumping for irrigation purposes is expected to increase significantly. Since January 1, 2012, there have been 45 permits issued from the Missouri: Elk Point aquifer authorizing irrigation for a total of 5,546.1 acres. The average annual withdrawal is still expected to be significantly less than the average annual recharge. The pending permits for appropriation of water from the Missouri: Elk Point aquifer are shown in Table 4.

Permit No.	Diversion Rate (cfs)	Acres
7447-3	1.78	160
7460-3	3.11	264
7454-3	1.78	171
7527-3	1.11	117.5
7552-3	0.61	49
7553-3	1.55	136
7563-3	2.22	95
7565-3	1.89	160
7566-3	2.22	160
7554-3	1.89	136
7576-3	3.33	400
7577-3	2.0	70
7578-3	2.0	80
7579-3	2.0	152
7580-3	2.0	60
7593-3	1.5	105
7621-3	1.89	160
7622-3	1.89	142
7608-3	N/A	105
7606-3	N/A	78.8
7627-3	1.78	67
7630-3	3.34	160
7624-3	2.0	120
TOTAL	41.89	3148.3

Table 4. List of pending permits and their appropriations from the Missouri: Elk Point aquifer (Water Rights, 2013a).

Recognizing that Lewis and Clark RWS withdraw water from the Missouri: Elk Point aquifer that is induced from the Missouri River and considering the remaining hydrologic budget, there is reasonable probability that unappropriated water is available for the 640 ac-ft/yr appropriation proposed by this application.

Observation Well Data:

Administrative Rule of South Dakota Section 74:02:05:07 requires that “the Water Management Board shall rely upon the record of observation well measurements to determine that the quantity of water withdrawn annually from the aquifer does not exceed the estimated average annual recharge to the aquifer”.

The SD DENR-Water Rights Program monitors 37 observation wells completed into the Missouri: Elk Point aquifer with two of these observation wells located within five and one quarter miles of the well site proposed by this application (Water Rights, 2013b). Hydrographs for these wells are shown in Figures 1 and 2.

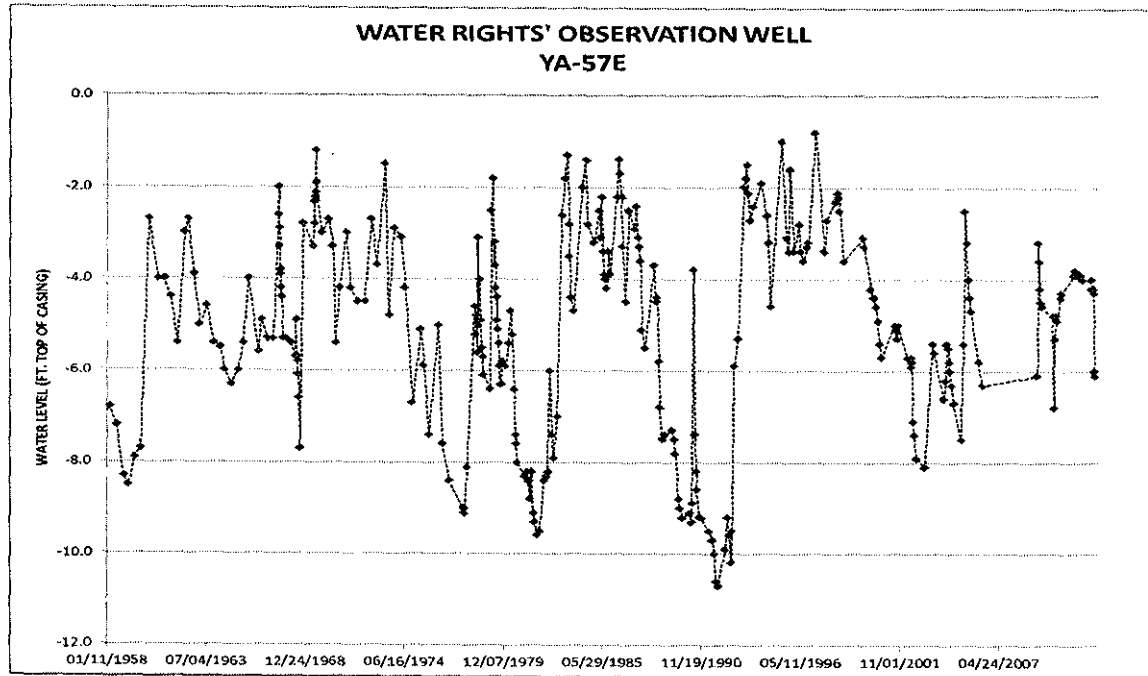

Figure 1. Hydrograph for SD DENR-Water Rights Observation Well YA-57E completed into the Missouri: Elk Point aquifer approximately four miles west of the well site proposed by Application No. 7635-3 (Water Rights, 2013a).

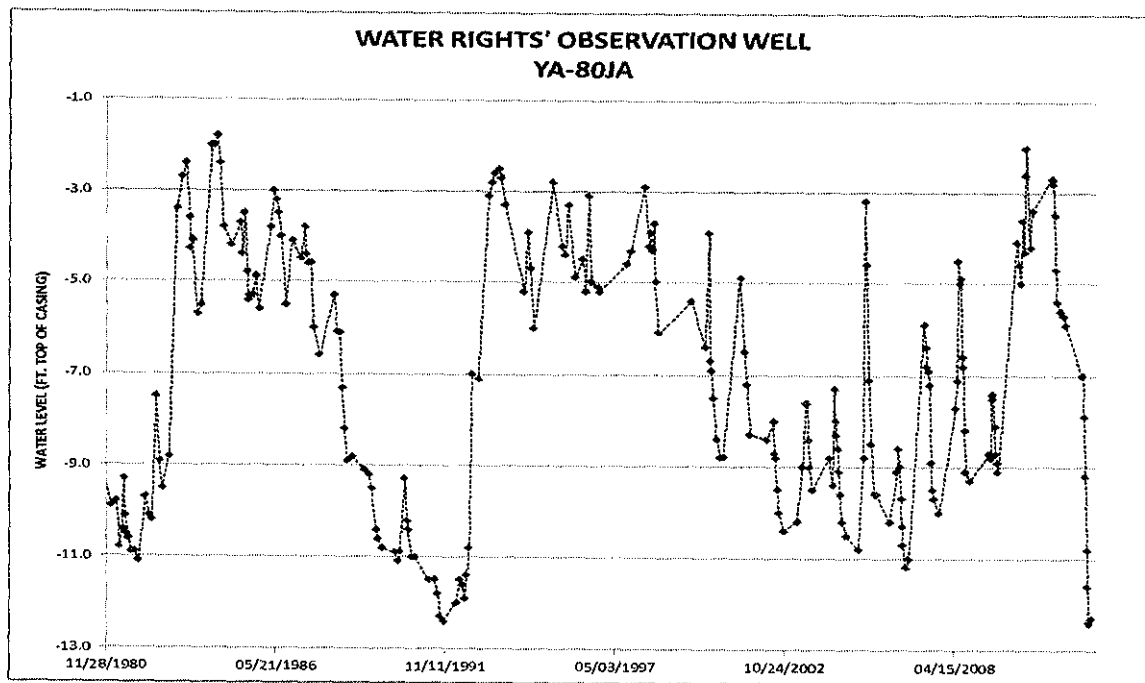

Figure 2. Hydrograph for SD DENR-Water Rights Observation Well YA-80JA completed into the Missouri: Elk Point aquifer less than five and one quarter miles northwest of the well site proposed by Application No. 7635-3 (Water Rights, 2013a).

The observation well data shows the aquifer responds well to climatic conditions with rising water levels during wet years and gradually declining water levels during dry years. The observation well data shows that at the current level of development, climatic conditions mask the temporal effects of well withdrawals. The observation well data documents the hydraulic connection between the Missouri: Elk Point aquifer and the Missouri River (e.g. in particular, record high groundwater levels associated with flooding in 2011). Because of this obvious hydraulic connection between Missouri: Elk Point aquifer and the Missouri River and the availability of water in the Missouri River, there is a reasonable probability that additional recharge to the Missouri: Elk Point will be induced with additional pumping. Recognizing that natural discharge from the aquifer can be captured for pumping. Additional pumping from the Missouri: Elk Point aquifer can also induce recharge from the underlying Dakota aquifer. Therefore, there is reasonable probability that unappropriated water is available from the aquifer to support this appropriation.

EXISTING WATER RIGHTS:

The proposed well site is located approximately one mile from the Clay and Yankton county line and approximately nine and one half miles north of the Missouri River. There is one water right/permit that has a diversion point within one mile of the proposed well site. The nearest water right/permit is Water Permit No. 7374-3, for Logue Partnership, located more than 3,400 feet northwest and up-gradient from the proposed well site (Water Rights, 2013c). Permit Application No. 7634-3, for Logue Partnership, proposes one well to be completed into the Missouri: Elk Point aquifer approximately 2,400 feet northwest and up-gradient from the proposed well site.

Based on the observation well data and the distance between wells, drawdown is not expected to be significant nor likely to cause adverse impacts to existing water rights. The precise drawdown cannot be quantified without aquifer testing. With that in mind, this permit should adhere to and include the standard permit qualification which applies to most groundwater permits/rights stating that:

“The well approved under this permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights”.

SDCL 46-6-6.1 does not protect artesian head pressure as a means of delivery and the Water Management Board has consistently recognized that to place water to maximum beneficial use a certain amount of drawdown may occur. To balance interests between irrigation use and delivery of water by artesian pressure, the Water Management Board has defined an “adversely impacted domestic well” in ARSD 74:02:04:20(7) as:

“a well in which the pump intake was set at least 20 feet below the top of the aquifer at the time of construction or, if the aquifer is less than 20 feet thick, is as near to the bottom of the aquifer as is practical and the water level of the aquifer has declined to a level that the pump will no longer deliver sufficient water for the well owner's needs”

In reality, the assurance of reasonable domestic use provided by SDCL 46-6-6.1 and ARSD 74:02:04:20(7) generally ensures not only that interference will not be adverse to domestic well users but also in existing appropriative rights (i.e. in most cases, the protection afforded to adequate domestic wells by water law, would lead to enforcement of the “standard permit qualification” before there is a reduction of needed water supplies to appropriative rights). Although drawdown is expected to be minimal, as shown by the observation well hydrographs, some drawdown will occur. Depending on the extent of drawdown, some existing well owners may need to lower their pumps to accommodate for deeper water levels. However, when considering the statute and rule, there is a reasonable probability that any well interference from these proposed applications will not be adverse to adequate domestic wells.

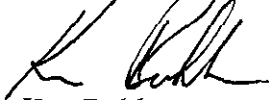

CONCLUSIONS:

1. This application proposes to appropriate up to 640 acre-feet annually for irrigation from the Missouri: Elk Point aquifer.
2. There is a reasonable probability that unappropriated water is available from the Missouri: Elk Point aquifer to supply this proposed appropriation.
3. Although the Missouri: Elk Point aquifer may be confined in this area, drawdown from pumping is not expected to be significant very far from a production well.
4. There is a reasonable probability that the well proposed by this application will not adversely impact existing water rights or domestic wells.

Notice is given that Richard Logue, c/o Thomas Logue, 30565 455th Ave, Volin SD 57072 has filed an application for a water permit to appropriate 2.0 cubic feet of water per second from one well to be completed into the Missouri:Elk Point Aquifer (100 feet deep) located in the NW 1/4 NW 1/4 Section 29 for irrigation of 320 acres located in the N 1/2 SW 1/4, SE 1/4 SW 1/4, NW 1/4 NW 1/4, S 1/2 NW 1/4 Section 29 and E 1/2 SW 1/4 Section 20; all in T94N-R53W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 7635-3 because 1) unappropriated water is available; 2) existing rights will not be unlawfully impaired; 3) it is a beneficial use of water; and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on this application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the Chief Engineer's recommendation. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider this application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by April 1, 2013.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application. Steven M. Dear Mr. Logue:

Water Permit Application No. 7635-3 for irrigation use has been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice has been sent to the Plain Talk printed at Vermillion SD (Ph # 605-624-2695) and the Press & Dakotan printed at Yankton SD (Ph # 605-665-7811). You will need to contact the newspaper(s) and authorize publication of this notice. For your information, a copy of the notice, the recommendation of the Chief Engineer and report on the application are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper(s) to authorize publication of your Notice and to arrange for payment. Early contact with the paper(s) can eliminate delays. Upon receiving authorization from you, the publisher has been instructed to publish your notice. The newspaper has also been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund

Natural Resources Engineer
(605) 773-3352

enclosures

NOTE: If you plan to contest any part of the Chief Engineer's recommendation, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the application.

Instruction to Newspaper - Publish the Notice on March 22, 2013. The applicant is responsible for payment. The text of the notice can be e-mailed to your paper by contacting Karen Schlaak at (605) 773-3352 or email: Karen.schlaak@state.sd.us.

NOTICE OF APPLICATION NO. 7635-3 to Appropriate Water

Notice is given that Richard Logue, c/o Thomas Logue, 30565 455th Ave, Volin SD 57072 has filed an application for a water permit to appropriate 2.0 cubic feet of water per second from one well to be completed into the Missouri:Elk Point Aquifer (100 feet deep) located in the NW 1/4 NW 1/4 Section 29 for irrigation of 320 acres located in the N 1/2 SW 1/4, SE 1/4 SW 1/4, NW 1/4 NW 1/4, S 1/2 NW 1/4 Section 29 and E 1/2 SW 1/4 Section 20; all in T94N-R53W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 7635-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on this application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the Chief Engineer's recommendation. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider this application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by April 1, 2013.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application. Steven M. Dear Mr. Logue:

Enclosed is Water Permit No. 7635-3 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

Form 10, *Notice of Completion of Works and Application of Water to Beneficial Use*, is enclosed. Please return this completed form after you have finished the system and have put the water to beneficial use. An investigation can then be scheduled so the water license may be issued, thus completing the acquisition of a water right.

An informational sheet *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Jeanne Goodman, Chief Engineer

Dear Mr. Logue:

I am writing to acknowledge receipt of the "Notice of Completion of Works" forms that you sent in to let us know that you are completed with the irrigation systems authorized under the following water permits:

- No. 7634-3, Logue Partnership
- No. 7635-3, Richard Logue

The systems are now ready for inspection. Inspections are done on a county-by-county basis as staff time permits. You have done everything you need to do and the intervening time between the completion of the projects and the staff inspection has no bearing on the water permits.

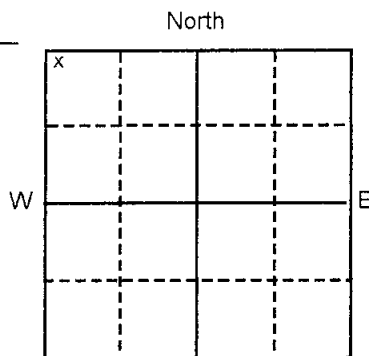

Someone from our office will contact you prior to the inspection to set up a time that is convenient for you. If you have any questions, please contact me.

Sincerely,

Genny McMath

Report of Examination of Works and/or Application of Water to Beneficial Use For Permit No. 7635-3

I have this day, November 5, 2016, made a thorough examination of the water use system constructed by Richard Logue, c/o Thomas Logue, 30565 455th Ave, Volin, SD 57072 of Permit No. 7635-3, bearing the priority of December 21, 2012 authorizing the diversion of 2.0 cu. ft. per second of the waters of Missouri:Elk Point Aquifer for irrigation purposes, of 320 acres, in Clay County.

Inspection contact & relationship **Thomas & Donny Logue, tenants**
to permit holder, if applicable:

A. Works used to divert the water:

Well Information:

- 1) Well Drilling Firm: Hammond-Wetmore Drilling, LLC
- 2) No. of Wells 1
- 3) Depth(s) 95 feet
- 4) Well log is available Yes

Casing:

- 1) Diameter 16 inches
- 2) Length 55 feet
- 3) Type PVC

Screen:

- 1) Type PVC Manufactured
- 2) Length 40 feet
- 3) Static water level 9.4 feet

Pump:

- 1) Make Grundfos
- 2) Model 625s400-2a
- 3) Capacity 900 GPM

Motor:

- 1) Make Grundfos
- 2) Model No. Submersible
- 3) Horsepower rating 40 hp

B. Works used to transport water to place of use:

- 1) Type PVC 2) Size 8 inches 3) Length 2140 feet

Comments: See map for approximate location.

C. Works used to apply water to beneficial use:

Center pivot:

- 1) Make Valley 8000
2) Overall length 1299 feet
3) Number of towers 7
4) End gun Yes
5) Capacity 900 GPM

Chemigation Equipment:

- 1) Does chemigate Yes
2) Main line check valve Yes
3) Inspection port/air relief Yes
4) Low pressure drain Yes
5) Discharge is 20' from source Yes
6) Interlock type electrical
7) Injection pump type piston
8) Injection check valve Yes
9) Injection line check valve or positive displacement pump Yes

Comments: Permit holder was not chemigating at time of inspection, but provided the above answers to questions asked. Permit holder indicated he uses chemigation primarily to apply liquid nitrogen to corn crop. A copy of the chemigation rules and Appendix A were reviewed and provided to the permit holder.

D. Compliance with Permit Requirements:

- 1) Permit qualifications being abided by Yes
2) Irrigation Questionnaires checked to determine if permit owner started irrigation by the end of construction period Yes, began irrigating in 2014.
3) Exceptions to compliance are: None

E. Condition and Location:

1. The system is in good condition with the point(s) of diversion located as follows: East 1290', South 600' from NW Corner of Sec 29-T94N-R53W; Lat 42.93691/Long -97.13635; NW ¼ NW ¼ Sec 29-T94N-R53W.

2. The works are capable of diverting and conveying to the place of use 2.0 cfs or 900 gpm of water which is to be used for irrigation. Water has been put to beneficial use to the maximum extent as follows:

All land is located in Sec 29-T94N-R53W.

SW ¼ NW ¼ - 33 ac

SE ¼ NW ¼ - 31 ac

NW ¼ SW ¼ - 36 ac

NE ¼ SW ¼ - 36 ac

SW ¼ SW ¼ - 2 ac

SE ¼ SW ¼ - 2 ac

comprising a total of 140 acres of land and the license should be issued for 2.0 cfs or 900 gpm.

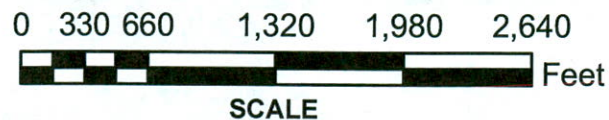

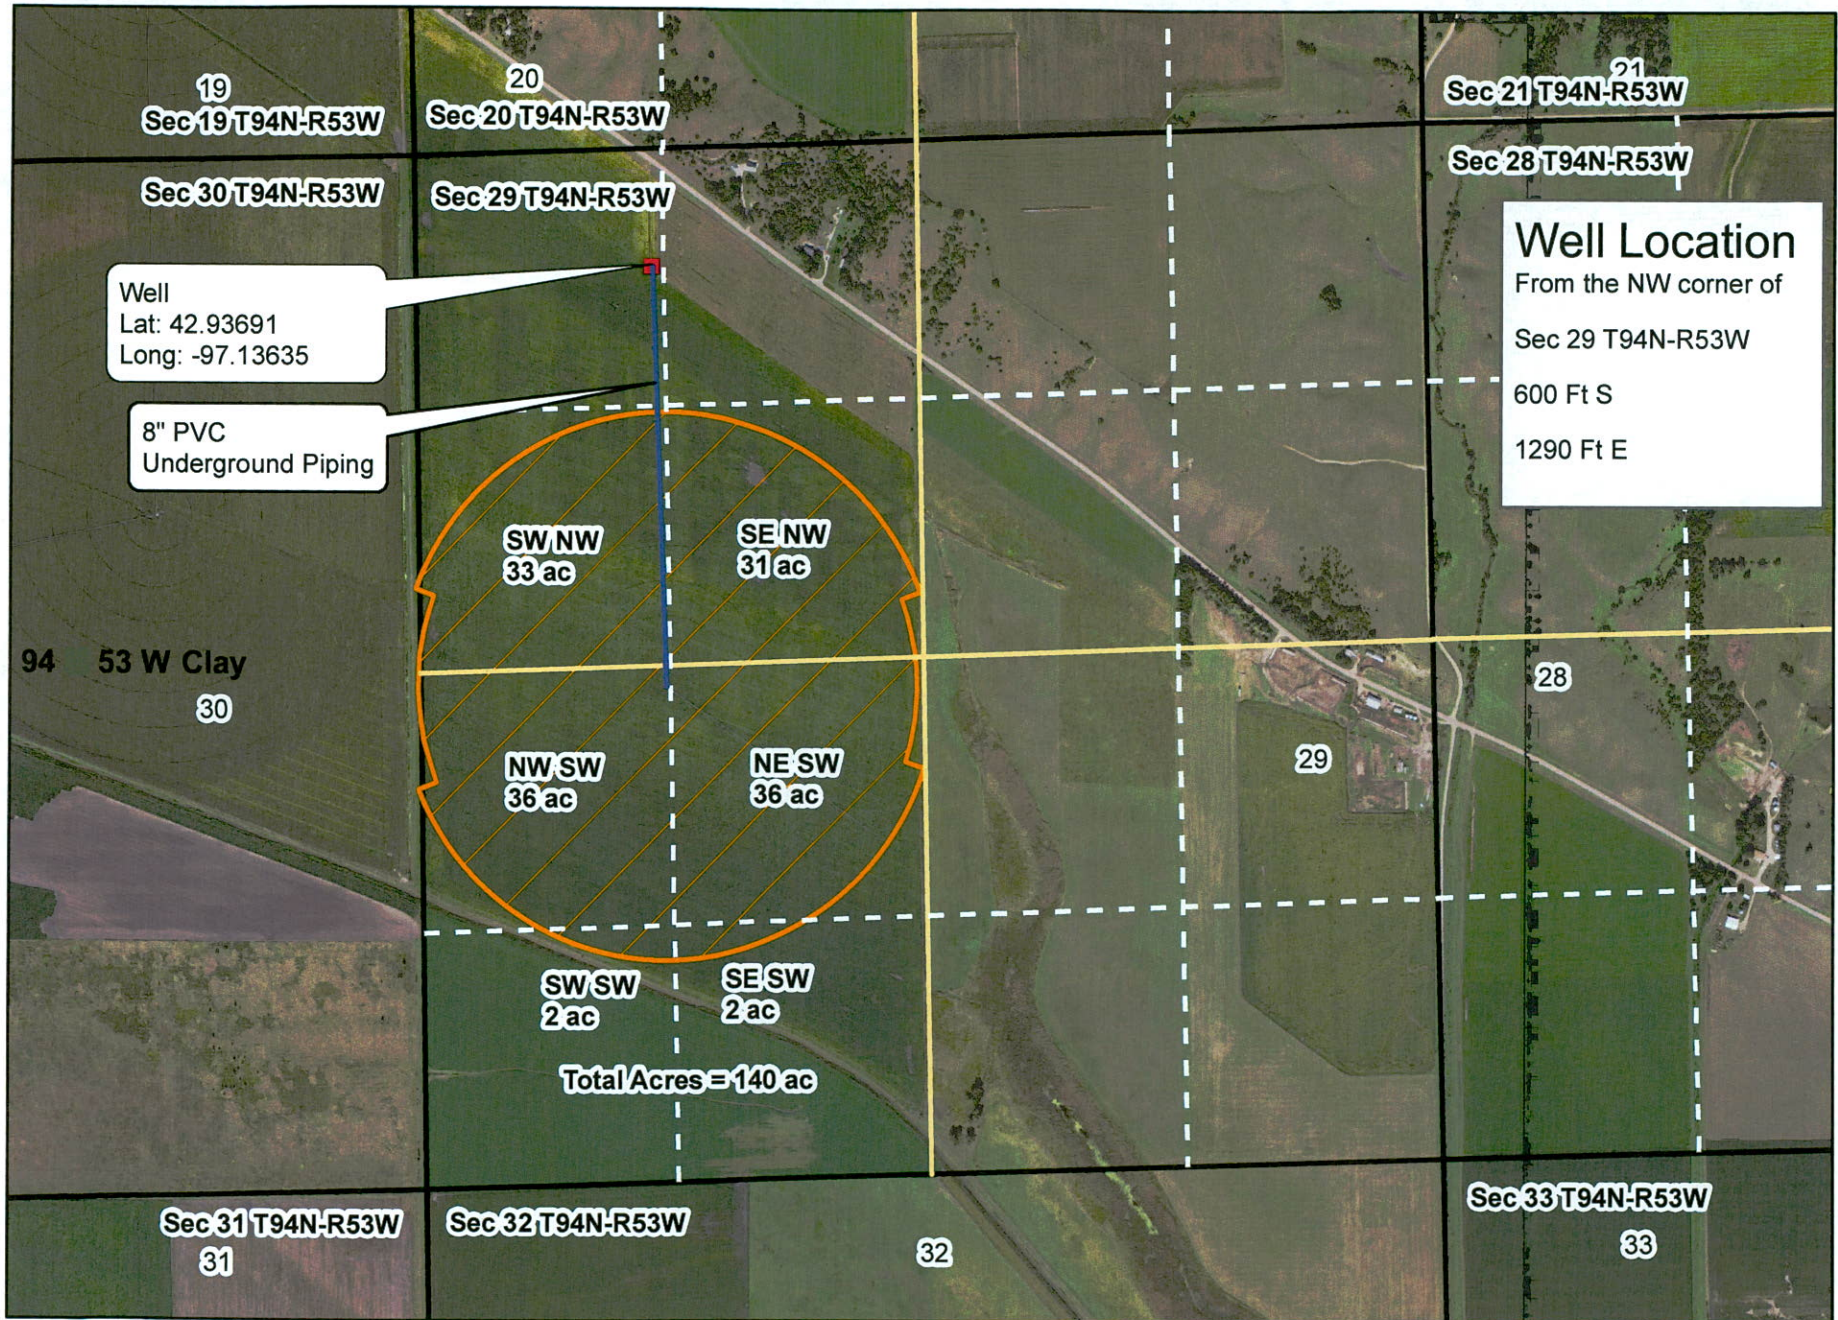

3. All structures, wells and lands on map Yes

Dear Mr. Logue:

Enclosed is Water License No. 7635-3. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

For your information SDCL 46-6-27 requires that if in the future, the owner of an existing well, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer
Water Rights Program
(605) 773-3352

**STATE OF SOUTH DAKOTA
WATER LICENSE NO. 7635-3**

(1) Richard Logue % Thomas Logue, 30565 455th Ave, Volin SD 57072 made Application No. 7635-3, December 21, 2012 for a water permit to divert 2.00 cubic feet of water per second from ground water, one well (Missouri Elk Point Aquifer), Clay County, South Dakota for irrigation purposes. Permit No. 7635-3, with a priority date of December 21, 2012 was approved April 1, 2013 and issued to the applicant for diversion of water with construction of the described water supply system to be completed on or before April 1, 2018 and for the application to beneficial use of said water on or before April 1, 2022.

The Permit holder submitted a "*Notice of Completion of Works and Application of Water to Beneficial Use*" on September 11, 2013. The "*Notice*" stated the water use system was completed in May, 2013 and the water placed to beneficial use in June, 2013.

(2) It is certified that the permit holder has complied with the provisions of South Dakota State Law relating to completion of the construction of the water supply system and is entitled to divert 2.00 cubic feet of water per second for beneficial use. The location of the diversion point is:

- 1290'E and 600'S of the NW Corner of Section 29, T94N, R53W (NW $\frac{1}{4}$ NW $\frac{1}{4}$)
Latitude 42.93691, Longitude -97.13635

(3) The permit holder has complied with the provisions of South Dakota State Law relating to the application of water to beneficial use to irrigate the following land:

Section 29, T94N, R53W			
SW $\frac{1}{4}$ NW $\frac{1}{4}$	33 acres	NW $\frac{1}{4}$ SW $\frac{1}{4}$	36 acres
SE $\frac{1}{4}$ NW $\frac{1}{4}$	31 acres	NE $\frac{1}{4}$ SW $\frac{1}{4}$	36 acres
		SW $\frac{1}{4}$ SW $\frac{1}{4}$	2 acres
		SE $\frac{1}{4}$ SW $\frac{1}{4}$	2 acres
Total 140 acres			

(4) Pursuant to South Dakota Water Law 46-5-30.1 Richard Logue % Thomas Logue, 30565 455th Ave, Volin SD 57072 the holder and/or owner of Water Right No. 7635-3 is issued a license to appropriate water, the right to use 2.00 cubic feet of water per second from ground water, one well (Missouri Elk Point Aquifer) with a priority date of December 21, 2012 from the location specified in (2) of this license for irrigation purposes.

This license is subject to South Dakota Water Law, any limitations or conditions listed in Water Right No. 7635-3 and subject to the following qualifications:

- The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
- The well authorized by Permit No. 7635-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with the Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28. ***The well was drilled in April, 2013 by Hammond-Wetmore Drilling LLC. A copy of the well completion report is on file with the Water Rights Program.***

- This Permit is approved subject to the irrigation water use questionnaire being submitted each year.
