

WATER PERMIT NO. 7769-3

Name of Applicant: **Robert & Theresa Geary**

Address: **32750 480th Ave, Elk Point SD 57025** Phone: **712 540 1633**

Amount of Water Claimed: **1.78 cfs** Total Acres: **48 acres**

Source of Water Supply: **groundwater (one well)**

Water to be used for: **irrigation** County: **Union**

Type of Waste Disposal System:

Location: **3 miles southeast of Elk Point**

PRIORITY Date Received: **2-14-13** Application/License Fee: **\$ 700**

Corrected Application Received: **2-28-13** Period of Annual Use: **April 1 – October 31**

Remarks: **Requesting diversion rate greater than statutory limit**

Diversion Point: **Gov't Lot 2 (NW 1/4) lying NE of RR, Sec 3-T90N-R49W**

Land to be Irrigated: **Gov't Lot 2 (NW 1/4) lying NE of RR, Sec 3-T90N-R49W**

Depth of Well: **120 feet deep**

Well Driller:

Remarks:

Type of Map: **aerial**

SOUTH DAKOTA
WATER PERMIT NO. 7769-3

Date of first receipt of application February 14, 2013.

Date of return to applicant for corrections, amendments or changes February 22, 2013.

Date of receipt of corrected application February 28, 2013.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 7769-3 to Robert & Theresa Geary, 32750 480th Ave, Elk Point SD 57025 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 7769-3 appropriates 1.78 cubic feet of water per second (cfs) from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Section 3 for irrigation of 48 acres located in the Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Sections 3; all in T90N-R49W.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: March 1 – November 30.
3. The date from which applicant may claim right is February 14, 2013.
4. The date of approval of Permit No. 7769-3 is May 20, 2013.
5. One-fifth of the construction is to be completed on or before November 20, 2015.
6. All construction is to be completed on or before May 20, 2018.
7. Water is to be put to beneficial use on or before May 20, 2022.
8. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 7769-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. Pursuant to SDCL 46-5-6 which allows a greater diversion rate if the method of irrigation, time constraints, or type of soils so requires, Permit No. 7769-3 authorizes a maximum diversion rate of 1.78 cfs for the irrigation of 48 acres with an annual volume not to exceed 2 acre feet of water per acre per year.
4. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

Supplemental Information

(Complete applicable portions only)

(type or print in ink)

1. Well Information - Proposed Construction

- a) Drill Hole Diameter 20" Depth 120'
- b) Casing Type Plastic Diameter 16" Thickness 5080
- c) Screen Type Plastic Diameter 16" Thickness 5080
- d) Gravel Pack pea Gravel Length of Gravel Pack 50'
- e) Depth to Top of Water Bearing Material 60'
- f) Depth to Water (ground surface to water level) 16'
- g) Distance to nearest existing domestic well:
- On applicants property None On property owned by others None

2. Wastewater Disposal System Information

- a) Type of System (i.e. septic tank, drain field) _____
- b) System Capacity (gallons) _____ Year Constructed _____
- c) Connected to the City of _____ Sanitary System _____

3. Dugout Information

- a) Surface Dimensions _____ Depth _____
- b) Depth to water (ground surface to water level) _____

4. Water Storage Dams

If the proposed water use system contains one or more storage dams, please furnish the information requested below for each dam. The locations of the dams need to be shown on the map submitted with the application.

- a) If a private engineering firm or government agency was involved in the design of this dam, please give their name and address:
- _____
- _____

- b) Freeboard _____
- c) Crest Width _____
Crest Length _____
- d) Height _____
- e) Primary Outlet Capacity _____
If pipe, diameter _____
- f) Secondary Spillway Capacity _____
Spillway Width _____
- g) X & Y Slope _____
Upstream _____
Downstream _____
- h) Surface Area of Impoundment _____
- i) Storage _____ Acre Feet
- j) Drainage Area Above Dam _____ Acres

NAME OF PERSON OR FILE: Water Permit Application for Robert Geary

ADDRESS: COUNTY: Union

DATE: April 9, 2013 TELEPHONE: 712 540 1633

RE: diversion rate

I contacted Mr. Geary regarding each of his applications (7768-3 through 7776-3) uniformly requests a diversion rate of 800 gpm. That is understandable on the quarter section pivots that do not make full rotation. However, there are four applications for irrigation of between 35 to 48 acres. I asked if a 800 gpm diversion rate is really needed for these smaller pivots.

He indicated that these are all quarter section pivot that he is purchasing used. They all require 800 gpm to operate.

In addition, since they are used systems he wants them all to be set up the same so that he can interchange parts or use the same diesel motor for operating.

Subject: Re: Letter received on Mr. Geary's applications

Hi Eric. I can definitely verify that this is not Dans handwriting and he in no way had anything to do with this letter even though it does look like it says Dan Hanson I will agree.
Thanks.

Scott

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 7769-3, Robert and Theresa Geary**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 7769-3, Robert and Theresa Geary, 32750 480th Avenue, Elk Point SD 57025.

The Chief Engineer is recommending APPROVAL of Application No. 7769-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.
2. The well authorized by Permit No. 7769-3 shall be constructed by a licensed well driller and construction of the well and installation of the pump shall comply with Water Management Board Well Construction Rules, Chapter 74:02:04 with the well casing pressure grouted (bottom to top) pursuant to Section 74:02:04:28.
3. Pursuant to SDCL 46-5-6 which allows a greater diversion rate if the method of irrigation, time constraints, or type of soils so requires, Permit No. 7769-3 authorizes a maximum diversion rate of 1.78 cfs for the irrigation of 48 acres with an annual volume not to exceed 2 acre feet of water per acre per year.
4. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

REPORT TO THE CHIEF ENGINEER
ON
WATER PERMIT APPLICATION NOS. 7768-3, 7769-3, 7771-3,
7772-3, 7773-3, 7775-3 & 7776-3
ROBERT & THERESA GEARY
April 1, 2013

Water Permit Application No. 7768-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the W $\frac{1}{2}$ Gov't Lot 1 (NE $\frac{1}{4}$) of Section 3, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 48 acres located in the W $\frac{1}{2}$ Lot 1 (NE $\frac{1}{4}$) of Section 3, in T90N-R49W in Union County. The applicant is requesting a diversion rate greater than the statutory limit.

Water Permit Application No. 7769-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the Gov't Lot 2 lying NE of the railroad right of way (NW $\frac{1}{4}$) in Section 3, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 48 acres located in the Gov't Lot 2 lying NE of the railroad right of way (NW $\frac{1}{4}$) in Section 3, in T90N-R49W in Union County. The applicant is requesting a diversion rate greater than the statutory limit.

Water Permit Application No. 7771-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the center of the NW $\frac{1}{4}$ of Section 2, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 160 acres located in the NW $\frac{1}{4}$ of Section 2, in T90N-R49W in Union County.

Water Permit Application No. 7772-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 2, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 120 acres located in the W $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 2, in T90N-R49W in Union County. The applicant is requesting a diversion rate greater than the statutory limit.

Water Permit Application No. 7773-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the point between the NW $\frac{1}{4}$ SE $\frac{1}{4}$ and the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 2, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 70 acres located in the N $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 2, in T90N-R49W in Union County. The applicant is requesting a diversion rate greater than the statutory limit.

Water Permit Application No. 7775-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in Tract 1 N $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 3, T90N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 41 acres located in the Tract 1 N $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 3, in T90N-R49W in Union County. The applicant is requesting a diversion rate greater than the statutory limit.

Water Permit Application No. 7776-3 proposes to appropriate water from one well to be completed into the Missouri: Elk Point aquifer at a maximum diversion rate of 1.78 cubic feet of water per second (cfs). The well will be located in the center of the SW ¼ of Section 35, T91N-R49W and is expected to be approximately 120 feet deep. This application proposes to irrigate 140 acres located in the SW ¼ of Section 35, in T91N-R49W in Union County.

AQUIFER: Elk Point management unit of the Missouri aquifer (M:EP)

GEOLOGY AND AQUIFER CHARACTERISTICS:

Bugliosi (1986) refers to the Elk Point management unit of the Missouri aquifer as the southern portion of the Lower James-Missouri aquifer. For water management purposes, the Water Management Board and the SD DENR-Water Rights Program refer to this aquifer as the Missouri: Elk Point. The Missouri: Elk Point is a surficial aquifer composed of unconsolidated glacial outwash material ranging from fine sand to coarse gravel (Niehus, 1994). The aquifer generally lies below the flood plain of the Missouri River (Bugliosi, 1986), and also below the flood plain of the Big Sioux River in the southern part of Union County (Niehus, 1994). Bugliosi (1986) reported that the aquifer directly overlies and is hydraulically connected to the Dakota aquifer, and is hydraulically connected at its northern boundary to the Lower James-Missouri and the Lower Vermillion-Missouri aquifers as well as the Missouri and Vermillion Rivers. Niehus (1994) found the aquifer is also hydraulically connected to the Big Sioux aquifer in the northeast of Union County. The proposed well sites are located in southern Union County approximately three miles west of the Big Sioux River and approximately three and one half miles east of the Missouri River. The Elk Point management unit of the Missouri aquifer encompasses approximately 234,700 acres of Clay, Union, and Yankton Counties, as determined by Hedges and others (1982) and Niehus (1994). The aquifer contains an estimated 3,287,100 acre feet of recoverable water, of which an estimated 1,494,600 acre-feet of recoverable water is in storage in Union County (Hedges and others, 1982). The maximum thickness of the Missouri aquifer is 146 feet with an average thickness of 84 feet (Niehus, 1994). The transmissivity of the aquifer ranges from 20,700 to 24,700 square feet per day (ft²/d) (Bugliosi, 1986). The specific capacity of wells completed into the aquifer ranges from approximately 124 to 173 gallons per minute per foot ((gal/min)/ft) (Bugliosi, 1986). The aquifer can be under confined or unconfined (water-table) conditions, and is confined in the area of these applications. The average saturated thickness reported for nearby well sites is approximately 83 feet as shown in Table 1 (Water Rights, 2013a).

Well Log Identification	Saturated Thickness (ft)
Observation Well UN-77N	54
Observation Well UN-80E	71
Lithologic Log 090N49W02CCDA	104
Lithologic Log 090N49W04AADA	78
Domestic Well for Bob Geary	107

Table 1. Reported saturated thickness for nearby wells (Water Rights, 2013a).

SDCL 46-2A-9

In accordance with SDCL 46-2A-9, a permit may be issued to appropriate water only if there is reasonable probability that there is unappropriated water available for the applicant's proposed use, that the proposed diversions can be developed without unlawful impairment of existing rights and that the proposed use is a beneficial use and in the public interest. This report will

review the availability of unappropriated water and existing rights within the Missouri: Elk Point aquifer.

WATER AVAILABILITY:

These applications propose to appropriate water from the Missouri: Elk Point aquifer. If these applications are approved, it is likely that the actual water use will be less than 1,254 acre feet per year (ac-ft/yr). The probability of unappropriated water available from the aquifer can be evaluated using SDCL 46-6-3.1 which requires “No application to appropriate groundwater may be approved if, according to the best information reasonably available, it is probable that the quantity of water withdrawn annually from a groundwater source will exceed the quantity of the average estimated annual recharge of water to the groundwater source.”

Recharge versus Discharge:

Recharge:

Recharge to the Missouri: Elk Point aquifer occurs through seepage from streams and by infiltration of precipitation (Bugliosi, 1986; Niehus, 1994). Recharge is also provided to the aquifer from the Big Sioux, Lower Vermillion-Missouri, and Dakota aquifers as well as during times of high flow from the Big Sioux and Missouri Rivers. The average annual recharge rate to the Missouri: Elk Point aquifer is estimated to be 3.8 in/yr based on observation well analysis (Hedges and others, 1985). Given the area of the management unit in Clay, Union, and Yankton Counties of 234,700 acres, average annual recharge to the aquifer is estimated to be 74,322 ac-ft/yr. Recharge in Union County is estimated to be 36,480 ac-ft/yr based on the 115,200 acres that the aquifer underlies in the county (Hedges and others, 1982).

Discharge:

Discharge from the Missouri: Elk Point aquifer is by evapotranspiration, discharge to the Big Sioux and Missouri Rivers during low flow, to the underlying Dakota aquifer, and withdrawal from wells (Niehus, 1994). There are a number of completion reports on file with the SD DENR-Water Rights Program for domestic use wells completed into the Missouri: Elk Point aquifer (Water Rights, 2013b), and there are currently 538 water rights/permits appropriating water from the Missouri: Elk Point aquifer of which 302 are in Union County (Water Rights, 2013c). In addition, there are five future use permits in Clay County reserving 14,900 ac-ft/yr of water from the aquifer. The distribution of these appropriations for the entire aquifer and their types are shown in Table 2.

Water Rights/Permits	Number
Commercial	7
Domestic	2
Fish and Wildlife Propagation	4
Industrial	5
Irrigation	505
Municipal	10
Recreational	1
Rural Water System	2
Suburban Housing Development	2
Future Use Permits	Number
Lewis & Clark Rural Water System	4
City of Vermillion	1

Table 2. Water rights/permits from the Missouri: Elk Point aquifer (Water Rights, 2013c).

The amount of water that can be expected to be withdrawn through water rights/permits authorizing water use for non-irrigation purposes at the current appropriation level can be estimated by assuming:

1. Water rights/permits limited by an annual volume will pump the entire volume appropriated.
2. Water rights/permits limited only by diversion rate will pump at the maximum permitted diversion rate 60 percent of the time.
3. Future use permits can be fully developed.

The expected water use for non-irrigation purposes, including that reserved for future use, from the Missouri: Elk Point aquifer is less than 61,300 ac-ft/yr based on current water appropriations. Union County accounts for less than 5,700 ac-ft/yr of this based on current water appropriations.

The annual reported water use from the Missouri: Elk Point aquifer for irrigation purposes is displayed in Table 3. The average pumpage reported, for irrigation purposes, over the 1979 to 2011 period of record in Union County is 10,777.62 ac-ft/yr. The amount of water usage from domestic wells is not significant to the hydrologic budget.

YEAR	NO. OF PERMITS	APPROPRIATION (AC-FT/YR)	PUMPAGE REPORTED (AC-FT/YR)
1979	259	122980	9859

Table 3. Irrigation from the Missouri: Elk Point aquifer (Water Rights, 1979-2011)

Lewis and Clark Rural Water System currently reserves 13,000 ac-ft/yr for future use and has permits appropriating 32,165 ac-ft/yr (Water Rights, 2013b). These account for a significant portion of the annual water usage in Clay County, and most of the water from these wells will be induced from the Missouri River. More recharge can be induced with more pumping in particular from the Missouri River because it is hydraulically connected to the aquifer.

There are a number of new permits and pending applications from the Missouri: Elk Point aquifer. Once they are developed, the average pumping for irrigation purposes is expected to increase significantly. Since January 1, 2012, there have been 87 permits issued from the Missouri: Elk Point aquifer authorizing irrigation for a total of 10,670.5 acres. The average annual withdrawal is still expected to be significantly less than the average annual recharge. As of April 1, 2013, an additional 19 permit applications have been submitted for appropriation of

water from the Missouri: Elk Point aquifer. The pending permits have a total diversion rate of 32.79 cfs, and 1,700.85 acres of coverage as shown in Table 4 (Water Rights, 2013a). Recognizing that Lewis and Clark RWS withdraw water from the Missouri: Elk Point aquifer that is induced from the Missouri River, and considering the remaining hydrologic budget, there is reasonable probability that unappropriated water is available for these applications.

PERMIT NO.	DIV. RATE (CFS)	ACRES
7693-3	0.67	27.7
7711-3	1.67	115
7712-3	1.78	74.54
7713-3	2.22	114.29
7714-3	1.67	59.32
7749-3	2.28	160
7768-3	1.78	48
7769-3	1.78	48
7770-3	1.78	70
7771-3	1.78	160
7772-3	1.78	120
7773-3	1.78	70
7774-3	1.78	35
7775-3	1.78	41
7776-3	1.78	140
7785-3	0.92	35
7800-3	2.22	110
7801-3	1.56	108
7802-3	1.78	165
TOTAL	32.79	1700.85

Table 4. List of pending permits from the Missouri: Elk Point aquifer (Water Rights, 2013a)

Recognizing that Lewis and Clark RWS withdraw water from the Missouri: Elk Point aquifer that is induced from the Missouri River, and considering the remaining hydrologic budget, there is reasonable probability that unappropriated water is available for these applications.

Observation Well Data:

Administrative Rule of South Dakota Section 74:02:05:07 requires that “the Water Management Board shall rely upon the record of observation well measurements to determine that the quantity of water withdrawn annually from the aquifer does not exceed the estimated average annual recharge to the aquifer”.

The SD DENR-Water Rights Program monitors 37 observation wells completed into the Missouri: Elk Point aquifer with five of these observation wells located within two miles of the well sites proposed by these applications (Water Rights, 2013a). Hydrographs for these wells are shown in Figures 1, 2, 3, 4 and 5.

Figure 1. Hydrograph for SD DENR-Water Rights' Observation Well UN-87E completed into the Missouri: Elk Point aquifer approximately one half mile southeast of the well sites proposed by these applications (Water Rights, 2013b).

Figure 2. Hydrograph for SD DENR-Water Rights' Observation Well UN-77N completed into the Missouri: Elk Point aquifer approximately one and one quarter miles northeast of the well sites proposed by these applications (Water Rights, 2013b).

Figure 3. Hydrograph for SD DENR-Water Rights' Observation Well UN-57B completed into the Missouri: Elk Point aquifer approximately one and one half miles northwest of the well sites proposed by these applications (Water Rights, 2013b).

Figure 4. Hydrograph for SD DENR-Water Rights' Observation Well UN-80E completed into the Missouri: Elk Point aquifer approximately one and one half miles northwest of the well sites proposed by these applications (Water Rights, 2013b).

Figure 5. Hydrograph for SD DENR-Water Rights' Observation Well UN-87D completed into the Missouri: Elk Point aquifer approximately one and three quarter miles southeast of the well sites proposed by these applications (Water Rights, 2013b).

The observation well data shows the aquifer responds well to climatic conditions with rising water levels during wet years and gradually declining water levels during dry years. The observation well data shows that at the current level of development, climatic conditions mask the temporal effects of well withdrawals. The observation well data documents the hydraulic connection between the Missouri: Elk Point aquifer and the Missouri River (e.g. in particular, record high groundwater levels associated with flooding in 2011).

Because of this obvious hydraulic connection between Missouri: Elk Point aquifer and the Missouri River and the availability of water in the Missouri River, there is a reasonable probability that additional recharge to the Missouri: Elk Point will be induced with additional pumping. Natural discharge from the aquifer can be captured for pumping. Additional pumping from the Missouri: Elk Point aquifer can also induce recharge from the underlying Dakota aquifer. Therefore, there is reasonable probability that unappropriated water is available from the aquifer to support these appropriations.

EXISTING WATER RIGHTS:

The proposed well sites are located in southern Union County approximately three miles west of the Big Sioux River and approximately three and one half miles east of the Missouri River. Figure 6 shows the nearby existing water rights located in the Missouri: Elk Point aquifer. The locations of the existing water rights/permits were determined using the best data reasonably available. The nearest water right/permit to the group of proposed well sites is Water Right No. 1567-3, for Warren Mitchell, located approximately 2,100 feet southeast and down-gradient of the proposed well sites.

Observation Well UN-87D is located within 1,100 feet of Water Right No. 1096-3, for Mike & Brad Chicoine, and the hydrograph, shown in Figure 5, reports minimal drawdown at this distance due to pumping. Based on the observation well data and the distance between wells,

drawdown is not expected to be significant nor likely to cause adverse impacts to existing water rights or domestic wells. The precise drawdown cannot be quantified without aquifer testing. With that in mind, this permit should adhere to and include the standard permit qualification which applies to most groundwater permits/rights stating that:

“The well approved under this permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights”.

SDCL 46-6-6.1 does not protect artesian head pressure as a means of delivery and the Water Management Board has consistently recognized that to place water to maximum beneficial use a certain amount of drawdown may occur. To balance interests between irrigation use and delivery of water by artesian pressure, the Water Management Board has defined an “adversely impacted domestic well” in ARSD 74:02:04:20(7) as:

“a well in which the pump intake was set at least 20 feet below the top of the aquifer at the time of construction or, if the aquifer is less than 20 feet thick, is as near to the bottom of the aquifer as is practical and the water level of the aquifer has declined to a level that the pump will no longer deliver sufficient water for the well owner's needs”

In reality, the assurance of reasonable domestic use provided by SDCL 46-6-6.1 and ARSD 74:02:04:20(7) generally ensures not only that interference will not be adverse to domestic well users but also in existing appropriative rights (i.e. in most cases, the protection afforded to adequate domestic wells by water law, would lead to enforcement of the “standard permit qualification” before there is a reduction of needed water supplies to appropriative rights). Although drawdown is expected to be minimal, as shown by the observation well hydrographs, some drawdown will occur. Depending on the extent of drawdown, some existing well owners may need to lower their pumps to accommodate for deeper water levels. However, when considering the statute and rule, there is a reasonable probability that any well interference from these proposed applications will not be adverse to adequate domestic wells.

Figure 6. Existing water rights/permits located within close proximity to the well sites proposed by the applications for Robert and Theresa Geary (Water Rights, 2013c).

SDCL 46-5-6

Pursuant to SDCL 46-5-6, the diversion rate for an irrigation appropriation cannot be in excess of one cubic foot of water per second for every seventy acres, or “the equivalent thereof”. The statute provides that the Water Management Board may allow a greater diversion if the method of irrigation so requires. Water Permit Application Nos. 7768-3 and 7769-3 each propose to divert at a rate of 1.78 cfs to irrigate 48 acres, or the equivalent of 2.60 cfs per 70 acres to a center pivot irrigation system. Water Permit Application No. 7772-3 proposes to divert at a rate

of 1.78 cfs to irrigate 120 acres, or the equivalent of 1.04 cfs per 70 acres to a center pivot irrigation system. Water Permit Application No. 7773-3 proposes to divert at a rate of 1.78 cfs to irrigate 70 acres with a center pivot irrigation system. Water Permit Application No. 7775-3 proposes to divert at a rate of 1.78 cfs to irrigate 41 acres, or the equivalent of 3.04 cfs per 70 acres to a center pivot irrigation system. The applicant does not provide a justification for the diversion rates.

CONCLUSIONS:

1. These applications propose to appropriate water from the Missouri: Elk Point aquifer.
2. There is a reasonable probability that unappropriated water is available from the Missouri: Elk Point aquifer to supply these proposed appropriations.
3. The Missouri: Elk Point aquifer is confined in this area, but drawdown from pumping is not expected to be significant very far from a production well.
4. There is a reasonable probability that the wells proposed by these applications will not adversely impact existing water rights or domestic wells.

NOTICE OF APPLICATION NOS. 7768-3

THROUGH 7776-3 TO APPROPRIATE WATER

Notice is given that Robert & Theresa Geary, 32750 480th Ave, Elk Point SD 57025 has filed the following applications for a water permit.

Application No. 7768-3 proposes to appropriate 1.78 cubic feet of water per second (cfs) from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the W 1/2 Lot 1 (NE 1/4) Section 3 for irrigation of 48 acres located in the W 1/2 Lot 1 (NE 1/4) Section 3; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7769-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Section 3 for irrigation of 48 acres located in the Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Sections 3; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7770-3 proposes to appropriate 1.78 cfs from

one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NW 1/4 NW 1/4 Section 30 for irrigation of 70 acres located in the W 1/2 NW 1/4 Section 30; all in T90N-R48W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7771-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the center of the NW 1/4 Section 2 for irrigation of 160 acres located in the NW 1/4 Section 2; all in T90N-R49W.

Application No. 7772-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NW 1/4 NE 1/4 Section 2 for irrigation of 120 acres located in the W 1/2 NE 1/4, SE 1/4 NE 1/4 Section 2; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7773-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the a point between the NW 1/4 SE 1/4 and the NE 1/4 SE 1/4 Section 2 for irrigation of 70 acres located in the N 1/2 SE 1/4 Section 2; all in

T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7774-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NE 1/4 SW 1/4 Section 20 for irrigation of 35 acres located in the NE 1/4 SW 1/4 Section 20; all in T90N-R48W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7775-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in Tract 1 N 1/2 SE 1/4 Section 3 for irrigation of 41 acres located in the Tract 1 N 1/2 SE 1/4 Section 3; T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7776-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the center of the SW 1/4 Section 35 for irrigation of 140 acres located in the SW 1/4 Section 35; all in T91N-R49W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 7768-3 through 7776-3 because

1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on these applications, as recommended, unless a petition is filed opposing the applications or the applicant files a petition contesting the Chief Engineer's recommendations. If a petition opposing the applications or contesting the recommendations is filed, then a hearing will be scheduled and the Water Management Board will consider these applications. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting these applications or recommendations must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by May 20, 2013.

The petition may be informal, but must include a statement describing the petitioner's interest in the applications, the petitioner's reasons for opposing or supporting the applications, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to these applications.

Steven M. Pirner, Secretary,
Department of Environment and
Natural Resources.

Elk Point SD 57025

Dear Sir:

Water Permit Application Nos. 7768-3 through 7776-3 for irrigation use have been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice has been sent to the Leader Courier printed at Elk Point SD (Ph # 605-356-2632) and the Press & Dakotan printed at Yankton SD (Ph # 605-665-7811). You will need to contact the newspaper(s) and authorize publication of this notice. For your information, a copy of the notice, the recommendations of the Chief Engineer and reports on the applications are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper(s) to authorize publication of your Notice and to arrange for payment. Early contact with the paper(s) can eliminate delays. Upon receiving authorization from you, the publisher has been instructed to publish your notice. The newspaper(s) has also been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the applications.

Sincerely,

Eric Gronlund
Natural Resources Engineer
(605) 773-3352

enclosures

NOTE: If you plan to contest any part of the Chief Engineer's recommendation, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the applications.

Instruction to Newspaper - Publish the Notice on May 9, 2013. The applicant is responsible for payment. The text of the notice can be e-mailed to your paper by contacting Karen Schlaak at (605) 773-3352 or email: Karen.schlaak@state.sd.us.

NOTICE OF APPLICATION NOS. 7768-3 through 7776-3 to Appropriate Water

Notice is given that Robert & Theresa Geary, 32750 480th Ave, Elk Point SD 57025 has filed the following applications for a water permit.

Application No. 7768-3 proposes to appropriate 1.78 cubic feet of water per second (cfs) from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the W 1/2 Lot 1 (NE 1/4) Section 3 for irrigation of 48 acres located in the W 1/2 Lot 1 (NE 1/4) Section 3; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7769-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Section 3 for irrigation of 48 acres located in the Gov't Lot 2 lying NE of railroad right of way (NW 1/4) Sections 3; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7770-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NW 1/4 NW 1/4 Section 30 for irrigation of 70 acres located in the W 1/2 NW 1/4 Section 30; all in T90N-R48W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7771-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the center of the NW 1/4 Section 2 for irrigation of 160 acres located in the NW 1/4 Section 2; all in T90N-R49W.

Application No. 7772-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NW 1/4 NE 1/4 Section 2 for irrigation of 120 acres located in the W 1/2 NE 1/4, SE 1/4 NE 1/4 Section 2; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7773-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the a point between the NW 1/4 SE 1/4 and the NE 1/4 SE 1/4 Section 2 for irrigation of 70 acres located in the N 1/2 SE 1/4 Section 2; all in T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7774-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the NE 1/4 SW 1/4 Section 20 for irrigation of 35 acres located in the NE 1/4 SW 1/4 Section 20; all in T90N-R48W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7775-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in Tract 1 N 1/2 SE 1/4 Section 3 for irrigation of 41 acres located in the Tract 1 N 1/2 SE 1/4 Section 3; T90N-R49W. The applicant is requesting a diversion rate greater than the statutory limit.

Application No. 7776-3 proposes to appropriate 1.78 cfs from one well to be completed into the Missouri:Elk Point Aquifer (120 feet deep) located in the center of the SW 1/4 Section 35 for irrigation of 140 acres located in the SW 1/4 Section 35; all in T91N-R49W.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 7768-3 through 7776-3 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the Chief Engineer will act on these applications, as recommended, unless a petition is filed opposing the applications or the applicant files a petition contesting the Chief Engineer's recommendations. If a petition opposing the applications or contesting the recommendations is filed, then a hearing will be scheduled and the Water Management Board will consider these applications. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting these applications or recommendations must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by May 20, 2013.

The petition may be informal, but must include a statement describing the petitioner's interest in the applications, the petitioner's reasons for opposing or supporting the applications, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to these applications.

Steven M. Pirner, Secretary, Department of Environment and Natural Resources.

Dear Sir:

Enclosed are Water Permit Nos. 7768-3 thru 7776-3 authorizing construction of your water diversion systems and beneficial use of the water, not exceeding the limits as specified in the Water Permits.

Form 10's, *Notice of Completion of Works and Application of Water to Beneficial Use*, are enclosed. Please return the completed forms after you have finished the systems and have put the water to beneficial use. An investigation can then be scheduled so the water licenses may be issued, thus completing the acquisition of a water right.

An informational sheet ? *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Jeanne Goodman, Chief Engineer
Water Rights Program

NOTICE

TO: ROBERT J GEARY, 32750 480TH AVE, ELK POINT, SD 57025
FROM: Ron Duvall, Water Rights Permitting Administrator
for Eric Gronlund, Chief Engineer
Water Rights Program

SUBJECT: Reporting Requirement for 2022 Irrigation Questionnaires

Our records indicate your 2022 Irrigation Questionnaires have not been submitted. The request for the Questionnaires was dated October 21, 2022. The Water Management Board has directed owners of water permits who have not submitted the 2022 Irrigation Questionnaires be given notice of permit violation and a hearing to be held by the Board. The hearing is to determine if Permit No(s) 1567A-3, 1786-3, 2109-3, 2345-3 & 2346-3 should be amended to require the Questionnaire to be submitted each year and to determine action to be taken for violation of Water Permit No(s) 5870-3, 6044-3, 6072-3, 7768-3, 7769-3, 7770-3, 7771-3, 7772-3, 7773-3, 7774-3, 7775-3, 7776-3 & 8332-3 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at **Wednesday, March 8, 2023 at 9:30 am (Central Time)** in the Floyd Matthew Training Center, Joe Foss Building, 523 E Capitol Avenue, Pierre, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 46-2-17. These are contested case hearings pursuant to Chapter 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No(s) 5870-3, 6044-3, 6072-3, 7768-3, 7769-3, 7770-3, 7771-3, 7772-3, 7773-3, 7774-3, 7775-3, 7776-3 & 8332-3 in accordance with applicable provisions of SDCL 46-1-12;
2. Amend Permit No(s) 1567A-3, 1786-3, 2109-3, 2345-3 & 2346-3 to require the Irrigation Water Use Questionnaire to be submitted each year;
3. Postpone any action or take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaires are received in this office before the **March 8, 2023** hearing you will no longer be in violation of your permit and your name will be removed from the Board agenda. Enclosed are additional questionnaires for your use. If you have questions or need assistance, please contact Genny McMath at (605) 773-3352 or email at genny.mcmath@state.sd.us. **If you prefer, you can complete the questionnaire online at the following link: <https://danr.sd.gov/iq> using this password: AVHJEY**

Note: Please contact the Water Rights Program, Joe Foss Building, 523 E Capitol, Pierre, SD (605-773-3352) to assure access to the meeting room for the handicapped or to obtain an interpreter for the hearing impaired.
