Notice of Hearing - date to intervene: _____

SOUTH DAKOTA
WATER PERMIT NO. 8048B-3

Date of first receipt of application August 29, 2019.

Date of receipt of corrected application September 6, 2019.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 8048B-3 to Rockport Hutterian Brethren, c/o Donny Wipf, 26209 Rockport Rd, Alexandria SD 57311 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 8048B-3 amends Water Permit No. 8048-3 by transferring irrigated acreage and diversion rate authority. Water Permit No. 8048-3 authorizes 5.35 cubic feet of water per second (cfs) from the James River located in the NW 1/4 NE 1/4 Section 6-T101N-R58W to irrigate 469 acres located in the N 1/2 Section 36 and the S 1/2 Section 35; all in T102N-R59W. Permit No. 8048B-3 authorizes moving the location of 37 of the 469 acres approximately 1 1/2 miles southeast with the James River diversion points located between the NW 1/4 NE 1/4 Section 6 and SE 1/4 Section 7-T101N-R58W and the 37 acres to be located in the NE 1/4 NE 1/4 Section 1-T101N-R59W, S 1/2 NW 1/4, NE 1/4 SW 1/4 Section 6; W 1/2 SW 1/4, SE 1/4 SW 1/4 Section 7; all in T101N-R58W. The diversion rate authority to be transferred will be 0.50 cfs.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: April 1 – October 31.
3. The date from which applicant may claim right is September 4, 2014 (authorized by No. 8048-3).
4. The date of approval of Permit No. 8048B-3 is December 9, 2019.
5. One-fifth of the construction was to be completed on or before January 6, 2019.
6. All construction is to be completed on or before July 6, 2021.
7. Water is to be put to beneficial use on or before July 6, 2025.
8. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. Diversions of water from the James River shall be in accordance with the following criteria:
 - c) This permit does not authorize diversion of water from the James River after August 10th of each calendar year, unless written orders have been issued by the Chief Engineer. Diversions under this permit are subject to senior water rights and any written orders by the Chief Engineer.
 - d) This permit does not authorize diversions from the James River when there is less than 20 cfs bypassing the USGS gaging station at Scotland SD after pumping.
2. This permit is approved subject to the irrigation water use questionnaire being submitted each year.

PROGRAM

**NOTICE OF
APPLICATION NOS.
8048A-3 and 8048B-3**

Notice is given that Rockport Hutterian Brethren c/o Donny Wipf, 26209 Rockport Rd, Alexandria SD 57311 has filed applications to amend Water Permit No. 8048-3 by transferring irrigated acreage and diversion rate authority. Water Permit No. 8048-3 authorizes 5.35 cubic feet of water per second (cfs) from the James River located in the NW 1/4 NE 1/4 Section 6-T101N-R58W to irrigate 469 acres located in the N 1/2 Section 36 and the S 1/2 Section 35; all in T102N-R59W.

Application No. 8048A-3 proposes to move the location of 208 of the 469 acres approximately 1/2 mile south with the James River diversion point remaining the same and the 208 acres to be located in the NW 1/4, W 1/2 SW 1/4 Section 2-T101N-R59W. The diversion rate authority to be transferred will be 2.37 cfs.

Application No. 8048B-3 proposes to move the location of 37 of the 469 acres approximately 1 1/2 miles southeast with the James River diversion points located between the NW 1/4 NE 1/4 Section 6 and SE 1/4 Section 7-T101N-R58W and the 37 acres to be located in the NE 1/4 NE 1/4 Section 1-T101N-R59W, S 1/2 NW 1/4, NE 1/4 SW 1/4 Section 6; W 1/2 SW 1/4, SE 1/4 SW 1/4 Section 7; all in T101N-R58W. The diversion rate authority to be transferred will be 0.50 cfs.

The water sources for both systems is the James River and no increase in the diversion rate for number of acres irrigated is authorized by these applications. The remaining 217 acres authorized by Water Permit No. 8048-3 are located in the N 1/2 Section 36-T102N-R59W and will retain the diversion rate authority of 2.48 cfs.

State Law (SDCL 46-5-34) allows an irrigation water right to be severed from one parcel of land and simultaneously transferred to another parcel if it is impractical to use all or any part of the water beneficially or economically for irrigation of the current land. Mr. Wipf indicates his justification for Application No. 8048A-3 is the land is more suitable for irrigation. Application No. 8048B-3 is being transferred to small parcels of land to make the best utilization of the remaining acreage.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 8048A-3 and 8048B-3 with qualifications because 1) existing rights will not be unlawfully impaired, 2) It is a beneficial use of water, and 3) it is in the public interest. The Chief Engineer's recommendation with qualifications, the application, and staff report are available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided below.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by December 9, 2019.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

If the applicant does not contest the recommendation of the Chief Engineer and no petition is received, the Chief Engineer shall act on the application pursuant to the recommendation with no hearing held before the Water Management Board. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider this application. Notice of the hearing will be given to the applicant and any person filing a petition.

Dear Mr. Wipf:

Water Permit Application Nos. 8048A-3 and 8048B-3 for irrigation use have been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice has been sent to the Alexandria Herald printed at Alexandria SD (Ph # 605 239-4521) and the Daily Republic printed at Mitchell SD (Ph # 605 996-5514). You will need to contact the newspapers and authorize publication of this notice. For your information, a copy of the notice, the recommendationa of the Chief Engineer and report on the applications are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspapers to authorize publication of your Notice and to arrange for payment. Early contact with the papers can eliminate delays. Upon receiving authorization from you, the publisher has been instructed to publish your notice. The newspaper has also been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

A handwritten signature in cursive script that reads "Eric Gronlund".

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 8048B-3, Rockport Hutterian Brethren**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 8048B-3, Rockport Hutterian Brethren, c/o Donny Wipf, 26209 Rockport Road, Alexandria SD 57311.

The Chief Engineer is recommending APPROVAL of Application No. 8048B-3 to transfer 37 acres and 0.50 cfs authorized by Water Permit No. 8048-3 because 1) the proposed diversion can be developed without unlawful impairment of existing rights, 2) the proposed use is a beneficial use and 3) it is in the public interest with the following qualifications:

1. Diversions of water from the James River shall be in accordance with the following criteria:
 - a) This permit does not authorize diversion of water from the James River after August 10th of each calendar year, unless written orders have been issued by the Chief Engineer. Diversions under this permit are subject to senior water rights and any written orders by the Chief Engineer.
 - b) This permit does not authorize diversions from the James River when there is less than 20 cfs bypassing the USGS gaging station at Scotland SD after pumping.
2. This permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

A handwritten signature in black ink that reads "Jeanne Goodman". The signature is written in a cursive, flowing style.

REPORT ON WATER PERMIT APPLICATION NO. 8048A-3 & 8048B-3
Rockport Hutterian Bretheren
November 13, 2019

Application No. 8048A-3, proposes to amend Water Permit No. 8048-3 by transferring irrigated acreage and diversion rate authority. Water Permit No. 8048-3 authorizes 5.35 cubic feet of water per second (cfs) from the James River located in the NW 1/4 NE 1/4 Section 6-T101N-R58W to irrigate 469 acres located in the N 1/2 Section 36 and the S 1/2 Section 35; all in T102N-R59W.

Application Nos. 8048A-3 and 8048B-3 propose to move the location of 208 of the 469 acres approximately 1/2 mile south with the James River diversion point remaining the same and the 208 acres to be located in the NW 1/4, W 1/2 SW 1/4 Section 2-T101N-R59W. The diversion rate authority to be transferred will be 2.37cfs.

Application No. 8048B-3 proposes to move the location of 37 of the 469 acres approximately 1 1/2 miles southeast with the James River diversion points located between the NW 1/4 NE 1/4 Section 6 and SW 1/4 Section 1 and the 37 acres to be located in the NE 1/4 NE 1/4 Section 1, S 1/2 NW 1/4 Section 6; W 1/2 SW 1/4, SE 1/4 SW 1/4 Section 7; all in T101N-R58W. The diversion rate authority to be transferred will be 0.50 cfs.

The water sources for both systems is the James River and no increase in the diversion rate for number of acres irrigated is authorized by these applications. The remaining 217 acres authorized by Water Permit No. 8048-3 are located in the N 1/2 Section 36-T102N-R59W and will retain the diversion authority of 2.48 cfs.

State Law (SDCL 46-5-34) allows an irrigation water right to be severed from one parcel of land and simultaneously transferred to another parcel if it is impractical to use all or any part of the water beneficially or economically for irrigation of the current land. Mr. Wipf indicates his justification for Application No. 8048A-3 is the land is more suitable for irrigation. Application No. 8048B-3 is being transferred to small parcels of land to make the best utilization of the remaining acreage.

Review of the Proposed Project and Water Source

Applications Nos 8048A-3 and 8048B-3 propose to transfer 245 irrigated acres and diversion rate authority of 2.87 cfs from 8048-3. Figure 1 depicts the proposed irrigated acres and diversion locations.

Figure 1. Area map depicting the proposed irrigation and diversion locations for Application Nos. 8048A-3 and 8048B-3, Rockport Hutterian Brethren.

The water source for the proposed project is the James River in Spink County. Originating in North Dakota, the James River flows southward to the Missouri River near Yankton, SD. Approximately 475 miles of the James River are in South Dakota. During extended periods of low precipitation, the James River experiences extremely low flows and cannot be considered a reliable source of water.

Mean, often referred to as average, and median, otherwise referred to as 50 percentile, are statistical terms having a similar role in understanding the central tendency of a set of statistical results. Mean is often used to describe a middle value of a set of data values and is calculated by

determining the sum of the data values and by dividing the sum by the number of data values. Median can be described as the value separating the higher half of a set of data values from the lower half and may be thought of as the central value of a data set. The disadvantage of using mean to describe flow is the mean value can be significantly affected by any single value in the data set being very high or very low compared to the rest of the data values. In the analysis of long-term flow data, large flood event data values skew the calculated mean value giving an unreasonable expectation of a higher flow value for a period of time. An example of this is shown in Figure 2, which is a comparison of the daily mean flow value versus the daily median flow value for the USGS James River gaging station, James River near Mitchell, SD USGS No. 06478000, (USGS. 2019). This illustrates an improbable expectation of more river flow during the months of irrigation.

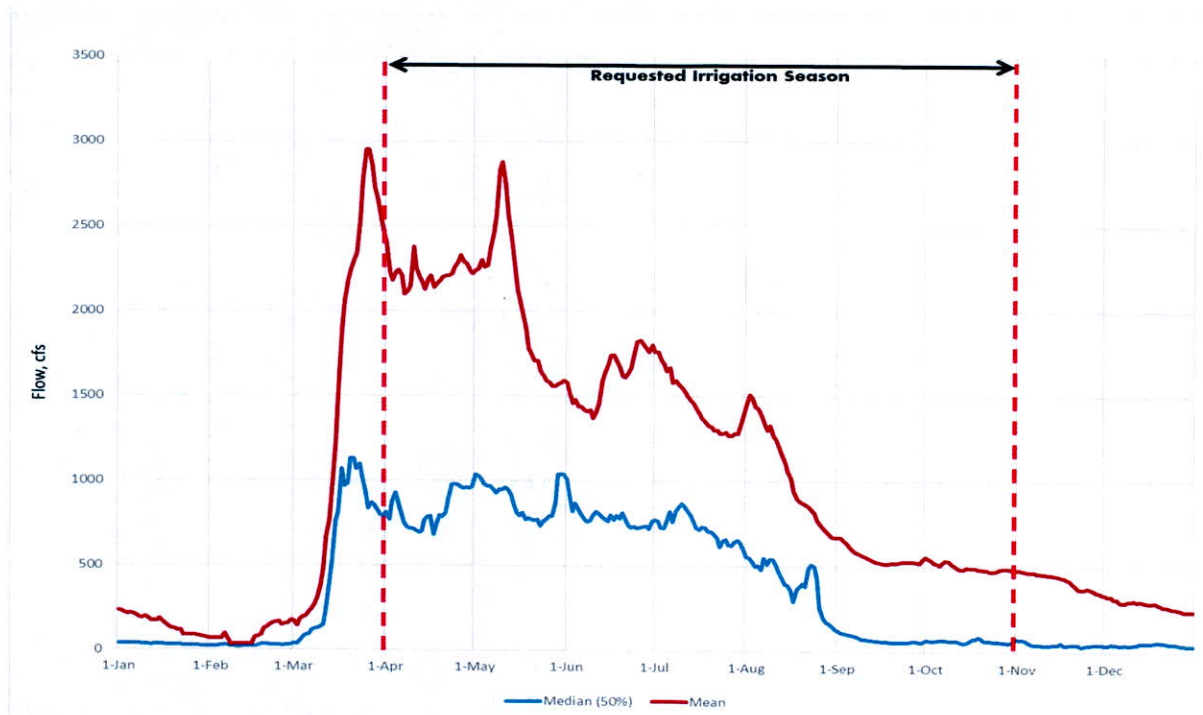

Figure 2. USGS No. 06478000 James River near Mitchell, Median versus Mean of daily flow values 1952-2019. Contributing drainage area of 17,037 mi² (USGS, 2019).

The U.S. Geological Survey (USGS) operates a stream flow gaging station on the James River near Mitchell, SD USGS No. 06478000, located approximately 12 river miles upstream of the proposed project, (USGS, 2019). The historical data from 1952 to 2019 for the Mitchell SD stream flow gage indicates at the 50-percentile level the mean daily flow indicates a base flow of less than 50 cfs from January through February before sharply increasing to above 600 cfs and holding that level of flow through July. From the first part of August through mid-September, flows steadily decrease to around 60 cfs until mid-November before dropping off to the winter month level of around 50 cfs. At the 10-percentile level, winter flows of 10 cfs or less are seen until early March before increasing to around 100 cfs during the month of April. At the beginning of May flows

begin to drop to around 60 cfs and holding that level until mid-July then drops to 20 cfs until mid-August. From mid-August until the end of December flows remain below 20 cfs (Figure 3).

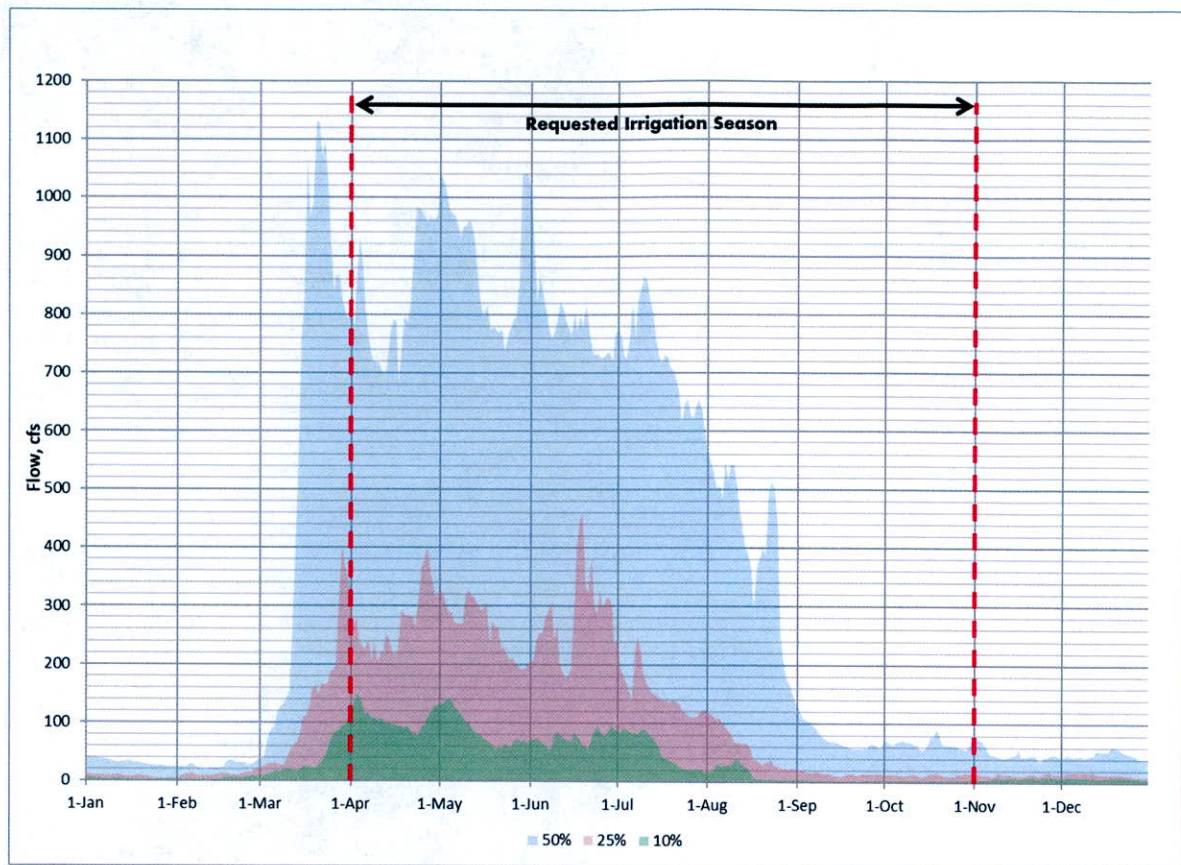

Figure 3. Daily percentile flow hydrograph for the USGS Stream Gage No. 06478000 James River near Mitchell, contributing drainage area 17,037 mi² SD, 1952-2019 (USGS, 2019)

The USGS also operates a stream flow gaging station on the James River near Scotland SD, approximately 39 river miles downstream of the proposed project. The historical data from 1928 to 2019 for the Scotland, SD stream flow gage indicates at the 50-percentile level the mean daily flow consists of a base flow of less than 60 cfs January to mid-February before sharply increasing to above 650 cfs and holding that level of flow through early July. From early July through September, flows steadily decrease to around 60 cfs until mid-November before dropping off to the winter month level of around 50 cfs. At the 10-percentile level, winter flows of 20 cfs or less are seen until early March before increasing to around 60 cfs in April through the first part of June. In early June flows begin to drop to around 20 cfs until mid-July then dropping to less than 20 cfs until the end of December (Figure 4).

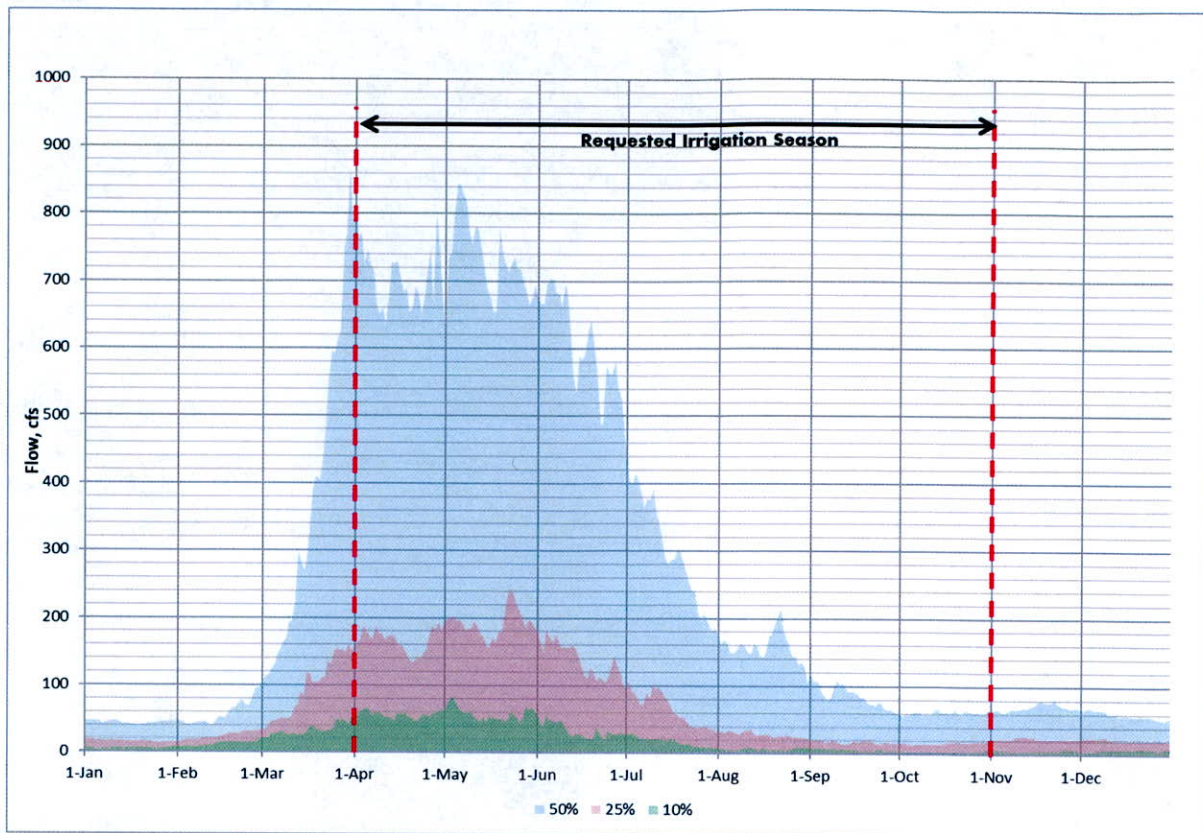

Figure 4. Daily percentile flow hydrograph for the USGS Stream Gage No. 06478500 James River near Scotland, contributing drainage area 18,616 mi² SD, 1928-2019 (USGS, 2019).

USGS historical data for the Mitchell SD and Scotland SD stream flow gages show similar results and indicate water is available in the James River during normal to wetter climatic conditions for the April through October annual period. During late summer and early fall months, the James River cannot be considered a reliable source of water. To address low flow conditions, the James River is subject to shut-off orders.

Review of Existing Water Rights and Current Appropriation

In 1965 the SD Water Rights Commission, a predecessor to the SD Water Management Board, placed a 300-cfs diversion limit on the James River in South Dakota with a maximum combined diversion limit of 200-cfs from the North Dakota border to Huron, SD. Due to the Missouri River backwater into the James River, the 300-cfs restriction has been applied from the North Dakota border to the Yankton-Hutchinson County Line (SD Water Rights. 2019). The Water Management Board has adopted these James River diversion limits. Based upon the current level of appropriation 299.99 cfs for river water from the North Dakota border to the Yankton-Hutchinson County Line, appropriations are within 0.01 cfs of the Water Management Board set limits.

Presently there are 109 Water Rights with diversions from the James River totaling 299.99-cfs from the North Dakota border to the Yankton-Hutchinson County Line. From the North Dakota border to Huron, SD, there are 67 Water Rights with diversions from the James River totaling 174.30-cfs. This leaves 0.01-cfs to be appropriated anywhere from the North Dakota border to the Yankton-Hutchinson County Line, (SD Water Rights. 2019).

If these permit applications are approved, the authorized diversion from the James River will remain at the 299.99 cfs of maximum 300 cfs diversion limit set by the Water Management Board.

Discussion and Review of Qualifications

State Law (SDCL 46-5-34) allows an irrigation water right to be severed from one parcel of land and simultaneously transferred to another parcel if it is impractical to use all or any part of the water beneficially or economically for irrigation on the current land. Rockport Hutterian Brethren indicate they would like to relocate current location of some of the irrigation authorized by Water Right No. 8048-3 to a more suitable location.

In 2007, Water Rights staff reviewed all of the shut-off and by-pass qualifications on the existing James River water rights/permits. Based on this review, the Chief Engineer recommended amending the existing qualifications in order to standardize them. The Water Management Board adopted the standardized qualifications and amended the existing water rights/permits. In addition, it was the intent that future appropriations of water from the James River be administered with the same amended qualifications (SD Water Rights. 2017).

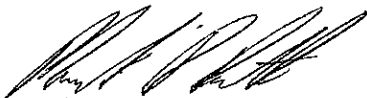

Therefore, if approved, Application No. 8048A-3 and 8048B-3 should contain the following qualifications:

- This permit does not authorize diversion of water from the James River after August 10th of each calendar year, or at any time the river's flow is obviously low, unless written orders have been issued by the Chief Engineer. Diversions under this permit are subject to senior water rights and any written orders issued by the Chief Engineer.
- This permit does not authorize diversions from the James River when there is less than 20 cfs by-passing the gage near Scotland, SD after pumping.

Conclusions

1. The applicant proposes to make changes to an existing James River Water Right No. 8048-3 by changing the location of some of the irrigated acres and adding a diversion point.

2. Application No. 8048A-3 proposes to move the location of 208 acres but retain the same diversion point for with a diversion rate of 2.37 cfs.
3. Application No. 8048B-3 proposes to move the location of 37 acres and the associated diversion rate authority of 0.50 cfs. There will also be an additional diversion location.
4. The water source for the proposed project is the James River in Hanson County. In 1965 the SD Water Rights Commission, a predecessor to the SD Water Management Board, placed a 300-cfs diversion limit on the James River in South Dakota with a maximum combined diversion limit of 200-cfs from the North Dakota border to Huron, SD. Based upon the current level of appropriation 299.99 cfs for river from the North Dakota border to the Yankton-Hutchinson County Line, appropriations are within 0.01 cfs of the Water Management Board set limits.
5. In 2007 the Water Management Board adopted standardized qualifications and amended the existing water rights/permits for current and future James River water rights and permits. If approved, Application No. 8048A-3 and 8048B-3 should contain the following qualifications:
 - This permit does not authorize diversion of water from the James River after August 10th of each calendar year, or at any time the river's flow is obviously low, unless written orders have been issued by the Chief Engineer. Diversions under this permit are subject to senior water rights and any written orders issued by the Chief Engineer.
 - This permit does not authorize diversions from the James River when there is less than 20 cfs by-passing the gage at Scotland, SD after pumping.

Mark D. Rath

Natural Resources Engineer III

Dear Mr. Wipf:

Enclosed are Water Permit Nos. 8048A-3 and 8048B-3 authorizing construction of the water diversion systems and beneficial use of the water, not exceeding the limits as specified in the Water Permits.

Form 10's, *Notice of Completion of Works and Application of Water to Beneficial Use*, are enclosed. Please return the completed forms after you have finished the systems and have put the water to beneficial use. An investigation can then be scheduled so the water license may be issued, thus completing the acquisition of a water right.

An informational sheet *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

A handwritten signature in black ink that reads "Jeanne Goodman". The signature is fluid and cursive, with the first name "Jeanne" being more prominent than the last name "Goodman".

Jeanne Goodman, Chief Engineer

August 16, 2021

Dear James River Water Right Holder:

I am writing to water right holders and operators who either use water from the James River or tributaries under permits with the August 10 shutoff date qualification.

Water rights containing this qualification requires a mandatory compliance and pumping under your permit must cease after August 10th unless you contact the Water Rights Program and receive permission to continue to divert water.

Water Rights staff drove along the James River last week after the August 10 shutoff date to spot-check whether water right holders were complying with this qualification. This spot-check found multiple water right holders diverting water in violation of this qualification.

Again, I remind you, compliance with this shutoff qualification is required unless you request and receive permission from the Water Rights Program to continue pumping. Permission may be granted based upon water availability.

Thank you for your cooperation. If you have any questions, please contact Mark Rath, Blaise Hansen, or Nakaila Steen at (605) 773-3352.

Sincerely,

Eric Gronlund, Chief Engineer
Water Rights Program

Dear Mr. Wipf:

This letter is in reference to your August 13, 2022, request for an extension to pump water from the James River beyond the August 10 shutoff date. Flows in the James River in the reach between the confluence with the North Dakota Border and the Huron are sufficient at this time to allow an extension. Because there is sufficient flow in the James River, I am granting your request to extend the shutoff date for your water permits out of the James River and allow you to divert through the end of the 2022 irrigation season.

In the event dry climatic conditions in the river basin causes river flow to significantly decrease and flow measured at the USGS stream gaging station James River near Scotland drops to below 20 cfs, you will be contacted and provided orders to cease pumping. Realtime flows in the James River can be monitored by going to the following website:

<https://waterdata.usgs.gov/sd/nwis/current/?type=flow>

If you have any questions, please contact Mark Rath of the Water Rights Program at phone (605) 773-3352.

Sincerely,

Eric Gronlund, Chief Engineer
Water Rights Program

Dear Mr. Wipf,

This letter is in reference to your request for an extension to pump water from the James River, beyond the annual August 10th shutoff date.

Flows in the James River, in the reach between North Dakota and the USGS stream gaging stations along the James River are sufficient, at this time, to allow an extension. Since there is sufficient flow in the James River, I am granting your request to extend the shutoff date for your Water Permits and Rights appropriating water from the James River, allowing diversions through August 24, 2026.

If continued use is needed beyond August 24, 2026, please contact the Water Rights Program for an additional extension. At this time, we are only granting extensions for the James River in two-week increments, since the forecast is for continued hot and dry conditions throughout August.

In the event that dry climactic conditions in the river basin cause river flows to significantly decrease, and flow measured at the USGS stream gaging station near Scotland drops below 20 cfs, you will be contacted and provided orders to cease pumping. Realtime flows in and James River can be monitored by going to the following website:

<https://waterdata.usgs.gov/sd/nwis/current/?type=flow>

If you have any questions, please contact Whitney Kilts with the Water Rights Program at (605) 773-3352.

Sincerely,

Adam Mathiowetz, PE
