Dear Mr. St. Clair:

On October 6, 1988, the Water Management Board adopted rules to implement a 1988 law for application of chemicals through irrigation systems. The rules establish equipment standards, performance standards and installation requirements for irrigation systems that apply chemicals (fertilizers, insecticides, or herbicides) with irrigation water.

You have indicated on your 1988 Water Management Board Irrigation Questionnaire that you do apply chemicals with irrigation water. A copy of the new rules for chemigation are enclosed for your information.

The new standards include:

- * a check valve between the irrigation pump and the point of chemical injection;
- * a vacuum relief valve on top of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a low-pressure drain on the bottom of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a chemical injection line check valve between the chemical injection pump and the point at which the chemical is injected into the irrigation line; a second check valve is required if the chemical injection pump is not a positive displacement pump;
- * an interlock system which ensures that the chemical injection pump will stop whenever the irrigation pump stops;
- * an inspection port between the irrigation pump and the check valve on the irrigation line;

DATE MICROFILMED

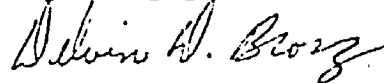

CAMERA OPERATOR

Each of these equipment requirements are discussed more thoroughly in Sections 74:02:09:05 through 74:02:09:10 of the enclosed rules. Appendix A contains diagrams of the arrangements of these anti-pollution devices.

The equipment must be installed according to the manufacturer's specifications, calibrated, and maintained in good working condition. All chemical product labels must be followed and warning signs must be posted. These rules also require reporting of all spills, accidents, and system malfunctions. A 24-hour telephone number is provided.

The chemigation rules contain notification and record keeping requirements. Prior to using chemigation, notification must be given to the Chief Engineer on the enclosed Form 1C. Information that must be provided in this notification includes the water permit or right number, the name, address, and telephone number of the water permit or right holder and of the system operator, and the legal description of the lands on which the system is located. A record of the name, quantity, dates and hours of each chemical applied must be provided to the Chief Engineer on Form 2C. A copy of this form is also enclosed for your information. It will be mailed with the annual irrigation questionnaire and must be returned with the questionnaire by the date specified. If you have any questions regarding these rules or need additional copies of the forms, please contact Susan Bowar, Water Rights Engineer (605-773-3352).

Very truly yours,

for JOHN HATCH, Chief Engineer

Dear Ms. St Clair:

Each year, the State of South Dakota sends out Water Management Irrigation Questionnaires to collect information based on annual water use from our state's waters.

This year we received word from your son, William E St Clair, that due to the unfortunate death of your husband, William F St Clair, the water rights held in his name should be transferred to you, the property owner. For your convenience I have enclosed partially completed "Transfer of Ownership" forms for you to review, complete, and return in the pre-paid envelopes.

Please return the forms with a check for \$500.00 (\$50.00/transfer) made payable to "SD Water Rights Program" to cover the transfer fees. If you would prefer to pay by card, you may call our Fiscal Office at 605.773.5559. These forms will still need to be returned even if you are submitting payment over the phone.

Should you decide you wish to discontinue the irrigation on any of these pieces of land, we would ask that you let us know.

If you have any questions or concerns, please give me a call. My direct number is 605.910.5187

(signed by new owner)

NOTE: Water permits may be cancelled for nonconstruction after the five-year construction period has expired. Once a water permit is developed, an inspection is conducted to issue a water right license for the project as developed. A water permit/right may be cancelled for one or more of the following reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three-year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

Dear Ms. St Clair:

The South Dakota Water Rights Program is in receipt of the "Notice of Transfer of Ownership" form and the required fees you submitted for Water Right Nos. 4158-3, 1725-3, 987-3, 971-3, 970-3, 839-3, 7295-3, 4586C-3, 6676-3, and 6675-3. Enclosed is a receipt of payment for your records.

Water Right Nos. 4158-3, 1725-3, 987-3, 971-3, 970-3, 839-3, 7295-3, 4586C-3, 6676-3, and 6675-3 previously held by William F St Clair and St Clair Ranch are now listed under yourself. I have also updated your contact information in our system.

As a reminder, so long as you use the water beneficially, as stated in the Water Rights (copies enclosed), State Water Laws provide that you have a continuing right to use the water. Should the water not be put to beneficial use for a period longer than 3 consecutive years, without legal excuse, the Water Rights will be subject to cancellation.

If you have any questions, please contact me.

Sincerely,

Amanda Dewell
